## PREFACE

The book aims at an examination of the geographical, social, economic, literary, religious and political data found in Pāṇini's *Aṣṭādhyāyī*. The subject 'Pāṇini as a source of Indian History,' was suggested to me by my Professor Dr. Radha Kumud Mookerji M.A., Ph.D., while I was admitted to his Ph.D. class in 1929 as a Research Fellow in the Lucknow University. Chs. I—IV of the book substantially represent the Thesis approved by the Lucknow University for Ph. D. in 1941 and Chs. V—VIII for D. Litt. in 1946, with such additions and changes as later research made inevitable.

The value of such a study to Indian History can hardly be overestimated. It is due at once to the antiquity of Pāṇini's evidence, its definite and authoritative character as reliable as the history of India based upon epigraphic and numismatic records, and also to the singular fact in Sanskrit literature that the *Aṣṭādhyāyī* is the work of an individual author (like its commentary the *Mahābhāṣya*) and not the accumulated result of additions made to it from time to time by generations of teachers and pupils as happened in the case of the literature of Vedic *Charaṇas* or schools.

In a study of Pāṇinian evidence the greatest importance attaches to facts recorded in the *sūtras*. As already stated, the text of the *sūtras* with a few exceptions shown by Kielhorn is the same as that handed down from the time of Pāṇini. The *gaṇas* form an inalienable appendix to the *sūtras* and a genuine tradition of *Gaṇa-pāṭha* was known to Kātyāyana and Patañjali who at times have made the inclusion of a particular word in a *gaṇa* the basis of their comments. Unfortunately the present state of the *Gaṇa-pāṭha* has suffered from subsequent interpolations, and although there is much valuable material

especially concerning geographical, literary and *gotra* names found in the present *Gaṇa-pāṭha*, it has to be used with proper discrimination. I have always given preference to the *sūtra* evidence, but it does not mean that the *Gaṇa-pāṭha* can be ignored as useless accretion, for without it a substantial portion of the data of Pāṇini's language would remain unaccounted for. The contribution of the *Gaṇa-pāṭha* is of distinct value and its facts when substantiated by Patañjali may be regarded as authentic. In all cases where evidence from the *gaṇas* has been utilized its source is plainly indicated.

✓ No scholar of Pāṇini can do without the invaluable help offered by the commentaries, and I must record my indebtedness to Patañjali's *Mahābhāṣya* and the *Kāśikā-vṛtti* without which this work would not have been possible. Prof. Max Muller was the first to point out 'that Pāṇini's *sūtras* were evidently from the beginning accompanied by a definite interpretation, whether oral or written, and that a considerable proportion of the examples in the *Bhāṣya* must have come from this source (Weber, *History of Indian Literature*, p. 228, f. n.). As an instance we may point out that Patañjali himself refers to a *Māthurī-vṛtti* which as stated by Purushottamadeva in his *Bhāṣā-vṛtti* (I.2.57), was a commentary on the *Aṣṭādhyāyī*, and was originally taught by oral instruction (*tena proktam, na cha tena kṛitam, Bhāṣya*, IV.3.101; II.315) and later on compiled in the form of a book. The subsequent commentaries including the *Mahābhāṣya* largely drew upon the older material. As Prof. Kielhorn has put it, 'We may, in my opinion certainly assume, that like Pāṇini himself, both Katyayana and Patañjali have based their own works on, and have preserved in them all that was valuable in the writings of their predecessors (*Ind. Ant.* XVI.106). Each case, however, has to be viewed on its own merits, and in the absence of more convincing proof the citations in the *Kāśikā* should not be pressed too far as evidence for Pāṇini's own time.

## Preface

The aphorisms of Pāṇini are rich in historical and cultural material. It has been my effort here, firstly to evolve a classified presentation of the same, and secondly to broaden the scope of its interpretation by focussing on it as much light as was possible from comparative sources, utilising for the purpose the great traditional commentaries on Pāṇini's *Sūtras*, like the *Vārttikas*, the *Mahābhāṣya*, the *Kāśika* as supplemented by the more important subsequent explanations, and secondly early Indian literature both Vedic and classical. In the course of my readings during the last twenty years, with mind constantly switched on to Pāṇini, I found light from many a source—Sanskrit, Pali and Prakrit, Brahmanical, Buddhist and Jain; and thus the work of understanding the true import of the cultural institutions in Pāṇini of which each word dealt with by him is a pointer gradually advanced. Words like *Jaya*, *Aśvadakṣhīna*, *Rāja-pratyenas*, *Ārya-Brāhmaṇa*, *Ākranda*, *Grāmaṇī*, *Parishad*, *Chbandasya*, *Kāra*, *Harāṇa*—to name only a few out of hundreds—will bear testimony to the success of this method. Thus it has been possible to throw fresh light on a number of Pāṇini's *sūtras* by which their significance has been increased.

The Thesis reveals for the first time the deep relationship between the historical background of Pāṇini and Kautilya. The close proximity of their vocabulary and numerous items of cultural life common to both are worthy of greater attention, and point to underlying chronological relationships. Pāṇini is closely related in time to Kautilya by his numismatic data. It is very significant that there is not a single coin name in the *Arthasāstra* which would reflect its late character. The numismatic evidence is completely in favour of its Mauryan date. Pāṇini must have preceded him by about a century or so.

Reference within brackets are to the *sūtras*, as (I.1.1) denotes the first *sūtra* of the first *pāda* of the first *adhyāya* of the *Aṣṭādhyāyī*. For the *Mahābhāṣya* text I have used

Kielhorn's edition, citing its reference by the number of volume and page; e.g., III.467 directs us to the last page of the last volume of that edition. In all other cases, the name of the author or the work quoted is indicated in a manner clear enough to follow.

I wish to express my grateful thanks to all previous writers whose works I have utilized in the preparation of this volume. The immense help and light which I have derived from them are not a mere matter of formal acknowledgment. I owe an obligation to the two volumes of *Word-Index* of the works of Pāṇini and Patañjali compiled by Sridharsastri Pathak and Siddheshwarsastri Chitrao and published by the Bhandarkar Oriental Research Institute, Poona.

It is a pleasant duty to record my deep gratefulness to my Professor, Dr. Radha Kumud Mookerji, who prescribed for me this subject and whose constant help has greatly contributed towards the completion and publication of this work. In token thereof I respectfully dedicate this book to him. May this work be a small recompense to him for all the trouble he has taken on my behalf during the last twenty-five years. My sincere thanks are also due to Shri Sampurnananda Ji, Shri Chandra Bhan Ji Gupta and Acharya Narendra Deva Ji who kindly helped me in securing from the State Government of Uttar Pradesh through the Lucknow University a generous subvention in aid of the publication. I am also grateful to the authorities of the Lucknow University for inviting me to deliver a course of lectures in 1952 based on the contents of this book under the Radha Kumud Mookerji Lectureship Endowment Fund of the University.

I also thankfully remember the ungrudging help I received from my office-assistants, Shri Jagan Prasad Chaturvedi of the Mathura Museum, Shri Chandra Sen of the Lucknow Museum and Shri Gautam Dev Khullar of the C. A. A. Museum, New Delhi, in typing the Thesis and its finally revised press-copy. Shri G. S. Ramanathan of the office of the Government

## *Preface*

Epigraphist, Ootacumund, and Shri Ram Shankar Bhattacharya, Banaras, deserve my thanks for kindly verifying the references. I am indebted to my son Shri Skand Kumar, M.A. for preparing the Index and to Shri Bhupal Singh Bisht of the C. A. A. Museum, New Delhi for the Maps.

## CONTENTS

### CHAPTER I

#### PAṆINI : HIS LIFE AND WORK

GRAMMAR (*Vyākaraṇa*) 1; Pāṇini's Greatness 1; Epithets 4; Kātyāyana's Estimate 4; Patañjali's Tribute 5; The Dakshas, A Northern People 8; Śalātura, Birth-Place of Pāṇini 9; Tradition about Pāṇini's Life 11; *Mañjuśrīmūlakalpa* 11; Rājasekhara 11; Account of Yuan Chwang 12; Origin of Ancient Letters 14; Growth of Literature 14; Aindra System 15; Different Schools before Pāṇini 16; Comparative Decay of Grammatical Studies 16; Pāṇini's Method 17; Pāṇini and Maheśvara 18; Pāṇini's Effort 18; Extent of Pāṇini's Work 19; Pāṇini's Work, A Complete Digest 19; Pāṇini and Pāṭaliputra 20; The Great Synod (*Sabbā*) 20; Recognition of Learning 21; Pāṇini as A Poet 22; The *Ashṭādhyāyī*: Its Name 23; Text 24; *Gaṇa-pāṭha* 26; *Kāśikā*, Its Value for Pāṇinian Tradition 29; Stock-Examples 30; Pāṇini as A Teacher 30; Nature of the Original *Vyākhyānas* 31.

### CHAPTER II

#### GEOGRAPHICAL DATA

SECTION 1. Introductory 34.

SECTION 2. Country 37; Geographical Horizon 37; Divisions of the Country 39;

SECTION 3. Mountains, Rivers and Forests 39; Forests 41; Rivers 42; Desert Regions 46.

SECTION 4. *Janaṇādas* 48.

SECTION 5. Towns and Villages 63; Towns in the *Gaṇas* 72.

CHAPTER III

SOCIAL LIFE

- SECTION 1. Castes 75; Brāhmaṇa 75; Kshatriya 77; Rājanya 77; Vaiśya 77; Śudra 77; Ārya and Dāsa 79; Mixed Castes 80.
- SECTION 2. Āśramas 81; Brahmachārin 81; Period 82; Snātaka 83; House-holder 83.
- SECTION 3. Marriage 85; Social Effect of Marriage 85; Exogamy 86.
- SECTION 4. Women 87; Maiden 87; Wife 88; Mother 88; Civic Status of Women 88.
- SECTION 5. Social Formations 91; *Vārṇa* and *Jāti* 91; *Sagotra* 92; *Sapinda* 92; *Sanābhi* 92; *Jñāti* 93; *Samyukta* 93; Family (*Kula*) 93; *Vamśa* 94; *Gṛibapati* 95; Family Relationships 95; Friend 96; Servants 97; Guests 97.
- SECTION 6. Food and Drinks (*Anna-Pāna*) 99; Classification of Foods 99; Different Foods 102; Cooking 111; Custom of feeding Domestic Servants 112; Invitations 114; Plate-Leavings 114; Drinks 114; *Maireya* 115; *Kāpīśāyana* 118; *Kashāyas* 119; Distillation 119.
- SECTION 7. Health and Disease 120; Humours of the Body 120; Diseases (*Roga*, *Upatāpa*) 121; Autumnal Diseases 122; List of Diseases 122; Body (*Śarīra*) 123; *Mahā-bailibila* 124.
- SECTION 8. Dress and Ornaments 125; Words for Clothing 125; Kinds of Fabrics 125; Blankets (*Kambala*) 128; *Prāvāra* 128; *Bṛihatikā* 128; Ornaments and Toilet 129.
- SECTION 9. Dwellings 133; *Śālā* 133; Houses 133; *Nishadyā* 133; *Nikāyya* and *Nikāya* 134; *Ekaśālīka* 134; Materials 135.
- SECTION 10. Town-Planning 137; *Prākāra* and *Devapatha* 138; City-Gates 139; The City 141; The Village 141.

## Contents

- SECTION 11. Furniture 144; Utensils 144; Containers 145; *Bhastrā* (IV.4.16) 145; *Vivadha* (IV.4.17), *Vivadha* 146; Storage.
- SECTION 12. Conveyances 148; Chariot 148; Chariot-upholstery 150; Running Footmen (*Pariskanda*) 151; A Term of Cart-Wrights 151.
- SECTION 13. Draught-Animals 153; *Āśvīna* 154.
- SECTION 14. Water Transport 155.
- SECTION 15. Games and Amusements 157; Sports (*Krīḍā*) 157; *Samajyā* 157; Wrestling 158; Jousts (*Praharan-krīḍā*) 158; The Eastern Sports 158; The Nature of Eastern Sports 158; Hunting 160; Dicing (*Aksha-Dyūta*) 161; Accessories of Play 162; Method of Play 162; Wager (*Glaba*) 169; Another Board Game 165.
- SECTION 16. Music 167; Orchestra 168; *Sammāda* 168; Instruments 168.
- SECTION 17. Divisions of Time 170; *Akālaka Vyākaraṇa* 170; *Aborātra* 171; Month 172; *Nakshatras* 174; Order of *Nakshatras* 176; Solstice 178; Seasons and Year 178; *Vyushṭa*, New Year's Day 179.
- SECTION 18. Current Personal Names 182; Classes of Names known to Pāṇini 182; Their Special Features 182; Contraction 183; Names Derived from Stars (*Nakshatra-Nāma*) 183; Shortened Names in Use after Pāṇini 191; Resumé 192.

## CHAPTER IV

### ECONOMIC CONDITIONS

- SECTION 1. *Vṛitti* (Economy) 194; *Kṛishi* (Agriculture) 194; Cultivators 195; Land and Fields 195; Measurement and Survey 196; *Kshetrakara*, 'Maker of a Field' 197; Classification of Fields 197; Agricultural Implements 198; Agricultural Operations 199; Rainfall 203;

Irrigation 204; Crops 204; Agricultural Produce 205; Fibrous Plants 208; Sugar Cane (*Iksbu*) 209; *Kustum-buru* 209; Dye-Stuffs 209.

SECTION 2. Flora 210; Forests 210; *Ośbadhi* and *Vanaspati* 210; Trees 211; Grasses and Weeds 214; Flowers (*Pushpa*, IV.1.64) 215; Herbs (*Ośbadhi*) 215; Fruits (*Phala*) 216; *Pīlukūṇa* 216.

SECTION 3. Fauna 218; *Harāṇa* 219; *Āśvīna* 220; Feeding and Stock 222; Life-Story of a Cow 223; Bull 224; Breeds 225; Branding of Cows (*Lakṣhaṇa*) 226; Names of Marks 227.

SECTION 4. Art and Crafts 229; Classes of Artisans 229; Names of *Śilpas* 230; *Kulāla* 230; *Takṣhā* (V.4.49) 230; *Dhanushkara* (III.2.21) 230; *Rajaka* 230; Miner 231; Gems 231; Weaver 231; Blanket-Makers 232; *Pāṇḍukambala* 232; Leather-Workers 234; Blacksmith (*Karmāra*) 234; Goldsmith (*Suvarṇakāra*) 234; Lifters.

SECTION 5. Labour and Wages 236; Skilled and Unskilled Labour 236; Wages 236.

SECTION 6. Trade and Commerce 238; *Vyavahāra* (Business) 238; Traders 238; Business Methods 239; Earnest-Money 240; Capital and Profit 240; *Vasna* 240; Trade Routes 242; *Uttarapatha* 244; Articles of Trade 245.

SECTION 7. Exchange and Barter 248; Nature of Barter Transactions 248.

SECTION 8. Measures and Weights 251; Terms 251; Scale 251; Weights 252; Measures of Length 255; *Pramāṇa* 255.

SECTION 9. Coinage 258; Gold Coins 258; Silver Coinage 261; Half-Kārshāpaṇa, *Ardha* and *Bhāga* 266; Quarter-Kārshāpaṇa 266; One-Eighth Kārshāpaṇa, *Māsha* 267; Copper Currency 267; *Vimśatika* 268; Actual Specimens of *Vimśatika* Coins 270; *Trimśatika* 271.

SECTION 10. Banking and Loans 274; Wealth 274; Money-

Lending 274; Interest 275; Corporeal Interest 278; Use of a Pledge 278; *Mahā-Pravṛiddha* 278; *Āpamityaka* 279.

## CHAPTER V

### EDUCATION, LEARNING AND LITERATURE

SECTION 1. Education 280; Studentship 280; The Pupil's Duties 281; Teachers 282; Disapproved Pupils 283; Naming of Students 284; Naming of Vedic Students 285; Education of Women 287; School Regulations 288; Gradation of Courses 289; Pedagogy 291; *Pārāyaṇa* (Vedic Recitations) 292; Intellectual Approach 294; *Charaṇa*, The Vedic School 295; *Parishad* 297; Working of a *Charaṇa* 298.

SECTION 2. Learning 303; Agencies of Learning 303; Peripetatic Scholars (*Charaka*) 304; Authorship 305; Naming of Books 306; Plan of A Treatise 308; Theory of *Maṅgala* 310; Writing 311.

SECTION 3. Literature 313; Classes of Literature 313; Works Known to Pāṇini—Vedic Texts 317; Terms Indicative of Texts 318; Vedic *Śākhās* 318; *Rigveda* 319; *Yajurveda* 321; *Śukla-Yajurveda* 325; *Sāmaveda* 325; *Atharvaveda* 327; Other Vedic Schools 327; *Brāhmaṇa* Literature 328; *Brāhmaṇas* of Thirty and Forty Adhyāyas 238; Older *Brāhmaṇa* Works 328; *Yājñavalka-Brāhmaṇa* 329; The Genesis of the *Śatapatha* 331; *Anubrāhmaṇa* 332; *Upanishad* 333; *Kalpa* Literature 333; Literature on Recitation 335; *Uktha* 336; *Jyotisha* 336; Philosophical Literature 337; *Bhikṣu-Sūtras* 338; *Naṭa-Sūtras* 338; *Ākhyāna* and *Kāvya*s 339; *Mahābhārata* 340.

SECTION 4. Grammatical Data 341; *Vyākaraṇa* 341; Previous Grammarians 341; *Pūrvāchārya-Sūtras* 342; Grammatical Terms Before Pāṇini (*Pūrvāchārya-Samjñās*) 344; Syllabus of Grammatical Studies 346; Pāṇini and *Loka* (Current Language) 348; Sanskrit as a Spoken Language

350; Pāṇini's Genius for Synthesis 352; Source of Meaning 353; *Jāti* and *Vyakti* 353; Onomatopoeia (*Anukaraṇa*) 354; Prefixes 354, *Dbātu* denoting *Kriyā* and *Bhāva* 354; Eternity of Words 354; *Majjhima Paṭipadā* 355.

## CHAPTER VI

### RELIGION

SECTION 1. Deities 356; Post-Vedic Deities 357; *Bhakti* 358; *Mahārāja* 359; *Vāsudeva* Cult 359; Images 361; Demons 363.

SECTION 2. *Yajñas* 365; The *Yājñikas* 365; *Yājñika* Literature 365; *Yajamāna* (Sacrificer) 366; *Āspada* 366; *Soma* 368; Names of Fires (*Agnyākhyā*, III.2.92) 369; Other Accessories 371; Priests 372; Recitation of *Mantras* 374; *Yājyā* Verses 374; *Āvāhana* 377; *Subrahmaṇyā* 378;

SECTION 3. Ascetics 380; *Ayatsūla* 381; *Maskarin* 381; *Śramaṇa* 383.

SECTION 4. Religious Beliefs and Practices 386; *Śrāddha* 386; Beliefs 387; *Dbarma* 388.

SECTION 5. Philosophy 389; Intellectual Ferment 389; *Jñā* 389; Different Schools of Thought 389; *Lokāyata* 392; Other Philosophical Terms 393; *Indra* and *Indriya* 394; *Paraloka* (The Other World) 396.

## CHAPTER VII

### POLITY AND ADMINISTRATION

SECTION 1. Monarchy 398; Titles and Terms 398; Council of Ministers (*Parishad*) 399; *Rājakṛitvā* 400; Chief Minister 400; *Aśadākshīṇa* (V.4.7, Secret Counsel) 402; *Rājasabhā* 403; *Mahishī* (Queen, IV.4.48) 404; Crown-Prince 405; *Rāja-Kumāra* 405; Personal and Palace Staff 406; Personal Body-guards (*Rāja-pratyenas*) 406; Chamberlain (*Dauvārika*) 406; Officers to Greet the King 406; Toilet Attendants 407; *Rāja-yudhvā* 407.

## Contents

- SECTION 2. Administration 408; Administrative Officers 408; *Yukta* 409; *Dūta* 410; *Ākranda* 411; Ideals of Administration 411; Functions of Government 412; Miscellaneous Details 412; Sources of Revenue 413; Special Taxes in Eastern India 414; Accounting 415.
- ✓ SECTION 3. Law and Justice 416; *Dharma* and *Nyāya* 416; Court 416; Civil Law 417; Criminal Law 418.
- SECTION 4. Army 419; Four-fold Division 419; Fighting Services 419; Wheel-Guards (*Pariskanda*) 420; Arms 421; Art of War 422.
- SECTION 5. Political *Saṅgha* or *Gaṇa* 424; *Janapada* and *Janapadins* 424; *Saṅgha* 426; The Religious *Saṅgha* 426.
- SECTION 6. *Gaṇa* Polity 428; *Rājanya* as the Ruling Caste in a *Gaṇa* 428; *Kula* 429; *Bhakti* 430; Party System 431; Executive 431; Voting 432; Quorum 433; State Emblems 433; *Jaya* 433.
- SECTION 7. *Āyudhajīvi Saṅghas* 434; Four Kinds of *Āyudhajīvins* 434; Mountaineers (*Parvatīya*) 434; *Pūga* and *Vrāta* 436; *Pūga* 437; *Vrāta* 439; *Vrātas*=*Vrātyas* 440; *Vrātya-stomas* 441; Four-fold *Vrātya-stomas* 441.
- SECTION 8. Names of Republics 443; *Āyudhajīvi Saṅghas* 443; Names of *Saṅghas* in the *Sūtras* 443; *Āyudhajīvi Saṅghas* in the *Gaṇa-pāṭha* 446; Some More Republics 451; Names of Some Important Tribes 452.

## CHAPTER VIII

### CHRONOLOGICAL CONSIDERATIONS

PREVIOUS Views 455; Literary Argument 456; Pāṇini and the South 458; Pāṇini and *Maskarī* 458; Pāṇini and Buddhism 459; *Śravishṭhā* as the First *Nakshatra* 459; The Nanda Tradition 462; Political Data 465; Reference to *Yavanānī* 465; Pāṇini and the *Parśus* 466; The Kshudraka-Mālavās 468; Pāṇini and Kauṭilya 470; Evidence of Coins 471;

Personal Names 473; Pāṇini and the *Jātakas* 473; Pāṇini and the *Madhyama-pāṭha* 474; Summary 474.

## APPENDIX

Coins in Pāṇini.

\* Appendix III on Gotras with a critical text of their *Gaṇa-pāṭha* had to be held back for treatment as a separate monograph.

## CHAPTER I

### PĀṆINI : HIS LIFE AND WORK

**GRAMMAR (Vyākaraṇa)**—Grammar was regarded by the Indians as the first and most important of the sciences (*Vyākaraṇam nāmeyam uttarā vidyā*, *Bhāṣya*, 1.2.32; I.208; also *śaṭsu aṅgesu pradhānam*). The results attained by them in the systematic analysis of language surpass those arrived at by any other nation. "The Sanskrit grammarians were the first to analyse word-forms, to recognise the difference between root and suffix, to determine the functions of suffixes, and on the whole to elaborate a grammatical system so accurate and complete as to be unparalleled in any other country." (Macdonell, *India's Past*, p. 136). Their singular achievements in this field have also rendered eminent services to Western philology.

The celebrated grammar of Pāṇini is the oldest surviving representative of this elaborate grammatical analysis of forms and linguistic investigation. Pāṇini is the architect of the magnificent edifice known as the *Aṣṭādhyāyī*, which justly commands the wonder and admiration of the world. His work may be regarded as the starting-point of the post-Vedic age, almost entirely dominating the classical Sanskrit literature by the linguistic standard set by it. His grammar regulates equally the language of both poetry and prose in Sanskrit. Pāṇini's work holds good for all ages so far as Sanskrit is concerned. It is a permanent influence and institution in the world of Sanskrit even to this day.

**PĀNINI'S GREATNESS**—Weber regards Pāṇini's grammar as "superior to all similar works of other countries, by the thoroughness with which it investigates the roots of the language and the formations of its words." (*History of Indian Literature*, p. 216). According to Goldstücker: "Pāṇini's work is

indeed a kind of natural history of the Sanskrit language." His grammar "is the centre of a vast and important branch of the ancient literature. No work has struck deeper roots than his in the soil of the scientific development of India." Pāṇini's rules (*sūtras*) have been framed with the utmost conciseness and this dignified brevity is the result of very ingenious methods. His terminology adequately explaining all the phenomena of the language, demonstrates his great originality.

Coming at the end of a long evolution of grammatical studies the *Aṣṭādhyāyī* achieved finally its position as the only adequate and comprehensive Sanskrit grammar. Regarded as the highest authority and also as infallible, Pāṇini superseded all his predecessors whose works have consequently been lost in oblivion. Of the older linguists, Yāska alone survives, and that because his work lay in the different field of Vedic exegesis.

Pāṇini undertook a profound investigation of the spoken and the living language of his day. He applied the inductive method in discovering and creating his own material for purposes of evolving his grammatical system. As a trustworthy and competent witness of linguistic facts, he cast his net so wide that almost every kind of word in the language was brought in:

संदास्सुबहवः सकलितास्तान्पादाय पाणिनिना स्मृतिरूपनिबद्धा,

(*Kāśikā*, IV.I.114).

This is shown, for example, by his rules applied to the accent, or the lengthening of the vowels in cases of calling from a distance (*durād-dhūte*), salutation (*pratyabbhivāde*), and in the case of questions and answers (*pari-prāśna*); or more specially, in his survey of place-names, and names of *charaṇas*, *gotras* and *janapadas*, for purposes of derivative formations which must have served an intensely practical need.

The characteristic feature of Pāṇini's system is that it derives words from verbal roots. He has given us comprehensive lists of suffixes and roots. In this way his grammar is a contribution not merely to Sanskrit, but to linguistics in gene-

ral, throwing light on the structure of the cognate Indo-European languages. Pāṇini, unlike Śākaṭāyana, did not carry to extremes the theory of treating all nouns as verbal derivatives, but also recognised the formation of fortuitous words (*yad-ricbcbhā śabda*, *nipātana-śabda*) in the language for which no certain derivation could be vouchsafed. Pāṇini's work is distinguished by the balanced judgment which it demonstrates in relation to contentious or extreme views.

His work is also unique in one respect, *viz.*, that like Yāska's *Nirukta* it is one of the rare masterpieces of old Sanskrit literature which is the work of an individual author, and not of a school. As Colebrooke has put it, the *Aṣṭādhyāyī* "certainly bears internal evidence of its having been accomplished by a single effort" (*Miscellaneous Essays*, 1873, Vol. II, p. 5). According to Burnell: "Pāṇini's grammar has, in all probability, been little tampered with; we have better warrant for its integrity than in the case of any other work" (*On the Aindra School of Sanskrit Grammarians*, p. 31). For purposes of cultural and historical material the references in the *Aṣṭādhyāyī* have the same value as epigraphic or numismatic records. Its credit is also very much enhanced by its admitted antiquity.

On the whole one may say that Pāṇini's grammar is related to Sanskrit like the tap-root of a tree, the source of its sap and vitality regulating its growth. For Indo-European philology, Pāṇini's work has proved of inestimable value. For Indian history and culture, the *Aṣṭādhyāyī* is a mine of trustworthy information throwing light on numerous institutions, as the present study is directed to show.

The genius of Pāṇini appeared at a critical point in the history of Sanskrit to solve the crisis confronting it. The days of Vedic Sanskrit had come to an end by the time of Yāska, and fresh forms were coming into use. A new regulating and authoritative grammar was needed for bridging the gulf between the Vedic language and the rising popular speech or the classical Sanskrit which had come to stay. It was Pāṇini's mastermind

that saved the situation by devising a system which treated of the Vedic language on the one hand and the classical Sanskrit on the other with requisite synthesis and proper shifting of emphasis. Pāṇini's concentrated contemplation and penance accomplished a supreme task under the grace of God, to which tradition so amply testifies.

**EPITHETS**—Pāṇini's *magnum opus*, the *Aṣṭādhyāyī*, is a code of Sanskrit grammar consisting of about 4,000 or to be more precise 3,995 rules. Pāṇini wrote in the *sūtra* style with admirable regard for economy of words. Although Kātyāyana after him also composed the *vārttikas* in the *sūtra* form, Pāṇini alone is understood by the term *sūtrakāra* (*Pāṇineḥ sūtrakārasya*, *Bhāṣya*, II. 2. 11; I. 414). In a *kṛidanta* rule (III. 2. 23) he teaches the formation amongst other words of *sūtrakāra* and *śabdakāra*. Patañjali speaks of Pāṇini adopting the *sūtra* style as the medium of teaching grammar (*vyākaraṇam sūtrayati*, III. 1. 26; II. 34). Previous writers were perhaps inclined to treat Vyākaraṇa as composed of rules as well as individual words (*lakṣhya-lakṣaṇa*). But Patañjali tells us that Pāṇini's contribution consisted in framing *sūtras* to embody the linguistic phenomena and to build up a system, rather than pursue the arduous and lengthy process of taking each word separately (*na hi Pāṇininā śabdāḥ proktāḥ, kiṁ tarhi, sūtram*, I.12). The title *śabdakāra* also may be applied to Pāṇini, since grammar concerned as it was with words is referred to as *śabda* in the *Aṣṭādhyāyī* itself (I.1.68 and VIII.3.86, *śabda-samjñā*). Elsewhere Pāṇini derives *śabdika* as applied to a grammarian on account of his authorship of *śabda* or grammar (IV.4.34, *Śabdam karoti śabdikah*). Since Pāṇini was the promulgator of a complete system of grammar, *Vyākaraṇa*, the title *vaiyākaraṇa* also applies to him, and he himself uses this term for a grammarian in one of his *sūtras* (VI. 3. 7).

**KĀTYĀYANA'S ESTIMATE**—Kātyāyana has been Pāṇini's ablest scientific critic, but also a follower. His own genius was of a high order. He subjected Pāṇini's work to a

searching examination, modifying and supplementing the *sūtras* where there was need for it in the process of time, initiating discussions on contentious grammatical theories, at times developed in as many as fifty-nine *vārttikas* (cf. *sūtra* I. 2. 64), and in other cases justifying and defending Pāṇini against his critics. He has written in a critical and scientific spirit, and not as a detractor of Pāṇini. The number of his *vārttikas* is nearly 4,263, showing that he laboured hard to bring out the depth and value of the Pāṇinian system.

There is unfortunately a tradition current in India, reinforced by legends that Kātyāyana was a biased critic of Pāṇini. The opinion is reiterated even by an eminent writer like Śabara-svāmīn (*sadvāditvācch-cha Pāṇiner-vachanam pramāṇam, asadvāditvān-na Kātyāyanasya, Mīmāṃsā-Bhāṣya*, X.8.1). Prof. Kielhorn who set forth the true position of Kātyāyana in relation to Pāṇini, has shown that it would be a scientific mistake to stigmatize Kātyāyana as an unfair antagonist of Pāṇini, since the object which Kātyāyana and Patañjali have in view throughout their works is one and the same, the nature of their remarks being identical, but only differing in form (Kielhorn, *Kātyāyana and Patañjali*, p. 53). The *Ashṭādhyāyī* instead of being weakened by Kātyāyana shines in his hands with added glory. Kātyāyana gives expression to his admiration for Pāṇini by concluding the *vārttika-sūtras*, in the following devout strain:

भगवतः पाणिनेः सिद्धम् ।

**PATAÑJALI'S TRIBUTE**—Patañjali, the author of the *Mahābhāṣya*, has applied his mastermind to reveal the depth and range of Pāṇini's scholarship. Like Kātyāyana, Patañjali applies the term *Bhagavān* exclusively to Pāṇini in recognition of his supreme position in the field of study he had made his own. Only once the epithet refers also to Kātyāyana (III. 2. 3; II. 97) (Kielhorn, *J.R.A.S.*, 1908, p. 503).

Patañjali next applies to Pāṇini the significant epithet *Māṅgalika Āchārya* (I.1.1; I.3.1; I.253), a great teacher

who commenced his treatise with a benedictory expression ensuring its continuity and development through the ages. There can be no doubt about Pāṇini's phenomenal success in the annals of human authorship, his work being greeted with universal approval: पाणिनीयं महत् सुविहितम् (*Bhāṣya* IV.2.66; II.285). 'Superbly accomplished is the grand treatise of Pāṇini.' His grammar was acknowledged as of superior authority over the works of his predecessors (सूत्रकारद्वय शब्दविदां मूर्धनिषिक्तः *Padamañ-jarī* on IV.1.93); and soon it spread from the elementary to the highest stages of studies. Patañjali testifies to the popularity of Pāṇini's work by saying that it was on the lips of young pupils (*Ākumārāṇi yaśaś Pāṇineś*, I.4.89; I.347). The *Kāśikā* goes further and says on the basis of an old stock-example that the name of Pāṇini was acclaimed as authority all over the country पाणिनिशब्दः लोके प्रकाशते, इतिपाणिनि, II. 1.6.).

Another epithet applied by Patañjali to Pāṇini is that he is a *Pramāṇabbhūta Āchārya* (I. 1.39; I.39), a teacher of the highest authority. He says that Pāṇini approached his task with a full sense of responsibility: 'Purified by the *kuśa* grass held in hand, the *Āchārya* seated himself facing the sun and took infinite pains in composing each *sūtra*. Not one syllable is purposeless there, much less could a whole *sūtra* be' (I.1.1; I.39). This authoritative conception later on became the pivot of the maxim (*paribbāśhā*) that the saving of half a *mātra* is regarded by the grammarians to be as gladdening as the birth of a son (*Paribbā-shendu-śekhara*, No. 122). Pāṇini adopted the *sūtra* style of composition based on utmost brevity, but not losing clarity. He was the founder of a new system planned with its logical method and scientific technique to solve the intricacies of grammar and reduce them to simplicity and precision as far as possible. He remains eminently understandable in spite of the rigour and conciseness of his work.

Patañjali also refers to the capacious intellect of Pāṇini by calling him an *Analpamati Āchārya* (I.4.51; I.335). It was by his comprehensive genius that Pāṇini was able to handle an

almost unlimited range of linguistic material, subject it to masterly analysis, and reduce it to an order and system. His vigorous understanding and method have for ages disciplined and invigorated the minds of generations of Sanskrit scholars.

Patañjali also mentions the technical ability of Pāṇini by calling him a specialist in the forms of words and their meanings (*Vṛttatañjā Āchārya*, I.3.9; I.226). Pāṇini was possessed of a phenomenal insight (*mahatī sūkṣmākṣikā*, *Kāśikā*, IV.2.74) into the true meaning (*vṛtti*) of words in all their aspects and bearings as they were obtaining in the usage of the different localities, Vedic schools (*śākhās* and *charaṇas*), families (*gotras*), trades, professions and social classes of his times. We learn from Yuan Chwang that 'Rishi Pāṇini was from his birth extensively informed about men and things.' (*Siyuki*, I. 115). Pāṇini for the most part discovered and created his own material. He has applied his scientific method to the arrangement of this material by bringing the numerous *vṛttis* or derivative meanings of words under well-classified *gaṇas* or word-groups. It was a method, which, as pointed out by Whitney and Burnell, was unknown before him (Whitney, *Atbarva Prāt.* p. 48; Burnell, *On the Aindra School of Sanskrit Grammarians*, p. 28). In fact, Pāṇini's name has gone down to posterity as the inventor of the device of the *Gaṇa-pāṭha*, which has done so much in the conservation of Sanskrit language and of its archaic and obsolete forms.

Lastly, Patañjali applies the significant epithet *Subhṛit* (I. 2.32; I.208) to Pāṇini in reference to the simplicity of his style which makes an erudite work so easy of comprehension by its lucidity and logic.

By his inner qualities of head and heart Pāṇini was able to appreciate the views of others in a spirit of detachment and with balanced judgment. He avoided extreme views and preferred the path of synthesis between conflicting theories. For example, it is well-known that the question whether a word denotes a whole class (*ākṛiti*) or only an individual (*vyakti*) was being

debated amongst the grammarians at an early stage. Later on this became the subject of a sharp controversy between Vājapyāyana and Vyāḍi (*Bhāṣhya*, I.2.64; I.242,244), but Pāṇini seeing truth in either accepted both positions as explained by Patañjali.

It may also be noted that Kātyāyana's epithet to Pāṇini has been also repeated at the end of Patañjali's work in the same spirit of homage : भगवतः पाणिनेराचार्यस्य सिद्धम् । (VIII.4.68; III.467).

*Name.* The author of the *Aṣṭādhyāyī* is universally known as Pāṇini. Kātyāyana and Patañjali use this name. According to Baudhāyana, Pāṇini is a *gotra* name included amongst the Vatsa-Bhṛigus, having five *Pravaras*, viz. Bhārgava, Chyāvana, Āpnavāna, Aurva and Jāmadagnya (*Pravara-kāṇḍa*, 3). Pāṇini's own *sūtra* mentioning Pāṇin (VI.4.165) suggests Pāṇini to be a *gotra* name. According to Kaiyaṭa's derivation a son of Paṇin was Pāṇina, and a *yuvan* descendant of his would be called Pāṇini (*Pradīpa* on I.1.73.6).

The *Trikāṇḍaśeṣa* and *Keśava*, both later lexicons, mention Āhika, Śālaṅki, Dākshīputra and Śālāturiya as the appellations of Pāṇini. We have no means to verify the correctness of the first two names. According to Weber the name Śālaṅki, which occurs in the *Bhāṣhya*, though it does not clearly appear that Pāṇini is meant by it, leads us to the Vāhikas (*History of Sanskrit Literature*, p. 218). It would at least accord with the fact that Pāṇini was an Udīchya. The last two are well-known names of Pāṇini. Patañjali quotes a *kārikā* describing Pāṇini as Dākshīputra (*Dākshīputrasya Pāṇineḥ*, I.75) after the name of his mother who was of the Daksha *gotra*. Dāksheya also would be Pāṇini's metronymic.

**THE DAKSHAS, A NORTHERN PEOPLE** — The Dakshas are referred to as a clan organised into *saṁgha* as is apparent from the following examples in the *Kāśika*: *Dākṣaḥ saṁgaḥ*, *Dākṣaḥ aṅkaḥ*, *Dākṣaḥ lakṣaṇam* (IV. 3. 127). It also refers to a settlement of the Dakshas (*Dākṣo ghoṣaḥ*, IV.3.127), and as examples of the names of their villages are cited *Dākṣi-kūla* and *Dākṣi-karṣa* (VI. 2. 129), seem-

ingly old illustrations, since Patañjali likewise mentions *Dākshikarshu* as the name of a village of which a resident was called *Dākshikarshuka* (IV. 2. 104; II. 294). That the Dakshas belonged to the north-west is suggested by the *Kāśikā's* discussion on *Sanjñāyām kautbośinareshu* (II. 4. 20), citing a counter-example to show that the place named *Dākshi-kanthā* lay outside the geographical limits of *Uśīnara*. According to Pāṇini *Uśīnara* formed part of *Vāhika* (IV. 2. 117, 118). That the Dakshas did not belong to the eastern part of India either is shown by another comment (*Kāśikā* on IV. 2. 113), where it is said that the Dakshas lived outside the *Prāchyā-Bharata* region, i.e., towards the west. Patañjali's interpretation of *Prāchyā-Bharata* on Pāṇini II. 4. 66 shows that the *Prāchyā* country or eastern India began from the region of *Bharata* or *Kuru-janapada* (I. 493). Strictly speaking the *Bharatas* although residing in east Panjab were considered to form part of the *Prāchyas*. Thus proceeding from east to west we encounter the chain of the *Prāchyas*, *Bharatas* (region of *Kurukshetra*), *Uśīnaras*, *Madras* and *Udīchyas*. The *Gopatha Brāhmaṇa* mentions the *Udīchyas* with the *Madras* (*Gopatha*, I.2.10), and the two jointly formed *Vāhika*. The Dakshas, as shown by the *Kāśikā*, lived outside the *Prāchyā* country, outside the *Bharata-janapada*, and outside the *Uśīnara* land which was in *Vāhika*, and have therefore to be located towards further west, somewhere in *Gandhāra*. This lends support to the tradition that Pāṇini of the Daksha *gotra* was born at *Śalātura*, which lay a few miles to the north of the confluence of the *Kabul* with the *Indus* river. The area once occupied by the *Dākshis* may probably have been somewhere in the lower valley of the *Kabul* river, between *Dakka* and the present site of *Śalātura*.

**ŚALĀTURA, THE BIRTH-PLACE OF PĀṆINI**—The term *Śālāturiya* applied to Pāṇini preserves the tradition of his original home being at *Śalātura*. The antiquity of the place is carried back to the time of Pāṇini himself, who mentions *Śalātura* in a *sūtra* (IV.3.94) for the sake of the formation *Śālāturiya* to

denote a person whose ancestors were natives of that place (*abbijana*). Thus the town existed even before Pāṇini, and the place of his ancestors may be taken as the place of his own birth. Vardhamāna refers to Pāṇini as Śālāturiya (*Gaṇaratnamahodadhi*, commentary on verse 2), and Bhāmaha and a Valabhi inscription also use this synonym for the grammarian (*Śālāturiya-matam*, Bhāmaha; *Śālāturiya-tantra*, Ins. of Śilāditya VII of Valabhi, Fleet, *Corpus Inscript. Indi.* III, p. 175).

Yuan Chwang visited Śālātura in the seventh century A.D. and found that the tradition about Pāṇini was current there. He writes, "To the north-west of U-to-kia-han-c'ho 20 li or so we come to the town of P'o-ls-tu-lo. This is the place where the Rishi Pāṇini, who composed the *Ching-ming-lun* (चिङ्ग मिङ्ग लुन्-शब्दविज्ञा) was born." (Beal, *Siyuki*, I. p. 114; also footnote equating the symbol *p'o* for *so*).

Śālātura has been identified by Cunningham with Lahur,<sup>1</sup> a small town four miles north-west of Ohind, in the angle of the river Kabul meeting the Indus (*Ancient Geog.* pp. 66-7; *A.S.R.*, II.95). It can be approached from Jahangira station of the N. W. Ry. on the right bank of the Attock bridge from where it is about 12 miles. Buses plying between Mardan and Ohind pass by Lahur.

For about five hundred years Śālātura continued as a

<sup>1</sup> A Kharoshthi inscription now preserved in the Lahore Museum and dated in the Kushāṇa year 40 (118 A. D.) was found at Shakardarrā near Campbellpore. It mentions the boat-ferry of Śala (*Śalanokrama*, Sten Konow, *Kharoshthi Ins.* p. 160), which plied from the eastern bank of the Indus and derived its name from the town of Śālātura situated on the opposite side at some distance from the river. The name Shakardarrā may be derived from Śakradvāra meaning the 'entrance from the east.'

There are several high mounds at Lahur, at one of which recent excavations by Madame Corbeau exposed some stucco Buddhist heads and Gandhāra terracottas. Yuan Chwang speaks of a statue of Rishi Pāṇini being in worship at Lahur. R. B. K. N. Dikshit first informed me that a life-size image in Gandhāra style, was previously found at a Lahur mound. It is only a Buddha image in Gandhāra style, now preserved in the Peshawar Museum, where I saw it in 1946.

centre of Pāṇinian studies. According to Yuan Chwang, "The children of this town, who are his (Pāṇini's) disciples, revere his eminent qualities, and a statue erected to his memory still exists." (*Siyuki*, I.116).

**TRADITION ABOUT PĀNINI'S LIFE**—The Indian tradition about Pāṇini is embodied in the *Kathāsaritsāgara* of Somadeva (11th century) and the *Bṛhatkathāmañjarī* of Kshemendra (11th century) both of which were based on the original *Bṛhatkathā* of Guṇādhya. According to this, Pāṇini was a pupil of the teacher Varsha. He was not much known for his intelligence (*manda-buddhi*) and lagged behind in studies. Withdrawing for a time to the Himalayan seclusion he performed meditation and pleased Śiva who revealed to him a new system of grammar (*nava-vyākaraṇa*). His rival was Kātyāyana whom he finally overcame by his superior powers. Pāṇini's grammar eventually replaced the older Aindra system. He also became a friend of the Nanda emperor. This tradition is supported in detail by Yuan Chwang as shown below.

**MANJUŚRĪ-MŪLAKALPA**—This work (c. 800 A.D.) refers to king Nanda, his learned council of Brahmin philosophers and to his intimacy with Pāṇini: "After him (Śūrasena) there will be king Nanda at Pushpa City. In the capital of the Magadha-residents there will be Brahman controversialists (*Brāhmāṇas-tārkikā bhūvi*, verse 425) and the king will be surrounded by them. The king will give them riches. His minister was a Buddhist Brahmin Vararuchi who was of high soul, kind and good. His great friend was a Brahmin, Pāṇini by name." (Jayaswal, *Imperial History of India*, p. 14).

**RĀJASĒKHARA**—Rājasekhara (c. 900 A.D.) gives further point to this tradition by saying that in the city of Pāṭaliputra there was an old institution called *Śāstrakāra-parīkṣā*, the Board to examine authors of scientific systems. Before this Board appeared such great masters of grammar as Upavarsha, Varsha, Pāṇini, Piṅgala, Vyādi, Vararuchi and Patañjali. Examined (*parīkṣitāḥ*) by this Board they attain-

ed fame.<sup>1</sup> These names embody literary history over a long period.

Upavarsha was a commentator on the Mīmāṃsā and Vedānta sūtras (Jacobi, J.A.O.S., 1912, p. 15; cf. *Śaṅkara-Bhāṣya*, III.3.53). His views about *śabda* are preserved to us in a citation by Śaṅkarācārya who refers to him as *Bhagavān Upavarsha* (I.3.28). Varsha, his brother is said to have been Pāṇini's teacher. Pāṇini as a Śāstrakāra and author of a new grammatical system would have submitted his work to this learned assembly of Pāṭaliputra. Piṅgala, the author of the *Cchbandovichiti*, a name at present included in the *Gaṇa-pāṭha* of IV.3.73, is spoken of as Pāṇini's younger brother (*anuja*) by Śaḍguruśiṣhya in the *Vedārthadīpikā* commentary. Vyāḍi the author of the *Saṅgraha-sūtra*, a known work on Grammar and highly spoken of in the *Bhāṣya* (cf. Patañjali on the meaning of *Siddha* decided in the *Saṅgraha*, I.6; also *Śobhanā khalu Dākṣhāyaṇasya Saṅgrahasya kṛitih*, I.468) was a junior contemporary of Pāṇini. Vyāḍi wrote his *Saṅgraha* in the *sūtra* style as is evident from Patañjali's reference to students called *Saṅgrahasūtrikas*, (those who studied the *Saṅgraha-sūtras*, IV.2.60; II.284). Kātyāyana and Patañjali are well-known grammarians. Thus the order in which these names are mentioned may be taken to be that of chronology. Patañjali who is a known contemporary of Pushyamitra Śuṅga of the second century B.C. is the last of this exalted race of grammarians.

**ACCOUNT OF YUAN CHWANG**—The sources of information about Pāṇini's life are rather meagre and they should be supplemented by other sources that are available. Yuan Chwang is such a source and his account needs careful study. Most of the traditions recorded above are repeated by Yuan Chwang. The Chinese traveller visited Śālatura in person and

<sup>1</sup> श्रूयते च पाटलिपुत्रे शास्त्रकार परीक्षा—

अत्रोपवर्षवर्षविह पाणिनिपिगलाविह व्याडिः ।

वररुचि पतञ्जली इह परीक्षिताः ख्यातिमुपजग्मुः ॥ *Kāvya-mīmāṃsā*.

the information collected by him on the spot may be regarded as trustworthy, specially on points where Somadeva, Rājaśekhara, *Mañjuśrīmūlakalpa* and the Chinese traveller are in accord.

Having stated that Ṛishi Pāṇini who composed the *Śabda-vidyā* was born at Śālātura, Yuan Chwang proceeds to say:

'Referring to the most ancient times, letters were very numerous; but when, in the process of ages, the world was destroyed and remained as a void, the Devas of long life descended spiritually to guide the people. Such was the origin of the ancient letters and composition. From this time and after it the source (of language) spread and passed its (former) bounds. Brahma Deva and Śakra (*Devendra*) established rules (*forms or examples*) according to the requirements. Ṛishis belonging to different schools each drew up forms of letters. Men in their successive generations put into use what had been delivered to them; but nevertheless students without ability (*religious ability*) were unable to make use (of these characters). And now men's lives were reduced to the length of a hundred years, when the Ṛishi Pāṇini was born; he was from birth extensively informed about things (*men and things*). The times being dull and careless, he wished to reform the vague and false rules (*of writing and speaking*)—to fix the rules and correct improprieties. As he wandered about asking for right ways, he encountered Īśvara Deva and recounted to him the plan of his undertaking. Īśvara Deva said, "Wonderful! I will assist you in this." The Ṛishi, having received instruction, retired. He then laboured incessantly and put forth all his power of mind. He collected a multitude of words, and made a book on letters which contained a thousand *śloka*s: each *śloka* was of thirty-two syllables. It contained everything known from the first till then, without exception, respecting letters and words. He then closed it and sent it to the king (*supreme ruler*), who exceedingly prized it, and issued an edict that throughout the kingdom it should be used and taught to others;

and he added that whoever should learn it from beginning to end should receive as his reward a thousand pieces of gold. And so from that time masters have received it and handed it down in its completeness for the good of the world. Hence the Brāhmaṇas of this town are well grounded in their literary work, and are of high renown for their talents, well informed as to things (*men and things*), and of a vigorous understanding (*memory*).’ (*Siyuki*, pp. 114-115).

The Pāṇinian tradition was still current even after the lapse of about eight centuries after Patañjali. Yuan Chwang faithfully repeats the much older tradition contained in the *Mabābbāshya* with regard to the spread of Vedic learning in all its offshoots and branches, the origin of grammar, the growth of the Aindra system, chaos produced by different grammatical schools, and finally the emergence at this crisis of Pāṇini with his new grammar, his eminent qualities and method.

(1) *ORIGIN OF ANCIENT LETTERS*—Yuan Chwang’s account of the primeval beginning of knowledge is in the nature of introductory remarks. This accords with the tradition almost universal in India regarding the divine origin of different *śāstras* and the divine guidance received in the propagation of knowledge. [Patañjali also transposes the scene to the divine world when he refers to the period of a thousand years of gods (*divya-varsha-sahasra*) during which time Bṛihaspati expounded the subject of letters (*śabda-pārāyanam provācha*) to his divine pupil Indra (*Bhāshya*, I.5.).

(2) *GROWTH OF LITERATURE*—‘From this time . . . the source (*of language*) spread and passed its former (*bounds*).’ This is supported by Patañjali’s account of the vast expansion of language after the first impulse to it was received from divine revelation. He writes:<sup>1</sup> ‘Here is the

<sup>1</sup> सप्तद्वीपा वसुमती त्रयो लोकाश्चत्वारो वेदाः सांगाः सरहस्या बहुधा विभिन्ना  
एकगतमध्वर्युशास्त्राः सहस्रवर्त्मा सामवेद एकविंशतिधा बाह्वृच्यं नवधाचर्वणो वेदो  
बाकोवाक्पमितिहासः पुराणं वैचकमित्वेतावाञ्छब्दस्य प्रयोगविषयः ।

(*Bhāshya*, 1.9)

wide world comprising seven divisions; its rich literature including the four *Vedas* with their *Aṅgas* and mystic portions, their ramifications into 101 *śākhās* of *Yajurveda*, 1000 of *Sāmaveda*, 21 of *Rigveda*, 9 of *Atharvaveda*, the Dialogue portions, *Itihāsa*, *Purāṇa* and *Vaidyaka* treatises constitutes the expansive source of language.' It is true that even before the time of Pāṇini Sanskrit literature had reached a stage of considerable development, as we shall see in examining the literary evidence.

(3) *AINDRA SYSTEM*—The tradition of an Aindra grammar prior to Pāṇini is strong in Sanskrit literature. It is found in the *Taittirīya Saṁhitā* where it is said that the gods approached Indra to elucidate speech (*vāchaṁ vyākuru*). Patañjali speaks of Bṛihaspati expounding to Indra the words by means of individual forms or examples (*pratipadokta śabda*, I.5; almost literally rendered by Yuan Chwang). The tradition in the *Ṛiktantra*, a *Prātiśākhya* work of the *Sāmaveda*, is more to the point: Brahmā taught Bṛihaspati; Bṛihaspati taught Indra; Indra taught Bhāradvāja; and from him the system devolved on the Rishis.' (*Ṛiktantra*, Dr. Suryakant's edition, Lahore, p. 3). Here also Brahmā as Prajāpati is the ultimate source of knowledge. Indra represents the divine agency. The school of Bṛihaspati was continued through his descendant Bhāradvāja who initiated other teachers in the system. There certainly existed a Bhāradvāja school of grammar, Pāṇini himself citing the opinion of Bhāradvāja (VII.2.63). Patañjali frequently quotes the *vārttikas* of the Bhāradvājīyas (*i.e.* followers of the Bhāradvāja system, as Pāṇiniyas were of Pāṇini) as giving a version variant from that of Kātyāyana (III.1.38; II.46; III.1.89; II.70, etc.). The *Ṛik Prātiśākhya*, which is generally regarded as prior to Pāṇini, also refers to the opinion of Bhāradvāja who seems to have been an adherent of the earlier Aindra system. The legendary accounts of the *Kathāsaritsāgara* and the *Bṛihat-kathā-mānjari* also mention that it was the Aindra school which was supplanted by Pāṇini's work.

Thus we find strong support for Yuan Chwang's allusion to the establishment of rules by Indra. The existence of the Aindra system has been dealt with in detail by Burnell (*On the Aindra System of Sanskrit Grammarians*).

(4) DIFFERENT SCHOOLS BEFORE PĀNINI—'Rishis belonging to different schools each drew up forms of letters.' This refers to the intense literary activity about words and language preceding Pāṇini in which hundreds of great teachers including such names as Śākaṭāyana, Gārgya, Yāska, Śaunaka, Śākalya, Bhārdvāja, Āpiśali, Audavraji, participated. Burnell's list of teachers from the *Nirukta*, Pāṇini and the *Taittirīya-Prātiśākhya* (*Aindra School*, pp. 32-33) considered together with the list of numerous phonetic treatises and the terminological literature (cf. Dr. Sūryakānta Sāstri, Intro. to *Laghu-Riktantra*) furnishes evidence of the strong intellectual activity which preceded and followed the genesis of the Pāṇiniya śāstra. (See also for a list of 64 Teachers quoted in the *Prātiśākhya*, *Nirukta* and Pāṇini, Max Muller's *History of Sanskrit Literature*, pp. 142-43).

(5) COMPARATIVE DECAY OF GRAMMATICAL STUDIES—'Men in their successive generations put into use what had been delivered to them. And now mens' lives were reduced to the length of a hundred years . . . The times being dull and careless.' Patañjali also refers to *purā-kalpa* (by-gone ages) when keen Brahmanical pupils devoted themselves first to master *Vyākaraṇa*, and then took up the study of the Veda. But in a subsequent epoch students devoted less attention to grammar; they even considered it useless (*anarthakam vyākaraṇam*). It was to reform such dull and careless students that Pāṇini wrote (*vipratipanna-buddhibhyo' dhyetṛibhya āchārya idam śāstram anvāchashte*, Pat. I.5.). As to the lessening of mens' lives to a hundred years, Yuan Chwang is almost literally rendering Patañjali's remarks:

*Kim punaradyatve yaḥ sarvathā chiram jīvati sa varsha-śatam jīvati* (I.5.).

'What to speak of the present times when the maximum span of human life is reduced to only one hundred years!' Pāṇini's object 'to fix the rules and correct improprieties' is supported by Kātyāyana referring to the *Aṣṭādhyāyī* as *sādhvanu-śāśana śāstra* 'the book of correct instruction' (*vārittika*, I.1.44. 14; 1.104). Possibly it contains an allusion to Pāṇini's ministering to the normal speech current in his time.

(6) *PĀNINI'S METHOD*—'Pāṇini was from his birth extensively informed about men and things. He wandered about asking for knowledge. He collected a multitude of words.' This information is valuable as it acquaints us with the fact that Pāṇini for the most part discovered and created his own material, making minute observations of facts in the course of his travels on a linguistic mission. We find in Pāṇini organism and life, an elastic and warm-hearted approach to the speech of the common people bringing in a vast and varied material about their life. A closer study of the *Aṣṭādhyāyī* as attempted in the following pages reveals how Pāṇini had explored and exploited all possible sources of linguistic material in the country including dialects, folk-lore and local customs, e.g. names of Yakshas like Viśāla used as personal names (V.3.84); *pīlu-kṇa*, a name for ripe berries of the Pīlu tree (V.2.24); eastern sports, and names of coins, weights and measures, etc. His recording of the differences in the accentuation of names of wells situated on the right and left banks of the river Beas is a true pointer to his painstaking method, on which the author of the *Kāśika* observes: 'the *Sūtrakāra* was endowed with deep and subtle insight.'

महती सूक्ष्मेशिका वर्तते सूत्रकारस्य । (IV.2.74).

Pāṇini's travels in search of facts from the living language and the method of personal discussion and interrogation to elicit information were in the manner of the true Takshaśilā style, which was marked by a practical bias in the pursuit of academic studies. We have a graphic account in Buddhist literature

describing how the royal physician Jīvaka was directed by his teacher to examine the plants in the region of Takshaśilā as sources of medicine (*Mahāvagga*, VIII.1.6 ff). Born at Śālātura as he was, Pāṇini must have been brought up in the academic tradition of Takshaśilā which was a far-famed centre of learning in that period. In one of the Jātakas we are told how students after completing their studies at Takshaśilā, wandered far and wide, acquiring all practical uses of arts, and understanding the various country observances (*Takkasilāṃ gantvā uggahita-sippā tato nikkhamitvā sabbasamaya-sippaṃ cha desachārittaṃ cha jāmissāmāti anupubbena chārikaṃ charantā*, *Jāt.* V.247).

(7) PĀṆINI AND MAHEŚVARA—The information that Pāṇini possessed a well-conceived 'plan of his undertaking' which was highly approved of by Īśvara Deva is of importance in crediting the grammarian with his full share of independent and original thinking in the execution of the *Ashṭādhyāyī*. The legend of Īśvara Deva indicates the traditional divine help usually associated with all pious undertakings. 'The Ṛishi having received instruction, retired.' It points to the period of Pāṇini's intellectual labour and single-minded devotion to his work in quiet surroundings (*śuchāv-avakāśe*, *Bhāṣya*, I.39).

(8) PĀṆINI'S EFFORT—'He then laboured incessantly and put forth all his power of mind.' It is almost a literal translation of Patañjali's remark about Pāṇini taking great pains in making his *sūtras*: *Pramāṇa-bhūta āchāryaḥ mabatā yatnena sūtraṃ praṇayati sma* (I.1.1; I.39). There can be no doubt about Pāṇini putting forth supreme effort to produce a work of such comprehensive nature and brevity as the *Ashṭādhyāyī*.

(9) PĀṆINI'S MENTAL POWERS—Yuan Chwang speaks of Pāṇini's spirit and wisdom, and of his vigorous mind which he devoted to investigate worldly literature (*Siyuki*, I.116). We have already spoken about Patañjali's tribute to Pāṇini as *analpamati āchārya*, explained by Kaiyaṭa as *medhāvī*, 'endowed with great understanding and memory.' We may confidently

dismiss the story of Pāṇini being dull at school. Moreover, the information that Pāṇini was extensively informed about men and things from his very birth indicates his inherent practical turn of mind and aptitude for observation amply borne out by the contents of the *Aṣṭādhyāyī*.

(10) *EXTENT OF PĀṆINIS WORK*—'He made a book on letters which contained a thousand *śloka*s; each *śloka* was of thirty-two syllables.' It indicates the extent of Pāṇini's *Aṣṭādhyāyī* consisting of 3,981 *sūtras* plus 14 *pratyāhāra sūtras*, computed by the *śloka* measure of 32 syllables each. Sköld has somewhat misunderstood this. He writes: 'This curious statement can hardly be interpreted in another way than assuming, that the work of Pāṇini, just as so many other Indian works on grammar, was originally written in metrical form.' (*Papers on Pāṇini*, p. 32). This is an untenable inference. As a matter of fact no Indian grammar, Sanskrit or Prakrit, is in metrical form. The *Aṣṭādhyāyī* was originally written in *sūtra* style, and its bulk from the beginning was very nearly 1,000 *śloka*s, as it is to-day. The statement is akin to the computation of Vyāḍi's *Saṅgraha*, also in *sūtras*, as *lakṣha-ślokātmaka*. The *Kāśikā* on IV.2.65 says that not only Pāṇini's work but those of Kāśakṛtsna and Vyāghrapāda also were in *sūtra* style (*Daśakanī Vaiyāghrapādīyam; Trikaṇā Kāśakṛtsnam*). Even up to a late period grammatical works were being written in *sūtra* form.

(11) *PĀṆINIS WORK, A COMPLETE DIGEST*—'It contained everything known from the first till then, without exception, respecting letters and words.' Pāṇini's work is rightly described by Patañjali as a vast ocean of science (*mahat śāstra-ugha*, *Bhāṣya*, I.1.1, I.40); also vast and well-done (*Pāṇiniyam mahat-suvibhitam*, IV.2.66; II.285). He also describes how Pāṇini's work was based upon the material available in the different schools of Vedic learning so that it became acceptable to all of them (*Sarva-veda-pārisadaīm bīdaīm śāstram*, *Bhāṣya*, II.1.58; I.400).

Burnell truly points out that for the *Aṣṭādhyāyī* to have

gained such a position of authority, 'it must have been vastly superior in the eyes of the Brāhmaṇas to all the numerous treatises which must have been in existence before Pāṇini's time.' (*Aindra School*, p. 38). Pawate has recently raised the question of Pāṇini's borrowings from his predecessors, a point which deserves much further consideration (cf. *Structure of the Aṣṭādhyāyī* by I. S. Pawate, Hubli). We find in the *Ṛiktantra*, a *Sāma Prātiśākhya* which Dr. Sūrya Kānt attributes to Audavraji some of Pāṇini's *sūtras* quoted almost *verbatim* (cf. *Ṛiktantra*, *sūtras* 195-218).

(12) PĀNINI AND PĀṬALIPUTRA—'He then closed it and sent it to the king (*supreme ruler*), who exceedingly prized it.' The *Mañjuśrīmūlakalpa*, Somadeva, and Tārānātha all relate the story of Pāṇini's friendship with one of the Nanda kings. Rājasekhara records a tradition, already referred to, showing Pāṇini's connection with Pāṭaliputra. It is likely that Pāṇini visited Pāṭaliputra in person to participate in the *Śāstrakāra-parīkṣā* rather than send his book through an emissary, Pāṭaliputra held a pre-eminent position in the literary life of the nation during the Nanda and Maurya periods. Chāṇakya, a resident of the distant North-West like Pāṇini himself, and nurtured in the glorious traditions of the Takshīlā school, also visited Pāṭaliputra. The *Atthapaṇṇāsini* commentary of the Sinhalese *Mahāvamsa* narrating the early life of Chāṇakya relates how during the course of his intellectual career to establish his reputation he was attracted to visit Pāṭaliputra: (*vādanaparyesanto Puṣṭhapaṇṇam gantvā*).<sup>11</sup>

We may take it that Pāṇini's mission to the celebrated capital of the Magadhan empire was not very different from that of Chāṇakya, *viz.* a desire to have his work valued by the most competent judges gathered at the court of Pāṭaliputra. **THE GREAT SYNOD (*Sabbā*)**—It is interesting to note that

<sup>11</sup> I am grateful for this reference to Śrī C. D. Chatterji, M.A., History Department, Lucknow University.

this academic institution continued even in the time of the Mauryan emperors of Pāṭaliputra, as indicated by Megasthenes and other Greek writers. In the words of Megasthenes the Brāhmaṇas "are employed publicly by kings at what is called the Great Synod where at the beginning of the new year, all the philosophers are gathered together, and any philosopher *who may have committed any useful suggestion to writing*, or observed any means of improving the crops and cattle, or for promoting the public interests, declare it publicly." (*Strabo*, XV.1., *McCrindle, Megasthenes*, Frag. XXXIII). Diodorus also refers to these distinguished gatherings at the beginning of each new year in which the learned men participated and the sovereign of the land acted as patron (*McCrindle, Megasthenes*, Frag. I, p.39). These statements corroborate the Sanskrit and Pāli accounts of the congregation at Pāṭaliputra, and Rājaśekhara's *Śāstrakāra-parīkṣā* very nearly corresponds to the functions of the Great Synod described by Megasthenes. The time of its meeting is recorded as the beginning of each new year. Very probably the technical term for this Synod and the Board responsible for the *Śāstrakāra-parīkṣā* was *Sabbā*, as in the expressions *Chandraguṇḍa-sabbā* and *Puṣyamitra-sabbā* used by Patañjali (I.77; see also *var. lect.* at p. 515)<sup>1</sup> and also *Rāja-sabbā* by Pāṇini in *sūtra* II, 4.23 (*sabbā rājamānusya-pūrvā*).

(13) RECOGNITION OF LEARNING—Victors at these synods who distinguished themselves publicly by producing a scientific contribution 'committed to writing' which promoted public interest or was conducive of general welfare, must have deserved to be adequately rewarded. Speaking in general it is said that "in requital of their services they receive valuable gifts and privileges." (*Diodorus*, Frag. I, p. 38). Megasthenes in continuation of his account of the Great Assembly specifically writes: "He who gives sound advice is exempted from paying any taxes or contributions." (*Meg. Frag. XXXIII*).

<sup>1</sup> Chandra cites *Chandraguṇḍa-sabbā* only on his *sūtra* II.2.69 corresponding to Pāṇini, II.4.23.

We have a suggestive word in Patañjali, viz. *Sābhā-sannayanah*, 'the honour derived from literary exposition in a *Sābhā*, (I.1.73; I.189). Pāṇini himself uses the word *sannayana* in the special sense of *sammānana* (I.3.36), i.e. bestowal of honour on successful exposition of a *śāstra* (cf. *Kāśikā* on *sammānana*, I.3.36).

Yuan Chwang speaks of a thousand pieces of gold as the reward received by one who mastered the *Aśṭādhyāyī* from beginning to end. *Sūtra* VI.2.65 (*Ṣaṭtami-bāriṇau dharmye'barane*) presupposes a customary payment of this nature called *dharmya* and speaks of its recipient as *bāriṇ*, one who took away the *dharmya* prize (*āchāra-niyataṁ deyaṁ yaḥ svīkaroti*, *Kāśikā*). The rule prescribes acute accent on the first syllable of the word denoting the recipient. One of the stock-illustrations cited by Patañjali actually makes the *vaiyākaraṇa* or grammarian a recipient (*bāriṇ*), and speaks of an elephant as his customary fee (*Bhāṣya*, VI.2.52; III.130; *Kāśikā*, VI.2.65, *vaiyākaraṇa-bastī*). The gift of an elephant as a prize could have originated only in the east of India. Kauṭilya mentions 1,000 silver pieces as the reward of learning (*vidyāvataḥ pūjāvetana*, *Arth. V. 3*; p. 248).

The above detailed analysis shows that the tradition recorded by Yuan Chwang was based upon facts of Pāṇini's life as known at that time.

**PĀṆINI AS A POET**—There is a tradition that Pāṇini was also a poet. It is suggested by certain verses cited from a poem named *Jāmbavatījaya* attributed to Pāṇini in certain anthologies. A verse in the *Sadukti-karṇāmṛita* refers to Dākṣhīputra as a poet. The available information with regard to Pāṇini as a poet is put together by Pischel (*Z.D.M.G.*, XXXIX pp. 95 and ff.) who is inclined to accept the theory that Pāṇini was also a poet. Bhandarkar, on the other hand, holds that the style in which the verses ascribed to Pāṇini are written is sufficient to prove that they cannot be by that grammarian (*J.B.B.R.A.S.*, XVI, p. 344). Prof. Kshitish Chandra Chatterji holds the same view

and after discussing at length all the known verses assigned to Pāṇini dismisses the theory of his authorship in these words: "The fact that Pāṇini as a poet is nowhere mentioned in the *Mahābhāṣya* or in any of the later first-rate works of the Pāṇini school and that annotators and commentators have racked their brains to explain away ungrammatical forms instead of regarding the uses in the *Jāmbavatīvijaya* as *jñāpakas*, that some of the verses attributed to Pāṇini in one anthology are attributed to other poets in others, that some of these verses show distinct traces of borrowings of a much later period, that none of the verses belonging to the *Jāmbavatīvijaya* bear the stamp of the grammarian on them, that some of them contain forms which would make Pāṇini shudder, and that some of them seem to be composed as examples for a work on rhetoric of a much later period, clearly indicate that the verses cannot have been the work of poet Pāṇini. The *Jāmbavatīvijaya-kāvya* or the *Pātālaviṇaya-kāvya* must have been composed by a poetaster of about the ninth century A.D. who made use of many peculiar grammatical forms in it and fathered it on Pāṇini, the great grammarian." (*Cal. Oriental Journal*, Vol. I, pp. 22-23; also p. 135).

We may, however, note that in a *kārikā* of the *Bhāṣya*, Pāṇini is referred to as a *kavi*: *tadakīrtitam-āccharitam kavinā* (I.4.50; I.334). But the meaning of *kavi* is not necessarily a poet. Although the *Kāśikā* equates *kavi* with the *sūtra-kāra*, both Kaiyaṭa and Nāgeśa understand *kavi* not as a poet, but as one possessed of supreme wisdom (*medhāvī*).

**THE ASHṬĀDHYĀYĪ:** (i) *Its Name*.—The *Ashṭādhyāyī* is differently designated as (1) *Ashṭaka* (*ashṭāu-adhyāyāḥ parimāṇamasya sūtrasya*, V.1.58); (2) *Pāṇinīya* (*Pāṇinīnā proktam*, IV.3.101); (3) *Vṛttisūtra* (*Bhāṣya* I.371 differentiating *Vṛttisūtra* from *vārttika*).

In the illustrations to several *sūtras*, the *Kāśikā* speaks of the Pāṇinīya system as an *akālaka* grammar (*Pāṇinyupajñam akālakaṁ vyākaraṇam*, II.4.21, IV.3.115 and VI.2.14). The

name is significant as showing that Pāṇini wisely excluded from his purview the discussion of *kāla* or tenses like *Paroksha* (Perfect) and *Vartamāna* (Present), on the exact definition of which subtle and elaborate arguments were often advanced by grammarians (cf. *Bhāṣya*, III.2.115; II.120, III.2.123; II.123). 'Some say *Paroksha* means the lapse of a century; others say that which is screened from the eye of the speaker is *Paroksha*; still others contend that an interval of two to three days constitutes *Paroksha*' (*Bhāṣya*, II.120). Pāṇini took a practical view in the matter, as indeed he did in the case of other extreme views also. In the *Sūtra-kāṇḍa* (I.2.51.57) he says that it is not within the province of the grammarian to lay down rules (*aśiṣyam*) about particulars of time and tense durations, since he must depend on the usage of the day (*saṃjñā-pramāṇa*) for such regulations. This position of Pāṇini expressed in the *sūtra* '*Kālo-pasarjane cha tulyam*' (I.2.57) must have been responsible for the epithet *akālaka* applied to his grammar.

(ii) *TEXT*—The text of the *sūtras* has been handed down to us almost intact by the method of oral transmission by which Sanskrit learning through the ages has descended from generation to generation through a succession of teachers and pupils (*guru-śiṣhya-pāramparya*) instead of being conserved in writing. This method of oral teaching of Pāṇini continued for many centuries and Yuan Chwang noticed it as prevailing in his time also: "And so from that time masters have received it and handed it down in its completeness for the good of the world." (*Siyuki*, I.115).

According to the author of the *Svarsiddhānta-chandrikā* the *Aṣṭādhyāyī* consists of 3,995 *sūtras*, i.e. 3,981 *sūtras* and the 14 *pratyābhāra-sūtras*.<sup>1</sup> Böhtlingk's critical edition contains 3,983 *sūtras*. Dr. Kielhorn after a detailed enquiry into the

<sup>1</sup> *Chatuh-sabasti sūtrāṇām pañcha-sūtra-vivarjitā, Aṣṭādhyāyī Pāṇinīyā sūtrair-māheivaraiḥ saba* (Svarsiddhānta-chandrikā, p. 3, verse 15, Annamalai Un.). 'The Text of the Aṣṭādhyāyī' by K. Madhava Krishna Sharma, J.U.P.H.S., July, 1940, pp. 52-65.

text of the *Aṣṭādhyāyī* came to the conclusion that "the text given in the *Kāśikā-vṛitti* (and that of the *Aṣṭādhyāyī* in the editions) contains 20 more *sūtras* than the original text." (*Ind. Antiquary*, XVI.184). This increase is accounted for in two ways, viz. (1) by applying the principle of *yoga-vibhāga* or splitting into two what Pāṇini originally read as a single *sūtra*, and (2) by introducing some *vārttikas* as full-fledged *sūtras* in the present text of the *Aṣṭādhyāyī*.<sup>2</sup> There is also evidence of retouching of some of the *sūtras* by introducing into them some words from the *vārttikas*.

Some also discuss that the original text of the *Aṣṭādhyāyī* contained (1) the sign of nasalization marked on indicator vowels (*Upadeśe'janunāsika it*, I.3.2); (2) the sign of *svārīta* accent to denote *adbikāra* (*Svariten-ādbikārah*, I.3.11); (3) accentuation of the text as in the case of Vedic works (*traiśvarya-pāṭha*); and (4) the *Samhitā-pāṭha* or arrangement by which the *sūtras* of each *pāda* are read in continuation and are joined to each other by *Sandhi*. But there is also the view that these features were not a part of the original text of Pāṇini, but only assumed by teachers. We know that in the case of the nasal and *svārīta* marks the followers of the Pāṇinīya school now take recourse to oral tradition, to indicate where such marks existed in the *sūtras*. This suggests an oral transmission from the time of Pāṇini's *upadeśa* or first instruction. The *Aṣṭādhyāyī* with an accented textual tradition, is not known. Kaiyaṭa is in favour of the hypothesis of *ekāśruti* or unaccented text from the beginning. The theory of *Samhitā-pāṭha* which was being discussed even before Patañjali (*cf. Śloka vārttika* on I.4.56 discussing *rīśvara* and *vīśvara*, the latter form being possible only

<sup>2</sup> In one case unnoticed by Kielhorn we have evidence of the fact that even before the time of Patañjali, variant wording of the *sūtra* had come to be discussed; *cf.* III.2.134, *Iha kechid-ākver iti sūtram paṭhanti, kechit prāk-kver iti*, *Bhāṣya*, II.135. There are some additional variants also to be noticed, e.g. *Kāśikā* III.3.78, IV.1.117, VI.1.156, VI.2.134; *Padamanījarī*, IV.3.118, IV.4.88; *Siddhāntakaumudī* V.2.64, V.2.68).

in *Samhitā-pāṭha*, *Bhāṣya*, I.340) appears to have been adopted more as a convenient device to get over stray cases of difficulty of interpretation rather than as a textual reality.<sup>1</sup>

(iii) *GAṆA-PĀṬHA*—The *Gaṇa-pāṭha* forms the most important accessory treatise to the *Aṣṭādhyāyī*. The *gaṇas* were not known in the Aindra School (Burnell, *Aindra System*, pp.28-30). They must have been Pāṇini's innovation. Patañjali definitely states that Pāṇini first compiled the *Gaṇa-pāṭha*, and then composed the *sūtras* (*Evam tarhi Āchārya-pravṛttir-jñāpayati sa pūrvah pāṭho'yam punah pāṭhaḥ* I.1.34; 1.92-93). Yuan Chwang's reference that Pāṇini collected a multitude of words and made a book, almost endorses Patañjali's statement regarding the priority of the *Gaṇa-pāṭha* to *Sūtra-pāṭha*.

The significance of the *Gaṇa-pāṭha* is that it introduces a comprehensive principle of classification by which similar grammatical formations may be grouped together and brought under the operation of a common grammatical rule. By this original device a large mass of linguistic data is reduced to order, system and simplicity so as to make for their easy understanding. By this method Pāṇini was also able to take note of comprehensive geographical, social, political and cultural details, names of towns, regions (*janapadas*), rivers, families (*gotras*), schools (*charaṇas*), republics (*saṅghas*), as examples of single short rules. Thus Pāṇini's genius was able to utilise what was primarily designed as a grammatical technique, to throw light upon the life of the people and serve as a source of sociological and historical studies. By its flexibility the way was left open for the incorporation into the *Gaṇa-pāṭha* of new material as it cropped up in course of time so as to render the system always up to date.

A critical reconstruction of the *Gaṇa-pāṭha* is an essential part of the Pāṇinian textual problem. The *Kāśikā* has preserv-

<sup>1</sup> See also S. P. Chaturvedi, 'On the Original Text of the *Aṣṭādhyāyī*,' *New Indian Antiquary*, Vol. I. pp. 562-569.

ed lists of words belonging to each *gaṇa*. The evidence of the *Chāndra-vṛitti* also, shows that the *Kāśikā* was following a previous tradition. Kātyāyana and Patañjali were also at pains to conserve the purity of the *Gaṇa-pāṭha*. In many cases they have critically examined the inclusion of certain words in a particular *gaṇa*, e.g. *ulūka* and *Kṣudraka-Mālava* in *Khaṇḍikādi* (IV.2.45); *ṛṣinamana* in *Kṣubhuṇādi* (VIII.4.39); *Śakalya* in *Lohitādi* (IV.1.18, on which there is a long discussion); *takṣan* in *Śivādi* (II.262; Kātyāyana has three *vārttikas* to discuss the reading in the group); *Garga-Bhārgavikā* in *Gopavanādi* (II.4.67; I.492); and *Ātharvan* and *Ātharvaṇa* in the *Vasantādi* group (*Bhāṣya* II.320, cf. Patañjali's remark that the words are read four times in the *Aṣṭādhyāyī*).

Their discussions, helpful in reconstructing a genuine text of the *Gaṇa-pāṭha*, create the impression that the Pāṇinian tradition attached as much authority to *gaṇas* as to *sūtras*. It is, however, difficult at present to ascertain in all cases whether a particular word was originally included in its *gaṇa*. The commentaries on Pāṇini have proceeded on the assumption that the basis of the *Gaṇa-pāṭha* is generally sound. We must agree with Dr. Bhandarkar that most of the words in the *gayas* must have been handed down from the time of Pāṇini himself, a good many being cited by Patañjali in his great commentary (*Ind. Ant.*, I.21). For example, the *Yaskādi* group (II.4.63) is analysed by the *Kāśikā*; out of a total of 36 words 16 have been directly traced to 5 different *gaṇas* of Pāṇini, viz. the first five words to *Śivādi* (IV.1.112); Kudri, Viśri, Ajabasti, Mitrayu to *Gṛishtyādi* (IV.1.136); Pushkarsad to *Bābhvādi* (IV.1.96); Kharapa to *Naḍādi* (IV.1.99); Bhalandana again to *Śivādi* (IV.1.112); and Bhaḍila, Bhaḍita, Bhaṇḍita to *Aśvādi* (IV.1.110). Moreover, intrinsic evidence from the *sūtras* in support of *Gaṇa-pāṭha* is sometimes available; e.g. the reading of *Pravahana* in IV.1.123 is presumed by the *sūtra* VII.3.28; or the reading of the *gaṇa* *Sarvādi* is authenticated by several *sūtras* of Pāṇini himself like *Pūrvādi* (VII.1.16), *Dvyādi* (V.3.2), *Ḍatarādi*

(VII.1.25) and *Tyadādi* (VII.2.102). The *Lobitādi-Katanta* group was included in the *Gargādi gaṇa* (IV.1.105), which like the *Bidādi* (IV.1.104) must be considered as one of the best preserved groups.

On the other hand the text of the *gaṇas*, especially of those which were called *ākṛiti gaṇas* (i.e. of which the list was left open by Pāṇini himself), did lend themselves to later additions. Patañjali distinguishes two kinds of *gaṇas*, firstly those fixed (*paṭhyante*) by Pāṇini, and secondly those which were only illustrative (*ākṛiti*).<sup>1</sup> The process of interpolation must naturally have been more freely operating in the case of groups which were of linguistic importance, as *Ardharcādi* (II.4.31), *Gaurādi* (IV.1.41), *Tārakādi* (V.2.36). On the other hand, *gaṇas* containing lists of proper names were comparatively more stable, as they tended to become obsolete in time. Pāṇini's names of *gotras* could be verified in the light of lists given in the oldest *Śrauta-sūtra* text of Baudhāyana in the *Mahāpravarakāṇḍa*. Groups in which geographical names predominate (e.g. *Dāmanyādi* and *Taksasīlādi*) can to some extent be verified from the mention of those place-names in old independent sources, as the Pāli literature, the *Mahābhārata* and the accounts of the early Greek writers. A large percentage of place-names in the *gaṇas* is undoubtedly archaic, and in many cases not traceable outside the *Aṣṭādhyāyī*. For example, the tribe of the *Sāvitrīputrakas* in the *gaṇa* *Dāmanyādi* (V.3.116) must date from Pāṇini himself, as it is unknown in literature except in one passage of the *Kaṇva-parvan* (*Mbh.*, 5. 49). At any rate the possibility of fresh accretions to lists of *janapadas* and place-names was considerably less after their examination by Patañjali.

In a *vārttika* on the *Kraṇḍyādi gaṇa* (IV.1.80) Katyāyana refers to the *Raṇḍyādi* class, which Patañjali informs us was identical with the former (*Bhāṣya*, IV.1.79; II.233). Since

<sup>1</sup> Cf. Patañjali on II.1.59, *Śreṇyādayaḥ paṭhyante, kṛitādir-ākṛiti-gaṇaḥ*, i.e. of the two groups in the same *sūtra* one was fixed and the other was only illustrative.

*Raudhī* is not included in the Pāṇinīya *Gaṇa-pāṭha*, we may infer that in some other grammar (*vyākaraṇ-āntara*) the *gaṇa* was named after it. We are indebted to Bhartṛhari for the valuable information that the grammar of Āpīśali (a predecessor of Pāṇini) arranged the words of the *gaṇa Sarvādī* (I.2.27) in a different order (Kielhorn, Intro. *Bhāṣya*, II.19). The fact, however, remains that the *Gaṇa-pāṭha* evidence is at best only secondary and should always be taken with caution.

**KĀŚIKĀ, ITS VALUE FOR PĀNINIAN TRADITION—**  
The *Kāśikā* is now the only ancient, exhaustive, concrete and authoritative commentary on the *Aśbādhyaī*. According to Haradatta it was written at Banaras (*Kāśishu bhavā*). Its importance for interpreting Pāṇini cannot be overrated. Amongst previous commentaries Bhartṛhari refers to *Vṛttikāra* Kuṇi (Kielhorn, *Bhāṣya*, Vol. II. Intro. p. 21, footnote) and Kaiyaṭa mentions that Patañjali followed Kuṇi as an authority (*Pradīpa*, I.1.75, *Bhāṣyakāras-tu Kuṇi-darśanam aśiśriyat*). A comparative examination of the extent commentaries on Pāṇini, *Tripādī*, *Bhāṣyavṛtti* in quotations, *Kāśikā*, *Nyāsa*, *Padamañjarī*) shows that each subsequent author was following the pre-existing Pāṇinian tradition. a/

An intensive study of the *Kāśikā*, reveals its immense indebtedness to the *Mahābhāṣya*. In the first verse the author explicitly states his dependence on the *Bhāṣya* and also on an earlier commentary which unfortunately is left unnamed (*Vṛttau Bhāṣye*). Even the perusal of a few *sūtras* will show how completely the *Kāśikā* relied on Patañjali for its material and the stock of its examples. The numerous illustrations in the *Bhāṣya* on IV.3.42 are bodily taken by the author of the *Kāśikā*, who did his work intelligently and not as a mere copyist of the older material. In discussing the meaning of *Prāchyā-Bharata* (II.4.66) the *Kāśikā* replaces *Auddālakāyana* of Patañjali by *Ārjunāyana*, the name of a tribe nearer to its own time. (cf. reference to *Ārjunayāna* in the Allahabad Pillar Inscription of Samudragupta).

It may be noted that the *Kāśikā* does not confine itself only to the tradition of Patañjali, Kātyāyana and Pāṇini. It has cited some older traditions showing that it considered a wide range of material. The best illustration of this fact is to be found in the example to *sūtra* I.4.86, *anu-Śakaṭāyanaṁ vaiyākaraṇāḥ*, i.e. 'all grammarians were lesser than Śakaṭāyana.' *Śakaṭāyana* was a well-known predecessor of Pāṇini. The *Kāśikā* here thus cites and conserves an older grammatical tradition, though Pāṇini long ago had eclipsed the fame of Śakaṭāyana. It also proves the tenacity of the tradition embodied in the examples (*udāharaṇa*). There are also a few other examples drawn from the earlier strata of grammatical tradition.

**STOCK-EXAMPLES**—Patañjali states that the *sūtras* were related to stock-illustrations called *mūrdhābhishikta udāharaṇa* (I.1.57; I.144). According to Kaiyaṭa they were so called because they were accepted in common by all commentaries (*sarva-vṛttish-ūdāhṛitatvāt*). They formed an essential part of the *sūtra* explanation, and were sometimes considered so important as to direct the course of subsequent discussion. The illustration *śāstrī-śyāmā* on II.1.55 is a case in point, which may be as old as Pāṇini himself, for it was made by Kātyāyana the basis of one of his *vārttikas* (I.398).

**PĀṆINI AS A TEACHER**—The title *Vṛtti-sūtra* applied by Patañjali to Pāṇini's work (I.371) means that the *sūtras* of Pāṇini were the subject of a *vṛtti* or commentary, which was the result of his own teaching. Kautsa was a well-known disciple of Pāṇini as mentioned by Patañjali (*upasedivān Kautsaḥ Pāṇinim*, II.115). The *Kāśikā* adds that he was a resident pupil (*anūśivān*) of Pāṇini and was directly instructed by him (*upāśisṛvān*, III.2.108). It may be accepted that Pāṇini's explanations (*Vṛtti*) formed the model and standard for later commentaries on his *sūtras*.

Patañjali also makes the interesting assumption that Pāṇini himself was responsible for explaining some of his *sūtras* to his pupils in two different ways. As an example may be cited the

rule I.4.1, *Ākaḍārādekā samjñā*. Patañjali enquires why there should be a doubt about the correct wording, and remarks that the Āchārya (Pāṇini) had taught his pupils both the alternative readings of the *sūtra* (*ubhayathā hyāchāryeṇa śiṣyāḥ sūtram pratipāditāḥ*, I.296). Even Kātyāyana was acquainted with the alternative wordings of this rule (*cf. vārttikas* 1 and 9 on I.4.1.), for which he must have depended on a still earlier source, most likely Pāṇini's own explanation. In *sūtra* V.1.50 (*Taddharati . . . bhārād-vamśādibhyah*), we have an example of the same rule being interpreted by the *Kāśikā* in two different ways, on the authority of an unnamed commentary (*aparā vṛtti*), which occasioned its remark that both the meanings of the *sūtra* were expounded by Pāṇini himself to his pupils. (*Sūtr-ārthadvayam-api chaitad-āchāryeṇa śiṣyāḥ pratipāditāḥ*). The same unnamed commentary (*aparā vṛtti*) further provides an alternative, but equally authoritative, explanation of *sūtra* V.1.94 (*Tadasya Brahmacharyam*), on which the *Kāśikā* repeats the same statement (*ubhayam api pramāṇam ubhayathā sūtrapraṇayanāt*). The case of *sūtra* V.4.21 is similar. These instances show that Pāṇini became the originator of a tradition of *sūtra* explanation which was handed down through an unbroken succession of Pāṇinīya teachers and pupils following that system (*Tadadbite tadveda*). We have already seen that in respect of the signs of vowels, nasalisation and *svarita* accent on them, the Pāṇinīya grammar relied on an oral tradition which must have originated with Pāṇini himself as a teacher (*Pratijñānuśāsikyāḥ Pāṇiniyāḥ*, and *Pratijñā-svaritāḥ Pāṇiniyāḥ*, *Kāśikā* on I.3.2 and 11). Kaiyaṭa's comment on the *śloka-vārttika*, *tad-analpa-mater-vachanam smarata* (I.4.51; I.335), points to the unbroken continuity of the tradition (*āgamsya avicchbedam*). He also remarks that his own *Pradīpa* commentary on the *Bhāṣya* was composed in accordance with the tradition (*yathā-āgamanī vidhāsyē*, Introductory Verses).

NATURE OF THE ORIGINAL VYĀKHYĀNAS—Both Kātyāyana and Patañjali admit the necessity of a commentary

(*vyākhyāna*) to elucidate the words of the *sūtras* (I.11). The earliest commentaries were of a simple nature intended for the practical purpose of teaching. They comprised the following elements: (1) *charchā*, or *pada-vidyā*, splitting up the *sūtra* into its component parts; (2) *udāharaṇa*, examples; (3) *praty-udāharaṇa*, counter-examples; and (4) *vākya-ādhyāhāra*, or *anuvṛtti*, repeating the words of a previous *sūtra* to aid in the meaning of the subsequent *sūtra*.<sup>1</sup> The explanation emanating from the *Sūtrakāra* or from those nearest to him in time must have been of this simple character. To them should be assigned illustrations like *anu-Śakaṭāyanam vaiyākaraṇaḥ* (I.4.86), *Śakaṭāyana-putraḥ* (VI.2.133), *Nanda-putraḥ* (VI.2.133) referring to both king Nanda and his son, and *Nand-opakramāṇi mānāni* 'the weights and measures were first standardised by king Nanda, (II.4.21). The historical value of such early illustrations will be discussed in their proper places.

The antiquity and the genuineness of the Pāṇinian tradition are factors which must weigh with us in assessing the value of whatever commentaries are now left to us. Every commentary should be viewed as a link and a very important link too, in the chain of Pāṇinian interpretation. Dr. Kielhorn examining the question of the earlier authorities quoted in the *Mahābhāṣya* made the significant recognition that 'Kātyāyana was acquainted with the works of other scholars who, before him, had tried both to explain and to amend Pāṇini's grammar, and who had subjected the wording of the *Sūtras* to that critical examination, which is so striking a feature of Kātyāyana's own *Vārttikas*,' and also that 'between him and Patañjali there intervenes a large number of writers in prose and verse, individual scholars and schools of grammarians, who all have tried to explain and to amend the works of both Pāṇini and Kātyāyana.' (*Ind. Ant.*,

<sup>1</sup> नहि सूत्रत एव शब्दाः प्रतिपद्यन्ते, किं तर्हि, व्याख्यानतश्च . . . न केवलानि चर्चापदानि व्याख्यानं वृद्धिः सात् ऐच् इति । किं तर्हि, उदाहरणं प्रत्युदाहरणं वाक्या-ध्याहार इत्येतत् समुदितं व्याख्यानं भवति । भाष्य १. ११.

XVI. p. 106). The treatises of pre-Kātyāyana *vārttika* writers and pre-Patañjali exponents of *vārttikas* typified by such names as the Bhāradvājīyas, Saunāgas, Kuṇaravāḍava, Kroshtṛīyas, or more faintly symbolised in references like *kechid*, *apare*, have become mere shadows. But those ancient masters passed on the fruits of their labours to Kātyāyana and Patañjali. As observed by Kielhorn: 'To what extent Kātyāyana and Patañjali were indebted to those that went before them, we shall never know; judging from the analogy of the later grammatical literature of India we may, in my opinion, certainly assume, that, like Pāṇini himself, both have based their works on, and have preserved in them all that was valuable in the writings of their predecessors.' (*Ind. Ant.*, XVI. p. 106). This statement from one of the most eminent authorities on Indian grammar in recent times brings out the characteristic feature of the evolution of Indian grammatical tradition from Pāṇini to Patañjali, and the same with equal soundness holds good for the period from Patañjali to the *Kāśikā*.

## CHAPTER II

### GEOGRAPHICAL DATA

#### SECTION 1. INTRODUCTORY

The most important contribution of the *Asbṭādhyāyī* to the history of ancient India is its geographical information. The country, its mountains and ocean, forests and rivers, natural and territorial divisions (*janapadas*), towns and villages receive their full share of attention in the linguistic material dealt with by Pāṇini. It is here that the grammarian can be credited with having created his material in a very real sense by undertaking an original survey of the place-names in the vast area of the country stretching from Kamboja (Pamir region) and Kāpiśī (Begrām in Afghanistan) to Kalinga (Orissa) and Sūramasa (Sūrmā Valley in Assam). The question may be asked as to the *raison d'être* of the rich geographical information that a work proclaimed to deal with grammar contains.

The answer to this may be understood in this way. Place-names form an integral part of language which it is the object of grammar to discuss and regulate. The analysis which Pāṇini has given of the underlying meanings which relate names of places to social life and background, shows conclusively that such names do not originate by mere accident, but are the outcome of social and historical conditions with which a people are intimately connected. These conditions are reflected in language in the geographical names. An etymological approach to the place-names of a country reveals to us many a forgotten chapter of history and settlement on land, and the contribution that Pāṇini makes in this respect through his grammatical expositions possesses abiding historical value. He has given a list of endings of place-names by which geographical places are classified. Most of the names of the geographical

places originate, as he points out, from one or the other of the following factors:

- (1) 'this object is found in a particular place;'
- (2) 'the place was founded (*nirvṛitta*) by such and such a person;
- (3) 'the place was the abode (*nivāsa*) of such a person, or a community;'
- (4) 'the place is located in proximity (*adūrabbhava*) to a known object.'

It will thus appear that places are here distinguished for their founders, their economic products, their historical associations and their proximity to monuments. These four descriptions are termed *Chāturarthika*, 'suffixes with four-fold meaning'.

Pāṇini also instances places which have lent their names to persons as the places of their own residence (*nivāsa*), such as *Māthura*, or of their ancestors (*abhijana*, IV.3.90), such as *Saindhava*, 'one whose ancestors lived in Sindhu'. Besides persons, commodities may also be associated with places as their origin, e.g., the wine (*phalaja-madhu*) known as *Kāpiśāyana* which was known after the place of its origin called *Kāpiśi* (IV.2.99). Animals also were called sometimes after the places of their origin, e.g., *Rāṅkava* or *Rāṅkavāyaṇa*, a bull bred in the *Rāṅku* country (IV.2.100); or *Kāchchha*, a bull of *Kachchha* country (IV.2.134). There may also be other associations of names with places under the general rule stated in the *sūtras* IV.2.92-145 (*Śaishika*), e.g., *Kāśika*, 'the cloth woven at *Kāśi*' (IV.2.116). An assemblage of meanings can be seen in *Kāchchhaka* which used to denote (a) an inhabitant of *Kachchha*, (b) the turban (*chūḍā*) peculiar to its people, (c) their mannerisms in speech (*jalpita*) and laughing (*basita*). The term *Saindhava* is also cited under this rule with reference to the above peculiarities of its people.

Another class of geographical names is that of regions or provinces (*vishaya*, IV.2.52-54), called after their peoples, e.g.,

*Saiba*, the region of the Śibis; *Āprītaka*, the region of the Āprītas (=Afridis); *Mālavaka*, the region of the Mālava people. Similarly, *Rājanyaka* (of the Rājanya tribe), *Traigartaka* (Kangra), *Vāsātika* (of the *Vasātis* or the Ossadioi, Sibi in Baluchistan), *Vairātaka* (Bairāt in Jaipur), *Audumbaraka*, and so forth. The names according to *visaya* seem to be based on the ethnic distribution of population over particular areas for the time being without reference to the form of government.

Places were also named after the nature of their polity. Thus Pāṇini divides *janapadas* into two classes, firstly *janapadas* under monarchy (*Ekarāja*) enumerated in *sūtras* IV.1.168-176; and secondly *janapadas* as republics (*Śaṅgha*), such as Vāhika where flourished the Āyudhajivī Śaṅghas (Military Republics).

The suffixes applied to these names point to the types of government (*Tadrāja*) associated with their names.

This in short illustrates Pāṇini's scientific classification of place-names on the basis of the principles underlying their formation.

Names of rivers, forests and mountains are noticed not in connection with any social or historical significance, but as examples of linguistic peculiarity, such as vowel-lengthening (VI.3.117-120) or cerebralisation (VIII.4.4-5).

Kātyāyana and Patañjali following Pāṇini add more examples to his. For instance, under *Sālvāvayava* (IV.1.173) Patañjali mentions the names of the states belonging to the Sālva Janapada (*Bhāshya*, II.269); under *sūtra* IV.1.172 illustrating names of countries beginning with the letter *n*, Nichaka and Nipa (II.269); and under the Rājanya *gaṇa*, Vasāti, Devayāta, Bailvavana, Ambarīshaputra and Ātmakāmeya, which probably go back to Pāṇini himself (IV.2.52; II.282).

## CH. II, SECTION 2. COUNTRY

**GEOGRAPHICAL HORIZON**—Pāṇini knew of a wider geographical horizon. The extent of the country known to him is indicated by several landmarks mentioned in the *sūtras*. The western-most point is Prakaṇva corresponding to the term *Pari-kanioi* mentioned by Herodotus and to the modern country of Ferghana. It may be noted that Pāṇini names Ṛishi Praskaṇva in *sūtra* VI.1.153 and from this name is derived as a counter-example, as given by the *Kāśikā*, the name of the country called Prakaṇva. To the south of Ferghana lay Kamboja (IV.1.175), which as will be shown later may be identified with the region of Badakshan-Pamir. South of it lay Kāpiśi (IV.2.99), capital of the kingdom of Kāpiśa, which may be identified with modern Kafiristan, south-east of the Hindukush. South of Kāpiśi was situated Gandhāra (IV.1.169) comprising the valley of the Kabul river, with its frontier outpost at Takshaśilā (IV.3.93).

There are also mentioned from west to east *janapadas*, of (1) Madra (IV.2.131), (2) Uśīnara (IV.2.118), (3) Kuru (IV.1.172), (4) Bharata, called also Prāchya-Bharata as the dividing line between north (Udīchya) and east (Prāchya) (IV.2.113).

Eastern India is known by its divisions called (1) Kosala (IV.1.171) (2) Kāśi (V.2.116) (3) Magadha (IV.1.170) (4) Kalinga (IV.1.170) and Sūramasa (IV.1.170).

On the west side the country of Kachchha is mentioned (IV.2.133), and also the islands of the adjoining sea (*anusamudra dvīpa*, IV.3.10).

Further up, modern Sind is mentioned under the name of Sauvīra. Pāṇini had a direct knowledge of the country as he shows acquaintance with its social life (formation of its *gōtra*-names) as will be explained later.

The southern limit of his horizon is indicated by the mention of Aśmaka (IV.1.173) of which the capital as known from other sources was Pratishṭhāna, modern Paṭhan on the Godāvarī.

**DIVISIONS OF THE COUNTRY**—Udīchya and Prāchya are the two broad divisions of the country mentioned by Pāṇini, and these terms occur in connection with the linguistic forms known to the eastern and northern grammarians. The Udīchya country included Gandhāra and Vāhika, the latter comprising Madra and Uśīnara, and possibly Trigarta also. The Kuru region in the south-east of the Punjab was contiguous with the Bharata *janapada*. The Bharata region separated the east from the west, as shown by Pāṇini's reference to Prāchya-Bharata, on which Patañjali remarks that the proper Prāchya country lies outside the sphere of the Bharatas (II.4.66; I.493, *anyatra prāg-graṇe Bharata-graṇaṇi no bhavati*). The river Śarāvātī mentioned in Pāṇini (VI.3.120) formed according to commentators the boundary between the two divisions of Udīchya and Prāchya. It may probably be identified with the Drishadvatī or Chitāṅg flowing through Ambala district.

Both Udīchya and Prāchya were taken as the home (*Lōka*) of standard Sanskrit both in Pāṇini's time and earlier. In the time of Patañjali, however, this became contracted to Āryāvarta as the home of the *śiṣṭas* (persons proficient in the *śāstras*) whose language set its norm.

## CH. II, SECTION 3. MOUNTAINS, RIVERS AND FORESTS

Pāṇini shows knowledge of the mountainous regions called Himālaya, with its perpetual snow (*himānī*, IV.1.49), its melting (*bima-śratba*, IV.4.29), uplands (*adbityakā*) and lowlands (*upatyakā*, V.2.34). In this connection the expressions Antargiri and Upagiri (with variant forms Antargiram and Upagiram, according to the opinion of *āchārya* Senaka, V.4 112) are especially noteworthy as proper names also known to the *Mahābhārata*, the former signifying Himālaya proper (Antargiri—'Heart of Himālaya'), same as Pāli Mahāhimavant or the Great Central Himālaya including its highest peaks, such as Gaurīśaṅkara, Nandādevī, Kedāranātha, etc., and the latter the sub-Himālayan region of low-lying peaks (Pāli Chulla-Himavant). The *Mahābhārata* also adds Bahirgiri, signifying the outlying region of the Tarāi (Sabhā., 27.3).

Pāṇini mentions some particular hills: (1) Tri-kakut (V.4.147) so-called from its three peaks, a name first used in the *Ātharvaveda* as the source of a salve (*añjana*), which may be identified with the Sulaiman mountain, famous as the source of antimony all over the Punjab and Sind (probably same as Sauvīrañjana; cf. *Vedic Index*, I.329); (2) Vidūra (IV.3.84) as the source of the precious stone called *vaidūrya*, cat's eye, which according to Patañjali was quarried at Vālavāya and treated by the lapidaries in Vidūra, probably Bidar (cf. Pargiter, *Mārķ.*, p. 365, for Vaidūrya as Satpura); (3) Kimśulakā-giri (VI.3.117), to which the *Gaṇapāṭha* adds five more names, viz., Śālvakāgiri, Añjanāgiri Bhañjanāgiri Lohitāgiri, Kukkuṭāgiri.

These six names seem to be taken from some *Bhuvankosha* list, giving in order the ranges on the western frontiers from Afghanistan to Baluchistan.

Starting from below, Śālvakāgiri is phonetically the name of

Hālā Range lying north-south between Sind and Baluchistan. To the west of it is the Makran chain of hills, the home of the Hiṅgulā river and Hiṅgulāja goddess. Hiṅgulā seems to be the Prakrit form of Kirṇśulakā. It was also called by its synonymous name, the Pārada country, Pardene of classical writers, corresponding to *Pārdāyana* of Patañjali (IV.2.99). Goddess Hiṅgulā of this place is of vermilion colour, also called Dadhi-parṇī, because of its association with the ancient Scythian tribes of Dahae and Parnians. It was worshipped also as Nānī, or Nanā of antiquity.

The next great range is that of Sulaiman mountains which as the source of a famous salve was rightly celebrated as Añjanā-giri. With the other two ranges of Tobā Kākaḍ and Shingar to the west of it, Sulaiman with its triple chain was rightly called Trikakut which seems to have been its Vedic name (*Ātharva.*, IV.9.8), also recorded by Pāṇini (V.4.147).

The next step lands us into Afghanistan. Here we have two conspicuous mountainous ranges, *viz.*, one in the north-east of Kabul called Hindukush and the other to the south-west of Kabul called Koh-i-Bābā. The old name of Hindukush was Lohitāgiri (cf. *Kāśikā* on IV.3.91 where the military highlanders of Rohitagiri are referred), from which Afghanistan in medieval geography was called Roha (*Ling. Survey of India*, X, p.5). In the route of Arjuna's conquest we read of Lohita with its ten tribes after Kashmir (*Sabhā.*, 27.17). This can apply only to Hindukush and its martial tribes occupying the valleys of Kohistan-Kafiristan.

Sandwiched between the Sulaiman (Trikakut) and the Hindukush (Rohitagiri) we find a little to the west the Koh-i-Bābā range which acts as the central watershed for the dispersal of waters to the south, west, north and east. A glance at the map of Afghanistan points to it most probably as being the Bhañjanā-giri.

The last name Kukkuṭā-giri seems to represent the comparatively low peaks in the west of Afghanistan towards Herat

which in Iranian geograhly were called *Uparisaena*, "The Falcon's Perch", and by the classical writers Paropamisus, with special reference to their low height.

In *sūtra* IV.3.91 Pāṇini mentions peoples who lived by the profession of arms and were settled in hilly regions (*Āyudhājīvivhyaśchbaḥ parvate*). Hṛidgola, Andhakavarta and Rohitagiri are mentioned as names of particular hills occupied by these military Highlanders. The mention of Rohitgiri suggests their identification with the mountainous tracts in Afghanistan known as Rōha, the Tribal Area which is still the recruiting ground of good soldiery. In the *Mārkaṇḍeya Purāṇa* the home of the Highlanders (*Parvatāśrayiṇaḥ*, 57.56) is placed in the region of Nihāra or Jalalabad (for which the *Vāyu* gives the true reading Nagarahāra; Pargiter, *Mar. P.*, p. 345). It may be added that Patañjali gives several new names of mountain-dwellers, of which Mālāvat (II.287) is noteworthy as corresponding to Malākand, the mountainous district north of Dargai, the home of the Dārgalas in the country south of the Swat river.

**FORESTS**—Several names of forests are mentioned in *sūtras* VIII.4.4-5. Of these the five names enumerated in the first *sūtra* occur also in the *Koṭṭarādi gaṇa* giving a list of forest names (VI.3.117). Of these the Puragāvaṇa seems to be connected with Pāṭaliputra as the *Gaṇaratnamahōdadhi* associates the Yakshī Puragā with Pāṭaliputra (verse 291). Miśrakāvaṇa appears to be the name of the well-known forest of Misrikh in Sitapur district. The Pāli literature, however, makes Missaka a mythical forest of the Tāvātimsa heaven (*Jātaka*, VI.278; *Dict. Pāli Proper Names*). The other names, i.e. Sīdhrakā-, Sārikā-, Koṭṭarā- and Agrevāṇa are unidentified. Similarly names like Śaravaṇa, Ikshuvaṇa, Plakshavaṇa, Amravaṇa, Kārshya-vaṇa, Khadiravaṇa and Piyūkshābaṇa included in *sūtra* VIII.4.5 cannot be definitely identified since Pāṇini takes them both as proper and common names. Some of these proper names are known in Pāli works; they may not have been big

forests but mere groves of trees situated in the vicinity of big towns. For example, Khadiravaṇa occurs in the *Aṅguttara Nikāya* as the birth-place of the teacher Revata who was the foremost of the forest recluses and called Khadiravaṇīya after the place of his birth. Similarly Śaravaṇa is said to have been a settlement in the neighbourhood of Śrāvastī, where another great teacher Gosāla Maṅkhaliputta was born. Āmraṇa is said to have been attached to the city of Rājagriha, and also Kāmpilya.

Forests of herbs and big trees (*Vibhāshaushadhi-vanaspati-bbyaḥ*, VII.4.6) and those reserved for the grazing of cattle (*goshpada*, VI.1.145; *āśītaṁ-gavīna aranya*, V.4.7) are also mentioned.

**RIVERS**—On the north-west frontier Pāṇini mentions the river Suvāstu (IV.2.77; Swat). This river with its tributary the Gaurī (mod. Panjkora) flowed through Gandhāra of which the upper part was known as Uḍḍiyāna, famous for its blankets called *pāṇḍu-kambala*, mentioned by Pāṇini (IV.2.11). The western capital of Gandhāra was Pushkalāvātī which is identified with modern Charsadda a little above the junction of the Swat with the Kābul river. The *Kāśika* mentions Pushkarāvātī as the name of a river in three *sūtras* (IV.2.85; VI.1.219; VI.3.119) along with certain other names as Udumbarāvātī, Viraṇāvātī, Maśakāvātī. Of these Maśakāvātī seems to be identical with the name of the river on which Massaga or Massaka, capital of the warlike people known as the Āśvakāyana was situated. It is possible that Pushkalāvātī and Maśakāvātī were the designation of only those particular portions of the river Swat where it flowed past by these two great towns of Gandhāra in the south and north respectively. It may be added that Patañjali mentions Udumbarāvātī, Maśakāvātī, Ikshumatī and Drumatī definitely as names of rivers (II.287). Of these Udumbarāvātī may have flowed through the country of the Audumbaras, and Ikshumatī (also included in the Madhvādi group, IV.2.86) is identical with a tributary of the Ganges re-

ferred to as Oxymagis by Arrian and now known as Īkhan (also Kālindī) flowing through Farrukhabad district.

The next great river mentioned in the north-west is the Sindhu after which the country to its east was named Sindhu, the present Sind-Sagar Doab (IV.3.93). Taking its rise from the snows of western Kailāsa in Tibet, the Sindhu first flows north-west for about half of its length, and then reaching the Darad country in the north-west of Kashmīr and south of Little Pamīr it takes a southward course along which lay its most famous places. A geographical feature of the Indus descending from the defiles of Dardistan is expressed in the grammatical formation *Dāradī Sindhubh*, naming it after its immediate source (*Prabhavati*, IV.3.83). Emerging from the Darad highlands the river enters the Gandhāra country with Swat or Uḍḍiyāna on its right and the ancient *janapada* of Uraśā (mod. Hazara in N.W.F.P.) on its left until it receives its most important western tributary the Kabul river at Ohind, a few miles north of Attock where it is at present crossed by a bridge. Ohind was the ancient Udbhāṇḍa, the place of transshipment of goods across the Sindhu and the spot where the great northern trade-route called Uttarapatha in *sūtra* V.1.77 crossed the river. Pāṇini's own birth-place, Śālātura was a riparian town of the Indus situated at a distance of only about four miles from Ohind in the angle of the Kubhā and the Sindhu. About sixty miles east of Udbhāṇḍa was Takshaśilā, the eastern capital of Gandhāra, and at an equal distance to the west was Pushkalāvati (mod. Charsadda), its western capital. The trans-Indus country was known in ancient times as *Pāre-Sindhu* (*Sabbāparva*, 51-11). Its famous breed of mares imported into India is mentioned by Pāṇini as *Pāre-vaḍavā*, 'the mare from beyond the border' (VI.2.42).

Varṇu, corresponding to Bannu on the other side of the river is mentioned in a *sūtra*, and also *Gaṇa-pāṭha*. The Bannu valley is drained by the rivers Kurram (Vedic Krumu) and the Gambila or Tochi which unite and flow into the Indus. The

*Kāśikā* commenting on *sūtra* IV.2.103 speaks of Varṇu *deśa* named after the river Varṇu (*Varṇur-nāma nadas-tat-samīpo deśo Varṇuḥ*). It appears that the Kurram river after it left the Kurram Agency and from the point where it enters the Bannu valley was named Varṇu in ancient days. The place situated in proximity to Varṇu is mentioned as Vārṇava (IV.2.77, *gaṇa Suvāstvādi*). Although Bannu (Edwardesabad) is a modern town founded only in 1848, the valley after which the town was named is mentioned in ancient texts. Opposite Varṇu, across the river, was situated the famous Kekaya *janapada* mentioned in *sūtra* VII.3.2, comprising parts of the three modern districts Jhelum, Gujrat and Shahpur, adjoining which lay the Salt Range (Saindhava). To south of Kekaya was situated the Sindhu *janapada* lying north to south between the rivers Jhelum and Indus. Along the lowermost course of the river Sindhu was situated the ancient Sauvīra *janapada* (IV.1.148), now known as Sind.

Of the rivers of the Punjab, Pāṇini mentions Vipās (Beās) and the wells dug on its north side (*Udak cha Vipāsah*, IV.2.74). The northern wells were more stable as being on high and dry ground than those on the other side and the former were therefore distinguished by the peculiar accent on their names.

Pāṇini names two other rivers, Bhidya and Uddhya (*Bhidy-ōddhyau nade*, III. 1. 115). Uddhya is the same as Ujh flowing through Jasrota district and falling into the Rāvi (*Imperial Gazetteer of India*, Vol. XV, p. 73; located to the north-west of Mādhopur on the Rāvi, p. 107). On Pāṇini II.4.7 the *Kāśikā* illustrating the compound names of two rivers cites the example *Uddhy-Erāvati*, that is Uddhya and Irāvati, the former of which we must consider as a tributary of the latter on the analogy of *Gaṅgā-Śoṇam*, another example of the same rule, and of the counter-example *Gaṅgā-Yamune*. Bhidya may be identified with a river named Baī, rising in Jammu about 15 miles to the west of Ujh, and flowing into the Rāvi in the

Gurdaspur district. The names Uddhya and Bhidya suggest that they dried up in summer but flowed in torrents in the rains, as indicated by Kālidāsa who describes their brisk and wayward movements as those of lusty youths like Rāma and Lakshmaṇa (*Raghuvamśa*, XI.8).

DEVIKĀ—Pāṇini also mentions the river Devikā and what grew on its bank (*Dāvikā-kūla*, VII. 31.1), which Patañjali describes to be *śālī* rice (III. 316). Pargiter rightly identified it with the river Deg (*Mārk. Purāṇa*, p. 292). According to the *Viṣṇudharmottara Purāṇa* (I.67.15) the Devikā flowed through the Madra country, and joined the Ravi according to the *Vāmana* (ch. 84). Rising in the Jammu hills, the Deg flows through Sialkot and Sheikhpura districts and joins the Ravi. In each rainy season it deposits on its banks layers of rich alluvium soil which produce rice of fine quality that are famous all over the Punjab and exported from Muridke and Kamoke towns. (cf. Jagannath Agarwal, *On the Identification of the Devikā*, JUPHS, 1944, Pt. II, pp. 76-79).

Pāṇini mentions another river Ajiravatī (VI.3.119) the Achiravatī of Pāli texts (modern Rapti) on which stood Srāvastī. The next river mentioned in this region is Sarayū (VI.4. 174) of which the Rapti is a tributary. It may be noted that Sarayū was also the name of a river in remote R̥igvedic India flowing past Herat (derived from Hari-Rūd; cf. Old-Persian Harayū from Vedic Sarayū). Darius I (516 B.C.) in his inscription mentions *Haraiva*, the people of Harayū, equal to Pāṇini's *Sārava*. In the Elamite version of the Behistun inscription occurs the name Arriya (=Haraiva=Gk. Aria with its capital at Heart).

Another river Rathaspā is mentioned in the *Gaṇa-pāṭha* to *sūtra* VI.1.157 (*Bhāshya*, III. 96, *Rathaspā nadī*). This name occurs in the *Jaiminīya Brāhmaṇa* (Caland, JB., Extract 204) and in the *Ādiparva* (172.20) where it is one of the seven sacred rivers between Sarasvatī on the one side and Gaṇḍakī on the other. Most probably it was a river of Pañchāla and the name

may correspond to Rhodopha which is mentioned by the Greek writers as marking an important stage on the great royal road from the frontier to Pāṭaliputra. Rhodopha is stated there to be 119 miles from the Gaṅgā; although it is called a town but the mention of the stages generally between two well-known rivers as Jhelum and Beās, Sutlej and Jamna, suggests its having been the name of a river (*Megasthenes*, *Fragm.* LVI; *Rawlinson Intercourse between India and the Western World*, p. 64). the distance of 119 miles lands us on the banks of the Rāmagaṅgā which is the only big river between the Gaṅgā and the Sarayū to present difficulties of crossing so as to merit the name Rathasthā, given to it in the Vedic period, and which is still in its upper course known as Ruhut or Ruput (*Imp. Gazetteer, U. P.*, I.166). The distances from Hastināpur on the Gaṅgā to Bareilly on the Rāmagaṅgā, and from Bareilly to Kanauj where the Rāmagaṅgā falls into the Gaṅgā, are equal to the stages of the Royal Road mentioned by Megasthenes from the Gaṅgā at Hastināpura to the town of Callinipaxa identified with Kanauj as the river Kālindī joins the Gaṅgā near it.

Rathaspā or Rathasthā as the name of a river occurs as an independent *sūtra* in the *Ṛiktantra Prātiśākhya* (*sūtra* 209).

Śarāvātī is mentioned in *sūtra* VI.3.120 (*Śarādīnām cha*). Several rivers lay claim to this name (cf. *Dey's Geog. Dict.*), the most famous one was that which separated the Udīchya from the Prāchya country already noted.

Of the rivers of Central India (now Vindhya-Pradeśa) Pāṇini mentions Charmaṇvatī (Chambal, VIII.2.12).

Pāṇini uses the term Rumaṇvat, which the *Kāśikā* connects with a place producing salt (*Lavaṇa-śabdasya rumaṇa-bhāvo nipātyate*). The form Rumaṇvat may have been based on the name Rumā, a river or lake in the district of Sambhar in Ajmer which is also the source of the river Lūnī.

**DESERT REGIONS** — Pāṇini mentions a desert region as *dhanva* (IV.2.121), of which two examples are cited by Patañjali, viz. Pāre-Dhanva and Āshṭaka (II.298), and another by

the *Kāśikā* as *Airāvata*. *Pāre-dhanva* literally means 'across the desert,' which seems to refer to the region called Thar-Parkar to the west of the Marusthala desert of Rajasthan. *Āshṭaka-dhanva* seems to be the name of the desert region of the Attock district which is called Dhanni, probably from *dbanva*. East Gandhāra included the desert of Attock and the hilly tracts of Rawalpindi called *Prithi<sup>4</sup>janapada*, both of which are preserved in the joint name Dhanni-Pothowar. The *Bhīshma-parva* (VI. 7) places *Airāvata-varsha* beyond the *Sītā* or Yarkand river in Chinese Turkestan where we may look for *Airāvata Dhanva* in the desert regions of Central Asia.

## CH. II, SECTION 4. JANAPADAS

An important geographical term used by Pāṇini is *Janapada*, which was both a state and a cultural unit, its culture counting more than its geography. Its cultural integrity was reflected and preserved in the manners, customs and above all the dialect of its people. The citizens of the same (*samāna*) *janapada* were called *sajanapadāḥ* (VI.3.85). The *janapadas* known to Pāṇini are the following:—

1. Kamboja (IV.1.175). Gandhāra, Kapiśa, Bālhika, and Kamboja are the four *janapadas* the relative positions of which should be clearly understood. Of these Gandhāra extended from Takshaśilā, its eastern capital, to the river Kunar, its western boundary, and from the river Kābul in the south to Swat in the north. Next to it was the kingdom of Kapiśa coinciding with modern Kafiristan and occupying the whole area between the river Kunar and the Hindukush. The latter mountain identified as Rohitāgiri separated Kapiśa from Bālhika. Sometimes Kapiśa politically formed part of Gandhāra, as in the reign of Darius, and then the name Gandhāra was applied to both of them. In none of these three *janapadas* can Kamboja be included. It stands as a separate *janapada*, which Lassen correctly identified with the head-waters of the Oxus comprising the Ghalcha-speaking areas of Pamir.

This identification is also supported by important linguistic evidence, *viz.* that the root *śava* 'to go' which was noticed by Yāska as a peculiarity of Kamboja speech (*Śava-tir-gatikarmā Kambojesbveva bhāshyate, Nirukta*, II.2), is still current there. (Cf. Grierson, *Linguistic Survey of India*, Vol. X, pp. 468, 473, 474, 476, 500, etc; Jayachandra, *Bhārata-Bhūmi*, pp. 297-303). The Kambojas are known as Kambu-

jiya in the Old-Persian Inscriptions. In the *Aitareya Brāhmaṇa* the Uttarakurus and the Uttaramadras are described as living beyond the Himālaya (VIII.14); and in the *Vaiśa Brāhmaṇa* Kāmboja Aupamanyava is spoken of as a pupil of Madragāra, from which the *Vedic Index* postulates a possible connection of the Uttaramadras with the Kambojas, who probably had Iranian as well as Indian affinities, (*Vedic Index*, I.84, 138 cf. also Jean Przyluski, *An Ancient People of the Punjab: The Udumbaras*, *Journal Asiatique*, 1926, p.11 showing that Bālhika was an Iranian settlement of the Madras; Bālhika-Uttaramadra).

2. *Prakaṇva*. The name is a corollary to Praskaṇva in *sūtra* VI.1.153 and is stated by the *Kāśikā* to have been a country (*deśa*). It should be identified with the people mentioned by Herodotus as *Parikanioi*, (modern Ferghāna, Sten Konow, *Kharoshthī Ins.*, p. xviii) who are said to have formed part of the empire of Darius. Prakaṇva was thus situated immediately to the north of Kamboja or the Pamir region.

3. *Gandhāra*. Pāṇini mentions both the Vedic form Gāndhāri as the name of the *janapada* and its people in *sūtra* IV.1.169, and its later form Gandhāra in the *gaṇas* to IV.2.133 and IV.3.93. Gandhāra extended from the Kābul Valley to Takshaśilā. Two towns of Gandhāra are mentioned, *viz.* Takshaśilā, its eastern capital, and Pushkalāvati, the western. The latter occurs in a *gaṇa* as the name of a river on which the town stood. The Greeks refer to it as Peucelaotes (modern Charsadda, situated near the junction of the Swat with the Kābul). The Pushkalas of the *Mārkaṇḍeya Purāṇa* must be the people of this region. The country between the rivers Suvāstu and Gaurī was known as Uḍḍiyāna which Kātyāyana mentions as Aurdāyana (*Bhāṣya*, IV.2.99; II.292). It was considered in ancient days a part of Gandhāra. A special variety of blankets known as *pāṇḍu-kambala* (IV.2.11) was a product of Gandhāra. Gandhāra is also known to the *Atharvaveda* for its wool.

4. *Sindhu*. Sindhu was originally the name of the river, which gave its name to the whole country. The term Sindhu was corrupted to Hi(n)du in the Old Persian inscriptions of Darius I (516-485 B. C.) and to Indus by the Ionian (=Pāṇini's Yavana) Greeks. Sindhu as a *janapada* may be identified with Sind-Sāgar Doāb, the region between the Jhelum and the Indus. Most of it is now the sandy desert of Thal.

5. *Sauvīra* (IV.1.148). Pāṇini mentions Sauvīra and gives valuable social history of the region. It was the home of many *gotras* of which he names two, Phāṇṭāhṛiti and Mimata, and the *Kāśikā* following an old tradition adds Bhāgavitti, Tārṇabindava, Akāśāpeya, Yamunda and Suyāmā. Bhāgavitti is also mentioned by Patañjali (II.243) and may be identified with the present Bugti tribe on the northern border of Sind, numbering about thirty thousand. Pāṇini mentions Śarkarā or Śārkarā (modern Sukkur on the Indus) as a town (IV.2.83). The name was suggested by its proximity to the rocky region (*śarkarāyāḥ adūrabbavaḥ*) on the borders of which Sukkur is situated.

Pāli literature mentions Rauruka (modern Rori in Upper Sind) as the capital of Sauvīra.

6. *Brāhmaṇaka*. It is mentioned in Pāṇini's *sūtra* V.2.71. Patañjali definitely calls it a *janapada* (*Brāhmaṇako nāma janapadaḥ*, II.298). The significance of its name is brought out by the *Kāśikā*, which describes it as the land of Brahmins who were *āyudhajīvins* or followers of military art, (*yatrāyudhajīvino Brāhmaṇāḥ santi*). Their military traditions continued up to the time of Alexander whose invasion they resisted with patriotic heroism (Plutarch, *Alex.*, 59). The Greeks call them *Brachmanoi* and locate them in middle Sind (*Arrian*, VI.16), of which the capital is still called Brahmanabad (Cunningham, *Ancient Geog.*, p. 310).

It may be noted that even Rājasekhara (9th century A. D.) names Brāhmaṇavaha ('abode of Brāhmaṇas') as one of the *janapadas* of the west. The Muslim geographers called Brah-

manabad as Bahmanwā after this old tradition.

It may be noted that Patañjali mentions two formations *a-Brāhmaṇaka* and *a-Vṛishalaka* as names of countries (I.301), corresponding to Śaudrāyaṇa and Brāhmaṇaka respectively.

Śaudrāyaṇa or the Śūdra country is mentioned along with other names in the *gaṇa* Aishukāri (IV.2.54) which denoted names of countries after their peoples (*Vishayo deśe*). Like the Brāhmaṇas, the Śaudrāyaṇas (=Greek *Sodrae*) also are mentioned as having opposed Alexandar. Cunningham treats the present Sodā Rajputs of south-east Sind around Umarkot as their descendants (*Ancient Geog.*, p. 291). Diodorus couples the *Sodrae* with the *Massanae* as occupying the opposite banks of the Indus. Cunningham equates the *Massanae* with the *Mausarnaioi* of Ptolemy, which name corresponds to the Masūrakarṇa (derivative Mausurakarṇa) of the *Gaṇa-pāṭha* (II.4.49; IV.1.112).

7. *Apakara*. This name is mentioned along with Sindhu in *sūtra* IV.3.32, to explain the forms Apakaraka and Āpakara, denoting its products. It may be identified with Bhakkhar on the Indus in Mianwali district.

8. *Pāraskara* (VI.1.157). This is mentioned in the *gaṇa* Pāraskara-prabhṛiti. Patañjali treats it as a country (*Pāraskaro deśah*, III.96). The name corresponds to Thara-Pāraka (Thara being the Sindhi form of Thala meaning dry country or desert; as opposed to Kachchha or *jāṅgala* country), one of the biggest districts of Sindh which once denoted the whole of its south-eastern part up to the coast of the Great Rann of Kachchha or Kachchha-Iriṇa.

The *Riktantra* takes the name Pāraskara as that of a mountain, and the term Pārakara for non-mountainous region, such as the Thar-Parkar district (*Pāra parvate*, IV.5.10, Suryakant's edition, p. 41).

9. *Kachchha* (IV.2.133). Kachchha represented the water-logged portions in the south as against the dry desert area

in the north. Kachchha was historically connected with Sindh forming its province in the seventh century when Yuan Chwang visited the country. Cunningham says that Kachchha and Parkar have always been linked together (*Anc. Geog.*, p. 347). Pāṇini also refers to the names of towns ending in Kachchha (IV.2.126), which were mostly situated along the coast from Bhṛigu-Kachchha to the province of Kachchha. The inhabitants of the Kachchha *janapada* were known as Kāchchhaka, and a reference to their peculiarities in speech, laughing and dress has already been noted.

10. *Kekaya* (VII.3.2). The descendants of the Kshatriyas of the Kekaya *janapada* were known as Kaikeya. The ancient Kekaya *janapada* consisted of the territory now comprised in the three districts of Jhelum, Shahpur and Gujerat.

11. *Madra* (IV.2.131). Madra was a part of the Vāhika country, as already seen, with its capital at Śākala, modern Sialkot. Pāṇini mentions two divisions of Madra, Pūrva (Eastern) and Aparā (Western) (*Diśo'Madrāṇām*, VII.3.13; also IV.2.108). Pūrva-Madra extended from the Ravi to the Chenab and Aparā-Madra from the Chenab to the Jhelum.

In the *Mahābhārata* Śākala is mentioned as the chief city of the Vāhikas on the Āpagā river. Patañjali also mentions Śākala as a Vāhika-*grāma* (IV.2.104; II.294; cf. also *Kāśikā*, IV.2.117). Pāṇini does not explain the derivation of the name Vāhika. Kātyāyana, however, derives it from *bāhis*, 'outside,' with the suffix *īkak* (IV.1.85.5). This seems to agree with the epic description of Vāhika as the country of five rivers but lying outside the pale of Aryan society (*dharma-bāhya*), devoid of religion (*nashṭa-dharma*) and impure (*asuci*) *Kaṇva* parva, 44.7.32).

12. *Uśīnara* (IV.2.118). Pāṇini mentions Uśīnara as a part of Vāhika (cf. *Kāśika* on IV.2.118, *Uśīnareshu ye Vāhika-grāmāḥ*). In the *Gopātha Brāhmaṇa* the Uśīnaras are regarded as northerners (II. 9, *Śavasośīnareshu Udīchyeshu*).

Thus Pāṇini names three divisions of the Vāhika country, viz. Kekaya, Uśīnara and Madra to which is to be added the fourth division Śavasa. Of these Kekaya and Śavasa may be located between the Jhelum and the Chenab, the first in the south and the second in the north respectively, and Madra and Uśīnara between the Chenab and the Ravi in the north and south respectively. The divisions become clear on the map.

The *Divyāvadāna* refers to the Śvasas in Uttarāpatha with headquarters at Takshaśilā to which Aśoka was deputed by his father Bindusāra as Viceroy to quell their rebellion. The name Śavasa or Śvasa seems to be preserved in the modern name Chhibha comprising Punch, Rajauri and Bhimbhara. In literature the Uśīnaras are often associated with the Śibis (Gk. Śiboi) whose chief town Śibipura has been identified with Shorkot, headquarters of a Tehsil in the Jhung district.

13. *Ambashṭha*. It is mentioned by Pāṇini in *sūtra* VIII.3.97, and is stated by Patañjali to be implied in *sūtra* IV.1.171 as the name of a *janapada* under a monarchy. The *Mahābhārata* locates them in the north-west and describes them as a kingship. The Ambashṭhas may be taken as Gk. *Abastanoi* or *Sambastai* on the lower course of the Chenab (*Invasion of Alexander*, p. 155).

14. *Trigarta*. It is mentioned by Pāṇini as an *Āyudhajī-vī Saṅgha*, and a Confederation of Six States known as Trigarta-Shashṭha (V.3.116). The Trigarta country, although in itself marked out by natural boundaries from the rest of the province, was partitioned into smaller territorial divisions or *janapadas*. The name Trigarta denotes the region drained by the three rivers, Ravi, Beas and Sutlej, and corresponds to the Jālandhar group of states which had retained their geographical identity all these years. Jālandharāyaṇa is mentioned in the Rājanyādi group (IV.2.53).

Patañjali mentions Pātānaprastha as a Vāhika-grāma (II.298). It may be identified with Paithan or Pathānkot, situated at the

entrance of the Kāngrā valley and at one time the capital of the Audumbaras (Cunningham, A.S.R., XIV, p. 116; also V, p. 153).

The central portion of Trigarta formed by the valley of the Beas was also named Kulūta (same as Ulūka of the Sabhāparva, 27.5-16), now known as Kulū. Its ancient capital was at Nagara on the Beas, a name included in the Katryādi gaṇa (IV.2.95).

Maṇḍamatī (Yavādi gaṇa, VII.29) was perhaps modern Maṇḍi, lying to the south of Kulūta. Pāṇini makes special mention of the Bhārgāyaṇa gotra in the Trigarta country (IV.1.111).

15. *Kalakūṭa* (IV.1.173). It is mentioned as a *janapada* under a king. The Sabhāparva calls it Kālakūṭa and makes it a part of Kulinda (*Kulinda-vishaye*, 26.3) which was conquered by Arjuna. Pāṇini's Kuluna (*Gaṇa-pāṭha*, IV.2.133 and IV.3.93) seems to be the same as Kulinda and later Kuṇinda. Kulinda (Gk. Kulindrini) was known to Ptolemy as an extensive country including the region of the lofty mountains wherein the Beas, the Sutlej, the Yamunā and the Gaṅgā had their sources (McCrindle, *Ptolemy*, p. 105, 109). The Kalakūṭa lay somewhere in this area, with possible traces of its name in modern Kalka in the Simla hills.

16. *Kuru* (IV.1.172). It was known to Pāṇini as a *janapada* and a kingdom. He also mentions the town of Hāstina-pura (VI.2.101), which was its capital. The region between the triangle of Thaneshwar, Hisar and Hastinapur was distinguished by three different names: Kuru-rāshṭra proper between the Gaṅgā and the Yamunā with its capital at Hastināpura; Kurujāṅgala equal to Rohtak, Hansi, Hissar; and Kuru-kshetra to the north with its centre at Thaneshwar, Kaithal, Karnal. The *Kāśikā* mentions all the three as distinct geographical units (*Kuravaścha Kurukshetram cha Kuru-Kurukshetram, Kuravaścha Kurujāṅgalam cha Kuru-Kurujāṅgalam*, II.47). The name Āsandīvat, the place with the king's throne where Jana-

mejaya Parīkshit is stated in the *Mahābhārata* to have performed his sacrifice, is also noticed by Pāṇini (VIII.2.12). Pāṇini also refers to the householders' way of life obtaining amongst the Kurus (*Kuru-gārhapatam*, VI.2.42) as against the ascetic way. It seems to be akin to the Kuru-dhamma of the *Jātaka* of that name which insisted on the purity of family life and the cultivation of proper domestic relations and virtues (*Kurudhamma Jātaka*, Vol. III, No. 276), a way of life and philosophy that are reflected in the basic doctrine of the *Bhagavadgītā* expounded in Kurukshetra.

17. *Sālva*. Pāṇini mentions *Sālva* (IV.2.135), *Sālveya* (IV.1.169) and *Sālvāvayava* (IV.1.173) as three distinct *janapada* units which were monarchies. Of these *Sālva* seems to have been the parent state, *Sālveya* equal to *Sālvaputra*, a collateral branch, and *Sālvāvayava*, a bunch of kingly states which the enterprising *Sālvās* either brought under their conquest or planted during the course of their colonising activity. The last although confined to a limited geographical horizon in the central and north-eastern Punjab, were in relation to each other not geographically contiguous.

The *Sālva* is mentioned as a pair *janapada* with *Matsya* as early as the *Gopātha Brāhmaṇa* (I.2.9) and also in the same group in the *Mahābhārata* (Bhishmaparva, 10.3) where the *Śālvas*, the *Mādreyas* and the *Jāṅgalas* are juxtaposed. *Matsya* with its capital at *Virāṭa* (*Bairāt* in Jaipur) provides a fixed point and *Sālva* should be located near that region. Making allowance for the position of the other known *janapadas*, the only place left for *Sālva* coincides with the territory extending from Alwar to north Bikaner. It may be mentioned that the *Sālvās* were an ancient people who seem to have migrated from the west through Baluchistan and Sindh where they left traces of their name in *Śālvakā-giri* (mentioned by Pāṇini in the *Gaṇa-pāṭha* to VI.3. 117), the present *Hālā* mountain, and then advancing towards north *Sauvīra* and along the *Sarasvatī* finally settled in north Rajasthan. Of their intrusion towards

the Yamunā some dim intimation is preserved in an old Vedic verse.<sup>1</sup>

*Sālveyaka.* The Sālveyakas are mentioned as a separate people in the *Mahābhārata*, grouped with the Matsyas in their fight with king Suśarmā of Trigarta (*Virāṭaparva*, 29. 2). They must be the same as Sālvaputra mentioned in the *Udyogaparva* (4.24) amongst kings to whom the Pāṇḍavas were to send emissaries. The name Sālvaputra may still be traced in Alwar, which is in the same geographical sphere. The Sālveyas stood in relation to the Sālvas as the Mādreyas to the Madras (*Bhīshmaparva* 10.37).

*Sālvāvayava.* Of the several member states grouped in the Sālavavayava confederacy, the *Kāśīkā* mentions six, viz. 1. Udumbara, 2. Tilakhala, 3. Madrakāra, 4. Yugandhara, 5. Bhūliṅga and Śaradaṇḍa (*IV.1.173*).

*Udumbara.* The Udumbara (also Rājnyādi group, *IV.3.53*) territory is fixed by the find-spots of their coins in the Kangra valley, between the Ravi and the Beas, and at Pathankot in Gurdaspur district at its mouth (Allan, *Coins of Ancient India*, Intro.p. lxxxvii). Udumbarāvatī as a river-name (*Bhāshya*, *IV.2.71*; *II.287*) might be some tributary flowing through the Udumbara country on which the town of the same name was situated.

*Tilakhala.* Looking at the map of this region we find that the area south of the Beas comprising Hoshiarpur district, where even today sesamum forms the main crop should be indentified with Tilakhala ('the threshing-floors of *tila*'). Thus Tilakhala and Udumbara were immediate neighbours, and the former appear to be the same as the Tilabhāras of the

<sup>1</sup> *Yaugandharireva no rājeti Sālvīr-avādishubh, Vivṛitta-chakrā āsīnās-tīreṇa Yamunē tava.*

'The Sālva women turning their wheels and sitting on thy banks, O Yamunā, have told us that their king is a Yaugandhari.' (Un ancien peuple du Panjab: Les Sālva, *Journal Asiatique* 1929, (pp. 311-354) p. 314). Keith considers a reference to war-like raid more plausible.

epic (Bhishmaparva, 10.51)<sup>1</sup>.

*Madrakāra*. The Madrakāras, as pointed out by Prof. Przyluski, signifies the warrior-troops of the Madras (Les Salva, *Journal Asiatique*, 1929, pp. 311-354; from old Persian *kāra* meaning 'army'). Their connection with the Sālvas was the outcome of an important event in the history of the two peoples, viz. the marriage of the Madra princess Sāvitṛī with the Sālva prince Satyavān (Vanaparva, 279.15). It appears that consequent to this marriage three new small kingdoms came into existence for which distinct names have been preserved, e.g. 1. Sāvitṛīputrakāḥ, 2. Madrakāraḥ and 3. Śālvasenyaḥ. The first represented the hundred sons of Sāvitṛī and Satyavān mentioned both in the *Mahabhārata* (Vanaparva, 283. 12; Karṇaparva, 4.47) and in the *Gaṇa-pāṭha* (V.3.166, Dāmanyādī gaṇa). Putra denoted a clan as in the names Kehar-potre, Chanan-potre, etc. amongst the Arora Khattris of the Punjab, or in such old designations as the Śākya-putras. The Madrakāras and the Śālvasenyaḥ (Skt. *senā* corresponding to Iranian *kāra*; Bhishmaparva 10.59), were smaller kingdoms of such warrior chiefs as were lent both by the Madras and the Sālvas in order to rehabilitate Sāvitṛī and Satyavān who were bereft of their kingdom and married in exile.

Madrakāra and Bhadrakāra appear to be variants of the same name (*madra*=*bhadra*, *sūtras* II.3.73 and V.4.67). It seems that Bhadra situated on the Ghaggar near the north-eastern border of Bikaner marks their old home.

*Yugandhara*. Yugandhara should be some where in the region of the Yamunā, since the Sālva women spinning on its banks, as mentioned above, invoked Yaugandhari as their king. It may be located in Ambala district between the Sarasvatī

<sup>1</sup> Vulgate 9.53; Poona edition gives *tilakāḥ* in the text and *Tilabhāra* in the foot-note.

<sup>2</sup> Vulgate 9.61. Poona edition gives *Sarvasenyaḥ* in the text and *Śālvasenayaḥ* in the foot-note. For *Sarvasenayaḥ* cf. Pāṇini, V.3.116; *Kāśikā*, VIII.1.5.

and the upper Yamunā, where Jagādhari, probably is a relic of the old name.

*Bhūliṅga.* The Bhūliṅgas should be identified with the *Bolingae* of Ptolemy settled in the north-west of the Aravallis. Bhūliṅga seems to be the same as Kuliṅga mentioned in the *Mahābhārata* (Bhishmaparva, 10.38)<sup>1</sup> and the *Rāmāyaṇa* on the route connecting Sāketa and Kekaya at the point where the Śaraṇḍā river was crossed (Ayodhyākāṇḍa, 68.16).

*Śaraṇḍā.* The Śaraṇḍas must have been settled along the Śaraṇḍā river mentioned above. Nothing is known about it, but the first part of the two names Śaraṇḍā and Śarāvātī points to their being one and the same river. The latter formed the boundary between the Prāchya and the Udīchya divisions of India and may be identified with the Dṛishadvatī or Chitāṅg.

*Ajamīḍha and Ajakranda.* Patañjali adds to this list three other names, viz. 1. Bodha, 2. Ajakranda and 3. Ajamīḍha. (IV.1.170; II.289). The prefix *Aja* in the last two names has reference to a local cult deity Asura Ajaka with whom king Sālva was identified as its incarnation (Ādiparva, 61.17).<sup>2</sup>

*Bodha.* The Bodhas occur also in the list of the Bhīṣmaparva (10.37-38) in the same group as the Kuliṅgas, the Sālvas and the Mādreyas. Patañjali also mentions them along with the Udumbaras (II.4.58; I.489).

An important economic feature of the Sālva country was its special breed of bulls mentioned as Sālvaka by Pāṇini (IV.2.136). The Sālva *janapada* also provided recruits for the infantry known in those days as *Sālvā padāti* (IV.2.135).

<sup>1</sup> The critical edition records Kaliṅga in the text and Kuliṅga in the foot-note; but all the *janapadas* in this list e.g. Sālva, Mādrey, Jāṅgala, Śūrasena, Bodha and Kuru-Pāñchāla being of the Punjab-Rajputana region, the original reading must be taken to be Kuliṅga and not Kaliṅga, as supported by a Kashmir MS. also.

<sup>2</sup> Vulgate 67.17; Poona edition gives *malla* in the text and *Sālva* in the footnote.

Pāṇini further mentions a particular item in the Sālva dietary, the porridge known as *Sālvikā yavāgū* made of barley, which is still a favourite food of the people in Bikaner and Jaipur states, i.e. the area which was formerly the Sālva *janapada*.

18. *Pratyagratha* (IV.1.173). It is the name of a *janapada* in Pāṇini. While Patañjali and the *Kāśikā* are silent on this name, we have the later authority of Hemachandra referring to the Pratyag-rathas as belonging to the Ahichchhatrā region (*Abhidhānachintāmaṇi*, 4. 22). It may be noted that Pāṇini mentions the river named Rathasthā (=Ruhut or Rāmagaṅgā), 'that which brings the chariot to a halt,' a meaning suggested by Pratyagratha also. It may be taken as the 'chariot' of Aryan advance marching towards the east.

19. *Ajāda* (IV.1.171). Nothing is known about this *janapada*. It is connected with the grazing of goats. It may be taken to be the Etawah district, the region between the Chambal and the Yamunā, famous for its goats (Hindi *jamnāpārī bakrī*).

20. *Raṅku* (IV.2.100). Pāṇini uses the term *Rāṅka-vaka* for a native of Raṅku. He also mentions the terms *Rāṅkavāvāyaṇa* and *Rāṅkava* to indicate what was non-human, as examples of which the *Kāśikā* mentions the *Rāṅkavāyaṇa* bull and the *Rāṅkava* blankets. It may be noted that Rangka is the name of a language used in parts of Almora district (Moti Chandra, *Indian Costume*, *Bhārtiya Vidyā*, Vol. I, p. 46, footnote; for the Rangka language see, *Linguistic Survey of India*, Vol. III, pt. I, p. 479). So the Raṅku *janapada* may have been located in this region which was the home of woollen blankets. The area of ancient Raṅku must have been much bigger than at present.

21. *Bhāradvāja* (IV.2.145). The *Kāśikā* states clearly that Bhāradvāja in this *sūtra* is not a *gotra* name but a country. As Pargiter has remarked Bhāradvāja is often mentioned in the *Mahābhārata* in connection with the upper part of the Ganges near the hills, and the Bhāradvājās were the people living in

Garhwal (*Mārk. Purāṇa*, p. 320). Pāṇini mentions the Ātreyas as a division of the Bhāradvājas (*Gaṇa-pāṭha Aśvādi*, IV.1.110, *Ātreya Bhāradvāje*), and the *Mahābhārata* and the *Mārkaṇḍeya Purāṇa* also group them together.

22. *Kosala* (VI.1.171). As seen above this figures as one of the sixteen *Mahājanapadas* of the Pāli texts. Its town Śrāvastī is mentioned by Pāṇini in a *Gaṇa-pāṭha*; also the two terms Sarayū and Ikshvāku in *sūtra* VI.4.174. Patañjali mentions Ikshvāku as a *janapada* (IV.2.104; II.298) which was obviously the same as Kosala.

23. *Kāśi* (IV.2.116). Pāṇini does not mention Kāśi as an independent monarchy like Kosala, and Magadha. The omission may be accidental, or due to political reasons reflecting the condition when Kāśi lost its separate identity and was under the control of Magadha. Pāṇini also mentions the term Vārāṇasī (the capital of the Kāśi *janapada*) in a *gaṇa* IV.2.97, and its citizens as *Vārāṇaseya*.

24. *Vṛjī* (IV.2.131). It was the name of a *janapada*. Its citizens were called *Vṛjika*.

25. *Magadha* (IV.1.170). It was a famous monarchy in Pāṇini's time, as we know from other sources. A Kshatriya descendant of the Magadha tribe was termed a *Māgadha*.

26. *Kaliṅga* (IV.1.170). Pāṇini mentions Kaliṅga as a *janapada* with a monarchy. Probably in his time the boundaries of Kaliṅga and Magadha touched each other.

27. *Sūramasa* (IV.1.170). As already noted this *janapada* may be identified with the Sūrmā Valley and Hill District of Assam.

28. *Avanti* (IV.1.175), an independent *janapada* with a monarchical government. Its capital Ujjayinī is referred to in the *Gaṇa-pāṭha* (IV.2.82; IV.2.127).

29. *Kuntī* (IV.1.175). Patañjali instances Kuntī and Avanti as *janapada* names ending in short *i* and implied in *sūtra* IV.1.171. The *Mahābhārata* speaks of Kuntī as the region through which flowed the Aśva Nadī (Vanaparva,

308.7), a tributary of the Chambal (Dey, *Geog. Dict.*, p. 109). Kunti must be identified with the region of Kontwar in Gwalior State, through which flows the Kumārī river. Pāṇini also refers to the compound names *Kunti-Surāśbṛāḥ* and *Chinti-Surāśbṛāḥ* indicative of the period when the royal houses of Kunti and Chinti were tied to Surāśṭra (VI.2.37).

This phenomenon belongs to Mahābhārata polity when the royal house of Kunti under Dantavakra and of Chinti under Śiśupāla suffered a reverse by Kṛishṇa and were tied to the political wheels of Surāśṭra. Chinti seems to be the old name of Chedi.

30. *Aśmaka* (IV.1.173). Pāṇini also refers to the pair names *Avantyaśmakāḥ*, showing their geographical proximity (VI.2.12). *Aśmaka* is named Assaka in Pāli texts with its capital at Paiṭhan (Pratishṭhāna) on the Godāvarī.

Pāṇini refers to *Taitila-kadrū* (VI.2.42) which is mentioned after *Pāre-vaḍavā*, 'a mare from across the Indus' and may have denoted a tawny-coloured mare of the Taitila country. Kauṭilya refers to horses imported from Taitila (*Arthśāstra*, II.30). The *Mahābhārata* refers to horses of partridge colour as *tittirakalmāsha* (Sabhāparva, 28.6; 19) which seems to be an equivalent of Taitila-kadrū. These horses came from the Uttara-Kuru regions (north of Pamīr in Central Asia). The Taitila *janapada* may therefore be looked for in the neighbourhood of that region. But according to medieval lexicons Taitila was synonymous with Kalinga (*Nānārthāṇava*, II.891; *Vaijayantī*, p. 37, verse 26) which may be identified with Titilgarh, south of Sambalpur in Orissa. In this case Pāṇini's Taitila-kadrū would refer to some tawny-coloured material produced in Kalinga, probably rhinoceros hides, from Taitila.

In the above list the following *janapadas* mark the extreme points of Pāṇini's geographical horizon, Kamboja in the north, Sauvīra in the west, *Aśmaka* in the south, Kalinga in the south-west and Sūramasa in the east.

Pāṇini also refers to boundaries of *janapadas* as known in the expression *janapada-tadavadhi* (IV.2.124). This indicates that the *janapadas* formed the boundaries of other *janapadas*, without needing any smaller landmark like a village (*Kāśikā, tadavadhirāpi janapada eva gṛibhyate na grāmaḥ*).

The *Gaṇa-pāṭha* furnishes some additional names of *janapadas*, viz., *Barbara* (IV.3.93, on the sea-coast near the mouth of the Indus where the port Barbarika was situated); *Kāśmīra* (IV.2.133; IV.3.93); *Uraśā* (IV.3.93, modern Hazara); *Darad* (IV.3.93, modern Dardistan); *Gabdikā* (IV.3.93; Patañjali mentions the Gabdikās as living outside Aryāvarta in his time; to be identified with modern Gadderan, the homeland of the Gaddi tribe, beyond Dhaulidhar in the Chambā valley); *Paṭachchara* (IV.2.110, probably modern Pataudi), *Yakṣīloman* (IV.2.110 mentioned in the *Bhīshmaparva* 9.46 and *Virāṭaparva* 5.4, and corresponding to the region between Etawah in the north, Jalaun and Orai in the south, and Kalpi in the east); *Sarvasena* (IV.3.92; also called *Sārvaseni*, cf. *Kāśikā*, VI.2.33; VIII.1.5 described as a dry region;). *Bhīshmaparva* 9.59). Patañjali mentions the names of two other *janapadas*, viz., *Ṛishika* and *Jihnu* (IV.2.104; II.298, *Jihnu*, perhaps modern Jhind). The name *Ṛishika* occurs in the *Mahābhārata* as part of *Śakadvīpa*. Arjuna conquered the *Ṛishikas* across the *Vakshu* (Oxus) 'which flowed through the Śaka country.' The *Ṛishikas* were later known as *Yuechis* whose language was called *Ārsī*.

Further substantial geographical information is obtainable from the *Ashṭādhyāyī* in the form of tribal names of people who were living under political constitutions of a varied character. These together with the names of localities as habitation of particular peoples after whom they were named, will be dealt with in a later chapter on political data.

## CH. II, SECTION 5. TOWNS AND VILLAGES

The units of settlement comprised (1) *nagara* (town) (2) *grāma* (village) (3) *ghosha* (abode of herdsmen (VI.2.85) and (4) *kbeṣa* (hamlets, VI.2.126). Pāṇini mentions separately the villages and towns of Eastern India (*Prāchām grāma-nagarāṇām*, VII.3.14), but with reference to Vāhika and Udīchya country he uses the term *grāma* in a generic sense to include all centres of population (IV.2.117 and IV.2.109). Patañjali in commenting on the distinctions between the terms *grāma* and *pura* remarks that these should not be settled by rules of grammar but by local usage (*taṭrāṭi-nirbandho na lābbhaḥ*, III.321).

The two terms *grāma* and *nagara* were used indiscriminately in the Vāhika country, whereas the distinction between them in eastern India was much more sharp. This may be due to the fact that in the Punjab the villages also had grown in prosperity like the towns, and hence the word *grāma* there included *nagara* also in its connotation. The Greek accounts testify to the existence of about five hundred towns, all rich and prosperous, in the Vāhika country, where naturally the old distinction of *grāma* and *nagara* must have lost its sharpness as reflected in the *Asbṭādhyāyī*.

*Endings of place-names*—Pāṇini uses these various endings to frame rules for explaining the formation of certain words derived from the places concerned, and this is explained by the following examples:—

1. *Nagara* (IV.2.142), e.g., Mahānagara and Navanagara, as names of towns 'not in the north' (*anudīchām*, VI.2.89) but in the east. Mahānagara as an eastern town is to be identified with Mahāsthāna, capital of north Bengal or Puṇḍra, and Navanagara with Navadvīpa, capital of west Bengal or Vaṅga. The latter seems to have sprung up as a 'new town'

when the southern route from Rājagṛīha to the sea outgrew in importance the route along the north bank of the Gaṅgā, from Mithilā and Aṅga to Puṇḍra. In between Mahānagara and Navanagara lay Gauḍapura (VI.2.100), modern Gauḍa, an important town on the route from Champā to Mahāsthāna and a trading centre for *guḍa* manufactured in the Puṇḍra country.

2. *Pura* (IV.2.122), which is mentioned by Pāṇini as an ending in the following names of towns, e.g., Arisṭapura (Pāli Ariṭṭhapura, a city in the kingdom of Śivi in Vāhika), Gauḍapura (VI.2.100, Gauḍa in Maldah in Bengal); Hāstina-pura (the well-known epic town in Meerut district), Phala-kapura (Phillaur on the Sutlej in Jullundhar district.); Mārdeyapura (VI.2.101), probably Maṇḍāwar in Bijnaur district where the ancient route to Hastinapur crossed the Gāṅgā on its opposite bank.

Patañjali mentions Nāndīpura (IV.2.104; II.298) as a *Vāhikagrāma*.

The *Kāśikā* adds the following names: Kāntipura (IV.2.122); Lalāṭapura (probably in the region called Lalāṭāksha, modern Ladakh; Sabhāparva, 47.15), Kārṇipura, Nārmapura, Śivadattapura (VI.2.99) and Śivapura (a northern town, probably in the Śivi country).

3. *Grāma* (IV.2.142). Patañjali mentions a *grāma* called Ishukāmaśamī, both eastern and western (*pūruva*, *apara* (VI.1.85, III.62) to which the *Kāśikā* adds the name Kṛishna-mṛittikā (VII.3.14), both situated in Eastern India (*Prāchām*).

4. *Kbeṭa* (VI.2.126), a small hamlet; Hindi and Gujrati *kbeṭā*.

5. *Ghosba* (VI.2.85), a settlement of cowherds (*ābhīra-pallī*).

6-9. *Kūla*, *Sūda*, *Stbala*, *Karsba* (VI.2.129), endings applied to names of villages according to the *Kāśikā* (*grāma-nāmadbeyāni*) which gives the following examples: Dākshikūla, Māhakikūla; Devasūda, Bhājīsūda; Dākshikarsha, Kalhaṇa

refers to *sūda* as a place-name ending (*Rāj.* I.157, 167). *Karsha* of Pāṇini might be the same as *karshū* (pit or hollow) of older literature (*Drāhyāyaṇa Gṛihya*, III.2.31; *Khādira*, III.5.36).

The ending *sthala* occurs in the name Kapisthala implied in *sūtra* (VIII.3.91, modern Kaithal in Karnal district). It may be noted that the ending *sthala* had an alternative form *sthalī* (IV.1.42). Pāṇini takes it in the sense of a natural (*akṛitrima*) dry land. The *Kāśikā* instances under *sthalī* Dāṇḍāyanasthalī and Māhakisthalī.

10-11. *Tīra* and *Rūpya* (IV.2.106). In another *sūtra* Pāṇini gives the name Kāstira as that of a *nagara* (VI.1.155). Patañjali takes it to be a *Vābika-grāma* (IV.2.104, II.293).

The *Kāśikā* mentions Kākatīra, Palvalatīra, and Vṛikarūpya, Śivarūpya, respectively as examples of these endings.

12-15. *Kachcha*, *Agni*, *Vaktra*, *Garta* (IV.2.126). No examples of these names are found in the *sūtras* and in Patañjali, but there was the well-known seaport called Bhṛigukachchha (Bharukachchha, *Jāt.* No. 463) called Broach. The *Kāśikā* instances under *kachchha* Dāru-kachchha and Pippalī-kachchha (Rajpipla near the mouth of the Narbada); under *agni* Kāṇḍāgni and Vibhujāgni (modern Bhuj); under *vaktra* Indravaktra and Sindhuvaktra; under *garta* Bahugarta and Chakragarta.

Here we have four pairs of eight geographical names, preserved as grammatical examples from antiquity. A careful glance at the map of western India affords clue to their identification. Standing at the head of the Gulf of Cambay, we have to our left Pippalī-kachchha, the sea-coast of Pippalī, comprising the delta areas of Sābarmatī, Mahī, Narmadā and Tāptī rivers, of which the old name is still preserved in Pīplā or Rāj-Pīplā. To our right is the sea-coast of Kathiawar, literally equivalent of Dāru-kachchha (*Dāru*=*Kāśhṭa*).

*Agni* refers to a burning sandy tract, equivalent to Skt. *Irīṇa* or Rann. *Vibhujāgni* refers to the great Rann of Cutch-

Bhuj in the north-west, and Kāṇḍāgni to the Little Rann of Cutch towards the north-east, traces of its name being preserved in the sea-port of Kāṇḍalā.

Of the pair of names ending in *vaktra*, Sindhu-vaktra clearly refers to the Indus Delta in lower Sindh depending for its irrigation on that river, and therefore a *nadīmāṭṛika* region. Opposed to it were the *deva-māṭṛika* tracts of Baluchistan where the parched soil depends for irrigation on whatever it gets as scanty rainfall. The country was therefore called Indra-vaktra as opposed to Sindhu-vaktra. The Mahābhārata mentions the exact nature and location of these two regions (Sabhāparva, 51.11-12), the agricultural produce in one being called *Indrakṣiḥṭa* and in the other *nadīmukha* (*Indrakṣiḥṭair-vartayanti dhānyair-ye cha nadīmukhaiḥ*). The former lay across the river Indus (*Pāre-Sindhu*, Sabhā., 51.11); and comprised the peoples of Kej-Makran named *Kitavāḥ* (=Kej), *Pāradāḥ* (=Hingulaj) and *Vairāmāḥ* (=Rambakia of Alexander's historians; Sabhāparva, 51.12).

The last pair of names refers to Bahugarta and Chakragarta. Bahugarta refers most likely to the valley of the Sābarmatī, Skt. Śvabhramatī, literally the river of holes or pits (*śvabhra*=hole, pit). Chakragarta refers to the region of Chakra-tīrtha on the Gomatī near Dvārakā in Prabhāsa-kshetra. The two indicated the peculiarity of the natural terrain formed by undulating loessic dunes.

Pāṇini refers to *garta*-ending names again in *sūtra* IV.2. 137 and separately mentions Trigarta. Patañjali names Śvāvidgarta as a *Vāhika-grāma* (IV.2.137), to which the *Kāśikā* adds Śṛigālagarta, Vṛikagarta, both *Vāhika-grāmas*.

16. *Palada* (IV.2.142) found in such names as Dākshīpalada. This word in the *Atharvaveda* (IX.3.17) denotes straw and may have denoted a place in the vicinity of which stumps of various weeds and grasses were found.

17. *Arma* (VI. 2. 90). Pāṇini mentions Bhūtārma,

Adhikārma, Sañjivārma, Madrārma, Aśmārma and Kajjalārma (VI.2.91), to which the *Kāśikā* adds Dattārma, Guptārma, Kukkuṭārma, Vāyasārma, Bṛihadarma, Kapiñjalārma, Mahārma and Navārma. The *Tāṇḍya Brāhmaṇa* mentions a lake (*brada*) called Sthulārma north of the Sarasvatī, where on its pasture-lands 100 cattle had grazed and increased to 1,000 (XXV.10.8). The word *arma* in the *Baudh. Śranta Sūtra* (ix.1; ix.3) is explained by the commentator as a village in ruins (*vinashṭagrāma*) and deserted (*śūnya*).

18. *Vaba* (IV.2.122). Pāṇini mentions Piluvaha in *sūtra* VI.3.121, on which the *Kāśikā* adds Ṛishīvaha, Kapīvaha, Munīvaha, Piṇḍavaha, Dāruvaha and Phalgunīvaha (probably modern Phagwara, IV.2.122). Patañjali names Kaukkuḍīvaha as a *Vāhika-grāma*.

19. *Hrada* (IV.2.142). The *Kāśikā* repeats the stock-examples Dākshi-hrada and Māhaki-hrada. The *Mahābhārta* knows Rāma-hrada in Kurukshetra (*Āraṇyakaparva*, 81.22).

20. *Prastha* (IV.2.122; IV.2.110). Pāṇini mentions Karkīprastha and Mālāprastha in *sūtras* VI.2.87-88, and in the *Gaṇa-pāṭha* adds: Maghī-, Makarī-, Karkandhū-, Śamī-, Karīra-, Kaṭuka-, Kavala-, Badarī-, (VI.2.87), Śālā-, Śoṇā- (Sonepat), Drākhsā-, Kshaumā-, Kāñchī-, Eka- and Kāma-. To these the *Kāśikā* adds: Indraprastha (well-known epic town), Kuṇḍa-, Hrada-, Suvarṇa-, Dākshi- and Māhaki, the latter two being stock-examples.

In *Pāli* the term *prastha* is thus explained by Buddha-ghosha: 'It denotes a place outside the *grāma*, a wasteland not used by men either for ploughing or sowing (*Dhammapada-Atthakathā*, 1.210; *Dīgh*, 1.71). It may be noted that the places ending with *prastha* (Hindi, *pat*) are confined mostly to the Kuru country, such as Panipat, Sonepat, Baghpat, Tilpat, etc., and to the region of the Himalayas watered by the Ganges.

21. *Kantbā* (IV.2.142). Pāṇini gives the interesting information that this ending was in use in Uśīnara (II.4.20)

and Varṇu (Bannu) (IV.2.103). He names the following places:—

Chihanakantha, Maḍarakantha, Vaitulakantha, Paṭatka-kantha, Vaidālikarṇakantha, Kukkuṭakantha, Chitkaṇakantha, the first one in *sūtra* VI.2.125 and the rest in *gaṇa*. The ending and the place-names seem to show that Pāṇini was drawing upon the linguistic material of the frontier country and its non-Aryan dialects. *Kanthā* was a Śaka word for a town as in the expression *kadhavara*=*kanthāvara* occurring in a Kharoshthī inscription: "Here belongs Sogdian expression *kanda*- "city", and Śaka *kantha* "city", earlier attested in Markantha" (Lüders, *JRAS.*, 1934, p. 516; also Sten Konow, *Corpus of Kharoshthī Inscriptions*, p. 43; *Śaka Studies*, pp.42, 149, *kantha* "town" in feminine gender). H. W. Bailey also points out that the Persian word *kand*, Khotanese *kanthā*, Sogdian Buddhist Sanskrit *kndb*, Pashto *kandai*, Asica (the dialect of the Rishikas or Yue-chis) *kandā*, are all akin to Sanskrit *kanthā* (H. W. Bailey, *Asica, Transactions of the Philological Society*, 1945, pp. 22-23).

It may be noted that in the time of Pāṇini and as stated by Darius I, in his inscriptions, the Śakas were living beyond the Oxus (*Śaka tyiy paradrava* 'the Śakas to the east of the Caspian Sea, Naksh-i-Rustam Ins.). That region naturally still abounds in *kanthā*-ending place-names, as Samar-kand, Kho-qand, Chim-kand, Tash-kent, Panj-kand, Yar-kand, all indicating Śaka influence.

The *Mahābhārata* speaks of the Śakas as living in this region, named by it as Śākadvīpa, and particularly mentions its places like *Chakshu* (=Oxus), *Kumud* (=Komedai of Herodotus, a mountain in the Śaka country), *Himavat* (=Hemodan mountain), *Sītā* (=Yarkand river), *Kaumāra* (=Komarai of Herodotus), *Maśaka* (=Massagetar of Strabo), *Rishika* (=Asioi), *Tushāra* (=Tokarai).

Pāṇini also must have known the Śakas, not in Seistan but in their original home in Central Asia. How a string of

*kanthā*-ending place-names was found in the Uśīnara country in the heart of the Panjab, is an unexplained problem. It points to an event associated with Śaka history even before Pāṇini, possibly an intrusion which left its relics in place-names long before the Śaka contact with India in the second century B.C. Kātyāyana mentions *Śakandhu*, *Karkandhu*, two kinds of wells of the Śakas and the Karkas (*Karkians*), which may be identified as the stepped well (*vāpī*) and the Persian wheel (*arghaṭṭa*) well respectively.

Lastly we owe to the *Kāśikā* the following names ending in *kanthā*; Sauśamikantha, Āhvarakantha, both in the Uśīnara country in Vāhika (II.4.20).

TOWNS—Pāṇini's geography mentions towns which may be grouped under two divisions, called *Udīchyagrāma* (IV.2.109) and *Prāchyagrāma* (VII.3.14). Among the *Udīchya* towns some lay in the *Vāhika* country (*Vāhika-grāmas*, IV.2.117), and some in its southerly part known as Uśīnara (IV.2.118), while others were located outside Vāhika towards the west (the present North-West Frontier Province).

The *sūtras* mention the following towns which naturally figure in them as being the most important in those days:

1. *Kāpiśī* (IV.2.99). It was a town known for its wine *Kāpiśāyana* as already stated. According to Pliny *Kāpiśī* was destroyed by the Achaemenian emperor Cyrus (Kurush) in the sixth century B.C. It is identified with modern Begram, about 50 miles north of Kābul on the ground of a Kharoshthī inscription found there naming the city (Sten Konow, *Ep. Ind.*, Vol. XXII (1933), p. 11).

2. *Sauvāstava* (IV.2.77) capital in the valley of the Suvāstu or Swat.

3. *Varaṇā* (IV.2.82). It may be identified with the place called Aornos by the Greeks as a fort in the country of the Assakenoi (*Āśvakāyanas*). It may correspond to modern Ūṇa, pronounced Ūṇra in Pashtu, situated a few miles west of the Indus, as pointed out by Sir Aurel Stein who gave its con-  
a

tural restoration as *Avarṇa*. It really corresponds to Varanā mentioned by Pāṇini (*Arch. Survey Memoir.*, No. 42, pp. 89-90).

4. *Vārṇava* (IV.2.77; IV.2.103). It was so called from its situation in the Varṇu or Bannu valley.

5. *Śalātura* (IV.3.94), modern Lahur situated at a distance of four miles from Ohind on the right bank of the Indus, in the northern angle of the junction of the Kabul river, identified as the birthplace of Pāṇini.

6. *Tūdī* (IV.3.94), not identified.

7. *Varmatī* (IV.3.94), Bimran (Masson, *Ariana Antiqua*, p. 69), or possibly Bamian.

8. *Kūchavāra* (IV.3.94); it was Kūchā, the old name of Turkestan appearing in a Sanskrit manuscript and inscriptions from that region (Lüders, *Zur Geschichte und Geographie Ostturkestans*, p. 246). Varāhamihira mentions the Kūchikas amongst the people of the north.

9. *Takshaśilā* (IV.3.93); Pāṇini applies the term *Tākshaśilā* to those whose ancestors (*abbijana*) lived at Takshaśilā. Takshaśilā existed in all its glory at the time of Alexander's invasion and is described by the Greek writers as "a great and flourishing city, the greatest, indeed, of all the cities which lay between the Indus and the Hydaspes" (*Alexander's Invasion*, p. 92).

10. *Śārkara* (IV.2.83), modern Sukkur in Sind on the Indus opposite Rori. The *Mārkaṇḍeya Purāṇa* knows of a western people called Śārkārāḥ (Pargiter, *Mārk. P.*, p. 373).

11. *Sāṅkala* (IV.2.75) probably the same as the town Sangala, the capital of the republican peoples called Kaṭhoi (Kaṭhas) by the Greeks, which was strongly fortified; modern Sāṅgalāwālā Ṭībā in Jhang district (*Alexander's Invasion*, p. 115).

12. *Kāstīra* (VI.1.155), mentioned as a Vāhika city by Patañjali.

13. *Ajastunda* (VI.1.155), not identified.

14. *Cbibanakantham* (VI.2.125), a town in the Uśīnara country where the word *kantbā* was a popular ending.
  15. *Arishṭapura* (VI.2.100), same as Aritṭhapura, a city of Sivi kingdom referred to in Buddhist literature.
  16. *Gauḍapura* (VI.2.100), Gauḍa, the well-known town in Maldah district in Bengal.
  17. *Kapisthala* (VIII.3.91), modern Kaithal in Karnal district.
  18. *Katri* (IV.2.95).
  19. *Hāstinapura* (VI.2.101), same as Hastinapur on the Gaṅgā in Meerut district.
  20. *Phalakapura* (VI.2.101), probably Phillaur in Julundhur district.
  21. *Mārdeyapura*, (VI.2.101), probably Maṇḍāwar in Bijnaur district.
  22. *Paladī* (IV.2.110).
  23. *Roṇī* (IV.2.78), probably Roḍi in Hissar district.
  24. *Sāṅkāśya* (IV.2.80), modern Sankissā, situated on the north bank of the river Ikshumatī in Farrukhabad district. The Sāṅkāśyādi group also includes Kāmpilya, modern Kampil in Kaimganj Tehsil of Farrukhabad.
  25. *Āsandivat* (VIII.2.12; IV.2.86), name of the royal city of Janamejaya Pārikshita, in which the horse for his famous sacrifice was bound (*Vedic Index*, I. 72); the *Kāśikā* equates it with Ahisthala.
  26. *Śikhāvala* (IV.2.89), name of a *nagara* according to the *Kāśikā*; probably Sihawal on the left bank of the Son in Rewa State. Pāṇini again refers to Śikhāvala as a proper name (*Danta-Śikhāt samjñāyām* (V.2.113).
  27. *Mabānagara* and *Navanagara* (VI.2.89), names of two eastern towns; the former may be identified with Mahāsthāna and the latter with Navadvīpa, both ancient towns in Puṇḍra and Vaṅga, i.e. North and West Bengal.
- TOWNS IN THE GANAS—The *gaṇas* mention the names of

about 500 towns. Of these the more famous are noticed here, while a full list is given in an Appendix:

1. *Saunetra*, modern Sunet in Ludhiana district, three miles south-west of Ludhiana town, with a large mound and other ruins indicative of an old city; here were found Yaudheya, Agreya and other coins of the pre-Christian period (Cunningham, *ASR.*, Vol. XIV., p. 65; Pāṇini *Saṅkalādi-gaṇa*).

2. *Śairīshaka* (IV.2.80); same as Sirsā, headquarters of a subdivision of the same name in Hissar district, and situated on the north side of a dry bed of the Ghaggar, having considerable ancient ruins.

3. *Tausbāyaṇa* (*Pakshādi-gaṇa*, IV.2.80); modern Tohānā, a place of historical and archaeological interest in the Fathabad Tehsil of Hissar district.

4. *Śrāvastī* (IV.2.97).

5. *Vārāṇasī* (IV.2.97).

6. *Kauśāmbī* (IV.2.97).

7. *Pāvā* (IV.2.97), probably Pāwā of the Pāli texts, capital of the Malla country.

8. *Saubhūta* (IV.2.75), usually identified with the kingdom of the Sophytes mentioned by the Greek writers (M'Crindle, *Alexander*, p. 280). The place is especially noted by the Greeks for a ferocious breed of dogs whose fame spread to Greece even before Alexander's time (*ibid.*, p. 364). The *Rāmāyaṇa* also refers to similar dogs bred in the Kekaya country of the Salt Range. It describes them as bred in the royal kennels (*antaḥpurēti-samvṛiddhān*), strong like tigers *vyāghra-vīrya-balopamān*), big in size (*mahākāyān*) and with big teeth (*mahādāṇishṭrān*, *Rāmāyaṇa*, II. 70.20). It was probably this breed of dogs that was referred to by Pāṇini as *kauleyaka* (IV.2.96). *Saubhūta* was thus a part of Kekaya in the Salt Range.

The *Kāśikā* gives the following examples of towns with the ending  *nagara*: Nāndīnāga, Kāntinagara in the north (*udīchām*); Suhmanagara and Puṇḍranagara (the capitals of

Suhma and Puṇḍra provinces in eastern India, VI.2.89); Pāṭaliputra and Ekachakrā (VII.3.14; IV.2.123 in the east); Madranagara (in the north, VII.3.24); and Dākshingara (in the country of Pāṇini's kinsmen, a citizen of which was called Dākshinagarīya, IV.2.142); Māhakinagara (IV.2.142).

With reference to Pāṭaliputra it is interesting to note that it was a vast metropolis with two divisions which the *Kāśikā* records as Pūrva-Pāṭaliputra (eastern, on the Ganges) and Aparā-Pāṭaliputra (western, on the Son, VII.3.14). A citizen of Pāṭaliputra was called Pāṭaliputraka (*Ropadhetoh Prāchām*, IV.2.123).

That ancient India possessed a large number of flourishing centres of population in the form of cities or towns is also attested to by Greek writers. According to them the Panjab was full of towns, centres of industry and economic prosperity. Many of these figured as forts or centres of defence such as the famous town of Massage (Maśakāvātī) or Aornos (Varaṇā) in the country of the Aśvakas. The free clan called the Glaukanikoi (identical with the Glauchukāyanakas of the *Kāśikā* on Pāṇini IV.3.99) whose country lay in the fertile and populous regions lying in the south of Kāśmīr (the Bhimber and Rajauri districts) between the upper courses of the Jhelum and the Chenab and the Ravi, had as many as thirty-seven cities, the smallest of which contained not fewer than 5,000 inhabitants, while many contained upwards of 10,000. There were also a great many villages which were not less populous than the towns (M'Crindle, *Alexander*, p. 112). Strabo affirms that in the territories of the nine nations situated between the Jhelum and the Beas, such as the Malloi, Oxydrakai and others, there were as many as 500 cities (*Ibid*, p. 112). Megasthenes makes the following general statement on the cities of Mauryan India: "Of their cities it is said that the number is so great that it cannot be stated with precision" (M'Crindle's *Megasthenes and Arrian*, p. 209).

The above accounts of Greek historians do not seem to suffer from exaggeration, as only in the lists attached to the two *sūtras* IV.2.75 and IV.2.80 we have about 500 names, and these may be further augmented if we add the testimony of the other *gaṇas*, as those headed by Suvāstu (IV.2.77), Varāṇa (IV.2.82), Madhu (IV.2.86), Utkara (IV.2.90), Naḍa (IV.2.91), Kattri (IV.2.95), Nadī (IV.2.97), Kāśi (IV.2.116), Dhūma (IV.2.127), Karkī (VI.2.87), Chihaṇa (VI.2.125), etc. This gives us a substantial list of about 750 town names, a case of curious coincidence with Greek evidence. Probably both Pāṇini and the Greek geographers depended on a common source or tradition. The grammatical literature is now a valuable source of information regarding the old and forgotten cities of India. This literature like Yuan Chwang's *Travels* has preserved landmarks in the light of which archaeological old sites may be verified. It may be further noted that certain names of tribes and *gotras* as recorded in the *gaṇas* (cf. *Aśvādi*, IV.1.110) point to places with which they were connected.

### CHAPTER III SOCIAL LIFE

#### SECTION 1. CASTE

The *Ashṭādhyāyī* is full of interesting details regarding the social life, manners and customs of its times. Pāṇini, as we have seen, was acquainted with a large part of India including Gandhāra, Vāhika, Sindhu, Sauvīra, and the Prāchya country or eastern India. His master-mind did not fail to observe minutely the characteristics of social and economic life in these different regions.

Society in his time was based on Varṇāśramadharma, i.e. on Castes and Āśramas or stages into which life was divided.

Pāṇini twice uses the Vedic term *Varṇa* for caste (*Dharma-śīla-varṇāccheḥ*, V.2.132; VI.3. 84) which is more often referred to by the specific term *Jāti* adopted in later legal texts (II.1.63; VI.3.41).

The term *Jāti* seems to have a more comprehensive sense so as to include both *gotra* and *charaṇa* indicative of natural and cultural lineage as implied in *sūtra* II.1.63 (*Kātara-kātau jāti-pariprasne*). Patañjali explains *jāti* in this extended sense (*gotraṁ cha charaṇaiḥ saba*, IV.1.63), citing as its examples the Kāṭha and Kalāpa *charaṇas* (cf. also *sūtra* V.3.93). Evidently the *gotras* and *charaṇas* were fast developing their separate entity as *jātis*.

**BRĀHMAṆA.** The Brāhmaṇas formed the highest caste. There were four principal castes which Kātyāyana mentions as *Cbāturvarṇya* (V.1.124). These were to be mentioned in their order of status, as pointed out definitely by Kātyāyana in a *vārttika* on Pāṇini II.2.34 (*varṇānām ānupūrvyeṇa pūrvanipātaḥ*), as Brāhmaṇa-Kshatttriya-Viç-Śūdrāḥ (*Bhāshya*, I. 436). Thus the Brāhmaṇa was the highest caste.

Pāṇini uses the Vedic term Brahman (V.1.7) and also Brāhmaṇa for the caste (*Brāhmo' jātau*, VI.4.171). He seems to find a distinction between them taking the former in a cultural reference as shown in the derivative *brahmaṇya* (*Brahmaṇe bitaṇi*) to indicate what appertains to the spiritual welfare of a Brāhmaṇa (*Brāhmaṇebhyo bitaṇi*, *Bhāṣya*, V.1.7; II.339), and reserving the term Brāhmaṇa for the caste based on birth (son of a Brahman). This point is also explained by Patañjali stating that 'although the two terms Brahman and Brāhmaṇa are synonymous (*samān-ārthau etau . . . Brahman-śabdo Brāhmaṇa-śabdaścha*, II.339), yet the affix *yat* is added only to Brahman to have the form *brahmaṇya*.

Pāṇini in a *sūtra* V.1.124 refers to the *bbāva* (nature) and *karma* (conduct) which should characterise a Brāhmaṇa (*Guṇavachana-Brāhmaṇādibhyah karmaṇi cha*). These are indicated in the derivative expression *Brāhmaṇya*. Kātyāyana applies this rule to the four castes collectively to indicate the norm and the duties for which the system stands.

*Provincial Distinctions amongst Brāhmaṇas* (JĀNA-PADĀKHYĀ). Pāṇini knows of the practice of the Brāhmaṇas being named after the localities (*janapada*) to which they belonged by birth (V.4.104, *Brahmaṇo jānapadākhyāyām*), of which the *Kāśikā* cites the following examples: *Avanti-Brahmaṇ* and *Surāshṭra-Brahmaṇ*, i.e. a Brāhmaṇa of Avanti *janapada*, (modern Malwa), and a Brāhmaṇa of Surāshṭra or Kathiawar. Such names are the precursors of the later terms like Kānyakubja, Sārasvata, Mahārāshṭra and Gurjara Brāhmaṇas.

A degraded Brāhmaṇa was called *ku-Brahmaṇ* (V.4.105), while a Brāhmaṇa pre-eminent in his duties (*dharmā*) *mahā-Brahmaṇ* (V.4.105). The Pāli texts take *Mahā-Brahmā* to mean a super-Brāhmaṇa, one with realised soul. The *Mahānārada-kassapa Jātaka* speaks of Bodhisattva Nārada as being the *Mahā-Brahmā* (Great *Brahmā*) at a particular epoch (*Jāt.* VI.242). The *Mātanga Jātaka* explicitly refers to the

superior position of a Mahā-Brahmā (*Jāt.* IV.377; cf. also *Jāt.* No. 254).

**KSHATRIYA.** Pāṇini mentions the Kshatriya caste in connection with *gotras*, *janapadas* and *saṅghas*. For example the Kuru *gotra* occurred both amongst Brāhmaṇas (IV.1.151) and Kshatriyas (IV.1.172). If the father was a Brāhmaṇa, he and his young (*yuvan*) son were both called Kauravya, but if a Kshatriya they would be Kauravya and Kauravyāyaṇi (II.4.58, *Kāśikā*). Andhaka and Vṛishṇi were Kshatriya *gotras*. As to Kshatriyas associated with the *janapadas*, they as original founders gave their name to the region where they settled down (*Janapada-śabdāt kshatriyād añ*, IV.1.168), the ruling families being designated as *janapadins* (IV.3.100); e.g. Pañchāla country named after the Pañchāla Kshatriyas; similarly Dardistan from Darads, Johiyāwār (Bahawalpur) from Yaudheyas, Mālva (in Ferozpur-Ludhiana) from ancient Mālavas (now called Malavais). Pāṇini specially mentions the Vāhika *saṅghas* (V.3.114), some dominated by Brāhmaṇas as ruling caste (Gopālavas), others by Rājanyas, and called Rājanyaka (IV.2.53), most likely referring to the Rāṇas of the Hill-States. The majority were Kshatriya *saṅghas*, as Kshudrakas, Malavas (V.3.114, *Kāśikā*), Vṛikas (V.3.115), Yaudheyas (V.3.117). Distinguished Kshatriya heroes had become objects of religious *bhakti* (IV.3.99) before Pāṇini's time, referring to the emergence of a popular cult of hero-worship.

**RĀJANYA**—In the Saṁhitās *Rājanya* is a synonymous term with Kshatriya. Pāṇini has retained the old sense of the word in *sūtra* IV.2.39, whereas he has used it in a new constitutional significance in *sūtra* VI. 2. 34 (*Rājanya-babuvachana-dvandve Andhaka-Vṛishṇishu*), where the *Kāśikā* defines *rājanya* as a member of such families in a Kshatriya tribe as were consecrated to rulership (*abbishikta-vamśya kshatriya*). **VAIŚYA.** The Vaiśyas were given the title *arya* to indicate their social status (*Aryaḥ svāmi-vaiśyayoh*, III.1.103).

**ŚŪDRA**—Pāṇini refers to some Śūdras living within the pale of

the Aryan society (*anīravasita*, II.4.10), implying that there were other Śūdras, probably aboriginal peoples, who were yet to be assimilated in the Aryan society.

Patañjali makes clear the social status of the Śūdras in his time. Firstly, there were Śūdras who were not excluded from Āryāvarta but were living within its social system. Secondly, there was another class of Śūdras who were living outside Āryāvarta and its society. He cites as examples (1) Kishkindha-Gabdikam (2) Śaka-Yavanam and (3) Saurya-Krauñcham. Of these Kishkindhā may be identified with Pāli Khukhundo in Gorakhpore, Gabdikā with the Gaddis of Chambā, who were deemed as living outside the limits of Āryāvarta, Saurya with Soreyya or Soron in Etah district and Krauñcha with the later Krauñcha-dvāra somewhere in Garhwal. The Śakas and the Yavanas who are termed Śūdras were not yet parts of the Aryan society and were outside Āryāvarta in Patañjali's time. The Aryan society was at pains to repel the invasion of the Yavanas (Greeks under the leadership of Demetrius and Menander) and this hostility must have emphasized the cleavage between them. The Śakas geographically were still living outside the borders of India in the second century B.C. But in the first century B.C. we find Śaka settlements springing up at Takshasilā, Mathurā and Ujjayinī.

Thirdly, there were Śūdras who had separate settlements of their own within the Aryan colonies (*ārya-nivāsa*), such as a *grāma* (village), a *ghosha* (cattle ranch), a *nagara* (town) or a *samvāha* (caravan camp). Examples of such Śūdras are Mṛitapas (undertakers), Chāṇḍālas, who were of the lowest grades. Fourthly, there was another class of Śūdras who were entrusted with some of the work connected with *yajñas* or sacrifices as carpenters (*takṣhā*), metal-workers (*ayaskāra*), washermen (*rajaka*) and weavers (*tantuvāya*). There were also Śūdra untouchables who had to take their food in their own utensils and not in those of the household, while there were others who were not subject to this restriction as

being more closely associated with the household (*yair-bbukte pātram saṁskāreṇa śudhyati*, II.4.10; I.475).

ĀRYA AND DĀSA. Pāṇini applies the epithet Ārya to a Brāhmaṇa to denote the king's chief counsellor (*Ārya-Brāhmaṇa*) and to Kumāra to denote the Crown-Prince (*Ārya-Kumāra*, VI.2.58).

The use of the term Ārya in the expression *Ārya-kṛita* in *sūtra*, IV.1.30, (feminine *Āryakṛitī*, terms which were also Vedic words) had a specific meaning in current speech (*saṁjñā*). The meaning of these terms is best explained by Kauṭilya (*Dāsakalpa* chapter). Kauṭilya takes *Ārya* to mean a free man as opposed to *Dāsa* who had lost his freedom, e.g. 'The offspring of a man who has sold himself off as a slave shall be an Ārya; on paying the value (for which one is enslaved) a slave shall regain his Āryahood' (*Āryatava, Ārya-bhāva, Artha. Text*, III.13). The regulations contained in that chapter aim at humanising the institution of *dāsyā* and restoring to the *dāsas* the privileges of an Ārya or 'free citizen.' The linguistic form *Āryakṛita* (i.e. *Ārya* with the root *kṛi*) is also implied in Kauṭilya's expression, *Dāsamanuruṇṇeṇa nishkṛayeṇ-Āryamakurvato dvādaśa paṇo daṇḍaḥ*, i.e., '12 paṇas is the fine for not making a slave a freeman (*Ārya*) even after receiving the proper ransom.' The feminine form *Āryakṛitī* would denote the woman similarly made free, or her daughter who had obtained the status of an '*adāsa*' or '*Ārya*' either through payment of ransom or birth. (Cf. *Artha. Text*, III.13, *Mātā bhrātā bhaḡinī chāsyā adāsāḥ syuḥ*). Pāṇini uses *dāśī-bhāra* in *sūtra* VI.2.42, as a word with specific meaning (*saṁjñā*). The *Kāśikā* explains it as *dāsyā bhāraḥ*, i.e. the burden of a *dāśī* to be borne (by her master). Kauṭilya states, 'If a pregnant female slave is sold or pledged without any provision for her confinement, her master is punishable.' (*Artha. Trans.* p. 207). This probably explains the nature of the burden implied in the term *dāśī-bhāra* of Pāṇini.

**MIXED CASTES**—Pāṇini uses the terms *anuloma* and *pratiloma* (V.4.75) which are well-known in later Smṛiti texts. The *Aśbādhyaī* mentions the names *Ambashṭha* and *Āmbashṭha* (VIII.3.97). These were a republican people in the Panjab. They are taken to be a mixed caste in the Smṛitis, as the offspring of a Brāhmaṇa husband and a Vaiśya wife. Pāṇini also knows of a class of people called *udakabhāra* (or *udabāra*, VI.3.60), 'drawer of water,' who may be taken as a caste (Hindi *kabhāra*). It may be noted that Kātyāyana knows of a special caste (*jāti*) called *mahāśūdra*, with its female *mahāśūdrī*. The *Kāśikā* explains the term to mean the Ābhīras regarded as higher Śūdras.

### CH. III, SECTION 2. ĀŚRAMAS

Pāṇini knows of (1) Brahmachārin (V.2.134), (2) Gṛihapati (IV.4.90), (3) Parivrājaka (VI.1.154), and (4) Bhikshu (III.2.168). The system of four āśramas is called by Kātyāyana *chāturāśramya* (V.1.124).

**BRAHMACHĀRIN**—Brahmacharya denoted the condition or life of a Brahmachārin or religious student. The institution of *Brahmacharya* was known to Pāṇini in its full development. He refers to educational institutions known as the *Charaṇa* or Vedic schools devoted to the study of some major recension (*āmnāya*) of the Vedas together with its accessory and subordinate literature (IV.3.126). The Brahmachārins congregated for study at a *Charaṇa* which was run under the direction of one great teacher or Vedic exponent. From the manner of Pāṇini's reference to this organisation it appears that the Brahmachārins looked upon their *Charaṇa* as their *alma mater*, and were attached to it by permanent bonds of common fellowship with other members of the same school, all distinguished as *sabrahmachārins* (*Charaṇe Brahmachārīṇi*, VI.3.86).

The growing distinction of the religious student is indicated by the emergence of a new word *Varṇī*, unknown in the Saṁhitā and Brāhmaṇa literature. Pāṇini explains it as a synonym for Brahmachārin (*Varṇād Brahmachārīṇi*, V.2.134). According to the *Kāśikā* the students of only the three upper classes (*traivarṇika*) were called *Varṇī*.

The preceptor or *Āchārya* initiated the young student. Every pupil became attached to his preceptor by a formal ceremony which Pāṇini calls *upanayana* and *āchārya-karaṇa* (I.3.36). The *Kāśikā* explains it as follows:

'*Āchāryakaraṇa* is a ceremony (*kriyā*) by which the

teacher brings the pupil (*māṇavaka*) into close relationship with him (*ātmasamīpani prāpayati*). By means of this ceremony the *upanetā* (performer of the *upanayana* ceremony) formally becomes the *āchārya*.<sup>1</sup>

Pāṇini uses the two terms *māṇava* and *antevāsin* for the pupils (VI.2.69). The former were also called *daṇḍa-māṇavas* (IV.3.130), probably from the staff they bore. The *māṇava* seems to have been a novice, as seen from the term *bāla* applied to him in the *Mātaṅga Jātaka*, which also calls him *daṇḍa-māṇava* (IV.379, 387).

Pāṇini mentions a *daṇḍa* made of *palāśa* wood (*Butea frondosa*) as *āśbāḍha* (V.1.110).

PERIOD—There is a general rule by which the student was to be named after the special circumstances of study (*Tadasya Brahmacharyam*, V.1.94). The maximum period of studentship is stated by Kātyāyana to be 48 years, the student concerned being called *asbṛā-chaṭvāriṁśaka* (also *asbṛā-chaṭvāriṁśi*). The same *vārttika* refers to *gaudānika* whose period of study ended by the performance of the *godāna* or hair-cutting ceremony (cf. *Mann*, II.65).

Besides the studentship proper for fixed periods, there were occasional studentships for shorter terms, e.g., students for half a month (*ardhamāsika*), a month (*māsika*), or a year (*sāmvatsarika*), as instanced by the *Kāśikā*.

Kātyāyana also introduces a new feature, viz. naming occasional students after their subjects, or vows (special disciplines adopted by them), e.g. *Māhānāmnikā*, one studying the *Māhānāmni* hymn (a kind of *Sāman*, cf. *Gobhila Gṛihyasūtra*, quoting *Rauruki Brāhmaṇa*); *Ādityavratika*, a student who had consecrated himself to the vow of mastering the *Āditya Sāma* (cf. *Jaīminīya Upanishad Brāhmaṇa*), *Avāntara-dīkṣhī* (one who enters upon the vow of studentship for an intermediate period), and *Tilavratī* (probably the vow of studentship to last through life, such as that of the *naishṭhika Brahmachārī*).

The occasional studentships for shorter terms or study of special texts or observance of particular vows points to a new feature in the educational system. These gave to seekers after truth and advanced knowledge, opportunities for specialisation to realise their desires towards self-fulfilment both through the study of texts and prescribed practices. This practice of occasional studentship is also known to the *Upanishads*.

**SNĀTAKA**—The student who completes his study is called *snātaka*. The *Gaṇasūtra* holds it as completion of Vedic study (*Veda-samāpti*, V.4.29). The more proficient *snātaka* was singled out as *nishṇāta* (with his study fully completed). This term for proficiency was later on applied to proficiency in any study or craft, e.g. *nishṇātaḥ kaṭakarane*, skilled (*kuśala*) in the art of mat-making (VIII.3.89). The epithet *sragvī* (V.2.121, wearer of garland) appears also to have been applied to a *snātaka*. The *sraḥ* was a sign of graduation and the *Gṛīhya Sūtras* differentiate it from the ordinary garland for decoration called *mālā* (V. M. Apte, *Social and Religious Life in the Gṛīhya Sūtras*, p. 107). Manu also applies the term *sragvī* to a *snātaka* (*Manu Smṛiti*, III.3). A student who ends his studentship and enters upon the householder's life is condemned by Pāṇini as *khaṭvārūḍha* ('taking to the luxury of sleeping on a cot,' not permitted to a Brahmachāri, II.1.26).

**HOUSE-HOLDER**—*Gṛīhapati* is the regular name, from the *Rigveda* onwards, for the householder as master of the house. Pāṇini refers to him in connection with the Fire kindled at the time of marriage with whose worship commenced his life as a householder (*Gṛīhapatinā saṁyukto n̄yah*, IV.4.90). The *Kāśika* treats *Gārbhatya* as the technical term for the Household Fire.

His wife was technically called *Patnī* derived from the term *Pati* to whom she was wedded at the sacrifice (*Patyur-no yajñasam̐yoge*, IV.1.33). The two together tended through life the sacred Family Fire, (*Gārbhatya Agni*) essential for the performance of domestic ceremonies. As

stated by Manu (III.67) the married couple installed and tended the *vaivāhika agni* for the *grihya* rites. They were also called *āvasathika* from their dwelling in an *āvasatha* (IV.4.74), from which their Fire was named *Āvasathya*.

Happy family life is envisaged in such terms as *suprajas* (V.4.122), *babuṣraja* (V.4.123), *putrapautrīṇa*, 'having healthy sons, a big family, and enjoying generations of sons and grandsons' (*putrapautram anubhavati*, V.2.10).

The head of the family was called *Vamśya* (IV.1.163) or *Vṛiddha* (I.2.65), i.e. Patriarch, and its other members *Yuvan* (Juniors). Pāṇini teaches different suffixes to distinguish the head of the family from its junior members. This distinction between the patriarch and his descendants was expressed by appropriate suffixes, e.g. *Gārgya* as patriarch, and his juniors as *Gārgyāyaṇa*. The family or the household was the centre of social life supporting its different factors. These distinctive titles were of real practical value; e.g. a *Gārgya* as patriarch represented his family in the social assemblies, whereas the junior members called *Gārgyāyaṇa* would be given the nomenclature *Gārgya* only when they were admitted to the headship of the family in the absence of *Gārgya* the elder.

The duties of the householder were to entertain the guests (*atithi*), to make suitable gifts on occasions (*vyaya* I.3.36; *upayoga*, I.3.32), to perform the family sacrifices (*yajñas*) and offer due worship to the ancestors (*śrāddha*, IV.3.12).

The economic pursuits of a householder are also indicated. He might be a priest (*ṛitvik*), merchant (*vāṇija*, VI.2.13), an agriculturist (*kṛishīvala*, V.2.112), craftsman (*śilpī*), a labourer earning wages (*bhṛitaka karmakara*, III.2.22), and the like. Rich householders are referred to as possessing hoarded wealth, amounting to 100 (*naishka-śatika*) and 1000 *niskhas* (*naishka-sahasrika*, V.2.119).

### CH. III, SECTION 3. MARRIAGE

The householder's life began with marriage. Its ceremony was performed round the Fire as witness. Pāṇini refers to marriage by the word *upayamana* (I.2.16), which he explains as *sva-karaṇa*, i.e. 'the bridegroom making the bride his own' (I.3.56). The marriage ceremony was solemnised by *pāṇi-grahaṇa*, 'the holding by the bridegroom of the bride's hand.' Pāṇini uses two other terms for it, *haste-kṛitya* and *pāṇau-kṛitya*. This holding of the hand was a symbol of *sva-karaṇa*, i.e. formal transfer of the father's dominion over the girl to the husband. We may cite Manu's comment that this ceremony was observed for marriage within the same caste (III.43).

This formality was considered so important in marriage that Kātyāyana calls the legally wedded wife as *pāṇi-gṛihītī* (*vār.* on IV.1.52; *Bhāṣhya* II.221), whereas the girl married without proper ritual was marked out by the different term *pāṇi-gṛihītā* (*yasyā hi yathākathamchit pāṇir-gṛibyate*, II.221). **SOCIAL EFFECT OF MARRIAGE**—The legal effect of marriage is an important proposition in Hindu law. The term *sva-karaṇa* of Pāṇini is explained by Patañjali as 'making one's own what was not so previously' (*asvam yadā svam karoti*, *Bhāṣhya*, I.3.56; I.284). According to Manu marriage meant the gift (*pradāna*) of a girl by her parents by which they transferred their dominion over her to the bridegroom (*pradānam svāmya-kāraṇam*, V.152).

According to Pāṇini, the bride whom the husband marries should be a *kumārī*, which is explained by Patañjali as *apūrvapati*, i.e. one who is not previously married (*Kaumārāpūrvavachane*, IV.2.13). The virgin after marriage was honoured by the title *kaumārī bhāryā*, and her husband *kaumāra-pati*. It

is the same as the epithet *ananyapūrvikā* applied by Yājñavalkya (I.52). The husband and his wife after marriage had to perform jointly the sacrificial rites, from which the wife derived the title of honour as *patnī* (*patyur-no yajña-saṁyoge*, IV.1.33). It was denied to a woman not properly married. The social status of the husband devolved on his wife, as implied in Pāṇini's *sūtra* (*Puṁyogād ākhyāyām*, IV.1.48), i.e. a designation derived from her husband; e.g. *mahāmātrī* (ministrix), wife of a *mahāmātra*, a high government official, and *gaṇakī*, wife of a *gaṇaka* (accountant). Pāṇini also speaks of *āchāryānī* as the wife of an *āchārya* (IV.1.49).

**EXOAMY**—Marriage must have been contracted outside the *gotra*. Pāṇini in one place refers to the formation of compound words showing two *gotras* united in marital relationship. (*maithunikā*) (IV. 3. 125). Patañjali instances (1) *Atri-Bharadvājikā*, (2) *Vasiṣṭha-Kaśyāpikā*, (3) *Bṛigu-Aṅgirasikā*, (4) *Kutsa-Kuśikikā*, and (5) *Garga-Bhārgavikā*, i.e. marriages contracted between two different *gotras* jointly designated (II.4.62; I.492). Most of these *gotra* names occur in Pāṇini's *sūtras*.

### CH. III, SECTION 4. WOMEN

Pāṇini refers to Woman in all the aspects of her life, as a girl, a maiden, a wife, a mother, a friend and a teacher. We obtain glimpses of her life inside the household as its virtual mistress in her capacity of *patnī*, and in the larger public sphere of education (*ccharaṇas*) and citizenship (*janapadas*, IV.1.175). As examples may be cited (1) *Kaṭhī*, a female member of the Vedic Kaṭha *śākhā*, and (2) *Yaudheyī*, a female citizen of the Yaudheya republic (*saṅgha*). The woman also figures as an ascetic as indicated in the title *kumāraśramaṇā* (II.1.70), *i.e.* an unmarried female mendicant, showing that women were also eligible for the ascetic order. It may be assumed that such women ascetics moved about freely in public as homeless wanderers (*prabrajitā*, *Gaṇa-pāṭha* II.1.70). A veil of privacy was, however, thrown on the ladies of the royal household who were described as *asūryam-ṇaśyā* (III.2.36), 'screened from the sun's gaze' and kept in their harems (cf. *Kāśikā*, *rāja-dārāḥ*).

**MAIDEN**—In the first part of her life (*vayasi prathame* IV.1.20) she was called *kumārī*, *kiśorī* and *kanyā*. Some women remained unmarried through life (*kumāryām vayasi*, VI.2.95) and were still called *kumārī* even in old age, e.g. *vṛiddha-kumārī*, *jarat-kumārī*.

There were exceptional cases of unmarried girls becoming mothers whence their offspring was called *kānīna* (IV.1.116), 'issue of a *kanyā* not formally married.' Manu counts *kānīna* as one of the twelve kinds of sons (*Manu*, IX.172; cf. *Yāj.* II.129). Patañjali makes the objection that *kanyā*, a virgin, and *kānīna*, her son, cannot go together. He holds that the term *kanyā* continued to be applied to a girl before her legal marriage (*puṇis-ābbisambandha-pūrvaka saṁprayoga*, II.257).

A maiden of marriageable age was known as *varyā*, i.e. one to be wooed freely without restriction (*anirrodha*, III.1.101). When she became engaged, she was called *vṛityā*. No doubt parents exercised their choice in fixing proper matches, but girls of mature age were free to choose their husbands and were described as *patinivarā* (III.2.46).

**WIFE**—The bride is called *janī* and the maids in attendance who conducted her to the prospective husband *janyāḥ*. The newly wedded bride was called by the Vedic name *sumangalī*, which Pāṇini cites as current in later Sanskrit also (*saṃjñā-cchandasoh*, IV.1.30). The term *Jāyā* was used for the wife with reference to the ideal of motherhood, whereas *Patnī* as stated above denoted her religious function (IV.1.33). She is also called *Jāni* in the examples *yuvajāni* and *vṛiddha-jāni* (V.4.134). The term *Pativatnī* was used to indicate that so long as her husband lived she was the mistress of the household (IV.1.32). Reference to polygamy can be traced in the word *sapatnī* (IV.1.35).

Pāṇini also refers to *mantras* repeated for captivating the hearts of lovers which were known as *hṛidya* (*hṛidaya-bandhana*, explained by *Kāśikā*, as *vaśīkaraṇa mantra*, IV.4.96).

An elderly sister marrying later than her younger sister was called *didhishū* and her husband *didhishū-pati* (VI.2.19; cf. *Vedic Index*, I. 307).

**MOTHER**—The practice of naming sons after their mothers found in the *Vamśa* lists was also known to Pāṇini. Sometimes the son is extolled for the virtues of his mother, e.g. *bhadra-mātura*, son of a noble mother (IV.1.115) and *kalyāṇineya*, son of a beautiful mother (IV.1.126). In cases of doubtful parentage the son was named according to the mother's *gotra*, e.g. *Gārgika*, son of Gārgī a female descendant of the Garga *gotra*; but such names after the mother involved social opprobrium (*kutsana*, IV.1.147).

**CIVIC STATUS OF WOMEN**—Women were distinguished as members of larger associations than the family. They were

known by the *gotras* and the *janapadas* or States to which they belonged, e.g. *Avantī* (the lady of Avanti *Janapada*), *Kuntī* (of Kunti), *Kurū* (of Kuru) (IV. 1. 176); *Bhārgī* (of Bharga *Janapada*, a part of the Trigarta country), *Yaudheyī* (a woman of the well-known Yaudheya republic); and similarly *Pāñchālī*, *Vaidehī*, *Āṅgī*, *Vāṅgī*, *Māgadhi*, hailing from those Eastern *janapadas* implied in the *sūtra* (IV.1.178). The *Gaṇapāṭha* adds other names, such as *Kārūshī*, *Kaikeyī*, *Kāśmīrī*, *Sālvī*, *Śaubhreyī*, *Śaukreyī*, *Bhāratī*, *Auśinari*, etc. It is also laid down that female names in the plural derived from *gotra* and *janapada* should be distinguished in their formation from those of the male members, and this distinction was brought out by retaining the female-denoting suffix, e.g. a bevy of women of Yaska *gotra* was named as *Yāskyah* (II.4.63) and *Āṅga* women as *Āṅgyah* (II.4.62). A peculiarity in the names of women in the eastern country was the addition of the suffix *āyana* (IV.1.17), e.g. a female descendant of the Garga *gotra* was called *Gārgyāyaṇī* in the east corresponding to modern Gargāin, a feature preserved specially in the Bhojapuri dialect.

Women also figured as students of Vedic schools (*charaṇas*, cf. *sūtra* IV.1.63 in which *jāti* includes both *gotra* and *charaṇa*), e.g. *Kaṭhī*, *Babrujīhī*. Sometimes they were in-residents at the schools in what were called *chbātri-śālā* (VI.2.86).

Women also occupied the exalted position of teachers and were called *āchāryā* (IV.1.49, a counter-example of *āchāryāṇī*).

We have already seen that women sometimes devoted themselves totally to the pursuit of learning and religion as ascetics, and were called by the generic term *kumāra-sramaṇā*.

Women also pursued other cultural occupations. They took part in the cultural sports of the times. Pāṇini refers to the games of Eastern India (*Prāchyā-kṛīḍas*, VI.2.74), e.g.

*Śālabhañjikā* (the game of plucking the flowers of the Śāla trees in blossom); *Aśoka-pushpa-prachāyikā* (gathering of the flowers of the Aśoka trees in blossom), etc. The *Jātakas* also mention these sports as *uyyāna-kīḍikam* (IV.376). Patañjali mentions *śaktīkī*, a woman warrior who specialised in the wielding of lance (IV.4.59; *Bhāshya*, IV.1.15; II. 209).

Women also paid attention to personal adornment and beauty (*bbūshana* and *maṇḍana*, III.2.151). Mention is made of an ornament of the fore-head (*lalāṭikā*) and ear-rings (*karnīkā*, IV.3.65), and also to hair-dressing (*keśa-veśa*, IV.1.42). The *lalāṭikā* is seen as an ornament on the forehead of the earliest Indian women in the sculptures of Bharhut (Cunn. *Bharhut*, plate XXIII).

### CH. III, SECTION 5. SOCIAL FORMATIONS

These include in a descending order the following (1) *Janapada*, (2) *Varṇa*, (3) *Jāti*, (4) *Gotra*, (5) *Sapinda*, (6) *Sanābhi*, (7) *Jñāti*, (8) *Samyukta*, (9) *Kula*, (10) *Vamśa*, and (11) *Gṛihapati*.

Pāṇini is acquainted with a number of *Janapadas* or States. To start with, a wandering *Jana* which was a Kshatriya clan, settled down in a particular region (*Jana-pada*), which came to be named after it. In time, other peoples also came to settle in it, whence arose the conception of a common citizenship binding them to the *Janapada*. It marked the evolution from the racial (*Jana*) to the territorial (*Janapada*) basis of citizenship embracing a variety of peoples. The citizens bound in loyalty to a common *Janapada* were called *Sajanapadas* (VI.3.85), nationals of the same State. The Vedic Bharata *Jana*, for instance, became settled in the region called Bharata, where were also settled later on other people giving rise to the territorial conception of citizenship replacing the clan. Thus it marked a great progress in political evolution.

The governing class of each *Janapada*, however, was distinguished from the rest of its citizens by the designation *Janapadins* (IV.3.100), or the citizens proper as an elect body or nucleus representing the original settlers.

A typical *Janapada* was peopled by members of the four principal castes and other mixed castes so that its population was heterogeneous.

**VARNA AND JĀTI**—Pāṇini mentions members of the same caste or *Varṇa* as *savarṇa* (from *samāna varṇa*, VI.3.85).

However, the term *Jāti* is used more often for caste. In the early Vedic texts and even in the *Kātyāyana Śrauta Sūtra*, it had only the sense of family (*Vedic Index*, Vol. I.281).

In the *Aśṭādhyāyī* an individual member of a caste is designated as *bandhu* in relation to his *jāti* (*Jātyantācch-bbha bandhuni*, V.4.9). 'The affix *cbba* (*iya*) is added to a word ending in the word *jāti*, when it denotes a *bandhu*.' The examples are *Brāhmaṇa-jāṭiyah*, *Kṣatriya-jāṭiyah*, *Vaiśya-jāṭiyah*. The *Kāśikā* says that *bandhu* in the *sūtra* means an individual; the *jāti* or class is in itself an invisible entity which achieves concrete form only through its component parts or *bandhus*. The term *bandhu* implies relationship, thus pointing to the fact that the *jāti* had evolved out of the common bond of mutual kinship. The word *sabandhu* in *sūtra* VI.3.85, indicates this idea of kinship, (*samāna-bandhutva*) uniting members of one caste.

**SAGOTRA**—Next to caste was *Gotra*. *Gotra* denoted the ancestral family from which its members traced their descent. Members belonging to the same *gotra* were called *sagotra* (VI.3.85). The *gotra* name of a person on the basis of his *gotra* must have been a matter of considerable practical importance. In the *Jātakas* we often find the *gotra* name of a person asked along with his personal name. This is shown by Pāṇini having prescribed elaborate rules for the formation of *gotra* names, e.g. Garga, father; Gārgi, son; Gārgya grandson; Gārgyāyaṇa great-grandson.

**SAPINḌA**—It is important to note that the word *Sapiṇḍa* is peculiar to the *Sūtra* literature; there is no trace of it either in the *Saṃhitās*, or the *Brāhmaṇas* and *Aranyakas*. The *Dharmśāstra* works explain *Sapiṇḍa* as blood-relations upto the seventh degree on the father's and fifth on the mother's side (*Manu*, V.60). Pāṇini refers to the *Sapiṇḍa* institution in the aphorism, *Vānyasmin sapiṇḍe sthaviratore jīvati* (IV.1.165), which states that a great-grandson was called *yuvan* when a more elderly *Sapiṇḍa*, i.e. either his uncle or grand-uncle was alive.

**SANĀBHI**—*Sanābhi* is equal to *samāna nābhi*, i.e. those connected with a common *nābhi* or umbilical cord (VI.3.85), thus bringing within its fold all the blood-relations of different

degrees. In the *Rigveda* I.139.9, the seer Paruchchhepa says: our *nābbis* (umbilical cords) join us to Manu, Atri and Kaṇva of old (*Asmākaṁ tesu nābbayah*). In *Manu*, *Sanābhya* is taken as *Sapinda* (cf. *Kullūka*, V.184).

*JNĀTI*—*Jñāti* mentioned in *sūtra* VI.2.133 is explained by the *Kāśikā* as comprising 'all relations on the mother's and father's side' (*jñātayo mātṛi-pitṛi-sambandhino bāndhavāḥ*, VI.2.133). Pāṇini considers *jñāti* to be synonymous with *sva*, i.e. kinsmen or paternal relations (I.1.35).

*SAMYUKTA*—*Jñāti* and *Samyukta* occur in the same *sūtra* (VI.2.133), the latter formed a smaller social unit than the former. The *Kāśikā* says that the *saṁyuktas* included relations on the wife's side only, as brother-in-law and others (*saṁyuktāḥ strī-sambandhinaḥ śyālādayaḥ*), which means that the wife's *jñātis* were the *saṁyukta* relations of the husband. Among *saṁyuktas* Pāṇini himself mentions *śvaśura-śvaśrū*, i.e. father-in-law and mother-in-law (I.2.71), and *śvaśurya* or brother-in-law (IV.1.137).

*FAMILY (KULA)*—The family was considered to be the fundamental unit or nucleus of society in ancient India. Society was an aggregate of families, each comprising several members under the headship of the father, or in his absence the eldest brother, and as far as possible partaking of a common household. Pāṇini calls family a *kula* (IV.1.139; IV.2.96).

The word *kulīna*, 'of eminent family,' (IV.1.139) indicated high descent. The epithet *mahākula* was indicative of a still higher family status. Pāṇini refers to the members of these distinguished families as *mahākulīna*, *mābākulīna* and *mābākula* (IV.1.141). On IV.1.139 the *Kāśikā* refers to a member of a superior family of *śrotṛiya* Brāhmaṇas as *śrotṛiya-kulīna*. *Manu* points out that a *kula* could be improved in its status by the following factors: (1) marriage, (2) study of the Vedas, and (3) performance of Vedic rites, (*Manu*, III.66; 184-186), to which the *Mahābhārata* echoing the same popular esteem for *mahākula* adds *tapā*, *dama*,

*annadāna* and *samyag vṛitta* (Udyogaparva, 36.23-29).

On the other hand some families suffered in social status by their neglect of Vedic study or lapses in morals; members of such degraded families were stigmatised as *dusbkulīna* or *dausbkuleya* (IV.2.142).

VAMŚA—*Vamśas* could be both natural and cultural in their character. The spiritual lineage is called by Pāṇini *Vidyā-sambandha*, and the natural *Yoni-sambandha* (IV.3.77; VI.3.23). The spiritual lineage is represented by a succession of teachers and pupils. The natural lineage is traced both on the father's and mother's side, as pointed out by Patañjali (IV.1.147; II.261).

It was the duty of the pupils to recite the succession-lists of the teachers of Schools to which they belonged. A few such spiritual genealogies are preserved in Vedic works.

Family pedigrees also seem to be carefully preserved by counting the number of its generations from the original founder. *Sūtra*, II.1.19, *Samkhyā vamśyena*, states that a numeral may be prefixed to the name of an ancestor (*vamśya*) and the compound thus formed will indicate the number of generations descended from him. As an instance Patañjali cites *ekaviṃśati-Bhāradvāja*, meaning that there were twenty-one descendants in the line of Bhāradvāja (I.499).

A second instance is *triṣaṅchāśad-Gautamam* (Pat. I.499 on II.4.84), meaning that there were already counted fifty-three generations of the descendants of Gautamas. These numbers afford valuable chronological data for computing their time allowing 25 years to a generation. Thus the first Bhāradvāja should be dated to about five-hundred years earlier and the first Gautama to about thirteen hundred years earlier than the time when the two illustrations were adopted. It may be noted as a striking resemblance that the *Bṛihadāranyaka Upaniṣad* also knows only of 57 generations of teachers. It may be surmised that perhaps this stock-example of fifty-three Gautamas dates from the time when the *Vamśa* lists were being

compiled in the Brāhmaṇa period. We may also note that the Gautama family with which this example is connected was an important family famous for its learning as represented in its several descendants like Aruṇa, Uddālaka Āruṇi and his son Śvetaketu Āruṇeya in the Upanishads.

The *sūtra* IV.1.163 mentions the two terms *Vamśya* and *Yuvā* which denoted the great-grandfather and the great-grandson respectively as being alive at the same time (*Jīvati tu vamśye yuvā*). As stated above, suffixes were added to indicate these distinctions, as in the series Garga-Gārgyāyaṇa.

**GRIHAPATI**—The smallest social formation was the *Gṛiha*, its master being called *Gṛihapati* (IV.4.90), in whom vested the supreme authority of the family. Generally the father was the *grihapati*, but after him his eldest son. *Sūtra* IV.1.164 (*Bhrātari cha jyāyasi*) points out that the younger brother was called *yuvā*, when he was under the guardianship of his elder brother as the head of the family.

The family system was called *gārbhapata*, of which Pāṇini cites the example *Kuru-gārbhapatam* (VI.2.42), i.e. the family-system in the Kuru country, to which Kātyāyana adds another example, viz. *Vṛjī-gārbhapatam*, the family-system in the Vṛjī country.

**FAMILY RELATIONSHIPS**—The sphere of relationships constituting the family is indicated by the following list from the *Ashṭādhyāyī*:—

*Mātā*, *Pitā* (I.2.70); *Pitāmaha*; *Pitṛivya* (uncle IV.2.36); *Bhrātā*, *Sodarya* (uterine brother, IV.4.109); *Jyāyān Bhrātā* (IV.1.164); *Svasā* (sister, I.2.68); *Putra*, *Pautra* (V.1.10); *Pitṛi-shvasā* (father's sister, VIII.3.84), *Paitrishvaseya* (her son, IV.1.132); *Mātri-shvasā* (mother's sister, VIII.3.84) and her son *Mātrishvaseya* (IV.1.134); sister's son or *Svasrīya* (IV.1.143); brother's son or *Bhrātṛivya* (IV.1.144); *Mātāmaha* (mother's father, IV.2.36); *Mātula* (mother's brother, IV.2.36) and *Mātulānī* (maternal uncle's wife, IV.1.49).

The parents are called *Pitaraṇ* by the *Ekaśeṣa* compound

which drops out *mātā* (I.2.70). Patañjali's illustration *mātā-pitarau* on the *vārttika*, *Abhyarbitam* (II.2.34; 1.436) recalls Manu's view that the mother was entitled to greater esteem than the father (*Manu*, II.145). Pāṇini was probably of the same view as inferred from his mentioning *Mātāmaha* before *Pitāmaha* (IV.2.36). In the *Ekaśeṣa* compounds like *Pitarau* (parents), *Bhrātarau* (brother and sister, I.2.68), *Putrau* (son and daughter, I.2.68), and *Śvaśurau* (parents-in-law, I.2.71), it is always the word for the male that is retained and expresses the female also, which is probably indicative of his importance in a patriarchal society. The *sūtra* I.2.67, *Pumān striyā* points to their relative positions. According to *sūtras* I.2.56 and 57 Pāṇini knowingly eschewed the discussion of *Pradhāna* (Principal) and *Upasarjana* (Subordinate) from the *Aṣṭādhyāyī*. In his view the usage of society is the best guide in matters like defining the primary and secondary position of husband and wife, teacher and pupil, male and female, etc.

Pāṇini refers to a father with many children as *Bahuprajah* (V.4.123), and to a grandfather as *Putrapautrīṇa*, who lived to enjoy the affection of his sons and grandsons in an expanded family (*Putra-pautramanubhavati*, V.2.10).

**FRIEND**—The domestic sphere of the home was extended in a wider social circle of friends. The *Jātakas* include *mitta* and *subajja*, friends and acquaintances, in the gradation of relationships. (*māta-pitu-mitta-subajja nāti-vaggo*, *Jātaka* Vol. V, p. 132).

Pāṇini calls a friend *sakhi* (V.1.126), or *mitra* (V.4.150), and friendship *sakhyam* (*sakhyuḥ bhāvaḥ karma vā*, V.1.126), or also *saṃgatam*, comradeship (III.1.105). Pāṇini marks out a friend by his goodness of heart and the enemy by its wickedness (*Subṛid-durṛidau*, V. 4. 150). Friendship to last for a life-time is called *ajarya*. In the following interesting *sūtra* Pāṇini puts his seal of approval on the basic principle of friendship so often repeated in Sanskrit literature:

*Sāptapadīnam sakhyam*, (V.2.22).

Friendship is called *sāpta-padīna* because it is accomplished through "Seven Steps" (*sapta-pada*). In the *Atharva-veda*, Atharvā calls Varuṇa his *sapta-pada* friend, and Varuṇa pleased with the insight of Atharvā and his consequent fitness to keep the Pṛiṣni cow reciprocates the same sentiment (*Atharva*, V.11.9, 10). The *Mahābhārata* also repeats the conception of *sāpta-pada* friendship (Vanaparva, 260.35; 297.23). We find the full explanation of *sāpta-pada* in the *Sāptapadī* ritual of marriage as given in the *Gṛīhya Sūtras* where the bridegroom makes the bride his *sāptapadī* friend<sup>1</sup> by repeating seven formulas beginning with *Iṣha* and *Ūrja*. The conception symbolised by the outer form of taking 'seven steps' appears to be very old, since the *Ṛigveda* also mentions Agni milking the *Iṣha* and the *Ūrja* for the *Sāptapadī* (*Ṛig*. VIII.72.16). Originally the *sāptapadī* friendship was perfected round the fire; later the phrase assumed a figurative sense. (Cf. *Vālmīki Rāmāyaṇa* describing the friendship of Rāma with Sugrīva as *agni-sākshika*, Kish. 8.4).

**SERVANTS**—In Pāṇini a new word *kimkara* (III.2.21) unknown in the Vedic and Brāhmaṇa literature denotes a domestic servant. The *Gaṇa-pāṭha* mentions several classes of them, e.g. (1) *parichāraka* (attendant), (2) *parishechaka* (one helping in bath), (3) *utsādaka* (one who helps in toilet), (4) *udvartaka* (one who rubs the body with unguents), (5) *snātaka* (II.2.9 and VI.2.151, *yājakādi* group), (6) *praleṭhikā* (a female servant who applies paste to the body), (7) *vileṭhikā* (a female servant who applies unguents before bath), (8) *anuleṭhikā* (a female servant who applies them after bath), (9) *anuchāraka* (an assistant), (10) *maṇi-pālī* (a female to keep charge of jewellery, IV.4.48), (11) *dvāra-pālī* (a female door-

<sup>1</sup> For wife as a friend, see *Taittirīya Saṁhitā*, VI. 2.9.2. The same sentiment is echoed by Kālidāsa in *Raghu*. VIII.67: *Gṛibhīni sachivāḥ mithaḥ sakhbā*.

keeper), (12) *daṇḍa-grāha* (bearer of staff) and (13) *cbāmara-grāha* (bearer of fly-whisk, IV.1.146). Most of these servants formed part of the establishment in the king's household and were in the service of aristocratic or high families as stated in the *Arthaśāstra* and the *Kāmasūtra*. In the *sūtras*, Pāṇini mentions *dauvārika*, chamberlain (VII.3.4), *vaivadbika*, carrier of load (IV.4.17) and *udaka-hāra* or *udahāra* water-carrier (VI.3.60).

**GUESTS**—Hospitality (*ātithya*, V.4.26) to strangers and guests was a cardinal virtue of household life. The hospitable man is referred to as *ātitheya* (*atithau sādhuḥ*, IV.4.104). The *Grihya Sūtras* lay down detailed rules for honouring a guest on his first arrival. Pāṇini mentions *pādya* and *arghya* (V.4.25) in the order in which they were offered to a guest, although grammatically contravening his own rule II.2.33. He also borrows from the Vedic terminology the word *goghna*, i.e. one for whom a cow was dedicated (III.4.73). A distinguished guest like a king, a priest, a preceptor, or a respectable relation was considered worthy of this honour. All these persons are incidentally mentioned in a *sūtra* (VI.2.133).

### CH. III, SECTION 6. FOOD AND DRINKS

(*Anna-Pāna*)

The *Aṣṭādhyāyī* contains material for an important chapter on the history of food and drinks in ancient India. Food is called *anna*, and the eater of food *annāda* (III.2.68). The word *bhakta* which also occurs in the *Jātakas* (*yāgu-bhattādīni*, *Takkala Jāt.* IV.43) and the *Arthaśāstra* (Text II.24) primarily denoted *anna*, as in *sūtra* VI.2.71 (*Bhaktākhyās-tad-arttheshu*) where names of edible articles are implied. A servant or wage-earner whose daily remuneration was given to him in the form of food was called *bhākta* or *bhāktika*, a practice which seems to have been more true in the case of agricultural labour. The *Arthaśāstra* says that food and wages (*bhakta-veṭana*) were paid to the artisans, but food only to agricultural labour (*Arth.* Text II.24). Patañjali is even more specific: 'The meaning of the root *kṛishi* is not restricted merely to the actual operation of ploughing, but it also implies all accessory efforts by way of providing food (to labour), seed and bullocks, etc. which together contribute to the complete fulfilment of the sense of the verb' (*Bhāṣya*, II. 33, *Yadasau bhakta-bija-balīvardaiḥ pratividbānam karoti sa kṛishy-artbah*). The other sense of *bhakta*, viz. boiled rice is seen in *sūtra* IV.4.100, which prescribes a suffix to denote a thing that is good for *bhakta* (*Bhaktāṇ-ṇaḥ*). *Kāśikā's* examples *bhāktah śālīḥ* and *bhāktas-taṇḍulaḥ* show that *bhakta* here stands only for boiled rice, a meaning which it still retains in Hindi *bhāt*.

CLASSIFICATION OF FOODS—(i) *Bhojya*—In a simple-looking *sūtra*, round which controversy has raged, Pāṇini explains the meaning of *bhojya*:

*Bhojyam bhakshye*, VII.3.69.

It means that the word *bhojya* is irregularly derived in the sense of *bhaksbha*. To this Kātyāyana raises an objection that *bhaksbha* is not to be taken as a synonym of *bhojya*, since *bhojya* includes all articles of diet, both solid and liquid, while *bhaksbha* denotes only solid food. Kātyāyana suggests that the proper word to express the sense of *bhojya* is *abhyavahārya*, 'worthy of being taken in.' Patañjali disagrees with Kātyāyana and defends Pāṇini by saying that in such older examples as *ab-bhaksha* and *vāyu-bhaksha* (one who takes in water or air) even non-solid substances occur as the object of *bhaksbha*, and hence Pāṇini's idiom in equating *bhojya* with *bhaksbha* is unobjectionable. All subsequent commentators have accepted Patañjali's liberal interpretation of *bhaksbha* in this *sūtra*, viz. that it stands both for solid (*khara-viśada*) and liquid (*drava*) foods (cf. *Kāśikā*, *Iha bhaksbham-abhyavahāramātram*). Dr. Goldstücker, however, raised his voice of dissent against Patañjali and maintained that 'in Pāṇini's time, which preceded the classical epoch, *bhaksbha* must have been used as a convertible term for *bhojya*; while at Kātyāyana's period, this rendering became incorrect, and the *sūtra* needed correction' (*Pāṇini and his Place in Sanskrit Lit.* p. 97). Dr. Goldstücker's statement, however, does not hold good even for the whole of the *Aśṭādhyāyī*, since in Pāṇini's own *sūtra* II.1.35 (*Bhaksbheṇa miśrikaraṇam*) as read with IV.2.16, (*Samśkṛitam bhakshāḥ*) *bhaksbha* denotes solid food only and not liquids, as is evident from the illustration in the *Bhāṣya*, i.e. *guḍena samśrīṣṭā guḍa-samśrīṣṭā, guḍa-samśrīṣṭā dhānā guḍa-dhānāḥ* (I.387), which is accepted by all subsequent commentators. (Cf. *Kāśikā*, IV.1.16; *Khara-viśadam abhyavahāryam bhaksham ity ucchyate*; also II.1.35). Here *bhaksbha* cannot be said to be strictly synonymous with *bhojya*, if, as rightly argued, *bhojya* included both liquid and solid diets. The correct view, we submit, is that *bhaksbha* has a two-fold sense in the *Aśṭādhyāyī*, a more general sense in *sūtra* VII.3. 69 and a restricted one elsewhere. As for the contention of Dr.

Goldstücker (*ibid*, p. 97) that in the classical language *bbaksbhya* is different from *bbojya* and applies to solid food only, we submit the following three examples from Kauṭilya, where exactly as in Pāṇini both meanings prevail side by side:

- (a) *Māmsa-surā-bbaksbhya-bbojana*. (*Arth. Text*, p. 214), i.e. eating of meat and other solid foods and drinking of liquors;
- (b) *Sūdo bbaksbakāro vā bbaksba-bbojanam yācheta* (p. 239), i.e. the cook or one who prepares food may ask for some *bbaksba* and *bbojana*;
- (c) *Bbaksbhyeshu smarati* (p. 252), i.e. the king at meals remembers (his courtier).

In the above examples (a) and (b) distinguish between the meanings of *bbaksbhya* and *bbojya*, while (c) uses *bbaksbhya* as synonymous with food in general. It is this latter sense that holds good in Pāṇini's *sūtra* VII.3.69.

(ii) *Bbaksbhya* and *Miśrī-karāṇa*. For the rest of the *Aśbādhyāyī* Pāṇini has distinguished *bbaksbhya* (II.1.35) from *anna* (food in general, II.1.34), and it is, therefore, right to take it as denoting *kbādyā* (eatable or solid) articles only. Pāṇini's own examples of *bbaksbhyas* as given in *sūtra* VI.1.128 are (1) *palala* (meat), (2) *sūpa* (pulses) and (3) *śāka* (vegetables), which are compounded with words denoting relish-giving articles of diet like *ghṛita*, *guḍa*, etc. According to *Kāśikā*'s gloss on VI.2.154 (*Miśram chānuṣa-sargam asandban*) *guḍa*, *tila* and *ghṛita* are examples of *miśra* articles. It follows that for improving the taste it was permissible to have any suitable combination with the principal *bbaksbhya* food. The process of *miśrīkarāṇa*, mixing therewith, is the same as *saṁśṛishṭa* (IV.4.22). The *sūtra* *Samśṛishṭe* provides that the suffix *ṭhak* is added to a word when the sense is 'mixed therewith.' According to Pāṇini *chūrṇa* (IV.2.23) *lavaṇa* (IV.2.24) and *mudga* (IV.2.25) are ingredients which are used in 'mixing therewith.' Kātyāyana, perhaps too subtly, thinks that there is something

wrong in salt being considered as an article for 'mixing,' since it is not an eatable by itself but an adjunct of food (*guṇa*) being one of the six *rasas*. (Cf. Kātyāyana on IV.4.24; II.330). But Pāṇini understands salt not merely as a *rasa*, but to be a *pañya* or material commodity (cf. *lāvaṇika*, a dealer in salt, IV.4.52), and therefore a mixable article with food.

(iii) *Vyañjana and Upasikta*. Whereas *miśra* articles are mixed at the option of the eater, the use of *vyañjanas* is obligatory to make the food tasteful. Pāṇini takes *vyañjana* in the sense of *upasechana*, (i.e. ingredients of seasoning to improve the taste, IV.4.26, *Vyañjanair-upasikte*), as example of which Patañjali mentions *dadhi* (curds) (*Annena vyañjanam*, II.1.34) and the *Kāśikā* on Pāṇini II.4.12 mentions both curds and butter (*dadhi-gḥṛitam*). The nature of any dish determines whether a particular article bears to it the relation of a *vyañjana* or *miśrīkaraṇa*, i.e. an indispensable or optional ingredient of mixing. For example, the *Kāśikā* takes *gḥṛita* as an article both for mixing and for seasoning the food (*Kāśikā* on VI.2.128 and 154).

(iv) *Saṃskṛita*. This term (IV.2.16 and IV.4.3) denotes such food as is ready for eating direct from its place of preparation, e.g. groats ground in a hand-mill. Patañjali further points out that barley which is being pounded in the mortar is not in an eatable stage until it is boiled (*Bhāshya*, IV.3.25; II.307). Pāṇini mentions *dadhi* (IV.2.18), *udaśvit* (butter-milk, IV.2.19) and milk (*kṣīra*, IV.2.20) as examples of *saṃskṛita* food. The *Kāśikā* instances *apūṣa* or sweet bread baked in an oven as coming under this class (*bbrāshṭrā apupāḥ*, IV.2.16).

**DIFFERENT FOODS**—A list of the principal food products and their preparations mentioned in the *Ashṭādhyāyī* is given below:—

#### I. Grains.

1. *Cereals*. (i) *Śāli* (V.2.2), a kind of rice growing

in winter which is replanted and called *jaḍaban*.

(ii) *Mabāvrihi* (VI.2.38). One of the best known varieties of rice mentioned by Charaka in his list of principal kinds of rice (*Charaka Saṃhitā*, Nidāna-sthāna, IV.6). Sūsruta mentions *mabāsāli* (Sūtra-sthāna, 46.7), which was perhaps a kindred variety of *mabāvrihi*. Patañjali praises the *śāli* rice grown in Magadha (I.19). This variety seems to have survived for more than a thousand years. According to Yuan Chwang: 'There is an unusual sort of rice grown here (Magadha), the grains of which are large and scented and of an exquisite taste. It is specially remarkable for its shining colour. It is commonly called "the rice for the use of the great." (Beal, *Siyuki*, II.82). This appears to be the rice called *Mabāsāli* and *Sugandhikā* (Julien). Hwui Li, the biographer of the Chinese pilgrim states that the *Mabāsāli* rice was grown only in Magadha and that Yuan Chwang, during his stay at Nālandā, was entertained with this special kind of rice (H. D. Sankalia, *Nalanda*, pp. 192-93). Pāṇini's acquaintance with the *mabāvrihi* rice of Magadha must be due to his intimate knowledge of eastern India.

(iii) *Hāyana* (III.1.48) a kind of *vrihi* (the rainy crop which is not transplanted); included by Charaka amongst the nine varieties of well-known rice.<sup>1</sup> 'In the *Kāṭhaka Saṃhitā* and the *Śatapatha Brāhmaṇa* the term appears as a designation of a species of red rice' (*Vedic Index*, Vol. II.502).

(iv) *Yavaka* (V.2.3). Both Pāṇini and Charaka mention *yavaka* as the name of a variety of rice. Pāṇini refers to it also in the *Gaṇa-pāṭha* (*yava vrībishu*, V.4.3, from which we get *yavaka*). The same *gaṇa* also contains *jīrṇa śālīshu*, from which we get *jīrṇaka* as a kind of rice, probably the same as *jūrṇa* of Charaka (Sūtra-sthāna, XXVII.18).

<sup>1</sup> *Hāyanaka-yavaka-chīnak-oddālaka-naishadbethaka-mukundaka-mabāvrihi-pramōdaka-sugandhikānām navānām*. Also Sūtra-sthāna, XXVII.12, where the name is *bāyana* as in Pāṇini, not *bāyanaka*.

(v) *Shashṭikā* (V.1.90), so called because it took sixty days to ripen (*shashṭi-rātreṇa pachyante*); it was considered as one of the best varieties according to medical authorities (*Charaka*, *Sūtra-sthāna*, XXVII.13).

(vi) *Nīvāra* (III.3.48), a wild inferior variety.

Pāṇini refers to the bank (*kūla*) of a river called *Devikā* (VII.3.1), on which was grown, according to Patañjali, a special kind of rice called *dāvikākūla śāli* (III.316). The river *Devikā* is identified with *Deg* flowing through *Jammu* and *Sialkot*, still famous for its excellent rice.

2. *Pulses*. *Mudga* (IV.4.25); *Māsha* (V.1.7; V.2.4); *Kulattha* (IV.4.4), *Dolichos uniflorus*, mentioned as an article to be eaten with food (*samiskāraka dravya*). *Charaka* enumerates *kulattha* amongst pulses (*śamī-dhānya*, *Sūtrasthāna*, XXVII.26).

3. *Other Grains*. *Yava* (barley, V.2.3); *Yavāni* (a kind of inferior barley, IV.1.49); *Aṇu* (V.2.4) a small grain (*Panicum miliaceum*) which is the principal food of the poorer people in the *Sindh-Sagar doāb* and other parts of the *Punjab*; *Gavedbhukā*<sup>1</sup> (IV.3.136), *Coix barbata*, boiled with rice or barley in preparing gruel; and *Tila* (V.1.4; II.7).

## II. *Cooked Foods (Kṛitāṇna)*.

(1) *Odana* (IV.4.67), boiled rice, also called *bbakta* (IV.4.100), must have been a favourite diet, since as many as six varieties of rice are mentioned in the *Ashṭādhyāyī*, of which some varieties were considered specially good for preparing *bbakta* (IV.4.100). *Odana* was either boiled alone in water, called *udakandana* and *udaudana* (VI.3.60), or prepared in combination with meat (*māṃsaudana*, IV.4.67). Vegetables and soups (*śāka*, *sūpa*, VI.2.128) were other ingredients eaten with boiled rice. *Charaka* giving a list of

<sup>1</sup> *Kāṭyāyana* considers the reading of *Gavedbhukā* in the *Bilvādi gaṇa* (IV.3.136) as authentic (*Bhāṣya*, II.323). The same *gaṇa* also contains *godhūma* and *maṣūra*.

thirty-five kinds of rice prescribes the use of *ghṛita*, *taila*, *phala*, *māsba*, *tila* along with *odana* (Sūtrasthāna, XXVII.257). In India *odana* is most commonly eaten with *sūpa* of various pulses. According to the *Mahāummaḡe Jātaka*<sup>1</sup> the food of a labourer consisted of *bhatta* from barley eaten with *sūpa*. According to Patañjali *odana* made a decent dish to feast Brāhmaṇas (II.3.65; I.467) and friends (I.1.72; I.182). He repeats several times the phrase, *Vindhyo vardbitakam* (I.4.24; I.327), comparing humorously the heap of rice served on a plate with Mount Vindhya. (*Bhāshya*, I.220, *Ekaścha taṇḍulaḥ kṣbut pratighāte' samarthas-tat-samudāyaś-cha vardbitakam samartham*). *Vindhya vardbitaka* is a common sight in the eastern districts of the U. P. where rice is the staple food.

(2) *Yavāgū* (IV.2.136). Barley gruel was a popular food like *odana*, as can be gathered from its repeated mention in the illustrations to *sūtras*. The *Jātakas* mention *yāgu* as a popular food. Patañjali considered *yavāgū* to be a liquid diet (*Bhāshya* on VII.3.69). Pāṇini specially mentions the *yavāgū* eaten in the Sālva country (*Sālvikā Yavāgū*) which like the breed of Sālva bulls enjoyed wide reputation (IV.2.136, *Go-yavāgvoś-cha*). The ancient *Sālva janapada* consisting of a confederacy of six member states most probably coincided with the vast territory stretching from Alwar to Bikaner in Rajasthan. People in these parts are still quite fond of eating gruel, which is of two kinds, viz. (1) 'thin *lapsī*, that is sweet in taste and eaten by the rich, and (2) thick *rābarī* that is saltish and prepared by the poor. Pāṇini also mentions *ushṇikā* in *sūtra* V.2.71 as a *saṃjñā* word, which according to the *Kāśikā* was the name of a *yavāgū* of very thin consistency (*alpānnā yavāgūr-ushṇik-ety uchyaate*). In *sūtra* II.2.34 Pāṇini describes *nakhām-pachā*, 'nail scotching.' The *Kāśikā*

<sup>1</sup> Cf. *Mahāummaḡe Jātaka*, Vol. VI. p. 372; *muṭṭhiṃ muṭṭhiṃ katvā appasūpaṃ yava-bhattaṃ bhuñjamānaṃ*. Cf. also *Jāt.* Vol. I., p. 486 describing *bhatta* of inferior rice for poor men (*taṇḍulamaṇassa bhattaṃ*).

connects *nakham-pachā* with *yavāgū*. We know from other sources that *yavāgū* was of two kinds, *peyā* and *vilepī*. The *peyā* or thin variety was drunk like *saktu* dissolved in water, while *vilepī* or paste-like *yavāgū* was licked with fingers of the hand. The *usbhikā* in *sūtra* V.2.71 must be the *peyā* variety, whereas the *nakham-pachā yavāgū* was called *vilepī* which scotched the finger ends when licked hot.

(3) *Yāvaka* (V.4.29). According to Patañjali *yāvaka* was made by pounding barley with pestle and mortar to remove the chaff, and then boiling its pearl grain in water or in milk with sugar added to it.<sup>1</sup> Charaka calls *yāvaka* a steamed food (*svinna bhakshya*, *Sūtra-sthāna*, XXVII.259). The *Arthaśāstra* lays down that prepared *yāvaka* must weigh twice the original quantity of barley cooked (*Arth. Text.* II.15).

(4) *Pishṭaka* (IV.3.147). *Pishṭa* (IV.3.146) denoted the ground paste of any grain. Articles prepared by mixing *pishṭa* were generally called *pishṭamayam*. *Pishṭaka* on the other hand was a special preparation, probably the cakes made of powdered rice. Suśruta counts *pishṭaka* among cooked delicacies (*kṛitānna varga*) (G. P. Majumdar, *Food, Indian Culture*, I.413).

(5) *Samyāva* (III.3.23). Kullūka explains *samyāva* as a sweet preparation made with *ghṛita*, milk, *guḍa*, and wheat-flour (*Manu*, V.7), almost the same as modern *chūrmā*. Suśruta also includes it among confectionaries (G. P. Majumdar, *ibid*, p. 413).

(6) *Apūpa* (V.1.4). Sweet cakes made of wheat flour and *ghṛita*, a dainty confectionary prepared even now. The *Kāśikā* mentions oven-baked *apūpas* (IV.2.16). The *Chāndra Vṛitti* and the *Kāśikā* read *abhyūsha* (variant form *abhyosha*)

<sup>1</sup> *Bhāṣya*, II.307; *Idam tu na vidhyati anūkalbalo yāvaka iti. . . Na cha yāvaka ulūkalād evāpakṣishya abhyavahriyate' vakyam randhanādini pratikṣyāni*.

in the *apūpādi gaṇa*.<sup>1</sup> It must have been an ancient food since the *Kāmasūtra* also mentions *abhyūsha-khādikā* as a sport in which boys and girls took part by eating the *abhyūsha* (parched grain) (*Kāma-sūtra*, ch. IV).

(7) *Saktu* (VI.3.59). Pāṇini mentions *saktu* (modern *sattu*) mixed with water as *udaka-saktu* or *udasaktu*, but Patañjali mentions *dadhi-saktu*, i.e. groats eaten with *dadhi* as the seasoning ingredient (I.1.57; I.149). *Bhrāśbṛa* or the place for frying is also mentioned (VI.2.82).

Another article of diet when mixed with water was called *udamantha* or *udaka-mantha* (VI.3.60). *Mantha* was a kind of groats made from fried rice (*Kātyāyana Śrauta*, V.8.12) and generally mixed with milk (*manthaḥ kṣhīra-samīyuto dhānā-sakṭuḥ*). The special word *udamantha* referred to such *sattu* when taken only with water. This food is now called *bhujjīyā ke sattu*. (For *mantha*, see also *Sat. Br.*, II.5.2.6).

(8) *Kulmāsha* (V.2.83). Pāṇini mentions *kulmāsha* as a food which was ceremoniously eaten on a particular day in the year (*Tad-asminn-annam prāye samjñāyām*, V.2.82). The particular Full-Moon day on account of its association with *kulmāsha* was known as *Kaulmāshī Purnamāsī*.

What was the nature of the *kulmāsha* food? In the *Nirukta*<sup>2</sup> *kulmāsha* is an inferior food, which is confirmed by the *Chbāndogya Upanishad* where the people of *Ibhyagrāma* (richmen's village) in *Kurukshetra* begin eating *kulmāsha* after the crops were damaged by hail-storm (I.10.2). The *Kummāsa-piṇḍa Jātaka* (No. 415) refers to it as the coarse food of the poor (*dalidda*) workman which he could carry in the form of a ball or lump, and to which on account of his

<sup>1</sup> Also *prithuka*, boiled rice, crushed and dried (*chiruve*); cf. *Kāśikā*, *gūḍa-prithukāḥ*, II.1.35; *Amara*, *Apakvaṁ paulir-abhyūshaḥ*, i.e. half-ripe corn fried in fire.

<sup>2</sup> *Kulmāshan chidāvara ity-avakutsite*, *Nir.* I.4 Dr. Sarup renders it as sour gruel (Cf. *Amara*, *kulmāsha=yavaka*; later *Koshas* add *kāñjika yavaka*. Also *Vedic Index* where the meaning of sour gruel is accepted.

poverty he could not even add a little fat and jaggery (*atelaṃ, alonikam*).<sup>1</sup> *Kulmāśba*<sup>2</sup> thus appears to have been a coarse thick gruel prepared by stewing beans, maize, or any inferior grain in a covered vessel with a little water (*appodaka*) and also adding *guḍa* and oil to it. *Yāvaka* was different from *kulmāśba* in that it was first pounded in a mortar (made *aulūkbala*, *Bhāshya*, II.307) and then boiled like the latter. Charaka considers *kulmāśba* as a steamed food (*svinnabhaṣhya*), heavy to digest and dry in effect (*Sūtra-sthāna*, XXVII.259). The *Kaulmāśbī* day of Pāṇini most probably coincided with the Full-Moon day of Chaitra, and the *Vaṭakini* of *Kātyāyana* with the Full-Moon day of *Kārttika*, when *kulmāśba* and *vaṭaka* cakes of *māśba* paste form the ceremonial food respectively. The Hindi equivalent of *kulmāśba* is *ghughri*. (Cf. *Bhojana-kutūbala*, P. K. Gode, A. B. O. R. I., XXII.256).

(9) *Palala* (VI.2.128). A sweetmeat made of pounded sesamum and sugar or *guḍa*, as illustrated by *Kāśikā*, *guḍena miśraṃ palalaṃ guḍa-palalam* (VI.2.128), and *tila-palalam* (VI.2.135). Its modern equivalent is *tila-kuṭa*.

(10) *Chūrṇa* (IV.4.23). It means wheat flour fried on a pan and mixed with *ghī* and sugar. In this form it was put inside cakes or *apūṣas*, which in Pāṇini's time were called *chūrṇinaḥ apūpāḥ* (*Kāśikā*, corresponding to modern *gūñ-jā* or *guñjbiyā*). The *chūrṇa* preparation is still known as *chūn* in eastern districts like Banaras and *Rasār* in western districts like Meerut.

<sup>1</sup> *Jāt.* III.406; on p. 408 *sukkbāya alonikāya cha. . . kummasapiṇḍiyā*. The commentary explains *sukkbāya* as *nisnebāya*, and *alonikāya* as *phāṇita-virahitāya*, adding that *alonikā* meant *nīphāṇitattā*, absence of jaggery.

<sup>2</sup> *Kāśikā* (also *Candra*) includes *kulmāśba* in the *guḍādi* group (IV.4.103) and illustrates it as *kaulmāśbika mudga*, i.e. *mudga*, suitable for making *kulmāśba*. Chakrapāṇi on *Charaka*, *Sūtra-sthāna*, XXVII.260, explains *kulmāśba* as *yavapiṣṭam ushṇodaka-siktam īśatsvinnam apūṣī-kṛitam kulmāśbam ābuh*.

## III. Sweets.

Pāṇini mentions the following sweets:—

(i) *Madhu*, honey from which is derived the general term *madhura* (V.2.107) denoting all confectionaries. Honey prepared by the common bee is referred to as *ksaudra* (IV.3.118) treated as a *saṃjñā* word.

(ii) *Guḍa* (IV.4.103), molasses, a universal product of sugarcane juice. Pāṇini's phrase 'excellent for making *guḍa*' (*guḍe sādhu*) refers to some special variety of sugarcane yielding better quality of *guḍa*. Even now this consideration prevails with experienced farmers in selecting sugarcane seed for the next crop. Pāṇini refers to vast cane plantations or forests of sugarcane as *ikṣu-vaṇa* (VIII.4.5).

(iii) *Phāṇṭa*, implied as a counter-example in *sūtra* VII.2.18 which mentions *phāṇṭa*. *Phāṇṭa* denotes inspissated juice of sugarcane boiled down to thick consistency, a preparation now called *rāb*, from which after crystallisation sugar is prepared.

(iv) *Śarkarā*, granulated sugar prepared from sugarcane.

## IV. Milk Products.

Milk products are called *gavya* and *payasya* (IV.3.160) of which curds, milk and butter-milk (IV.2.18; *dadhi-payasī* II.4.14) are mentioned as important food articles. *Phāṇṭa* as given in *sūtra* VII.2.18 has the sense of 'made without effort' (*anāyāsa*). The *Kāśikā* understands it as a hot decoction, but the epithet *anāyāsa* points to its old meaning of butter produced from the cream of the day's milk (*ayātayāma*, *Śatapatha Brāhmaṇa*, III.1.8), as opposed to *nāvanīta* churned from curds of the previous day's milk, for which a new classical word, *haiyaṃgavīna* (V.2.23) had come into use in Pāṇini's time.

Pāṇini has an interesting *sūtra*, *Pāṇanī deśe* (VIII.4.9), which apart from its grammatical interest (*i.e.* cerebralisation) acquaints us with the fact that different countries were named

after their popular drinks. Of the four illustrations on this *sūtra* the first cited by the *Kāśikā* and repeated in the *Cbāndru-vṛitti* (VL.4.109) refers to the people of Uśinara country as being fond of drinking milk (*Kṣhīra-pāṇā Uśīnarāḥ*). The information seems to be grounded in fact. Uśinara or the ancient Śibi *janapada* had its capital at Shorkot near the bank of the lower Chenab, and roughly corresponded with parts of Jhang, Multan and Montgomery districts famous for their breed of cows. The geographical term *Pāna-Sindhu* (*Kāśikā*, VII.3.9) should be identified with the south-half portion of Sindhu *janapada* (Sind-Sagar Doab) which was an extension of Uśinara for its prosperity in cattle wealth and of which the inhabitants were fond of dairy products in their dietary. Charaka informs us that the people of Sindhu (*Saindhavāḥ*) were fond of milk (*Chikitsā-sthāna*, 30-31). *Saktu-Sindhu* denoted the northern portion of Sindhu *janapada* where the people eat groats to this day. Eastern India was fond of wines (*surā-pāṇāḥ Prāchyāḥ*) Bālhika of *sauvīra* (a kind of sour drink); Gandhāra of *kashāya* wine.

The *Mahābhārata* mentions *matbīta* (whey) as a favourite drink of the people in the Vāhika country, and Patañjali refers to *māthitika* shopkeepers selling *matbīta* (III.328, *matbitam paṇyam asya māthitikaḥ*).

#### V. Vegetables and Fruits.

Among auxiliary articles of food Pāṇini refers to *śāka* (leafy vegetables), *bhājī* (cooked vegetables, IV.1.42; also called *śrāṇā* in *sūtra* IV.4.67), *sūpa* (juice of boiled pulses, VI.2.128), prepared from pulses like *mudga* and *māsha*. Mention is also made of the practice of munching with food such digestive roots as radish and ginger, called *upadamśa* (III.4.47).

Among fruits *āmra* (mango, VIII.4.5) and *jambū* (rose-apple, IV.3.165) are mentioned. Generally the name of the tree denoted also the name of the fruit (IV.3.163, *Phale-luk*).

**COOKING**—Cooking is called *pakti* (III.3.95). Frying-pans were used for cooking (*ukhā, ukhya*, IV.2.17). The process of roasting on spikes is referred to as *śulā-karoti* (V.4.65) and articles so roasted were known as *śūlya* (IV.2.17). The commentators understand this process to apply only to meat preparations. Pāṇini explicitly refers to *māmsa* in *sūtra* IV.4.67. Kauṭilya also mentions shops of cooked meat (*pakva-māmsika*, II.36) and *śūlya* articles of food.

The cooks in the time of Pāṇini derived their names from two factors, firstly from their specialised skill in preparing particular dishes, and secondly from the quantity which they were capable of handling. The first point is perhaps referred to in VI.2.129, in which the names of various classes of cooks are presumed, as *deva-sūda* and *bhājī-sūda*, i.e. cooks attached to temples and those expert in the cooking of vegetables.<sup>1</sup> Even at present the *bhājī-sūda* is a specialist whose services are in demand at the time of big feasts for making vegetables.

The practice of designating cooks on the basis of their capacity to cook a particular measure or quantity of food is referred to in *sūtra* V.1.52. This may have been a criterion to determine their wages and fitness for employment in domestic and festive cooking. Pāṇini speaks of cooks handling different quantities of food-stuffs, equal to an *āḍhaka*, *āchita* or *pātra* measure (V.1.53). Kātyāyana in a special *vārttika* refers to the cooking of a *droṇa*-measure, from which a female cook competent to handle this quantity was known as *drauṇī* or *drauṇikī* (V.1.52; II.352). There were also female cooks handling larger quantities like two *āḍhakas*, and named *dvyāḍhakī*, *dvyāḍhakikī*, *dvyāḍhakīnā* (V.1.55; II.352). The popularity of these epithets is seen from another rule in which Pāṇini gives as many as four variant forms for designating one who could cook a couple of *kulija*

<sup>1</sup> Cf. *Artha*. Text, V.1, referring to *sūda* and *bhukshakāra* as sauce-maker and sweetmeat-maker respectively. The *Kāśikā*. understands *Devasūda* and *Bhājīsūda* as place-names.

measures, e.g. *dvikulijikī dvikulijīnā, dvikulijā, dvaikulijikī* (V.1.55).

The same principle held good in the case of utensils which were named from the quantity that they could contain (*sambhavati*, V.1.52) as *prāsthika, kauḍavika, kbārīka*, or the quantity that could be cooked in them (*Parimāṇe pachah*, III.2.33). This naming of cooking vessels according to their capacity was of practical use at the time of borrowing utensils for big feasts.

**CUSTOM OF FEEDING DOMESTIC SERVANTS.** Pāṇini refers to the custom of giving food to a domestic servant as part of his wages fixed by custom (*niyukta*, IV.4.66). This practice was so widely prevalent that special terms were used to indicate it, e.g. a servant who got cooked rice as his food every day was called *odanika* or *bhāktika* (*odanikī* for a female servant). According to Pāṇini the customary payments of food to domestic servants were of an obligatory nature:

*Tad asmai dīyate niyuktam* (IV.4.66)

'The affix *thak* is added after the name of food which is to be given as a customary payment.'

The word *niyukta* comes from *niyoga*, which Patañjali explains as a legal obligation like a debt.<sup>1</sup> For example, if one had engaged a servant for a *paṇa* per day, the *paṇa* was a *niyukta* charge, the payment of which at the end of the day was obligatory. We have to think of those circumstances in which an article of food became due in a like manner. We read in the *Arthasāstra* of *bbakta-karmakaras*, i.e. servants engaged on the stipulation of being given daily food. In actual rural economy there has always existed the custom of giving a portion of the mid-day meal to certain domestic servants and menials, like the scavenger and the water-carrier, etc. Their daily wages in respect of

<sup>1</sup> *Yad-yasya niyogataḥ kāryam-ṛiṇaṁ tasya tad-bhavati.* (Bhāṣhya, I.391; in the course of explanation of the *vārttika* on *sūtra*, II.1.43).

the services rendered to the various families consist only of food articles which they are required to collect in the course of the day from the houses served by them. The village Brāhmaṇa also by virtue of his privileged position as Purohita gets a portion, which is no doubt referred to in the illustration *agrabhojanika* (*agre bhojanam asmai niyuktam dīyate*) cited by the *Kāśikā*. In this case the members of the household cannot partake of their food unless the *agrabhojana* has been set apart. It is to be noted that this supply of food (*niyukta bhakṣa*) is part of the stipulated wages for which the servant is employed. According to Pāṇini the food thus supplied might be of different kinds, viz. cooked vegetables (*śrāṇā*), rice cooked with meat (*māṃsa* and *odana*, IV.4.67), or full meal, (*bhakta*, IV.4.68). One getting cooked vegetables would be called *śrāṇika*, or *śrāṇikī* in the case of a female; similarly *māṃsika* (getting meat as food), *odanika* (getting boiled rice) and *bhāktika*. The *bhāktika* was the same as *bhakta-kārmakara* of Kauṭilya, receiving a full meal every day. This practice worked out in a manner that the servant could make a complete meal with the different articles received from different houses. The same person would be a *śrāṇika* in respect of one family, *odanika* in respect of a second, and *āpūpika* in respect of a third. For example, a female water-drawer (*udabārī*) agreed to take vegetables from one house, soup from another, meat and rice from a third and so on, and thus she earned her full meal. If she served a confectioner (*āpūpika*) she would naturally receive an *apūpa* a day as her payment for work, and with reference to that particular house she would be called *āpūpikī*, i.e. a female receiving an *apūpa* every day.

Such an arrangement alone would be responsible for the origin of different designations of servants based on the names of different articles of food as *niyukta* share. This is a living institution in North Indian villages upto this time where

cash payment is practically unknown for domestic and menial services rendered.

**INVITATIONS**—Pāṇini refers to two kinds of invitations to dinner, viz. *nimantraṇa* and *āmantraṇa* (III.3.161). Patañjali explains the former as an invitation to take food at sacrifices (*bavya*) and *śrāddha* (*kavya*), the acceptance of which was obligatory. *Āmantraṇa*, however, was an invitation to a feast extended to friends and relations and therefore less formal (*āmantraṇaṁ kāmāchbārah*, II.165).

**PLATE-LEAVINGS**—Pāṇini refers to special terms applied to food-leavings when served in different kinds of utensils. (*Tatrodhṛitam amatrebhyaḥ*, IV.2.14). The domestic servants enjoy customary rights to receive particular leavings and hence the necessity of special words in the language. The *Kāśikā* records three such leavings of rice-food, viz. *śārāva*, *māllaka* and *kārpara*. The first referred to the leavings from the plates in which rice was actually served for eating, and this must have been the share of the scavenger, as it is up to this day. The second, viz. *māllaka*, was the leavings in the pot (*māllaka*) from which it was served, and this must have been the share of the family barber (*nāpita*). The third or *kārpara odana* was that which was left behind in the cooking pot and as such must have been the customary share of the cooks. The *Kāśikā* explains *uddhṛita* as *bbuktochchbhisbṛta*, and the *Nānārthbāṇava Kosha* as *bbuktojjbṛta* (Vol. II, p. 42). The word *ujjbṛta* is the Prakrit form of Skt. *uddhṛita*.

As to food-habits, Pāṇini refers to them as fasting (*vrata*, III.1.21), gluttony (*audarika*, V.2.67, *ghasmarā*, *admara*, III.2.160), and moderation (*subhita*, II.2.11).

**DRINKS.** Pāṇini mentions the following terms in connection with drinks:

- (1) *Śundika*—Drinking booth (IV.3.76),  
*Śaundika*—Vintner (IV.3.76).
- (2) *Āsuti*—Distillery (V.2.112).  
*Āsutīvala*—Distiller (V.2.112).

- (3) *Madya* (intoxicating liquor, III.1.100);
- (4) *Surā* (wine in general, II.4.25).
- (5) *Maireya* and (6) *Kāpiśāyana*, names of special wines.

These are new classical words unknown to older Vedic literature.

**MAIREYA**—Maireya was a popular drink. The word is unknown in the *Brāhmaṇa* and *Āraṇyaka* literature, which suggests its origin in the post-Vedic period. The Buddha found its use so common as to lay down a prohibition against it. Pāṇini's *sūtra* is *Āṅgāni maireya* (VI.2.70).

'The first syllable of the word preceding *maireya*, gets the acute accent, when that word denotes an ingredient of *maireya*.' It implies that the word *maireya* enters into a compound with words denoting its ingredients.

Leaving the particular grammatical point aside, we infer from the *sūtra* that Pāṇini had a knowledge of the ingredients (*āṅgāni*) of *maireya* liquor. It is not possible to understand the rule properly without a knowledge of these ingredients.

The *Arthaśāstra* of Kauṭilya enumerates six varieties of liquors, viz. *medaka*, *prasannā*, *āsava*, *arishṭa*, *maireya* and *madhu* (*Arthaśāstra*, Text, II.25). It also gives the full recipe of *maireya*:

"Prepare a decoction of *meshaśṛiṅgī* bark, mix it with jaggery (*guḍa*) and add the powder of long pepper (*pīppalī*) and black pepper (*maricha*); to it the powder of *triphalā* may be added optionally,—this is the recipe of *maireya*."<sup>1</sup>

In the above recipe *meshaśṛiṅgī*, *pīppalī*, *maricha* and *triphalā* belong to one group, and *guḍa* to another. Further light on this division is thrown by the two illustrations given on Pāṇini's *sūtra*, by the *Kāśikā*:

गुडमैरेयः । मधुमैरेयः ।

मद्यविशेषो मैरेयस्तस्य गुडविकारस्य गुडोऽङ्गं भवति, मधुनो मधु ।

<sup>1</sup>मेषशृङ्गीद्वक्ववायामिष्टुतो गुडप्रतीवापः पिप्पली-मरिच सम्भारस्त्रिकलायुक्ती वा मैरेयः ।

(*Arb.*, II.25)

Both these examples refer only to the sweetening ingredients of *maireya*, viz. *guḍa* and *madhu*. Obviously according to Pāṇini's intention as implied in the *sūtra*, the word *aṅgāni* refers only to the sweetening ingredients and not to the *aushadhi* contents like *meshaśṛṅgī*, etc. It may be inferred with reason that the *aushadhi* contents of *maireya* remained constant, whereas the sweetening ingredients varied between *guḍa*, *madhu*, *śarkarā*, etc. The naming of *maireya* would thus depend not on the constant ingredients, but on the sweetening contents which varied. For example, the customer ordering his *maireya* drink from the master of the booth would not say *meshaśṛṅgī-maireya* or *triphalā-maireya*, but would express his desire for a variety in taste by ordering for *guḍa-maireya*, *madhu-maireya*, *śarkarā-maireya*, *phāṇita-maireya*, *ikshurasa-maireya*, etc.

The above varieties of sweetening ingredients (*madhura-varga*) mixed with the decoction of *meshaśṛṅgī* and other specified herbs, must have produced a correspondingly superior or inferior quality of drink. Charaka tells us that *maireya* was primarily a *madhura* wine, a drink of sweet taste. The choice of an inferior condiment like *guḍa* and *phāṇita*, or of a superior one like refined sugar made all the difference in the quality, taste and price of the *maireya* drink. The aristocratic customer in the tavern would order a superior grade of wine, and in the case of *maireya* this emphasis would fall naturally on the first part of the compound, i.e. on the word denoting the sweetening ingredient which therefore got an acute accent on it.

The *Arthaśāstra* mentions *guḍa* as a mixture of *maireya* in the recipe quoted above. It agrees with the example *guḍa-maireya* of the *Kāśikā*. The other example *madhu-maireya* i.e. *maireya* prepared by mixing honey, lacks confirmation from the above statement in the *Arthaśāstra*. The question arises as to whether we are on good authority for assuming that other sweetening ingredients besides *guḍa* were also added to *maireya*.

The answer to this is in the affirmative. In the chapter

relating to the duties of the Superintendent of the Royal Storehouse, Kauṭilya gives directions for the storage of liquids tasting astringent:

'Mixture made by combining any one of the substances, such as the juice of sugar-cane, jaggery, honey, raw granulated sugar, the essence of the fruits of *jambū* and jack tree,—with the decoction of *meshaśringī* (a kind of plant) and of long pepper should be stocked. To this the addition of the following is optional, *viz.* *chirbbiṭa*, cucumber, sugar-cane, mango fruit and the fruit of myrobalan. This mixture should be either one month or six months, or a year old. This constitutes the *śukta-varga*.<sup>1</sup>

In this context Kauṭilya does not actually use the name *maireya* for the liquid to be stocked in the royal storehouse, but the recipe leaves no doubt that high class *maireya* is intended. The *osbadhi* contents are the same, *viz.* the decoction of *meshaśringī* and *pippalī* (*maricha* is left out as of minor importance); in the optional group in place of *triphalā* alone, we have greater variety in *āmalaka*, *āmra-phala*, *urvāruka*, *ikṣbu-kāṇḍa*, etc. In the enumeration of the sweet contents, in place of *guḍa* we have six varieties, of which *madhu* is also one. We can now understand the example *madhu-maireya* given in the *Kāśikā* on Pāṇini, VI.2.70. Honey like *guḍa* was also an ingredient from which the particular variety of *maireya* derived its name. We may imagine that both *guḍa-maireya* and *madhu-maireya* were ancient illustrations to Pāṇini's rule. The plural number of the Pāṇinian word *aṅgāni* also stands justified by its reference to as many as seven varieties of sweetening ingredients mixed with *maireya*, *viz.* molasses (*guḍa*), honey (*madhu*), sugar (*śarkarā*), sugar-

<sup>1</sup> इक्षुरस-गुड-मधु-काणित-जाम्बव-पनसानामन्यतमो मेघशृंगी-

(*Arth. Text*, II.15, p. 94).

cane juice (*ikṣhu-rasa*), inspissated juice (*phāṇita*), sugar of jack-fruit (*panasa*) and of rose-apple (*jāmbava*).

**KĀPIŚĀYANA**—*Kāpiśāyana* is referred to in *sūtra* IV.2.29:

*Kāpiśyāḥ śphak.*

The grape exported from *Kāpiśi* was known as *Kāpiśāyani drākṣbā* and its wine *Kāpiśāyanam madhu*. *Kāpiśi*<sup>1</sup> is even today the home of the grape. In ancient days an excellent quality of raisin wine was manufactured at *Kāpiśi* and widely exported.<sup>2</sup> *Kauṭilya* supplies the clue to the name *Kāpiśāyana*: "The juice of grapes is termed *madhu*. Its own native place is the commentary on such of its various forms as *Kāpiśāyana* and *Hārahūraka*." (*Arth. Trans.* p. 145; *Text.* II.25). Obviously there were two varieties of the grape wine, the *Kāpiśāyana* produced in the region round *Kāpiśi* in north Afghanistan, and *Hārahūraka* in the south in the valley of the *Harahvaiti* or *Arghandāb*.<sup>3</sup> The black raisins are still called *harahūrā*, and it is possible that the *Kāpiśāyana* or northern variety of wine was made from green and the *Hārahūraka* or *Kandhār* wine from black grapes.

*Kauṭilya's* sentence, *tasya svadeśo vyākhyānam Kāpiśāyanam*, supplies the needed commentary on Pāṇini's *Kāpiśāyana* which must have been the name of the reputed wines from that region. That *Kāpiśi* was an emporium for this class of drinks is also proved by the recent archaeological discoveries at this site of numerous glass flasks, fish-shaped wine jars and drinking cups which were used in the wine trade many

<sup>1</sup> *Kāpiśi* is ancient Begram on the confluence of the Ghorband and Panjshir rivers. An inscription in Kharoshthī characters recently found there settles the ancient site of the place. (Dr. Sten Konow, *Kharoshthī Ins. on a Begram Bas-relief*, *Ep. Ind.*, XXII, pp. 1-11).

<sup>2</sup> *Bīndusāra* sent for raisin wines from king Antiochos in the third century B.C.

<sup>3</sup> *Harhvaiti* (*Avestan*), *Harahuvati* (O. Persian) = Skt. *Sarasvatī*; also called *Haraquaiti* (cf. *CHJ.* p. 326). It is the modern *Arghandāb*. (*Vedic Index*, II.434, footnote to *Sarasvatī*).

centuries after Pāṇini. (Cf. J. Hackin, *Recherches Archéologiques à Begram*, 1939, pp. 9-10, plates XVII-XIX).

**KASHĀYAS**—Pāṇini also refers to names of *kashāyas*, or decoctions (VI.2.10, *Adhvaryu-kashāyayor jātau*) of which the *Kāśikā* gives several examples. The *dauvārika-kashāya*, must have been an intoxicating drink of mild effect specially prepared for the *dauvārika* or doorkeeper (Pāṇini, VII.3.4; also *Arth.* Text. V.3), whose duties required him to indulge only in the mildest kinds of drinks.

Besides the above names, the *Gaṇa-pāṭha* of V.4.3 (supported both by the *Kāśikā* and *Cbāndra Vṛitti*) includes *kālikā* and *avadātikā* as names of special wines. *Kālikā* must be the same as *kālikā surā* in Kauṭilya (*Arth.* Text. II.25) and *avadātikā* might be only another name for *śvetasurā* of the *Arthaśāstra* (p. 121), also called *prasannā* (cf. *Kāśikā* on V.4.14). Kātyāyana refers to *śidhu* in a *vārttika* on II.2.8.

**DISTILLATION**—In the distillery (*āsuti*, V.2.112), the ingredients were first prepared into a ferment (*kiṇva*); and when their fermentation was complete, they were termed *āsāvya* (III.1.126), literally 'that of which the distillation has become imminent' (*āvaśyaka*). The sediment or refuse (*kalka*) left after distillation was termed *vinīya* (III.1.117), a technical word in the vintner's vocabulary, literally 'which is fit for removal.' According to Kauṭilya, women and children could be employed for removing the *surā-kiṇva*, or fermented dregs (*Arth.* Text, II.25, p. 121).

Another expression originating in the vocabulary of the drinking booth was *kaṇe-batya* (*ḥibati*) regularised in *sūtra* I.4.66, which corresponds to the English idiom 'drinking or draining to the lees.'

### CH. III, SECTION 7. HEALTH AND DISEASE

There is evidence of early investigation and nomenclature in the Vedic period of a number of important diseases and also of the identification of many useful herbs which pharmaceutical research in that age employed to fight disease. The evolution is further suggested by the development of specialised studies, as for example, Toxicology (*Viśha-vidyā*) which is enumerated in one place in the list of special sciences or *vidyās* (*Vedic Index*, II.312).

These studies were cultivated at important educational centres and attracted brilliant pupils gifted with practical mental bias who must have found in them openings for a useful career in later life. Takshaśilā was one such reputed centre at which Jīvaka, the royal physician of king Bimbisāra received his education.

Pāṇini brought up in the traditions of Takshaśilā uses several words for disease, such as *gada* (VI.3.70), *upatāpa* (VII.3.61) and *sparsā* (III.3.16), the last probably referring to contagious diseases. A medical doctor is called *agadamkāra* (VI.3.70). The herbs were known as *oshadhi* and the medicines as *aushadha* (V.4.37, *Oshadher-ajātau*). Since an *aushadha* was a compound of several ingredients to suit the needs of each case Pāṇini takes the view that it did not form a genus or class like the herbs.

A special suffix *tas* was used to indicate the disease to be cured (*Rogāchāpanayane*, V.4.49), in such phrases as *pravāhikātaḥ*, *kāsataḥ*, *cbbardikātaḥ kuru* 'please cure me of (1) diarrhoea, (2) cough, and (3) vomiting'.

**HUMOURS OF THE BODY.** *Kātyāyana* commenting on Pāṇini's *sūtra Tasya nimittam samyogopātau* (V.1.38), mentions the three humours of the body for the first time

together, viz. (1) *vāta* (wind), (2) *pitta* (bile), (3) *śleshma* (phlegm). On this basis Eggeling says, there was "some kind of humoral pathology prevalent among the Indian physicians several centuries before our era." (*Ency. Br.* Vol. 19, p. 970b, 14th edition).

We have separate reference to *vāta* in *sūtra* V.2.129 in connection with a patient (*vātakin*) suffering from wind. *Pitta* occurs in the *Sidhmādi* group (V.2.97) and *śleshman* forms part of the *Pāmādi-gaṇa* (V.2.100).

**DISEASES (ROGA, UPATĀPA)**—Pāṇini frames rules for naming diseases after, e.g. (1) time (*kāla*); e.g. *dvitīyaka*, *chaturthaka*, fevers appearing after two or four days; (2) cause or effect (*prayojana*); e.g. fevers with shivering (*śītaka*) or heat (*uśhṇaka*), or fevers produced by poisons as *viśvpushpa*, and *kāśapushpa* (*Kāśikā*).

Names of diseases (*rog-ākhyā*) were formed according to a regular pattern by adding the *ika* suffix (*sūtra* III.3.108), which according to the commentators regularised such forms as *prachchbhardikā* (vomitting), *pravābhikā* (diarrhoea), *vicharchikā* (scabs), etc. The rule points to the tendency in medical science for names of ailments to follow a uniform derivative pattern, similar to that in modern pathology. *Pravābhikā* diarrhoea and *vicharchikā* (scabs) are referred to in a *sūtra* as *atisāra* and *pāman* (V.2.129).

In medical language patients are described in terms of the disease from which they suffer. Pāṇini notes a general provision to derive the name of the patient after the name of the disease (V.2.128), for example *kushṭhī* from *kushṭha*, one afflicted with leprosy, (VIII.3.97), etc. Similarly he mentions *arśasa* (one suffering from haemorrhoids, V.2.127), *vātakī* (a sufferer from wind troubles), *atisārakī* (V.2.129, one afflicted with dysentery). One suffering from the debilitating effects of a disease was called *glāṣṇu*, 'convalescent' (III.2.139). Kātyāyana notes the word *āmayāvī* (*vārttika* on V.2.122) for an ailing patient. e

**AUTUMNAL DISEASES**—Seasonal outbreaks of epidemics were known, as shown in *sūtra* IV.3.13, referring to *Śaradika roga*, 'autumnal diseases.' These diseases, mostly fevers, coming after the rainy season, are still known.

**LIST OF DISEASES**—The following diseases are noted in the *sūtras*.

(1) *Atisāra* (V.2.129), from which the derivative word was *atisārakī*.

(2) *Arśas* (V.2.127), piles.

(3) *Āsrāva* (III.1.141), discharge. It is a disease mentioned in the *Atharvaveda*, the precise nature of which is uncertain. Sāyaṇa translated it as painful urination (*mūtr-āti-sāra*, *Atharva*, I.2.4) Lanmann takes it as diabetes and Bloomfield as diarrhoea (*Vedic Index*, I.74).

(4) *Kushṭha* (VIII.3.97), leprosy. According to Charaka *sidhma*, *pāmā* and *vicharchikā* are reckoned amongst eighteen kinds of *kushṭha*.

(5) *Kshetriyach*. It is mentioned several times in the *Atharvaveda*, which scholars take to be the name of a special disease. Indian commentators understand it in the sense of hereditary disease (*Vedic Index*, I.211). Pāṇini throws light on its meaning in the following *sūtra*:

*Kshetriyach para-kshetre chikitsyah*, V.2.92.

'*Kshetriya* is that (disease) which is curable in another body', i.e. a foul disease which is incurable in this life.

(6) *Nynbja* (VII.3.61), hump-backedness due to disease.

(7) *Pāman* (V.2.100), a skin disease. It occurs in the *Atharvaveda* as the name of a skin disease (V.22.12). According to Keith the derivative adjective, *Pāmana* 'suffering from skin disease' is found in the later *Saṁhitās* and the *Brāhmaṇas* (*Vedic Index*, I.517).

(8) *Vikshāva* (III.3.25), cough.

(9) *Samjvara* (III.2.142), fever, probably consumptive in nature. The sufferer was called *samjvarī*.

(10) *Sidhma* (V.2.97), a kind of leprosy, the sufferer being known as *sidhmala*.

(11) *Sparśa* (III.3.16). According to Kātyāyana's *vārttika* the word denoted an ailment, probably contracted by touch or infection.

(12) *Hṛid-roga* (VI.3.51), heart-disease. The word occurs also in the *Rigveda*. In the medical *Saṃhitās* the word probably denoted *angina pectoris* (*Vedic Index*, II.507).

**BODY (ŚARĪRA)**—Anatomy of the body was a subject which had attracted the attention of the Indians even in the Vedic times (*Vedic Index*, II.358). The popularity of the subject is proved by the fact that even a grammatical treatise like the *Aṣṭādhyāyī* contains a comprehensive list of terms for the various parts of the body. Body (*śarīra*) consists of two kinds of limbs (*svāṅga*), viz. *dhruva* (vital, VI.2.177) and *adhruva* (non-vital, III.4.54). The former is defined by the *Kāśikā* to include those limbs the loss of which results in death; the latter signified parts or limbs injury to which did not cause death. Pāṇini regards the costal bones (*parśu*, VI.2.177) as *dhruva* or an essential limb.

The following bodily parts (*svāṅgas*) are mentioned by Pāṇini:

Fingers (*aṅguli*), foot (*pāda*), forepart of the foot (*prapāda*, V.2.8), knee-caps (*aṣṭhivat*, VIII.2.12), legs (*jaṅghā*), knee-joints (*jānu*, V.2.129) thighs (*urn*, *ūrvash-thīva*, V.4.77), loins (*sakthi*, V.4.113), hips (*sphiga*, VI.2.187), belly (*udara*), navel (*nābhi*), womb (*kukshi*), arms (*bāhu*), chest (*uras*), ribs (*parśu*, VI.2.177), breasts (*stana*), collar-bone (*aṃsa*), neck (*grīvā*), nape (*manyā*, III.3.99, cf. *Vedic Index*, II.133), ears (*karṇa*), nose (*nāsikā*), eyes and eyebrows (*akshi-bhruva*, V.4.77), mouth (*mukha*, VI.2.167), lips (*oṣṭha*), teeth (*danta*, IV.1.55), tongue (*jihvā*), forehead (*lalāṭa*), head (*mūrdhā*, *mastaka*, *śirsha*), bone (*asthi*), sinews and arteries (*nāḍī*, *tantrī*, V.4.159), heart (*hrīdaya*, *hṛit*, VI.3.50), liver (*yakṛit*, VI.1.163), hair (*keśa*, *loma*),

nails (*nakha* derived as *na* plus *kha*, VI.3.74), skin (*tvach.*), flesh (*māṃsa*), vital parts (*arush*, V.4.51), bladder (*vasti*, IV.3.56).

The list includes some words specially noticeable, as *manyā*, *tantrī*, *arush* and *vasti*. According to *Amarakosha* the vein in the back of the neck was called *manyā*.

**MAHĀ-HAILIHILA**—*Hailibila* and *mabā-hailibila* are words of unknown meaning and origin, mentioned by Pāṇini as special names of some article (VI.3.38). The word is not explained in any Sanskrit dictionary, nor is there any instance of its being used in literature. It appears that *hailibila* was a Semitic word appearing in a sanskritised form, as the name of a poison which was imported from the West. In Arabic *halābila* means deadly poison (cf. Hebrew *halūl*, deadly poison). Steingass derives without reason the Arabic word from Skt. *halābala* (F. Steingass, *Persian-English Dictionary*, p. 1506). The Skt. word itself is exotic as shown by its variant spellings, e.g. *bālābala*, *halābala*, *hālabala*, *bālābāla*, *bābala*, *bābāla* (Monier-Williams, *A Sanskrit-English Dictionary*, 1899 revised edition, p. 1293). Pāṇini's *hailibila* seems to come nearest to the original Semitic form of the word, which may have been Aramaic, the international language of trade and commerce in the Achaemenian world from Syria to Gandhāra. Pāṇini refers to poisons in general called *visba* and to the third degree methods of liquidating particular persons marked out as *visbha* by the administering of poison.

### CH. III, SECTION 8. DRESS AND ORNAMENTS

**WORDS FOR CLOTHING**—Besides the usual *vastra* and *vasana* denoting clothing in older literature Pāṇini mentions three new post-Vedic words, viz. *chīra* (VI.2.127), *chela* (III.4.33) and *chīvara* (III.1.20). In the *sūtra Cbele knoṇeh* (III.4.33), *chela* denotes a garment worn on the body. *Chīvara* is frequently used in Buddhist books for a monk's robe. It is conspicuous by absence in the *Brāhmaṇa* and *Āraṇyaka* literature. Its Buddhist association is strengthened by its illustration which occurs both in the *Chāndra-vṛitti* and the *Kāśikā*, *saṁchīvarayate bhikṣuḥ*, the monk dons the *chīvara* or 'takes the holy robes.' We do not find the word applied to the garments of laymen, a householder or a Brahmachārin.

The word *āchchbādāna* denoted both a garment as *prāvāra* (III.3.54) and *bṛibatikā* (V.4.6), and also cloth (VI.2.170). It is more frequently used in the *Ashṭādhyāyī* than any other word for cloth. Its later affinities are apparent from the fact that the word is not found in the *Brāhmaṇas*, but occurs several times in the *Dharmasūtras* (*Vasishṭha*, XVII.62; XVIII.33, *āsāchchbādāna*) and the *Arthasāstra* in the sense of clothing (*Arth. Text*, I.11, p. 18).

**KINDS OF FABRICS**—Various classes of fabrics are mentioned:

(1) *kaūśeya* (VI.3.42), silken cloth. According to Kātyāyana *kaūśeya* is so called because it is produced from the cocoon, and though the silk-worm is also a similar product, the word applies only to the silken cloth.

(2) Linen cloth (*auma* or *aumaka*, IV.3.150), made from the yarn of flax (*umā*), and hemp (*bhaṅgā*) plants.

(3) Woollen garments (*aurṇa* or *aurṇaka*) made from wool (*ūrṇā*, IV.3.158).

(4) Cotton (*kārpāsa āchchbādana*, a counter-example to IV.3.143). The word *karpāsī* occurs not in a *sūtra*, but in the *Gaṇa-pāṭha Bilvādi* (IV.3.136), but its reading there must be authentic, as it is the only fabric-denoting word in the *Bilvādi* group, and without it half of Pāṇini's rule IV.3.143 (*abbhaksby-āchchbādanayoh*) would become redundant. In the chapter, IV.3.136-142, to which the rule IV.3.143 applies, *karpāsī* is the only word denoting cloth-making material.<sup>1</sup> The word *tūla* also occurs in Pāṇini (III.1.25, III.3.64), in a compound like *ishīkā-tūla*.

**DRESS**—The dress of the times is indicated in the *sūtra* *Antaram babiryogopasamvyānayoh*, I.1.36. We learn from this rule that *antara* in Pāṇini's time was used in two senses, viz. exterior (*babiryoga*) and dress (*upasamvyāna*). According to *Kātyāyana upasamvyāna* denoted one of a pair of *śāṭakas*. Since there were two *śāṭakas* one serving as *uttarīya* and the other as *antarīya*, *upasamvyāna* denoted the one which served as *antarīya*, viz. that which was worn, and not that which was used as a wrapper or scarf to be thrown over the shoulders. The *Kāśikā* further explains that *upasamvyāna* was a kind of *paridhānīya* 'fit for wearing,' and not a *prāvaraṇīya* 'covering.' In the most early examples of Indian sculpture as shown in the Parkham Yaksha statue (Dr. Coomaraswamy, *H.I.A.*, Pl. III), the Didārgan, Yakshī from Patna, made of polished Chunar stone and belonging to the Maurya period (*ibid.*, Pl. V), and the numerous Yaksha and Yakshī figures of Sanchi and Bharhut, the sole dress of both male and female figures consists practically of a pair of *śāṭakas* (*śāṭakayugam*). Both the *upasamvyāna* (*antara śāṭaka*, *antarīya*) and the *prāvaraṇīya* (upper scarf) were

<sup>1</sup> The genuineness of the *Bilvādi* group is also proved by *Kātyāyana* examining in a *vārttika* the reading of *gavedbuka* which is ninth in position (II.323).

arranged gracefully in an endless variety of ways. The Greeks in the fourth century B.C. were struck with the extreme simplicity and elegance of Indian dress, consisting then as in the time of Pāṇini, of a pair of *śāṭakas*. Arrian writes: 'The dress worn by the Indians is made of cotton, as Nearchos tells us. They wear an undergarment of cotton which reaches below the knee half-way down to the ankles, and also an upper garment which they throw partly over their shoulders, and partly twist in folds round their head.' (Arrian. *Ind. Frag.* XVI). The *Ashtādhyāyī* enables us to know that the undergarment reached down to the forepart of the foot, and was therefore called *āprapadīna* (V.2.8). An invariable feature of wearing the *antarīya* or *dboti* as seen on ancient sculptures depicting male and female figures is the tying of the girdle round the waist. The arrangement of the girdle is clearly visible on the Parkham statue, the Besnagar Yakshi and the Patna Yakshas, where it can be distinguished from the upper scarf and the lower *dboti*. Pāṇini refers to a girdle as *nīvī*, the region of the belt being called *uṣanīvī* (IV.3.40).

On *sūtra*, V.1.21 Patañjali cites an illustration from which we learn that the price of one hundred *śāṭakas* or *dbotis* was one hundred (*Śatena kṛtām śatyam śāṭaka-śatam*, 11.346). It will be shown in the Section on coins that when the number occurs without specifying the name of the coin, a silver *kārshāpaṇa* was usually meant. We may therefore say that in the time of Patañjali (2nd century B.C.) the selling price of an average cotton *sārī* was one silver *kārshāpaṇa*.

In the *Sthūlādi-gaṇa* (V.4.3) there is a reference to the *gomūtrikā* cloth, which appears to have been so called from the *gomūtrikā* design woven into its texture at one end. The *gomūtrikā* pattern was known in the fourth century B.C. as mentioned in the *Arthasāstra* in connection with the formation of battle-arrays (*Arth. Text*, X.6). We may note in this connection that the *paṭalī* or front folds of the *dboti* on the

Yaksha statues aforesaid are arranged zig-zag in the form of the *gomūtrikā* motif.

**BLANKETS (KAMBALA)**—Several kinds of blankets and woollen wrappers of different kinds were in use. Blankets produced in a standard size as marketable goods were called *pañya-kambala* (V.2.42). Their size and weight were determined according to the measure of wool used. Such measure was called *kambalya*, equal to one hundred *palas* in weight, roughly five seers. The *kambalya* measure is derived by Pāṇini as a *saṃjñā* word (*Kambalāchcha saṃjñāyām*, V.1.3), pointing to its definite meaning. The *kambalya* seems to have been a measure of value and medium of exchange for some transactions in the barter economy of those days. Pāṇini mentions the formation *kambalyā* in *sūtra* IV.1.22, illustrated by the *Kāśikā* as *dvi-kambalyā*, *tri-kambalyā*, i.e. 'purchased for the price of 2 or 3 *kambalya* measures of wool' which would refer to a goat or sheep purchased for 2 or 3 *kambalya* measures of wool.

**PRĀVĀRA**—*Prāvāra* (also *pravāra*) as a garment is referred to in the *sūtra* *Vṛinoter āchchbādane* (III.3.54). Kauṣilya names *prāvāraka* as a blanket made of the wool of wild animals (*mṛiga-roma*, p. 80). In the *Mahābhārata* *prāvāra* is described as a class of blankets for protection against cold (Vanaparva; 3.51). It seems that *prāvāra* was a wrapper made of finer quality of wool and lighter in weight than the *pañya-kambala*. **BṚIHATIKĀ**—It is referred to in *sūtra* *Bṛibatyā āchchbādane*, V.4.6. The upper garment which was thrown on shoulders covering either one or both of them and falling down to the waist or knees seems to have been the *bṛibatikā* dress. The *Amarakosha* understands it as a kind of *prāvāra*, a big all-covering mantle. As remarked by the Greeks about the dress of the Indians: "They have a tunic of tree-linen down to the middle of their shins" (C.H.I., p. 412). This long tunic may have been the *bṛibatikā* conforming to a real etymology of that word. Patañjali mentions *bṛibatikā* as a current dress (1.2.69). It seems to have been a fine wrapper 24' by 12'

in size, mentioned as *bābitikā* in the *Majjhima Nikāya* (*Sutta* 88).

A rich kind of wrapper known as *rāṅkava* is referred to in ancient literature along with woollen fabrics.<sup>1</sup> Pāṇini mentions *raṅku* in *sūtra* IV.2.100, from which we get *rāṅkava* and *rāṅkavāyana*. The *Kāśikā* explains *rāṅkava* as a blanket.

We may also note the names of two other kinds of blankets known to Kātyāyana and Patañjali. In a *vārttika* on *sūtra* VII.3.45, (*Varṇakā tāntave*) Kātyāyana mentions *varṇakā* as a woven fabric, which Kauṣilya describes under the masculine form *varṇaka* as a kind of woollen blanket (*Artb.* II.11). Patañjali refers independently to *kutaṭa*, a Nepalese blanket or *thulma* (II.1.69; I.406).

**ORNAMENTS AND TOILET**—Pāṇini refers to cultured citizens (*pravīṇa nāgarakas*, IV.2.128), and also to the arts of personal decoration (*subbagaṅkaraṇa*, III.2.56). Decoration was applied to the different parts of the body (*Svāṅgebhyaḥ prasite*, V.2.66), such as *keśa*, which were dressed in an artistic manner by the dandy called *keśaka*. There are references to ornaments (*alaṅkāra*, IV.3.64), elegant drapery (*āchchbhādana*, V.4.6), stylistic coiffure (*keśavesha*, IV.1.42) and to special words indicative of the beauty of the female form, e.g. *vāmoru*, *sambitoru*, *śaphoru* (IV.1.70).

In a group of phrases as *puruṣa-vyāghra*, *puruṣa-simha* (II.1.56, *Upamitaṁ vyāghrādibhiḥ sāmānyāprayoge*) and *bastigbna* (III.2.54), Pāṇini refers to the ideal of physical valour (*śakti*) for men.

He also mentions some epithets indicative of social-honour, e.g. *sat*, *mabat*, *parama*, *uttama*, *uṭkrishṭa* (II.1.61), *vṛindārka*, *nāga*, *kuñjara*, *pūjyamāna* (II.1.62), etc.

Whereas women enjoyed themselves with various garden sports as *śalabhañjikā* implied in the *sūtra* *Prāchāṁ krīḍāyām* (V.2.74), the male members skilled in the use of arms parti-

<sup>1</sup> *Sabbā Parva*, 47.22, *anṛṇaṁ cha rāṅkavam*.

icipated in jousts organised for the sake of pleasure (*prabaraṇa-kṛīḍā*, IV.2.57). Music, both vocal (*gāyana*, III.1.147) and instrumental (*vādaka*), practised on the lute and other percussion instruments, also formed part of the usual pastime of a cultured society.

Of ornaments (*alaṅkāras*) Pāṇini refers to *aṅgulīya*, finger-rings (IV.3.62), *karṇikā*, ear-ring<sup>1</sup> (IV.3.65), *lalāṭikā*, ornaments of the forehead (IV.3.65) and *graiveyaka*, torque round the neck (IV.2.96). If we look to the earliest known examples of Indian art we find these three ornaments conspicuously depicted there. The *karṇikā* is represented as the heavy ear-rings worn in cloven ears of men and women; the *graiveyaka*<sup>2</sup> as the torque, worn in addition to the flat triangular necklace on such statues as the Parkham Yaksha; and the *lalāṭikā* as the round pendant found on the forehead of the earliest female figures as the Yakshī from Didārganj, Patna (Bachhoffer, *Early Indian Sculpture*, Pl.9) and Sudarśanā (Pl.19), Chulakokā (Pl.20) and Sirimā *devatās* (Pl.21) from Bharhut. These works of art are no doubt removed in time from Pāṇini, but they represent the earliest specimens of classical Indian art and show an older tradition. The *Jātakas* also mention ear-rings, frontlet pieces and torques round the neck (*giveyya*, *Jāt.* VI.590).

Pāṇini also mentions *kumbā* (III.3.105) which according to the *Vedic Index* denoted a female adornment connected with the dressing of the hair (*Vedic Index*, I, 163). In one place he refers to a special style of female coiffure (*keśa-veśa*) known as *kabarī* (IV.1.42). The word may have originated from the variegated appearance of the braid of hair interwoven with a garland of flowers.

Among other requisites of personal decoration (*bhūṣaṇa*,

<sup>1</sup> Nearchus, *Frag.* 9 and 10; "And the Indians wear ear-rings of ivory." C.H.I., p. 412)

<sup>2</sup> For *graiveyakas* see also J.U.P.H.S., May, 1933, p. 97, Pre-Kushāna Art of Mathura, by V. S. Agrawala.

I.4.64, VI.1.133; *alaiṅkāra*, IV.3.65, etc.) and toilet (*subha-gam-karaṇa*, III.2.56), we find reference to the following:

1. *Darśana* (V.2.6), mirror (*ādarśādi*, *Kāśikā*) which was of two kinds, (1) *yathāmukhīna* (flat) and (2) *saīrmukhīna* (convex) in which only the frontal view gave correct perspective, and which was probably made of polished metal.

2. *Añjana*, not referred to directly, but mention is made of the Trikakut mountain (V.4.147) from which a kind of valuable salve called *Traikakuda añjana* was obtained (Cf. *Atharva*, IV.9.9; *Vedic Index*, I.329). It may be identified with the Sulaiman mountains which is the home of a salve sold all over Sind and Panjab. The *Mahābhārata* refers to fair-complexioned Panjabi women painting their eyes with the *añjana* from the Trikakut mountain (*Kaṇṇaparva*, 44.18). Another kind of salve, *Yāmuna añjana* was obtained in the region of the Yamunā, (Dehradun Dt.) which was known to Pāṇini as *Kalakuṭa* ('the Black Hill', IV.1.173).

3. *Mālā* (VI.3.65), garland. One who adorned his person with garlands was called *mālabbārī* (VI.3.65; fem. *mālabbārīṇī*). Patañjali illustrates this *sūtra* by the form *utapalāmāla-bbārīṇī* i.e. the girl adorned with lotus garlands (I.1.72; I.187). Pāṇini refers to *sragvī*, a garland-wearer, used as the special epithet of a *snātaka*, who beautified himself with flower garlands after completing the period of studentship during which time the use of flowers was forbidden.

4. *Gandha* (perfumes). Pāṇini mentions several kinds of perfumes, as (1) *kisara* (IV.4.53), (2) *śalālu* (IV.4.54) in the *sūtras*, and others like *narada*, *tagar*, *guggulu* (bdellium) and *uśīra* (*Andropogon Muricatus*), in the *Kisarādi-gaṇa*. From the way he mentions these perfumes it appears that there were special shopkeepers who traded in these articles (*Tadasya paṇyam*) and who were named after them, e.g. a woman selling *śalālu* (an unidentified fragrant substance) was called *śalāluki* and *śalāluki*. Spikenard (*nalada*) was an old

Indian perfume produced in the regions of the upper Indus and in Indo-Scythia and forwarded through Ujjain to Bharukachcha and thence to Egypt. 'Pliny describes the nard with its *spica*, mentioning also that both the leaves and the *spica* are of high value, and that the odour is the prime in all unguents, the price being 100 denarii for a pound.' (McCrindle, *Periplus*, p. 25).

5. *Daṇḍa* (V.1.110). Pāṇini refers to the staff called *āśbāḍha* (*pālāśa-daṇḍa*) which was used in the initiation ceremony (*upanayana*).

6. *Asi* (IV.296), sword, also called *kauksheya* from its being kept in a sheath.

7. *Upānab* (V.1.14), shoes, made of leather, manufactured according to the size of the foot (*anupadīnā*, V.29). The *Bauddh. Śr. Sūtra* mentions shoes made of tiger's skin (*vaiyāgbryau upānabau charmapakshau*, XVIII.16, p. 361). Pāṇini also knew of the use of *vaiyāgbra* leather (IV.2.12) for upholstering purposes.

The *Brahmajāla Sutta* contains a stock list of dress and toileting processes comprising twenty items. (G. P. Majumdar, *Toilet, Ind. Culture*, Vol. I, p. 651). This list agrees closely with the one laid down in *Suśruta* (*ibid.* p. 653). Of those items Pāṇini refers to mirror, collyrium, garlands, perfumes, shoes and staff. In the *Yājñakādi* group (which occurs twice in the *Aśbāḍhyāyī*, II.2.9 and VI.2.151), Pāṇini mentions *snāpaka* (barber), *utsāḍaka* (one who anoints), *udvartaka* (one who rubs the body with emollient unguents) and *pariśechaka* (one who sprinkles); and again in the *Mahisbyādi-gaṇa* (IV.4.48) *anulepikā* (a female for applying sandal paste after bath), *pralepikā* (a female to apply unguents before bath) and *vilepikā* (a female to apply scented oils, etc.). The *Arthaśāstra* also mentions these personal attendants in the service of the king. (Cf. also the king's toilet in the *Kalpasūtra* which mentions them, S.B.E., Vol. XXII, p. 241 ff.).

### CH. III, SECTION 9. DWELLINGS

Pāṇini acquaints us with the principal architectural patterns of buildings found in a big city, e.g. *rāja-sabhā* (the king's council-hall, II.4.23), *geba*, *griha* (houses, III.1.144), *nivāsa* and *nikāyā* (residential buildings or quarters, III.1.129), *chbātri-śālā* (hostels for women, VI.2.86), words ending in *agāra*, like *koshbhāgāra* (royal store-houses, IV.4.70), *nishadyā* (rest-houses, III.3.99), *dvāra* (city-gates, IV.3.86), *parikhā* (moats, V.1.17), *kapāṭa* (door leaves, III.2.54) and *parigba* (bolts, VIII.2.22).

**ŚĀLĀ**—*Śālā* was used for a variety of buildings, e.g. *sabhā* (council-hall II.4.24, *Śālā cha*); *chbātri-śālā* (female hostel, VI.2.86); *gośālā* and *kharāśālā* (stables for cows and asses, IV.3.35); the last one being also found in the *Atharvaveda* and *Brāhmaṇas* (*Vedic Index*, II.376). *Śālā* was also used for a granary room for storing corn with an opening called *śālā-bīla* (VI.2.102). It was a Vedic word (*Vedic Index*, II.376). **HOUSES**—The Vedic word for home was *griha*. Pāṇini also uses the term *griha* (III.1.144) which the *Kāśikā* explains as *veśma* or homestead, or as the women in residence there (*tātsthyād-dārāścha*), implying that the women constituted principally the household. Three other terms were also used, viz. *geba* (III.1.144), *agāra* (III.3.79) and *kshaya* (VI.1.201; cf. *Sabhāparva*, 33.16, *ajāyata Yadukshaye*, Krishna born in the house of Yadu). *Agāra* occurs once in the *Kāushītakī Upanishad* (*Vedic Index*, 1.7).

Pāṇini refers to officers (*niyukta*), in charge of buildings ending in *agāra* (IV.4.69-70), e.g. *bhāṇḍāgārika*, *devāgārika*, *koshbhāgārika* (*Kāśikā*). *Agāra* indicated a larger building with several parts, one of which (*agār-aika-deśa*) was called *praghāṇa* or *praghāṇa* (III.3.79), explained by the *Kāśikā* as

the rooms in the outer gateway of a building (*bāhya-dvāra-prakosṭha*). (Cf. Pali *paghāna*, a covered terrace before a house, *Vin.* II.153; *paghānaṃ nāma yaṃ nikkhamantā cha pavasantā cha pādehi hananti*, Buddhaghosha). In the *Udaya Jātaka* there is a reference to *koṭṭhaka* which the commentary translates as *dvāra-koṭṭhaka* (*Jāt.* Vol. IV. 106). Dr. Coomaraswamy understands *dvāra-koṭṭhaka* specifically as gatehouses, which formed part of the gateways in the wall of a city and of which several examples are found in ancient Indian art (Early Indian Architecture, 'Cities and City-Gates,' p. 209, *Eastern Art Annual*, 1930, Vol. 11; *Skt. alinda*).

**NISHADYĀ**—In *sūtra*, III.3.99 Pāṇini gives *nishadyā* as a specific word (*saṃjñā*) meaning a rest-house. The *nimśi* (*d*) *yās* (resting places) are referred to by Aśoka (Pillar Edict VII). The Nāgarjunī Hill Caves were built for providing shelter to monks during rains (*vāsa-nisidīyāya=varshā-nishadyāyai*).

**NIKĀYYA AND NIKĀYA**—These are synonymous of *nivāsa*, a dwelling place (III.1.129; III.3.341), and are in this sense peculiarly Pāṇinian words. It is not certain whether they were used to denote only the residence of monks. In the *Manu Smṛiti* we find the word *deva-nikāya* (I.36), taken by the commentators as *deva-nivāsa-sthāna*. *Nikāya* occurs once in the *Yajurveda*, but as the name of a *chbanda* denoting Vāyu (*Śatapatha*, VIII.5.2.5, commenting on *Yaj.*, XV.5). The *Arthaśāstra* also uses *nikāya* once, but in quite a different sense, *viz. saṅgha* (Text. II.4, p. 55).

**EKAŚĀLIKA**—The word *eka-śālika*, or its optional form *aikaśālika*, was of some practical importance. Pāṇini derives it as *eka-śālā iva*, 'that which is like one (man's) building' (V.3.109). It did not mean the owner of a single house, but it denoted a dwelling-place, which in respect of its use was reserved as one man's building, *i.e.* not intended for public use. The Tinduka-vana of queen Mallikā, wife of king Prasenjit, in the vicinity of Śrāvastī (*Dīgha Nikāya*, I. p. 278) was formerly *eka-śālaka* used as her own pleasure or for her

guests. Such a residence was called *rājāgāraka* (Brahmajāla Sutta). Subsequently this park-house was thrown open to the Buddhist community (*babū sālā katā*; *Sumaṅgala-Vilāsini*, II. p. 365). It was a matter of some consequence in the social life of that period whether a park-residence of some rich man was of the nature of *ekasālīka*, i.e. reserved for personal use, or was thrown open for public use. We know from the story of Anāthapiṇḍika how he converted the garden of Prince Jeta which used to be *eka-sālīka* (i.e. reserved for his own use) into a public residence for the use of the entire Buddhist Saṅgha.

**MATERIALS**—Pāṇini refers to bricks among building materials in the phrase *iṣṭaka-chita*, denoting something constructed with bricks (VI.3.65). The Pāli literature also mentions *iṭṭhakā-vaḍḍhaki* or brick-layers. (Dr. Coomaraswamy, *City and City-Gates*, p. 211; *Jāt.* VI. p. 333).

The roof of a house is called *chbadis*, probably denoting the thatched covering known as *chhappar*. The word *chbā-disbeya* refers to the material with which the *chbadis* was made (V.1.13). The actual doorway (*dvāra*) opened or closed with a pair of leaves called *kapāṭa*. Reference is made to daring burglars (*kapāṭagbha chaura*) battering against the leaves of a door-way to secure entrance (III.2.54). The *Mahākanṇa Jātaka* refers to battering against the palace-door (*kavāṭe ṭhapetvā*, IV.182). The closed door panels were secured from inside by a bar drawn across called *parigba* or *paligba* (VIII.2.22), which meant an iron bolt (*Vedic Index*, I.494).

Besides the residential and public buildings, there were market-places (*āpaṇa*, III.3.119) where commercial commodities (*paṇya*) were stocked and saleable goods (*krayya*, VI.1.82) were displayed.

Pāṇini also refers to the old Vedic god Vāstoshpati (IV.2.32), the presiding deity of *vāstu* or homestead. Two older words, *kṣhaya*, 'abode' (VI.1.201) and *āvasatha* (V.4.23), are also mentioned. The precise sense of *āvasatha* appears to

be a place for the reception of guests, especially Brāhmaṇas and others on the occasion of feasts and sacrifices (*Vedic Index*, I.66). According to Pāṇini: 'One who lives in an *āvasatba* is called *āvasatbika*' (IV.4.74). The religious guest-house was identical with that part of a householder's dwelling in which the household fire (*āvasatbha agni*) was established.<sup>1</sup>

<sup>1</sup> We are indebted to Patañjali for preserving two important architectural terms, viz., *āmalakī* and *valabbī* (*Bhāṣya*, VI.2.82; III.132) denoting the pinnacle and the cornice-mouldings respectively, which figure so prominently in the earliest representations of buildings in the sculpture of Bharhut and Sanchi.

### CH. III, SECTION 10. TOWN-PLANNING

Pāṇini refers to some important towns of his time. e.g. Kāpiśi, Takshaśilā, Śākala, Hāstinapura, Śāmkāśya, and Kāśi. The *gaṇas* add other names. The existence of these cities shows progress in the art of town-planning (*nagara-māṇana*) and architecture (*vāstuvidyā*). References to *vāthuvijjāchariya* and *pāsāda-māṇana* are known in the Jātakas (*Suruchi Jāt.* IV.323).

The most important parts of a city were its moat (*parikhā*), rampart (*prākāra*) and gates (*dvāra*), which served as the main defences. *Sūtras* V.1.17-18 envisage regular town-planning. For example, *Parikhāyā dhañ*, speaks of 'the space earmarked for a moat as *pārikheyi* (*bhūmi*).' The previous *sūtra*, *Tadasya tad-asmin syād-iti*, V.1.16, presupposes some sort of planning preceding the actual construction work. The marking out of the site of the moat, the rampart and the palace formed the preliminary part of such planning. The *Vatthuvijjāchariyas* or expert architects were requisitioned for testing sites (*Jāt.* I.297; IV.323), for the actual planning of cities (cf. *nagaraṇi Vedeheṇa sumāpitāni*, *Mahāummaga Jāt.* VI.448). The *Arthaśāstra* mentions the construction of ditches (*parikhā*) as the first item in the construction of forts (*durga-vidhāna*). We read in the *Mahābhārata* that the site of Indraprastha was mapped out (*nagaraṇi māpayāmāsub*) in the presence of Dvaipāyana Vyāsa and others and that work commenced with the digging of a series of moats (*parikhābbhiḥ*), followed by the building of a high rampart (*prākāra*), numerous gateways (*dvāraiḥ*) and towers (*saudhāiḥ*) (*Ādiparva.*, 209.29-32). Why the moat was built first can be understood from the fact that the earth so obtained was utilised for raising the mud-

rampart (*pāṃsu-prākāra*), or for moulding bricks for the city-wall (*prākārīyā ishṭakā*), or as Kauṭilya says, for ramming in the hollow masonry work (*pāṃsu-vīśesheṇa vāstu-chhidraṃ vā pūrayet*, *Arth. Text*, II.3, p. 52).

The *Arthasāstra* ordains the digging of three moats round the fort, having an intermediate space of one *daṇḍa* (6 ft.) between each other and being fourteen *daṇḍas* (84 ft.), twelve *daṇḍas* (72 ft.), and ten *daṇḍas* (60 ft.) respectively in width (*Arth. II.23*). Thus a total width of 38 *daṇḍas* (218 ft.) represented the *pārikbeyī* land round the fort. We are indebted to the commentary on the *Udaya Jātaka* (IV.106) for names of the three moats, viz. *udaka*, *kaddama* and *sukkha*, a water moat, a mud moat, and a dry moat. These may be taken to have followed the width given in Kauṭilya. We have discussed in another chapter Pāṇini's *puruṣa* measure (V.2.38) which according to the *Arthasāstra* was equal to 5 1/3 feet (*Arth. Text*, II.20, p. 106). Kauṭilya says that depth was measured in terms of this length called *khāta-pauruṣa*. The examples *dvi-puruṣī* and *tri-puruṣī* in the *Kāśikā* on *sūtra* V.2.38 (*Puruṣa-bastibhyām aṇ cha*) refer to the depth of ditches or moats.

**PRĀKĀRA AND DEVAPATHA**—There is no mention of *prākāra* in the *sūtras*. *Kātyāyana* mentions *prāsāda* and *prākāra* in a *vārttika* on *sūtra*, VI.3.122, and the trend of his discussion shows that the words were implied in Pāṇini's rule. The stock illustrations on V.1.16 (*Tadasya tadasmin syāditi*) include *prākārīya deśa* (the site for a rampart) and *prākārīya ishṭakā* (bricks for the city-wall), the latter agreeing with the direction of Kauṭilya that the ramparts should be made of bricks.

There is, however, one word in the *Ashṭādhyāyī*, which gives a definite clue to Pāṇini's acquaintance with the technical details of the building of ramparts and parapets. He mentions *devapatha* at the head of the *gaṇa Devapathādi*, (V.3.100), which again can be explained only in the light of Kauṭilya. This corroborative testimony from the *Arthasāstra* is rather

singular since no other work throws light on the meaning of the Pāṇinian word. According to Pāṇini the 'passage' which resembles a 'celestial passage' (*devapatha*) is called *devapatha* (V.3.100). What can such a passage or road possibly be so as to deserve the comparison involved? According to Kauṭilya the wide road on the top of the parapet built along the line of battlements (*indrakośas*) was called *devapatha* (*Arth. Text*, II.3, p. 52; *Trans.* p. 51). The height of the brick fort-wall (*prākāra*) above the mud-rampart (*vapra*) is there stated to be thirty-six feet rising from the ground level<sup>1</sup>, and the battlements were built above it. The *deva-patha* extending along the city-wall should be understood with reference to its great height resembling the celestial passage (*devapatha*) in the heavens, justifying the comparison of the former with the latter (V.3.100).<sup>2</sup> The *Raghuvaṃśa* (XIII.19) also refers to *devapatha* (= *surapatha*) as an altitude in the stratospheric measurements. We learn from later literature that the walled town of Pāṭaliputra became noted for its fortifications (*Pātali-putrakāḥ prāsādāḥ*) including its city-walls or palisades (*Pāṭali-putrakāḥ prākārāḥ*), and we find Patañjali speaking of the guide-book called *Sukosalā* which gave a detailed (*avayavaśah*) description of the wonderful city-walls of Pāṭaliputra (*Bhāṣhya*, IV.3.36. II.3.11; and IV.3.134; II.321).

**CITY-GATES**—The plan of the ancient walled cities was rectangular, usually square, pierced with four gates, one in the middle of each wall, facing the four quarters. (*Nagarassa chatuṣu dvāresu*, *Jāt.* I.262; III.414; cf. 'Cities and City-Gates',

<sup>1</sup> The *Mahākāṇḍa* (IV.182) and *Mahānīlasoma* (V.478) *Jātakas* mention the height of a *pākāra* to be 18 cubits (*aṣṭhārasabattba pākāram*) or 27 ft. While visiting the Alwar fort I was told that the fort-wall is still built 18 cubits high from the ground level.

<sup>2</sup> Vardhamāna misunderstands the point of comparison in the derivation of *devapatha*, when he says that the latter was so called from its possessing shady trees, supply of water and freedom from dangers in the manner of a divine road (*Gaṇaratna*, *Vetse* 186).

p. 213). Pāṇini describes the principle which governed the naming of these city-gates in the following *sūtra*:

*Abbinishkrāmati dvāram* (IV.3.86).

i.e. 'the city-gate is named after the other city towards which it opens;' e.g. *Māthurām Kānyakubja-dvāram*, a gate in Kānyakubja, opening towards Mathurā.

This principle of naming the city-gates originated at least in the fifth century B.C. and has continued throughout up to our own days. Hundreds of gates built in the Mughal period derive their names in this manner, e.g. *Ajmerī darwāzā*, a gate situated in Delhi but named after Ajmer.

The roads leading out of the city-gates also derived their names in the same manner as stated in the following *sūtra*:

*Tad gachchhati pathi dūtayoh* (IV.3.85).

'The names of roads and couriers are derived from their destination.' For example, all the roads which proceeded in the direction of Mathurā, even though they were situated in different towns, were labelled *Māthura* by the people of each locality. Thus the *Māthura* road of each city passed through its *Māthura* gate.

Patañjali knows of a wide net-work of roads punctuated by well-marked stages for purposes of halt and rest. He refers to the road leading from Sāketa towards Pāṭaliputra (*Bhāshya*, III.3.136; II.162), and again to the route leading towards Srughna (*Bhāshya*, I.3.25; I.281). Pāṇini also refers to the termini of roads connecting cities. The terminus at its destination was called *maryādā* or limit, and the other cities on the way marked the intermediate stages at shorter (*avarasmin*) or longer distances of the journey (III.3.136). The *Kāśikā* adds the interesting fact that these halts were counted by the need of rest and meal on the way.

Pāṇini mentions the Grand Trunk Road of North India as *Uttarapatba*, 'the Northern Road' (V.1.77), running from

Gandhāra to the eastern country, of which the details are given by the Greek geographers.

**THE CITY**—We may thus picture a well laid-out city to have been equipped with a multitude of buildings, both for its defence and for the practical needs of residence and business. The fortification consisted of the moat, parapet wall and gateways, while the civil architecture had its residential buildings, business quarters (*āpaṇa*, III.3.119), intersected by streets (*saṁchāra*, III.3.119), royal store-houses (ending in *agāra*, IV.4.70, as *kośabhāgāra* and *bhāṇḍāgāra*), king's council-hall (*rājasabha*) and a number of other buildings comprised under the general term *śālā*, e.g. places of dramatic performance (*prekṣhā*, IV.2.80), dancing, music, concerts and sports (*prabhaṇa-kriḍā*), etc. Reference is also made to ferries (*nāvya*, IV.4.91).

**THE VILLAGE**—The villages were marked out by their natural boundaries, such as (1) forests (*vana*), (2) thickets (*kaṭhina*, IV.4.72), (3) rivulets, (4) hills (*giri*), (5) jungle (*jaṅgala*, VII.3.25) and *prastāra* (rocks, IV.4.72). The village proper consisted of houses, mostly peasant cottages (*kuṭīra*, V.3.88), covered with a roofing of reed and straw (*chbādisheya tṛiṇa*, V.1.13). An individual house (*kuṭī*, V.4.95) sheltering one family (*gārbhaṇa*, VI.2.42) formed the unit of village-life. The entire settlement was called *vasati* (IV.4.104) and a multitude of villages by the name *grāmatā* (IV.2.43). The village depended for its water-supply on wells (*kūpa*, IV.2.73), to which were attached *nīpānas* (III.3.74) or water troughs from which cattle would drink. Wells were cleaned by specially trained labourers who acted as dredgers called *udagāba* or *udakagāba* (VI.3.60).

The area surrounding the village settlement consisted of (1) arable land (*sītya*, IV.4.91), (2) pasture (*gochara*, III.3.119), (3) plantations of bamboo thickets (*vaṁśa-kaṭhina*, IV.4.72), and reeds like *śara* (VIII.4.5) and *muñja* (*Saccharum muñja*, III.1.117), (4) fruit-bearing trees (*phalegrahi*, III.2.

26), (5) reserves of herbs and plants (*aushadi-vanaspati vana*, VIII.4.6), (6) forests of timber as *śimśipā*, *śamī*, *plakṣha* and mango (VIII.4.5), and (7) waste saline tracts or *ūshara* land (V.2.107).

Cultivated land was divided into a number of holdings (*kṣetra*) which are specifically defined as plots where crops were grown (*dhānyānām bhavane*, V.2.1). A systematic survey of agricultural land appears to have been undertaken by special officers called *kṣetrakara* (III.2.21), who measured out each field and fixed its area (*kṣetra-bhakti*) in terms of the *kāṇḍa* measure (IV.1.23); for example *dvikāṇḍā kṣetra-bhaktiḥ*, a field having an area equal to two *kāṇḍa* measures. The estimated area of individual fields was further expressed in terms of the quantity of seed required for its sowing (*Tasya vāpah*, V.1.45). The division of arable area into separate holdings (*kṣetra*) shows that they were held under individual ownership. The term *kaidārya* (IV.2.40), 'a group of fields,' probably indicates some kind of consolidated holdings.

Pastures appear to have been held in common by the village for the grazing of its cattle (*grāmya-pāśu-saṅgha*, I.2.73). The village also had its cattle ranches called *goshṭha* (V.2.18) or *vraja* (III.3.119). Settlements of cowherds (*gopāla*, VI.2.78) were known as *goshā* (VI.2.85).

The site of the ranches was subject to shifting owing to exigencies of fodder. According to Pāṇini: 'A place which had formerly been occupied by a *goshṭha* was called *gaushṭhina*' (*Goshṭhāt kṣaṇṇ bhūtapūrve*, V.2.18). The entire village land was marked out, as today, for habitation, grazing, dumping of manure, and agriculture, the last three shifting after every twelve years. The plot for grazing was *goshṭha* when in use, and *gaushṭhina* after it was abandoned.

The village land was distinct from a forest (*aranya*), the abode of wild people (*āranyaka manusṛya*, IV.2.129) and wild animals (*āranya paśu*). The forests were also used for grazing of domestic animals (*grāmya-pāśu-saṅgha*, I.2.73). When

a particular range was denuded of its fodder supply, it was called *āśitāṅgavīna* (V.4.7), i.e., 'the area where the cattle had eaten up all its fodder.' The herdsmen then moved the ranch to a different area which was called *goshpada deśa* (for the use of cattle, VI.1.145). In the same *sūtra* Pāṇini refers to forests not so used (*asevita*) by cattle (*agoshpada*, VI.1.145), as they were too dense and impenetrable (*mahāvana*, *Kāśikā*).

### CH. III, SECTION 11. FURNITURE

The progress of civilisation brought with it certain amenities, such as furniture to make life easy and homes comfortable. Furniture was of two main classes, *viz.* *śayana*, for lying down and *āsana*, for sitting, as mentioned by Pāṇini (VI.2.151). The word *śayanāsana* corresponds to Pāli *senāsana* which signified 'furniture.'

As examples of household furniture Pāṇini mentions *śayyā*, bed (III.3.99); *kbatvā*, cot (II.1.126); *paryāṅka* or *palyāṅka*, couch (VIII.2.22); *āsandī*,<sup>1</sup> settee or royal throne (VIII.2.12); *viśṭhāra*, an ordinary seat (*āsana*, VIII.3.93); and *parpa* a wheeled-chair for disabled persons (IV.4.10). One using a *parpa* was called *parpika*, evidently same as *pīṭha-sarpī* of the *Vājasaneyī Samhitā* (XXX.24), *Manu* (VIII.394) and the *Jātaka*s.

**UTENSILS**—Of these Pāṇini mentions (1) *pātra*, a vessel (VIII.3.46); *kumbha*, a big jar (VIII.3.46); (3) *kaṁsa*, a pot or vessel of bell-metal (cf. *Vedic Index*, I.130) which owing to its fragility attracted the attention of the Greeks as breaking, if it fell, like earthenware (cf. *Nearchus*, Frag. 7, *Strabo*, XV); (4) *kuṇḍī*, a bowl in different sizes of stone or wood (IV.1.42; also called *amatra* by Pāṇini); (5) *sthālī*, a cooking pot (V.1.70), from which was derived the phrase *sthālībiliya*, applied to a dainty article of food; (6) *ukhā* frying-pan (IV.2.17), a Vedic term (*Vedic Index*, I.83); (7) *kalāṣī*, a small pitcher or vessel (IV.3.56); (8) *kapāla*, *śarāva*, earthen pots (VI.2.29) and pots of different shapes for holding water (*udaka-pūrayitavya*, VI.3.59), all coming

<sup>1</sup> *Āsandī* (settee) is an old Vedic word. Pāṇini uses *Āsandīvat*, which was also the name of the royal city of Janamejaya (*Vedic Index*, I.72), so called because of its 'possessing the throne.' The *Kāśikā* equates *Āsandīvat* with *Ahīsthala* (VIII.1.12).

under the term *kaulālaka*, pottery (IV.3.118), on account of their being made by a *kulāla* or potter. Pottery has from time immemorial played an important role in the domestic economy of India, specially at communal feasts. Indian pottery with its long history reaching back to the age of Mohenjodaro reveals a surprising range of shapes, sizes and designs—worthy of illustration in a Corpus. At one end of this series stands the giant *kusūla* (VI.2.102) and at the other the tiny *śarāva*, or bowl (VI.2.29).

Other household articles included the winnowing basket (*śūrpa*, V.1.26), the churning stick (*mantha*, also called *vaiśākha*, V.1.110)<sup>1</sup> and spits for roasting meat (*śūla*, IV.2.17).

**CONTAINERS**—Pāṇini refers to leathern containers of big and small sizes called *kutū* and *kutupa* respectively (V.3.89), used for storing oil and ghee (*chārmamayānī sneha-bhājanānī*, *Kāśikā*); to *udaṅka*, oil-flasks (III.3.123), the opposite of which was *udaṅchana*, a big leathern bucket for lifting well-water; and to *ḍṛiti* (IV.3.56) and *bbastrā*, (IV.4.16). *Ḍṛiti*, a leather bag for holding fluids is frequently mentioned in the Vedic literature. Pāṇini derives *dārteya* to denote that which was filled in a leather bag (*tatra bhavaḥ*, IV.3.53). We learn from the *Panchaviṃśa Brāhmaṇa* that milk (*kṣīra*) and liquor (*surā*) were kept in *ḍṛitis*.<sup>2</sup> At present it is generally used to hold water. In Pāṇini's time *ḍṛitis*, leather bags, were transported on the back of animals which were therefore marked out as *ḍṛitihari* (III.2.25). This device of transporting liquids was preferred in mountainous regions where wheeled traffic was difficult.

**BHASTRĀ** (IV.4.16)—In the *Śatapatha Brāhmaṇa* (I.1.2.7;

<sup>1</sup> *Vaiśākha* as a synonym of *mantha* still persists in the Hindi word *baiśākhi* denoting the crutches of a lame person which exactly resemble an upturned churning stick.

<sup>2</sup> *Surā-ḍṛitīnā upavanathān dhāvayati*, P. Br. XIV.11.26; *Sakṣīra-ḍṛitayo ratbā bhavanti*, P. Br. XVI. 13.13.

6.3.16) *bbastrā* denotes a leathern pouch. Pāṇini derives *bbastrika* in the particular sense of one who conveys with a *bbastrā* (IV.4.16). The *bbastrikas* seem to have formed a special class of carriers engaged in river-transport by means of skin bags. The use of *bbastrā* extended to the north-west where the people used its variant form as *bbastrakā*, instead of *bbastrikā* (VII.3.47).

*Goṇī* is mentioned as a container or sack (*āvāhana*) made from *goṇa* (IV.1.42), obviously a cloth. It is unknown in the Vedic literature, but occurs in the *Brahmajāla Sutta* XV as *goṇaka*, explained as a woollen cloth made from the hair of long-haired goats. It was probably the same as *kaunnakēs*, one-piece loin cloth worn by the early Sumerians and the Accadians, and made of suspended loops of wool hanging from a woollen skirt (Marshall, *Indus Valley Civ.*, I.33, 342; pl. 95, fig. 10). The word seems to have travelled to India through commerce in pre-Pāṇinian times.

We are enabled to make some idea of the use of *goṇī*, as it is still known by its old name (cf. Hindi *gaun* or *gonī*) and used to carry grain, salt, etc. on pack animals. Pāṇini knows of *goṇī* in two sizes, bigger, which was also the standard size, called *goṇī* itself, and smaller *goṇītārī*. The former was naturally used to load on mules and asses and the latter on goats and sheep. The standard one also served as an article useful for barter, as shown by the *Kāśikā* on the *sūtra* *Id-goṇyāḥ* (I.2.50) mentioning a piece of cloth purchased for 5 or 10 *goṇis* (*pañcabhiḥ goṇibhiḥ krītaḥ paṭaḥ pañcha-goṇibḥ; dāśa-goṇibḥ*).

*VIVADHA* (IV.4.17), *VIVADHA*<sup>1</sup> (VI.3.60)—This was a device to carry loads suspended from the ends of a pole by professional carriers, and is still in use. Drinking water from

<sup>1</sup> Both long and short forms are used by Pāṇini himself, and hence Patañjali reads the long form *vīvadha* also in *sūtra*, IV.4.17. Another equivalent of *vīvadha* was *vīvaṅgikā* (*babāgi* in Hindi).

the village well was carried in this manner by persons called *udaka-hāra* and *udabāra* (VI.3.60, modern *kahār*). The *vīvadha* hung from their shoulders containing pitchers full of water was called *udaka-vīvadha* or *udavīvadha* (VI.3.60). Kautilya uses *vīvadha* in the technical sense of supply or transport (*Arth.* XII.4, p. 388; Trans. p. 417).

**STORAGE**—Pāṇini refers to several forms of storage vessels in *sūtra*, VI.2.102, for example (1) *kuśūla*, a large cylindrical vessel for storage of grain, made of earth and rising to more than a man's height with a capacity to hold 15 to 20 maunds; (2) *kumbha*, a big earthen jar with a narrow mouth; (3) *kūṇḍa*, a form of storage resembling a well and consisting of a series of earthen rings arranged one above the other; and (4) *śālā*, a masonry structure or store-room specially built for the purpose. The opening near their bottom for taking out corn was called *bila*.

### CH. III, SECTION 12. CONVEYANCES

The means of transport are referred to as *vahya* (III.1.102) or *vāhana*, which was of two kinds, viz. vehicles for carrying load on land (as in the *sūtra Vāhanam āhitāt*, VIII.4.8.), and means of transport in water called *vāhana* or *uda-vāhana* (VI.3.58). The name of the load-bearing cart was specified according to the nature of its load (*āhita*), e.g. *ikṣbu-vāhana*, *śara-vāhana*, *darbha-vāhana*. *Śakaṭa* denoted the waggon for carrying goods, with sturdy bulls called *śakaṭa* (IV.4.80) yoked to it. (Cf. *Vedic Index*, II.345). Patañjali refers to caravans of carts (*śakaṭa-sārlba*) passing along highways (III.2.115; II.120). In Buddhist literature numerous references to merchants conveying their goods and merchandise across the country, in caravans of 500 carts are met with, indicating the growing importance of wheeled traffic (*śakaṭa*) for transport of heavy goods.

**CHARIOT**—*Ratha* (IV.2.10 etc.) was the more aristocratic conveyance. A collection of chariots is referred to as *rathyā* and *ratha-kaṭyā* (IV.2.50-51). The use of chariots for army was also known. Pāṇini refers to the divisions of an army (*senāṅga*, II.4.2), which according to the commentary included chariot-men and horsemen (*rathikāśvāroham*).

Several kinds of chariots were known, each named after the draught animal yoked to it (IV.3.122). On this Patañjali mentions chariots drawn by horses (*āśvaratha*), camels (*auśbṛa-ratha*) and asses (*gārdabha-ratha*; *Bhāṣya*, II.318).<sup>1</sup> Naturally the wheels and other parts of a camel-chariot must

<sup>1</sup> The *Mahāniddesa* refers to *oṭṭha* and *khara yānas* and *jāt*. VI. 355 to *assatari ratha*. cf. *Conveyances* by G. P. Majumdar, *Indian Culture*, Vol. II.277. Also *Vedic Index*, II.202, for horses, asses and mules yoked to chariots.

have differed in dimension from others to suit the size of the yoked animal. The carpenter's vocabulary must have expressed this distinction by appropriate terms derived from the name of the draught-animal, and Pāṇini makes a provision in *sūtra* IV.3.122, *Patra-pūrvād-añ*. For example, a pair of wheels was labelled variously as *āśva-ratba-*, *auśhṭra-ratba-* or *gārdabha-ratba-chakra* (*Pat.* II.318 and *Kāśikā*) according to the kind of chariot for which it was required.

Pāṇini refers to the various parts of a chariot (*rathāṅga*) under the name of *apaskara* (VI.1.149). According to a *vārttika* on IV.3.121, *ratbha* denoted parts of a chariot, as wheel, axle, etc. This special term derived from *ratba* seems to have been required in the cartwright's vocabulary to distinguish the chariot-parts from those of a cart, which were neither so costly nor so nicely built.

*Upadbi* denoted the part of a wheel between the nave and the circumference to which spokes were fitted. The cartwrights take special care in the selection of wood to make *upadbi* and hence the special word *anupadbeya* (V.1.13) became current. The axle is called *aksba* (V.4.74). In *sūtra* VI.3.104 Pāṇini refers to *kāksba* in the sense of an inferior (*kutsita*) axle. The inferiority may be due to diminution in its standard length, which according to the *Śulba Sūtra* of Āpastamba was 104 *aṅgulas* (=78 inches, or 6½ ft.) (*Vedic Index* II.206). Pāṇini also refers to inferior chariots (*kad-ratbas*, VI.3.102), being below the standard size. As against this, were the *parama-ratba* (superior chariots), implied in *sūtra* IV.3.121, both on the authority of Kātyāyana and Patañjali (*Bhāṣya*, I.1.72, *vārt.* 16, I.186). According to the *Āpastamba Śulba Sūtra* the dimensions of a chariot of standard size were: pole=188 *aṅgulas*, 11¾ ft; axle=104 *aṅgulas*, 6½ ft.; yoke=86 *aṅgulas*, 5 ft. 4½ inches (*Āpastamba Śulba Sūtra*, Mysore edition, p. 95; *Vedic Index*, II.203). The epithets *kad-ratba* and *parama-ratba* became current in relation to some such specification of standard size.

**CHARIOT-UPHOLSTERY**—After fabrication, the chariots were upholstered (*Parivṛito rathah*, IV.2.10) of which the *Kāśikā* mentions three varieties, viz. *vāstra*, *kāmbala* and *chārmaṇa*, i.e. mounted with cloth, blanket and leather. Chariots covered with a special woollen stuff known as *pāṇḍu-kambala*<sup>1</sup> were called *pāṇḍu-kambalī* (IV.2.11). According to the *Vessantara Jātaka*, *pāṇḍu-kambala* was a kind of red-coloured blanket imported from Gandhāra (*Vessantara Jātaka*, VI.500, *Indagopaka-vaṇṇābhā Gandhārā paṇḍu-kambalā*), which, as the commentary adds, were of red colour and used for the army (*Jāt. Commentary*, Vol. VI. p. 501, *Gandhāra-raṭṭhe uppannā satasabassagghanikā senāya pārutā ratta-kambalā*).

Leopard and tiger skins were also in use for special upholstery, the chariots so covered being called *dvaipa* and *vaiyāgbra* respectively (IV.2.12). The earliest reference to *vaiyāgbra* chariots used in the ceremony of royal consecration is found in the *Atharvaveda* (*Vyāgbro adhi vaiyāgbre vikramasva*, IV.8.4). It is interesting to note that like *pāṇḍu-kambala* the *dvaipa* and *vaiyāgbra* chariots also had become popular in the epics and the *Jātakas*. A verse in the *Vessantara Jātaka* records the gift of 700 such conveyances by prince Vessantara (*Satta rathasate datvā... dipe atho pi veyyagge*, *Vessantara Jātaka*, VI.503), which the commentary explains as *dīpicchamma-vyagghachamma-parikkhitte*.

*The Mahājanaka Jātaka* refers in a song to artistically decorated *dīpa* and *veyaggha* chariots (*Jāt. VI*, pp. 48-50). It appears that chariots so upholstered were intended for royalty. Rāma mounts the *vaiyāgbra* chariot on the eve of his proposed consecration as heir-apparent (*Rāmāyaṇa*, II.16.28). Among the presents brought to Yudhishṭhira by kings of the Prāchya

<sup>1</sup> *Pāṇḍukambala* occurs in *Sasa Jātaka* (Vol. III. p. 53, *Pāṇḍukambala-silāsanam*, rocky seat of Indra covered with *pāṇḍu-kambala*). Cf. also *Jātaka*, VI.515, for Vessantara's elephant covered with *pāṇḍu-kambala*, showing the wide use of this stuff in the Jātaka period.

country were included *vaiyāghra* chariots each valued at 1000 *kārshāpaṇas* (Sabhāparva, 51.33, *vaiyāghra-ṣarivārīta-ratha*, and 61.4, *sabāsa-samīta vaiyāghra-rāja ratha*). The scabbard of Bhīmasena is spoken of as *vaiyāghra kośa* (*Mahābhārata*, Virāṭa-parva, 38.30, 55, Poona edition).

A chariot suited for rough use on all kinds of roads was, called *sarvapaṭhīna* (V.2.7). Among different classes of roads Kauṭilya specially mentions one called *rathapaṭha* being 7½ ft. wide (*Arth. Text*, II. 4., p. 54).

**RUNNING FOOTMEN**—In *sūtra* VIII.3.75, Pāṇini states that the word-form *pariskanda* is current in the usage of the eastern people and of the Bharata *janapada*.<sup>1</sup> It implies that in the idiom of the Udīchyas it was called *parishkanda* (cerebralised form), which occurs five times in the Vrātya hymn of the *Atharvaveda*. *Pariskanda* denoted running foot-soldiers one on each side of a war-chariot (*Vedic Index*, I.497)<sup>2</sup>, who are referred to as *chakra-rakṣa* in the Bhīshmaparva (18.16).

**A TERM OF CART-WRIGHTS**—*Sūtra* I.4.78, *Prādhvaṃ bandhane*, implies several stages in the making of carts and chariots. The idiom *prādhvaṃ-kṛītya*, 'tying with cords,' refers to the final phase through which each vehicle has to pass in the process of manufacture before it becomes road-worthy. The carpenter first proceeds to prepare the different parts of a chariot (*rathāṅga*) one by one, as wheel, axle, pole, yoke, etc., and then assembles them together. Patañjali says that the parts of a chariot lying singly are not fit for locomotion and that only when they are assembled as chariot they contribute to movement (*vraja*, to move).<sup>3</sup> After the frame-work is

<sup>1</sup> *Pariskandah Prāchya-Bharateshu*. In taking Prāchya and Bharata separately, I follow Patañjali on Pān. II.4.66 (I. 493).

<sup>2</sup> In the *Atharva*. XV.2.1. *et seq.* the form is dual; but *Taittirīya Br.* III.4.1.7, has singular, *Bhumne parishkandam* (= *parichūrakam*, Bhaṭṭa-Bhāskara).

<sup>3</sup> *Yathā tarbi rath-āṅgāni vihrītāni pratyekam vraji-kṛīyām praty-*

ready, the third process is to mount it with upholstery. The fourth stage is that of binding the parts with cords to keep them tight together. This is generally done, not by the car-maker but by the buyer at his place. A cart or chariot, even though all its parts be ready, is not considered road-worthy, unless it has undergone this stage of cording (*bāndhana*). Therefore the phrase *prādhvam-kṛitya*, literally 'having made it road-worthy,' has the meaning of *bāndhana*. The counter-example *prādhvam-kṛitvā* is derived from a chariot already in use, but which gets out of order and stranded, and then subsequently repaired and put on the road.<sup>1</sup> According to Pāṇini *prādhva* (V.4.85) is that which is 'road-worthy' (*prādhva ratha*, *prādhva śakaṭa*).

*atamartbhāni bhavanti, tat-samudāyaścha rathaḥ samartbaḥ* . . . *Bhāṣya*, 1.2.45; 1.2.20.

<sup>1</sup> Cf. *Kāśikā*, *prādhvam kṛitvā śakaṭam gataḥ*. . . The grammatical interest rotates round the *gati samjñā* of *prādhvam* in the sense of 'fastening' and its absence in the latter case. The effect of *gati samjñā* is two-fold, viz. the compound and *lyap* suffix in *prādhvam-kṛitya*.

### CH. III, SECTION 13. DRAUGHT-ANIMALS

A draught-animal is referred to by the peculiar term *patra*, from root *pat*, to move (III.1.121; IV.3.122-123). An animal fit to be yoked is called *yugya* (III.1.127). In the *Tad-vabati* section (IV.4.76-81) Pāṇini classifies animals on the basis of their being yoked to different vehicles and their capacity to draw various loads, as (1) *rathya*, bulls to draw chariots (IV.4.76); (2) *śakaṭa*, bulls for carts (IV.4.80); (3) *hālīka* and (4) *sairika*, bulls for ploughs (IV.4.81). These distinctive terms were used in connection with the care and quantity of rations prescribed for the animals of each class, as we find in Kauṭilya (*Arth.* II 29, p. 131).

There are some bulls whom the drivers can yoke on both sides alternately, that is both on the right or left side of the pole. These were called *sarva-dhurīṇa* (IV.4.78) = (*dbura*, frontal pole, *Jāt.* I.192). There are others who can be yoked on one side only, such being termed *eka-dhurīṇa*, the right one called *uparāl* in Hindi and the left one *tarwāl*.

We have already referred to various kinds of chariots (IV.3.122) drawn by different animals, as horse, camel, ass or bull, who must have been yoked in even numbers as two, four, etc. In addition to them sometimes a leader was yoked in front and called *prashṭha* (*Prashṭho' gragāmini*, VIII.3.92), for which the Vedic term was *prashṭi*, the epithet *prashṭivāhana* or *prashṭivāhin* being used for such a chariot (*Vedic Index*, II.42). In Bharhut, Sanchi and Mathurā sculptures, the chariots are drawn only by two or four horses or bulls, without a *prashṭha*.

Pāṇini refers to bull-riders (*go-sāda*, and *gosādin*, VI.2.41), camel-riders (*ushṭra-sādi*); to mounted officers (*yuktārohin*, VI.2.81), probably couriers or cavalrymen; to charioteers

(*sārathi*, VI.2.41); to reins (*pragraha*, *raśmi*, III.3.53); to expert bull-drivers (*gosārathi*, VI.2.41); and others competent to drive all kinds of animals (*sarvapatrīṇa*, V.2.7).

*ĀŚVĪNA*—*Āśvīna* (*aśva*+*khañ*) denoted the length of journey made in one day by a horse (*Āśvasy-aikābagamaḥ*, V.2.19).

In the *Atharvaveda* (VI.131.3) the *āśvīna* distance is mentioned immediately after 3 or 5 *yojanas* and appears to have exceeded the latter (*Vedic Index*, I.70). The *Arthaśāstra* defines precisely the *āśvīna* distance, as it was needed to calculate the travelling done by Government servants, and for determining the marches of cavalry or other post-chaise arrangements.

The *āśvīna* distances in the *Arthaśāstra* are as follows:—

Quality of horse	Chariot-horses	Riding horses
Average	6 <i>yojanas</i> = 31 miles	5 <i>yojanas</i> = 25½ miles
Middle	9 <i>yojanas</i> = 46 miles	8 <i>yojanas</i> = 41 miles
Best	12 <i>yojanas</i> = 61 miles	10 <i>yojanas</i> = 51 miles

A *yojana* was equal to 5 5/44 miles.

(*Arthaśāstra* Trans. p. 149; Text, II.30, p. 134).

Thus the minimum length of one day's horse-journey in the *Arthaśāstra* is 5 *yojanas* for a saddle horse of ordinary quality and 6 *yojanas* for a carriage horse. The *āśvīna* distance in the *Atharvaveda* was more than 5 *yojanas*, i.e. somewhere between 6 and 8 *yojanas*. According to Patañjali, the distance travelled by an average horse (*aśva*) was 4 *yojanas* and by a superior horse (*aśvatara*, V.3.55; II.413) 8 *yojanas* (*aśvo'yañ yaś-chatvāri yojanāni gacchhati*, *aśvataro'yañ yo'aṣṭau yojanāni gacchhati*).

### CH. III, SECTION 14. WATER TRANSPORT

Pāṇini refers to navigable rivers like the Sindhu, and also to *samudra* or ocean (IV.4.118). He knows of two kinds of islands, viz. (1) near the sea-coast (*anu-samudra*), and (2) in the main ocean. Goods imported from the former were called *dvaipya*, and from the latter *dvaipa* or *dvaipaka* (IV.3.10).

Boats are called *nau* (V.4.99), and also *udaka-vāhana* or *udavāhana* (VI.3.58); oars *aritra* (III.2.184); and a boatman, *nāvika* (*nāvā tarati*, IV.4.7).

Pāṇini refers to a boat-ferry as *nāvya* (IV.4.9), same as *nāva-tittba* (*Jāt.*, III.330). A ferry on the Indus was located near Pāṇini's own home in Śalātura, as stated in a later inscription (*Śala-no-krama*).<sup>1</sup> The Indus near this place is crossed by a boat-bridge for eight months of the year, and for the remaining four months the passage is effected by a ferry (*Imp. Gazetteer*, Vol. 1.382).

The worth of merchants was assessed in terms of the number of shiploads of merchandise, e.g., *dvināva-dhana*, a merchant having two cargo boats (*Nāvo-dvigoh*, V.4.99; *Kāśikā*). One who was sailing with five ship-loads was called *pañchanāva-priya*. A shipment arriving with two cargo boats was designated as *dvināva-rūpya*.

Supposing a full consignment of riverine trade was comprised of a hundred boats, it would happen that at important landing places, the cargo of some of these boats was unloaded and disposed of by exchange with other local goods, which latter were reladen on the boats. Such transactions are referred to by the *Kāśikā* as *pañchanau*, *daśa-nau* (*pañchabhiḥ*

<sup>1</sup> Sten Konow, *Corpus of Kharoshthi Inscriptions*, Shakardarra Well Inscription, p. 159. An ancient copy of this inscription is now deposited in the Mathurā Museum.

*naubbih kṛitāḥ*; V.4.99). A trader would own either the whole cargo boat or was sharing only a part of its merchandise. The cargo of 'half-a-boat' as well as its sale proceeds would be called *ardha-nāva* (*Ardhāchcha*, V.4.100).

Pāṇini also refers to another popular method of water transport called *bbastrā*, a raft of inflated skins; one who carried goods in this way was called *bbastrika* (IV.4.16; *Bbastrayāharati*). This method of crossing is frequently resorted to in the flooded rivers of the Panjab, the N.W.F.-P., and Afghanistan and is considered the safest and quickest (see *Imp. Gaz.*, N.W.F.-P., pp. 117-118).<sup>1</sup> In Persia also the Behistun Ins. refers to "floats-of-skin" (*masbkākhuvā*) used by Darius. Examples are seen sculptured on Assyian panels from Sennacherib's palace, and Herodotus also mentions this cargo-raft on the Tigris.<sup>1</sup>

In the previous *sūtra* *Haratyutsaṅgādibhyah* (IV.4.15) reference is made to transporting by means of *utsaṅga*, a kind of small dug-out float, called *chaṅg* in Sindh, similar to the Roman *cumba*, a small boat made originally from the hollow of a tree and used on rivers and lakes by fishermen; *uḍuṣa*, another small boat shaped like the half-moon (cf. Hindi *ḍongī*), *utpata*, probably a longish fishing boat; and *piṭaka*, a basket-like coracle made of weeds and rushes covered with leather.

<sup>1</sup> In Baltistan such contraptions are called *zak* (from Tibetan *yak* skins). A *zak* is now a raft of sewn-up goat skins, one leg of each left open for inflation. The skins are tied to a platform of sticks or have a fisherman's net spread on them on which the passengers travel at the rate of eight miles an hour, the Shighar *zak* consisting of four rows of four skins. In the Panjab a rude raft is made by tying together two inflated bullock-skins, with a *charpoy* on it for passengers. The rafts are so light that on reaching a downstream destination the crew merely pick them up and walk back along the bank with them. For the skin-raft (*bbastrā*), coracle (*piṭaka*), dug-out float (*kāṇḍa-plava*, *Kāṇikā*, IV.4.5), see Hornell, *Primitive Types of Water Transport in Asia*, J.R.A.S., 1946, pp. 124-141.

### TYPES OF BOATS

Bhastrâ (*inflated skins*)

Utsaṅga (*cumba*)

Pīṭaka (*coracle*)

Bharāṭa (*float of wood*)

### CH. III, SECTION 15. GAMES AND AMUSEMENTS

**SPORTS (KRĪḌĀ)**—The following are some of the sports (*krīḍās*) mentioned by Pāṇini: (1) wrestling, (2) jousts, (3) hunting, (4) dicing, (5) garden pastimes, and (6) musical entertainments.

Sport was called *krīḍā* (VI.2.74; IV.2.57). A sportsman *ākṛīḍī* (III.2.142), and the different parts of the play had their own names, e.g. *anukrīḍā*, *saṁkrīḍā*, *parikrīḍā* and *ākṛīḍā* (I.3.21).

**SAMAJYĀ**—Pāṇini refers to *samajyā* (a *saṁjñā* in III.3.99) which Kātyāyana and Patañjali explain as a place where people flock together (*samajanti tasyāṁ samajyā*, *Bhāṣya*, II.152). We are indebted to the *Jātakas* for information that the *samajjās* (= *samajyā*) were special gatherings 'where crowds of men, women and children gathered together and witnessed various kinds of shows and performances, like dancing and music, combats of elephants, horses and rams, bouts at quarter-staff (*daṇḍehi yuddham*) and wrestling.' (R. L. Mehta, *Pre-Buddhist India*, p. 355). The *Vidburapaṇḍita Jātaka* refers to *samajyā* gatherings of men and women, and seats arranged in tiers upon tiers (*mañchātimañche*, *Jāt.* VI.277). The *samajyā* gatherings formed a regular feature of social life in the Mahājanapada period.

Pāṇini also refers to assemblies under the general name of *samavāya* (IV.4.43), which according to the commentators included *samāja*. A cattle-fair was known as *samaja* (III.3.69), distinguished from a human assemblage (*saṁāja*), as stated above. Pāṇini explains *sāmājika* in two senses: (1) who attends a *samāja* as its member to witness its games, and (2) the convener of a *samāja* (IV.4.43 and IV.4.33, *rakṣhati* of the latter being taken as aiding a *samāja* by organizing it).

*Samāja* and *samajyā* appear to be synonymous terms, the first of wider meaning including religious gatherings also. Aśoka interdicted the popular *samāja* as not promoting morals.

**WRESTLING**—Pāṇini refers to the term *saṅgrāha*, i.e. gripping in wrestling (*Sami mushṭau*, III.3.36). Kātyāyana points out that *saṅgrāha* does not mean 'palm-ful' as taken by some. Patañjali's gloss is *mallasya saṅgrāhabh*, *mushṭikasya saṅgrāhabh* (grip of a wrestler). The *Jātaka* calls a wrestler *muṭṭhika* (*Jāt.* VI.277). Wrestling begins with a challenge (*ābhvāna*, I.3.31; *mallo mallam ābhvayate*), which is answered by a responsive action (*karma-vyatibhāra*).

**JOUSTS**—Pāṇini mentions a joust as *prabaraṇa-kṛīḍā*, 'a pastime with weapons.' The name of the sport takes after the weapon used in it as prescribed in the *sūtra Tadasyāṁ prabaraṇam iti kṛīḍāyām naḥ* (IV.2.57). The *Kāśikā* cites as examples *maushṭā* (boxing) and *dāṇḍā* (*lāṭhī*-play). The *Sarabhaṅga Jātaka* describes sports of archery with such feats as arrow-stick, arrow-rope, (*Jāt.* V.130, *sara-laṭṭhi*, *sara-raju*, etc.).

**THE EASTERN SPORTS**—Pāṇini knows of the sports of Eastern India (*Prācchāṁ kṛīḍā*, VI.2.74), for which he frames proper grammatical formations (II.2.17, sport-denoting words form a *nitya* compound, with *ṇvul* suffix). As examples the *Kāśikā* mentions the following: *Uddālaka-ṣuṣṭha-bhañjikā*, *Vīraṇa-ṣuṣṭha-prachāyikā*, *Śāla-bhañjikā*, *Tāla-bhañjikā* (*Kāśikā* on VI.2.74, III.3.109 and II.2.17). Rule VI.2.74 regulating the accents in the compound-names of these sports shows that Pāṇini was acquainted with the institutions of social life and national sports of the remote regions of eastern India.

**THE NATURE OF EASTERN SPORTS**—Some of these sports relating to the plucking of flowers (*prācchya-kṛīḍās*) are illustrated in early Indian art. According to Dr. Vogel: "It is interesting that these games are said to be peculiar to Eastern India, as this tallies with the mention of the *Śāla-bhañjikā* festival in Buddhist literature. It is evidently

Magadha, the cradle of Buddhism, and the neighbouring countries, that may be taken to have been its home." (The Woman and Tree or *Śālabhañjikā* in Indian Literature and Art, *Acta Orientalia*, Vol. VII. pp. 203-204).

A graphic account of these popular festivals is found in the *Avadānaśataka*: "Once the Lord Buddha dwelt at Śrāvastī in the Jetavana, the garden of Anāthapiṇḍada. Now at that very time the festival called *Śālabhañjikā* was being celebrated at Śrāvastī. Several hundred-thousands of beings assembled there and, having gathered *śāl* blossoms, they played, made merry and roamed about." (*Ibid.* p. 201). And again quoting from the *Nidānakathā* (*Jāt.* I.52) the description of the *śālabhañjikā* festival celebrated in the Lumbinī garden: "Now between the two towns (Kapilavatthu and Devadaha) there is an auspicious grove of *śāl* trees belonging to the people of both cities, and called Lumbinī Grove. At that time from the roots to the topmost branches it was one mass of full-blown flowers; and amidst the branches swarms of five-coloured bees, and flocks of birds of different kinds, roamed, warbling sweetly. The whole of Lumbinī Grove was like a wood of variegated creepers, or the well-decorated banqueting hall of some mighty king. The Queen beholding it was filled with the desire of disporting herself in the *śāla* grove (*śālanakilaṃ kīlitukāmatā*); and the attendants entered the wood with the Queen. When she came to the root of an auspicious *śāla* tree, she wanted to take hold of a branch of it. The branch, bending down, like a reed heated by steam, approached within reach of her hand. Stretching out her hand she took hold of the branch, and then her pains came upon her." (Cf. Rhys Davids, *Buddhist Birth Stories*, London 1880, Vol. I, p. 66).

The motif of the woman plucking flowers from a distended bough is met with on the *toranas* of Bharhut and Sānci in the Śuṅga period and is continued on the railing pillars of Mathurā during the Kushāṇa period. It also appears in a limited number of examples in Gandhāra art of the Kushāṇa age, but the weak

treatment of the subject there betrays its having been imported from the East. We have in the *Kāśikā* an example of a game played by people of the North known as *Jīva-putra-prachāyikā*.<sup>1</sup> Vātsyāyana in the *Kāmasūtra* mentions as examples of *deśya krīdās* (local sports) similar names ending in *aka* suffix, e.g. *Sabakāra-bhañjikā*, *Abhyūsha-khādikā* (cited by *Kāśikā*, on III.3.109), *Udaka-kshveḍikā*,<sup>2</sup> *Bisa-khādikā*, *Aśokottamsikā*, *Pushpāvachāyikā*, *Chūta-latikā*, *Damana-bhañjikā*, *Iksbu-bhakshikā*, etc.

A feature of all such sports played by the gathering of fruits or plucking of flowers was that the plucking should be done by hand (*bastādāne cherasteye*, III.3.40). According to this rule the form *pushpa-prachāya* would not be regular unless the plucking was done by hand.

**HUNTING**—Hunting is referred to as *lubdha-yoga* (V.4.126), and a hunter was called *mārgika*, 'one who shoots *mṛigas*,' and a bird-trapper *pākshika* or *śākunika* (IV.4.35).<sup>3</sup> Among *mṛigas* the *Kāśikā* includes not only deer, but also big game like the boar. The fowlers are said to have derived their epithets from the names of particular birds trapped by them, as *māyurika*, *taittirika*. Game-shooting was done with arrows provided with barbs (*patra*), and such arrows are noted by Pāṇini to have caused extreme pain (*ativyatbana*, V.4.61). He refers to two words in connection with shooting barbed shafts, viz. *sapatrā* when the arrow with the barbed end gets stuck inside the body of the animal, and *nishpatrā* when the barbed end pierces the body from one side with such force as to emerge on the other (V.4.61). Wounding an animal in the right flank was known as *dakṣhiṇermā*<sup>4</sup> (V.4.126) in the

<sup>1</sup> *Iyam Udichām krīdā*, *Kāśikā*, VI.2.74.

<sup>2</sup> Played in Madhya-deśa according to *Jayamaṅgalā*. It is depicted in the Sigiriya paintings of Ceylon, also called *Śrīṅga-krīdā*.

<sup>3</sup> *Pakshi—matsya—mṛigān hanti*, IV.4.35.

<sup>4</sup> *Īrma* denoting 'arm, side, haunches, forequarters' was an old R̥g-vedic word (RV. VIII.22.4).

hunter's slang (*lubdhayoga*). It was less fatal than the shot in the left side, and hence the need of the term in the language, for it was of some consequence to the hunter to know whether the game had been pierced in the right or the left flank.

Pāṇini knows of the habits of big game roaring or yelling at a particular time of day or night (IV.3.51, *Vyāharati mṛigaḥ*), as shown in the expression (1) *prādosika* (at dusk) and (2) *naisika* (at night). [Cf. Karmapārva, 31. 40, *kravyādā vyāharantyeṣu mṛigaḥ kurvanti bhairavam*].

The hunters moved with a pack of hounds (*śva-gaṇena charati*, IV.4.11). Pāṇini's *śvagaṇika* or *śvagaṇika* anticipates the *śvagaṇin* hunters mentioned in the *Arthaśāstra*, who were employed by the State to keep the pastures free of wild animals and thieves (*lubdhaka-śvagaṇibhiḥ*, II. 29 p. 130). In a Bharhut scene we actually find a hunter attacking his game with hounds (Barua's *Bharhut*, Vol. III, fig. 146).

The fisherman is referred to as *mātsyika* and *majnika* (IV. 4.35). His equipment consisted of a net called *jāla* and *ānāya* (III.3.124).

**DICING (AKSHA-DYŪTA)**—Dicing is mentioned as a game from the time of *Rigveda* onwards. It is referred to as *akshadyūta* (IV.4.19) or simply *dyūta* (III.3.37) in the *Ashṭādhyāyī*. Pāṇini records a grammatical idiom according to which the words denoting the objects with which the game was played were connected with the verb *div* either in the instrumental or accusative case (I.4.4, *Divah karma cha*). For example '*akshān divyati* and *akshair divyati*' (he plays with dice) were both used, probably from the fact that the game and its accessories of play were both called *aksha*.

Pāṇini calls a dicer *ākshika* (*Tena divyati*, IV.4.2.). Patañjali says that *kitava* and *dhūrta* formed part of the *Śaunḍādi* group (II.1.40) and he refers to a practised gambler as *aksha-kitava* and *aksha-dhūrta* (*Bhāshya*, I.390). *Kitava*, 'a gambler,' was an old Vedic word (*Vedic Index*, I.156-7),

used also in the Buddhist literature (cf. *asippha dhuttaka* and *sikkhita kitava*, *Jāt.* VI.228; also *Dhammapada*, verse 252) and the *Mahābhārata* (Sabhāparva, 58.9).<sup>1</sup>

**ACCESSORIES OF PLAY**—Pāṇini refers to two distinct methods of the game, i.e., one played by *akṣhas*, and the other played by *śalākās* (II.1.10). A player with the former was called *ākṣhika* and with the latter *śalākika* (cf. *Kāśikā* on Pāṇini, IV.4.2). The *Arthasāstra* also refers to both of these, stating that the Superintendent of Dicing shall supply *akṣha* and *śalākā* to the players (*Artha*, III.20. p. 198). The *akṣhas* seem to have been cubical and the *śalākās* oblong pieces marked on the sides with points or numbers. In the representation of the gambling scene at Bharhut the *akṣhas* are shown as little cubes (Cunningham, *Stupa of Bharhut*, pl. XLV).

The manner in which the game was played in olden days differed from that current today. At present only two pieces are used. But in ancient times the number of dice was five, at least so in the Brāhmaṇa period. In the *Taittirīya Brāhmaṇa* it is said that 'he hands to the king five dice, for these are all the dice' (*Tait. Brāh.* I.7.10). These pieces were called Akṣharāja, Kṛita, Tretā, Dvāpara and Kali (*Vedic Index*, I.3). The game as it was known to Pāṇini must have been played with five dice pieces as the form *chatusṣṭari* 'an unlucky throw by four' (II.1.10) shows. The *Kāśikā*, Chandra and Kaiyaṭa agree that the game implied in *sūtra*, II.1.10 was *pañcābhikā dyūta*.

**METHOD OF PLAY**—Pāṇini throws light on the method of play in the following:

*Akṣha-śalākā-saṁkhyāḥ pariṇā* (II.1.10).

The words *akṣha* and *śalākā* and the numerals (up to four) are compounded with *pari* to form an *Avyayībhāva* compound,

<sup>1</sup> "... *kitava* is used here in the usual sense of "gambler" without any special pejorative meaning." (K. de Vreese, "The Game of Dice in ancient India (The Vibhītaka Game)," *Orientalia Neerlandica, Lieden* (1948), p. 332. The interpretation of *kitava* by "cheat" does not suit the context.

when, as observed by Kātyāyana, the resultant words denote gambler's throws (*kitava-vyavahāra*, *vārt.* on II.1.10). Thus we have the following forms:

1. *Aksha-pari*;
2. *Śalākā-pari*;
3. *Eka-pari*;
4. *Dvi-pari*;
5. *Tri-pari*;
6. *Chatush-pari*.

The forms were used to indicate a deviation from the winning throw. The *Pañchikā* game was played with five dice or five ivory pieces. When all these five pieces fall with faces turned upward, or all with faces turned down, then the thrower wins the game. But when the fall is otherwise, he loses it (*Kāśikā* on II.1.10). For example, when four pieces fall alike and one is different, the dicer exclaims: *Aksha-pari!*, *Śalākā-pari!*, *Eka-pari!*, i.e. missed by a single *aksha* or by a single *śalākā*. The expression *ekapari* was synonymous with *aksha-pari* and *śalākā-pari* as shown in the *Kāśikā* cited in the *Bhāṣya* (*ekatve'ksha-śalākayor*, I.379). If the throw fell amiss by two, it was called *dvi-pari*; if 'by three,' *tripari*; and if 'by four,' *chatushpari*. When all the five pieces fell uniformly the throw was called a winning throw of which the technical name was *Kṛita*. The name for the losing throw was *Kalī*. According to the *Dhammapada* a deceitful player (*kitavo saṭho*) tries to conceal his losing or *kali* throw (*verse* 252). In the *Bhūridatta-Jātaka-Vatthu*, *kali* and *kṛita* are contrasted (*Kalī hi dhīrānaṃ kaṭam mugānaṃ*, 'Loss to the wise, a gain to the fool,' J.R.A.S., 1892, p. 127; also *Jāt.* VI.228). In the *Chhbāndogya Upanishad* (IV.1.4) *kṛita* is the winning throw. In the *Sabhāparva* (52.13) Śakuni is described by Vidura as *kṛita-basta*, i.e. one who takes a winning throw. Pāṇini also refers to these two kinds of throws:

*Kṛitaṁ grihṇāti=kṛitayati*

*Kaliṁ grihṇāti=kalayati*<sup>1</sup> (III.1.21)

These must have been current expressions used during the progress of the game when a player scored a winning or a losing throw. In the *Vidhurapandita Jātaka* (545) a graphic description of the gambling scene between the Kuru king and the Yakkha Puṇṇaka is given and there an expression identical with that of Pāṇini is used:

*'rājā kaliṁ vicchinam aggabesi,*

*kaṭam aggahī Puṇṇako pi yakkho.'*

'The king played the losing throw and the Yakkha Puṇṇaka the winning throw.' (*Jāt. Text*, VI. 282; *Trans.* VI 138). It is stated there that the Yaksha was reshuffling with his miraculous powers such dice as were falling against him. The *bhassamāna pāsaka* (missing dice) of the *Jātaka* correspond to Pāṇini's *ekapari*, etc. It also appears that so long as a player was taking the *kṛita* throw he went on repeating his throws. But after the *kali* throw, the turn went to the other player. When once either Śakuni or Puṇṇaka begins to win deceitfully, he continues to throw the dice up to the end of the game.

**WAGER (GLAHA)**—Śakuni opined that dicing, a noble game, was maligned only because of its association with a stake (*akṣha-glaba*, *Sabhā*. 59.8). According to Pāṇini *glaba* is irregularly derived when it relates to the vocabulary of dicing (*Akṣheṣhu glabaḥ*, III.3.70). According to the *Vedic Index*, *glaba* was a later form used in the *Atharvaveda* for *grābha* of the *Rigveda* meaning a 'throw' at dice (I.248). This may be its original meaning, but in classical Sanskrit *glaba* always denoted the stake and not the throw (Cf. *Yaj. Smṛiti*, II.199 as rendered by Mītākṣharā, *kitava-parikalpita paṇa*; also *Sabhā-*

<sup>1</sup> The *sūtra* deliberately reads *kala* instead of *kali*, as shown by Kātyāyana's *vārttika* '*bali-kalyoratva-nipātanam* (*Bhāṣya*, II.28), which says that there can be no desiderative form in *kalayati*, since no one would wish for himself a losing throw.

parva, Dyūta Section where it invariably means a wager). This meaning Pāṇini had in view. Other references in Pāṇini to wager or stake-money are *śatasya vyavaharati*, *śatasya paṇate* (II.3.57), *śatasya divyati* (II.3.58), *śatasya pratidiviyati* (II.3.59), all denoting 'he stakes a hundred rupees' in *dyūta*.<sup>1</sup>

According to the testimony of the Vedic literature, *Jātakas*, *Mabābhārata* (Sabhāparva) and Kauṭilya dicing was a game played in a *sabhā*. The *Arthaśāstra* prescribes 5 p.c. as Government fee to be realised on the amount of wager (*Arth.* III.20 p. 198). This would correspond to *pañchakaḥ* (*pañchāsmīn āyah*), cited in the *Kāśikā* to illustrate *sūtra*, V.1.47.

ANOTHER BOARD GAME—Pāṇini also refers to a game resembling draughts or the Indian *chauṣar*, which must have been played on a board (*ākarsba*, V.2.64) divided into squares, and in which the essential thing was the movement of the gamesmen from square to square in accordance with the results of the throw of the rival players. The gamesmen were known as *śāra* and the movement of the pieces as *pariṇāya* (*pari+ṇāya* in the sense of *dyūta*, III.3.37), *pariṇāyena hanti śārān* (example on Pāṇini, III.3.37), i.e. he hits the rival gamesmen by an encircling movement (*samantan-nayanena*) of his own pieces.

*Ayānayīna*, a technical term mentioned in *sūtra*, V.2.9, denoted a gamesman fit to be moved to a square of safety. Patañjali comments on its meaning: 'By giving the sense as 'that which is to be carried to *ayānaya*' the meaning is not made quite clear as to which is *naya* and which is *anaya*.' (To this we reply). 'The right hand move is *aya* and the left hand move *anaya*. (The pieces move both right and left with reference to the rival players seated opposite to each other). That square is called *ayānaya* in which pieces coming both from right and left (which virtually means the gamesmen of both players) are not attacked by their rivals. The gamesman that is desired

<sup>1</sup> Another sense of all these sentences is: he deals in sale and purchase transactions worth one hundred rupees (*kṛaya-vikṛaya-vyavahāra*).

to be moved to such a safe square is spoken of as *ayāna-yīna.*' *Bhāṣya*, II.373). On each side of the board there are such checkered squares in which rival gamesmen may rest without being attacked. This description holds good in the case of *chauṣar* which thus appears to be an old game.

### CH. III, SECTION 16. MUSIC

The tradition of the musical art in India is of high antiquity. In the sculptures at Bharhut and Sanchi both vocal and instrumental musicians are found frequently represented. In the *Arthśāstra* of Kauṭilya music and musicians are often mentioned. In the *Jātaka* literature music forms a chief item of social and individual entertainment. Pāṇini's *Aṣṭādhyāyī* which in point reflects an even earlier stage of culture, shows an equally full acquaintance with the various branches of the musical art. Besides referring to vocalists and instrumentalists, the *Aṣṭādhyāyī* also mentions orchestral bands including singers to the accompaniment of *vīṇā*, one of the most popular instruments in ancient Indian music.

**MUSIC, A ŚILPA**—In Pāṇini's days music was regarded as an art (*śilpa*). Not only instrumental music as cymbals, tabor, (IV.4.55-56) but also dance (III.1.145) and vocal music (III.1.146-47) are mentioned under the category of *śilpa*. In the *Jātakas* also music is a *śilpa*.

Music comprised *nṛitya* (dance), *gīta* (song), *vāditra* (instrumental music), and sometimes also *nāṭya* (stage-acting). The *Khantivādi Jātaka* mentions these four branches together as part of royal entertainment (*gīta-vādita-nachchesu ckekā nāṭakittthiyo gītādini payojayimsu*, *Jāt.* III.40). Kauṭilya also treats *gīta*, *vādya*, *nṛitta*, and *nāṭya* as parts of music (*Arth.* II.27, p. 125). The *Aṣṭādhyāyī* refers to all of them, e.g. song is referred to as *gīti* (III.3.95) and *geya* (III.4.68), a vocal singer as *gāthaka* (III.1.146) and *gāyana* (III.1.147), a songstress as *gāthikā* and *gāyanī*, a dancer as *nārtaka* (III.1.145 as explained by Patañjali), dance as *nṛitya* (I.3.89, VII.2.57), and a player on an instrument as *parivādaka* (III.2.146). Stage acting is mentioned as *nāṭya* (IV.3.129).

Pāṇini's reference to a treatise called the *Naṭasūtra* (IV.3.110) shows that the theoretical side of the dramatic art was also studied.

**ORCHESTRA**—The idea of having a concert of different instrumentalists was known to Pāṇini. The band was collectively known as *tūrya*, and individual members *tūryāṅga* (II.4.2). In concert two allied instrumentalists were grouped together, and the group was denoted by a compound in the singular number (II.4.2). For example, the set of players on *mṛdaṅga* and *paṇava* was referred to as *mārdāṅgika-pāṇavikam*. The *Kāśikā* adds to this *viṇāvādaka* (lute-player)—*parivādakam*. Pāṇini refers to *parivādaka* in *sūtra*, III.2.146 without stating its meaning. It appears that *parivādaka* was a player on a stringed instrument. Patañjali, considers *parivādaka* as a lute-player (*Bhāṣya*, VII.4.1; III.345; *avivāda-viṇām parivādakena*). Pāṇini refers to *viṇā* in several *sūtras* (III.3.65), and we learn from the *Jātakas* that *viṇā* formed part of an orchestral band (*viṇādīni tūriyāni*, *Jāt.* III.40).

**SAMMADA**—Pāṇini explains *sammada* and *pramada* as festivity (*barsba*, III.3.68). It was a kind of opera as illustrated in a sculpture at Bharhut, inscribed as '*Sāḍakam sammadam turam devānam*,' an opera (*saṭṭaka*) comprising both instrumental and vocal music performed in the palace of gods (*Barua Barhut*, Book I, plate 2; also Book III, Fig. 34). The scene shows several groups, namely, singers, four female dancers, and an orchestral band (*tūrya*) comprising of female lyre-players, a hand-clapper, a cymbalist and a taborer. According to the *Nidāna-kathā* a *tūrya* party consisted of players on five musical instruments (*pañchaṅgika tūrya*, *Jāt.* I.32), probably by adding a flute-player to the four represented in the Bharhut scene. *Sammada*, therefore, appears to have been a festive celebration in which dance and music played an essential part.

**INSTRUMENTS**—Amongst stringed instruments the lyre

(*vīṇā*) is mentioned. The term *upavīṇayati*, 'sings with the lyre,' points to the popular practice of combining vocal and instrumental music. Singing without lyre was denoted by the expression *apavīṇam* (VI.2.187). The musical notes produced from a lyre were known as *nikvaṇa* or *nikvāṇa* (III.3.65, *Kvaṇo vīṇāyām cha*).

Of the percussion and ringing instruments mention is made of *maḍḍuka*, a small tabor (IV.4.56) and *jharjbara* (IV.4.56), the players being known as *māḍḍukika* and *jhārjbarika*, taborers and cymbalists, respectively. Keeping time by the clapping of palm is referred to in the expressions *pāṇigba* and *tālagba* (III.2.55; cf. *pāṇissara* or clapper in the *Vidhurapaṇḍita Jāt.* VI.267).

The *dārdurika* seems to have been a player on a drum made of an earthen jar (IV.4.34). In the *Jātakas* we find *kumbha-thūnika* mentioned in a list of musical players which the commentary explains as *ghāṭadaddara-vādaka* (*Jāt.* VI.276). The *Kāśikā* explains *dārdurika* as a potter, signifying one who was the maker of those particular pots used as *vādya-bhāṇḍa*.

### CH. III, SECTION 17. DIVISIONS OF TIME

**AKĀLAKA VYĀKARANA**—Pāṇini's system of grammar became known to the ancients as a grammar without 'time' (*akālaka*). The *Kāśikā* repeats thrice the statement that Pāṇini was the promulgator of a grammatical treatise from which he excluded the discussion of the precise denotation of the various time-divisions (*Kāśikā*, II.4.21; IV.3.115; VI.2.14; also *Chāndravṛtti*, II.2.68, *Pāṇiny-upajñam akālakam vyākaraṇam*). 'How much is the duration of the day, when does present (*vartamāna*) end and future (*bhaviṣya*) begin, what is *adyatana*, and how much interval of time makes *parokṣa*, etc.?—these are questions considered by Pāṇini as not coming within the province of grammar, but to be decided with reference to current usage (I.2.57, *Kālopasarjane cha tulyam*). *Patañjali* tells us that other teachers had entered into hair-splitting discussions about these matters (*Bhāṣya*, III.2.123; II.123).

Pāṇini, however, deals with the general divisions of time (*kāla-vibhāgas*, III.3.136), e.g., night and day (*aborātra*, III.3.137), fortnight (*pakṣa*, V.2.25), month (*māsa*, V.1.81), half-year (*śaṇmāsa*, V.1.83), year (*varsā*, V.1.88), and the solstitial division (*ayana*, VII.4.25).

The more frequent word for time was *kāla*, although *samaya* and *velā* are also used (III.3.167). According to an unnamed author of a *vārttika* on Pāṇini, VII.3.15, the word *parimāṇa* in the *Ashtādhyāyī* applies to measures other than those of time (*Bhāṣya*, III.321). Pāṇini, however, treats Time as a measure of life (*kālāḥ parimāṇinā*, II.2.5); for example, a person after birth comes under the measure of time as *dvyaba-*, *tryaba-*, *māsa-*, *saṁvatsara-jātaḥ*. On the above *sūtra* Patañjali notes an important fact that time is an entity

by which growth and decay of visible objects are indicated and that the movement of the sun (*āditya-gati*, I.409) is responsible for portioning out time into days and nights, months and the year by constant repetition (*asakṣid-āvṛitti*). The sun is referred to as *abaskara*, maker of the day (III.2.21), and the heavenly bodies as *jyotis* (VI.3.85; *vār.* on I.3.40; *Pat.* I.231). Persons born under the same constellation were called *sajyoti*.

Pāṇini's reference to *vidhun-tuda* (III.2.35) points to the belief in the legend of Rāhu causing a lunar eclipse, also referred to in Vedic literature (*Vedic Index*, I.254; also *Tāṇḍya Br.* Caland, VI.6.8).

The following time-divisions are referred to in the *Ashṭādhyāyī*:

**AHORĀTRA** (III.3.137, VI.2.33)—Night and day constitute the fundamental unit of time-reckoning. The terms *nak-tāmidivam* and *rātrīmidivam* (*sūtra*, V.4.77) are according to Fleet rather peculiar since in India the day has always been measured from sunrise and he suggested that the forms may be due to euphonic considerations. Dr. Keith, however, thinks that they were genuine old expressions preserved in Pāṇini from a very remote past when the day was reckoned with sunset (*J.R.A.S.*, 1916, p. 143-6).<sup>1</sup> It is admitted that in the *Sūtra* period the day was reckoned with sunrise.

The day was further divided into *pūrvābhya* and *aparābhya*, forenoon and afternoon (IV.3.24), and the night into *pūrvarātra* and *apararātra* (V.4.87). The union of night and day in the morning and evening is referred to as *saṁdhi-velā* (IV.3.16).

The division of the day into *mubūrtas* was also known, the expiry of a *mubūrta* period being quoted as a factor to determine tenses (III.3.9; III.3.164). Patañjali on *sūtra*, II.1.28

<sup>1</sup> Cf. also Fleet's reply (*J.R.A.S.*, 1961, p. 356); Keith's rejoinder (p. 555) and Fleet's final reply (p. 561), in which Fleet's view seems well-grounded.

refers to a variable period of six *mubūrtas* (*śaṇ-mubūrtās charācharāḥ*, I.384). This may be understood in the light of Kauṭilya who states that the day consisted of 30 *mubūrtas* and that the equinoctial day and night of 15 *mubūrtas* each fell in the month of Chaitra and Āśvayuj; the solstitial points, however, caused night and day to increase and diminish by three *mubūrtas* each (*Artha*. II.20, p. 108). These six *mubūrtas* representing the maximum increase of day in summer and of night in winter must have been called *charāchara*.

**MONTH**—The month consisted of the usual two *pakṣas* of which the *Amāvāsyā* and the *Paurṇamāsī* formed the closing days. Pāṇini refers to the opening day of a *pakṣa* as *pakṣaṭi* (V.2.25) which the *Kāśikā* takes as a synonym of the *Pratipad* day.

**Sāvana Month.** The reckoning of a *Sāvana* month consisting of 30 days is deducible from the phrase *śaṣṭi-rātra* (V.I.90), literally 60 nights equivalent to two months. Kauṭilya also refers to a period of thirty days and nights together making one working month, (*prakarma-māsa*, *Artha*. II.20 p. 108). In this arrangement the last day of the half and the full month need not coincide with *Amāvāsyā* and *Paurṇamāsī* which were the characteristic days or *parvans* of a lunar month. Pāṇini derives two special words *ardha-māsa-tama* and *māsa-tama* to signify the last day of the half-month, and the last day of the full month respectively (V.2.57). It appears that the need for these two terms arose as they were not synonymous with *Amāvāsyā* and *Paurṇamāsī*. The words *ardha-māsa-tama* and *māsa-tama* may be taken to refer to the fifteenth day and the thirtieth day of the *prakarma-māsa* or the civil month used especially in the case of government or public offices. Patañjali clearly acquaints us with the existence of a *bhṛitaka-māsa*, month by which the wages of labourers were reckoned. Both Kātyāyana and Patañjali interpret *sūtra*, IV.2.21 (*Sāsmin Paurṇamāsīṭi*) in a way so as to distinguish the lunar month ending with *Paurṇamāsī* from some

different reckoning (*Bhāṣya*, II.275). The *prakarma* month of Kauṭilya seems to be the same as the *bhyitaka* month of Patañjali.

The *Sāvana* month of thirty days is again referred to by Patañjali as *triṃśadrātra*, consisting of two equal halves of fifteen days each, the first one of which was called *avara pañchadaśa-rātra* or *avara ardhamaśa*, and the second by implication as *para-* (*Bhāṣya*, III.3.136, II.162). It is interesting to note that Patañjali uses the term *rātri* for 'day' while referring to the *Sāvana* month of 30 days and its half of 15 days. This practice goes back to Pāṇini, who uses the word *rātri* (= *ahorātra*) in the phrase *śaṣṭi-rātra*, a period of 60 days, being twice of the *Sāvana* month called *triṃśad-rātra* by Patañjali.

**Lunar Month.** The prevalence of a lunar calendar with a month (*chāndramāsa*) of 29½ days depending on the two *parvans*, *Amāvāsyā* and *Paurṇamāsī* was definitely known. It appears that in the *Aṣṭādhyāyī* the *pūrṇimānta* basis of reckoning the lunar month was accepted. This is suggested by the fact that the name of the month was derived from that of the *Paurṇamāsī* falling in it, of which Pāṇini refers to *Āgrahāyaṇī* (IV.2.22), *Phālgunī*, *Śravaṇā*, *Kārttikī* and *Chaitrī* (IV.2.23). In one example the settlement of a debt claim is said to fall due on the *Paurṇamāsī* day (i.e. *Āgrahāyaṇī*, IV.3.50), this too pointing to *pūrṇimānta* reckoning. Moreover, the use of special terms *uṣa-paurṇamāsī* and *uṣa-paurṇamāsam* (V.4.110) meaning 'about the date of the month called *Paurṇamāsī*,' is more likely to have become current on the basis of a *pūrṇimānta* month, while no such idiom is available for *amāvāsyā*. Both Kātyāyana and Patañjali clearly accept *Paurṇamāsī* as the closing day of a month<sup>1</sup> (IV.2.35; II.277).

<sup>1</sup> (Var.) *Pūrṇamāsādaya* (Bh.) *Pūrṇamāso vartate* *smiṇ kālḥ Paurṇamāsī tittihī* (II.277).

*Names of Months.* Some Vedic names of months as *Nabhasya*, *Sabasya*, *Tapasya* are implied in *sūtra*, IV.4.128. But the prevailing month-names were those derived from the names of *nakshatras*. Dr. A. B. Keith observes that the method of naming the months from the *nakshatra* names began in the *Brāhmaṇas*, while it is found regularly in the Epics and later (*Vedic Index*, II.162). He also points out that the name of the *nakshatra* in the *Brāhmaṇas* is more often turned into a derivative adjective and used with *Pūrṇamāsī* or *Amāvāsyā*, as in *Phālgunī Paurṇamāsī*, but it is more usual in the *sūtras* to use the *nakshatra* adjective alone to denote the full-moon night (*Vedic Index*, I.420). The *Ashṭādhyāyī* refers to the latter practice e.g. *Āgrahāyaṇī*, *Phālgunī*, *Śravaṇā*, *Kārttikī*, *Chaitrī*, etc. (IV.2.22-23) as names of *Paurṇamāsīs* in which the full moon is in conjunction with the lunar mansions called *Phālgunī*, *Śravaṇa*, *Kṛittikā*, *Chitrā*, etc. The months in which these *Paurṇamāsīs* occur are called after them (*Sāsmin Paurṇamāsīti saṁjñāyām*, IV.2.21).

**NAKSHATRAS**—Pāṇini analyses *nakshatra* into *na-kshatra* (VI.3.75), a derivation found also in the *Śatapatha Brāhmaṇa* (II.1.2.18, *nakshatra* 'no light', explained with a legend). The *Nirukta*, although it cites this *Brāhmaṇa* derivation, prefers to derive *nakshatra* from *naksha* 'to come near' (*nakshater—gatikarmaṇaḥ*, *Nir*, III.20; Cf. *Vedic Index*, I.409). Pāṇini strangely enough followed the *Śatapatha* tradition. The following *Nakshatras* are mentioned in the *Ashṭādhyāyī*:

1. *Kṛittikā*. Referred to in the form *Kārttikī*, the full-moon day of *Kṛittikā* (IV.2.23). Pāṇini gives another name of *Kṛittikā* as *Babula* (IV.3.34) which word came to signify the asterism of Pleiades on account of the knowledge that this constellation consisted of numerous stars. The *Śatapatha Brāhmaṇa* significantly remarks: *bhūyishṭhā yat Kṛittikāḥ* (II.1.2.3). *Babula* and *Bhūyishṭha* are interchangeable terms

according to Pāṇini, VI.4.158 (*Baḥor-loṇo bbū cha baḥoḥ*).<sup>1</sup>

3. *Mṛigaśīrśa*. Not referred to by the name of the *nakṣatra*, but the full-moon night called *Āgrabāyaṇi* is mentioned thrice (IV.2.22; IV.3.50; V.4.110). The month was named *Āgrabāyaṇika* (*Āgrabāyaṇiko māsaḥ*). Pāṇini refers to agreements for repayment of loans on the *Āgrabāyaṇi* day (IV.3.50). The time near about *Āgrabāyaṇi* was called *upāgrabāyaṇam* and *upāgrabāyaṇi* (V.4.110).

4. *Ādrā* (IV.3.28). A person born under *Ādrā* was named *Ādraka*.

5. *Punarvasu*. Pāṇini knows that there were two stars in this constellation; the two stars of Punarvasu and one of Tishya make three, but they are expressed by the dual number, as Tishya-Punarvasū (I.2.63). But in *sūtra*, IV.3.64 he mentions Punarvasu in the singular, the form found both in the *Maitrāyaṇi* and *Kāṭhaka Saṁhitās* (*Vedic Index*, I.413). According to rule I.2.61 the singular form was optionally used in the Vedas.

6. *Tishya*. Besides the form *Tishya* (I.2.63; IV.3.34; VI.4.149), Pāṇini mentions its two other names, *Pushya* and *Siddhya* (*Pushya-Siddhyau nakṣatre*, III.1.116). The person born under this asterism was also called *Tishya* (IV.3.34), a common name in the *Jātakas* under the form *Tissa*, and also *Phussa* from *Pushya*.<sup>2</sup> In the *Arthaśāstra*, *Tishya* had been replaced by the form *Pushya*, which Patañjali also prefers (I.462; II.35). *Pushya* in preference to *Tishya* seems to be a feature of the post-Pāṇinean period.

9-10. *Phalgunī*, a double constellation called *Phalgunyanu*;

<sup>1</sup> The number of stars in the Kṛittikā is counted seven in the *Taitt. Br.* III.1.41, viz. *Ambā, Dulā, Nitatūi, Abhrayantī, Meghayantī, Varsabayantī, Chupunīkū*. In classical literature this number is six, from which comes the epithet *Shānmāturaḥ* as the name of Kārttikeya. Pāṇini's *sūtra māturuṭ-saṁkhyā*. . . (IV.1.115) is illustrated by *Dvai-mātura* and *Shāṇ-mātura*.

<sup>2</sup> Fausböll, *Jātaka Index*, p. 64, *Tissa amachebo, Tissa-kumāra, Tissa Buddha, Tissa theera*, and *Tissa aggasavika*; also p. 89 for *Phussa*.

and also in the plural as *Phalgunyah* (I.2.60).

11. *Hasta*, IV.3.34.

12. *Chitrā*, IV.2.23, its full-moon day being called *Chaitrī*.

13. *Svāti*, IV.3.34.

14. *Viśākhā*, double stars, named optionally as *Viśākhe* and *Viśākhā*, I.2.62. The *Tait. Saṃhitā* prefers the former and the *Kāṭhaka* the latter form. Pāṇini himself prefers the singular form *Viśākhā* (IV.3.34).

15. *Anurādhā*, IV.3.34.

17. *Mūla*, IV.3.28.

18-19. *Asbhādhā*, IV.3.34.

20. *Abhijit*, IV.3.36.

21. *Śravaṇa*, IV.2.23. The *Kāṭhaka Saṃhitā* names it as *Aśvattha* (*Vedic Index*, I.413), a term also known to Pāṇini (IV.2.5; IV.3.48). The *Kāśikā* takes *Aśvattha* as the season when the berries of the *Pīpal* (*Ficus religiosa*) ripen.

22. *Śraviṣṭhā*, IV.3.34.

23. *Śatabhishaj*, IV.3.36.

24-25. *Proshṭhapadā*, a double asterism called *Proshṭhapade* and *Proshṭhapadāḥ* (I.2.60), and also in the masculine gender as *Proshṭhapada* (V.4.120), a form used in the *Tait. Saṃhitā*, and also by Pāṇini when speaking of the deity of this asterism (IV.2.35) to whom religious homage (*bhakti*) was paid by its devotees.

26. *Revatī*, IV.1.146.

27. *Āśvayujī*, IV.3.36. The *Āśvayujī* full-moon day was considered auspicious for sowing crops (IV.3.45).

**ORDER OF NAKSHATRAS**—The Vedic list of *nakshatras* begins with *Kṛittikā*. According to Hopkins: 'As late as Yājñavalkya's law-book, I.267, the Pleiades hold this position as opposed to the still later scheme (since c. 490 A.D.) beginning with *Āśvinī* to indicate the vernal equinox' (*J.A.O.S.*, XXIV, p. 34). Patañjali's illustration *Kṛittikā-Robinyah* to

show the order of precedence in the asterisms as required by a *vārttika* on II.2.34 points to the fact that up to his time the *Kṛittikās* headed the list.

The question has to be considered in relation to Pāṇini from a different stand-point. In mentioning a list of about ten stars Pāṇini opens the list with *Śravishṭhā*:

*Śravishṭhā* — *Phalguny* — *Anurādhā* — *Svāti* — *Tisbya*  
— *Punarvasu* — *Hasta* — *Viśākh* — *Āshādhā* — *Babulā-*  
*luk* (IV.3.34).

What does the beginning with *Śravishṭhā* indicate? Now the list of the *Vedāṅga Jyotiṣa* also commences with *Śravishṭhā*, and Garga says that the *Kṛittikās* are the first asterism for the ritual, while *Śrāvishṭhā* is the first for ordinary reckoning: *Karmasu Kṛittikāḥ prathamam (nakshatram)*, *Śravishṭhā tu samikhyāyāḥ* (cited by Tilak, *The Orion*, p. 30). Hopkins who discussed this question with reference to the *Mahābhārata* evidence found that the *Mahābhārata* refers to two beginnings, viz. (1) with *Dhanishṭhā* (another name of *Śravishṭhā*) as in the *Vanaparva* (230. 10), and (2) with *Śravaṇa* as in the *Aśvamedha-parva* (44.2, *Śravaṇādīni rikṣbāṇi*) (J. A. O. S. XXIV, p. 15, 34). Fleet discussing independently another *Mahābhārata* passage, *pratiśravaṇa-pūrvāṇi nakshatrāṇi chakāra yaḥ* (*Ādiparva*, 71.34) showed that the 'two passages of the *Mahābhārata*, giving a *Śravaṇādi* list of the *nakshatras* are noteworthy as coming from a time when it was recognised that the winter solstice had travelled westwards from the first point of *Śravishṭhā* (*Dhanishṭhā*), where it was placed by the astronomy which was preserved in the *Jyotiṣa Vedāṅga*, and was in the preceding *Nakshatra Śravaṇa* (J.R.A.S., 1916, p. 570). Pāṇini's mention of *Śravishṭhā* at the head of his list is evidently in conformity with the *Vedāṅga* astronomy and points to a time anterior to the revision of the *Nakshatra* list, or, as Dr. Keith would have it (J.R.A.S., 1917, p. 139), its reform by substituting *Śravaṇa* for *Śravishṭhā*. The point is

of some importance for the relative chronology of Pāṇini, as explained in the last chapter.

Pāṇini also subscribes to the Vedāṅga conception of the *nakshatras* as a scale divided into twenty-seven equal parts. Under this division of the ecliptic, the twelve months were named after the moon's entry into the mansion of a particular star (*Nakshatreṇa yuktaḥ kālaḥ*, IV.2.3.). When the full-moon was in conjunction with the asterism of *Chitrā*, that day was known as *Chaitrī Paurṇamāsī* (IV.2.3), and the lunar month which included the *Chaitrī Paurṇamāsī* was named *Chaitra* (VI.2.21). The name of the star even without a suffix was used as synonymous with the time, for example, the expression *adya Pushyaḥ* indicated the day named after the star, as we name our days at present after the *titbis* like *Pratipad*, *Dvitiyā*, etc. (IV.2.4).

Pāṇini also regulates the naming of the day or night after two stars being in conjunction with the moon as *Rādhāmūrādhīya* and *Tishyapunarvasaviya* day (IV.2.6).

Pāṇini uses the word *lagna* in the sense of *sakta* (VII.2.18) and not in the technical sense of *rāśinām udaya*. According to Dr. Kaye the system of the zodiac scale of twelve divisions replaced the *nakshatra* division of the ecliptic at a fairly late date, probably about 450 A.D. (Kaye, *The Nakshatras and Precession*, *Ind. Ant.* Vol. 50, p. 45).

**SOLISTICE**—The *sūtra* VIII.4.25 (*Ayanam cha*) refers to *antarayana* or the time within the solstice, i.e. the period spent by the sun in proximity to the solstitial points. The alternative form *antarayana* denoted the countries situated within the tropics.

**SEASONS AND YEAR**—The year is referred to under various names as *varsha* (V.1.88), *samā* (V.1.85; V.2.12), *samvatsara* (V.1.87) and *bāyana* (III.1.148; V.1.130), the last word denoting both time and a kind of harvested paddy. The month-name *Agrabāyana* points to its being the first month of the year. Pāṇini also refers to the various terms

making up the five-year cycle, e.g. *Idvatsara*, *Samivatsara*, *Parivatsara* (V.1.91-92). The *Arthaśāstra* mentions the cycle of five years as constituting one *yuga*.

The year was divided into two halves, each semester being known as *shaṇ-māsa* (V.1.83). The first half-year was called *avarasamā*, and the loan to be repaid during that period was *āvarasamaka* (IV.3.49).

Pāṇini names all the six seasons, e.g. *vasanta* (IV.3.46), *grīshma* (IV.3.49), *varshā* (IV.3.18; also called *prāvṛṣh* (IV.3.17; 26), *śarad* (IV.3.12; 27), *bemanta* (IV.3.21-22) and *śiśira* (II.4.28). Each season (*ritu*) comprised two months, as shown by the mention of the two parts of a season, like *pūrvavārshika* and *aparavārshika*, the first and latter part of rains (*Avayayād-ṛitoḥ*, VII.3.11; see also *Bhāshya*, I.1.72.18; I. 186 mentioning *pūrva-* and *apara-śārada*, and also *-naidāgha*). Patañjali tells us that *śiśira* preceded *vasanta* and that the winter solstice began with *śiśira* (*śiśira-vasantāv=udagayanasthan*, *Bhāshya*, II.2.34; I.436). In the *Arthaśāstra* also *uttarāyana* begins with *śiśira*, consisting of the two months *Māgha* and *Phālguna* (*Artha*. II.20 p. 109). **VYUSHṬĀ, NEW YEAR'S DAY**—Pāṇini refers to *Vyushṭa*, the new year's day, and to *vaiyushṭa*, the transanctions or payments made on that day (*Tatra cha diyate kāryam bhavavat*, V.1.96; *Vyushṭādibhyo'n*, V.1.97). In the *Varāha Śrauta Sūtra* *pradosha* is the first *yāma* (3 hours) of the night, and *vyushṭa* the fourth (*Akulapāda Khaṇḍa* III); but in the *Arthaśāstra* (II.6-7, pp. 60 and 64) as Dr. Shamasastri has shown, *vyushṭa* denoted the New Year's day, i.e. the first day of the financial year commencing after the full-moon day of *Āshāḍha* (*Artha*. Trans. pp. 59, 64; Preface, xxiv; also the paper 'Vyushṭi or the Vedic New Year's Day' in the *Proceedings of the Second Oriental Conference*). Pāṇini seems to use *vyushṭa* in this special sense. Kauṭilya throws light on the nature of payments and business on this day. At the close of the financial year (*rāja-varsha*) on the *Āshāḍhī*, the Heads of the Accounts Department reported

themselves at Headquarters with their registers in sealed boxes (*samudra pusta-bhāṇḍa*) and the cash balances (*nīvī*). There they declared the totals (*agrāṇi*) of the receipts (*āya*), expenditure (*vyaya*) and cash (*nīvī*) and then deposited the net revenue in hand. This illustrates the *vaiyushṭa* payments of Pāṇini (*tatra cha dīyate*).

Next ensued the intricate checking and verification of accounts which corresponds to the business called *vaiyushṭa* by Pāṇini (*tatra cha kāryam*). In the *Arthaśāstra*, *Vyushṭa* (i.e. cash balance on the opening day) formed the bed-rock of this checking, heading each of the three lists of audit-points (II.7.) In the Asokan Edicts, the yearly diary began on the *Vyushṭa* day.<sup>1</sup>

Pāṇini refers to the last day of the year as *samvatsaratama* (V.2.57), probably the day for the clearance of the *samvatsarika* loans (IV.3.50, *samvatsare deyam ṛṇam*).

Pāṇini refers to another allied term, viz. *mahāparābhṇa*, 'the great afternoon' (VI.2.38). As the other words in the *sūtra* VI.2.38 like *mahā-vrīhi* and *Mahā-bhārata* are technical terms, *mahāparābhṇa* also appears to be of the same category. We may connect this word with the afternoon of the last day of the year, or better of *Vyushṭa* itself. The *Sūryaprajñapti* states that the new year began with *the longest day* in the month of *Śrāvaṇa* (*Proc. Second Oriental Conference*, p.38). This day was truly a *Mahāparābhṇa* as its day-book (*aborūpa*) would be long kept open for entries after verification. The *Mahābhārata* knows this term; Arjuna returning from the *svayamvara* 'entered the house on the *mahāparābhṇa* (day), surrounded by Brāhmaṇas like the sun in the midst of the clouds' (*mabatyatbāparābhṇe tu ghanaiḥ sūrya iv=āvṛitāḥ*, *Ādiparva*, Critical Poona edition, 181.40). The metaphor would be appropriate only in the rainy season. The Brāhmaṇas

<sup>1</sup> Cf Asoka's Minor Rock Edict, Brahmagiri, for counting the days of the year from the *Vyushṭa* day: "This proclamation was issued by me on tour when 256 days had elapsed after *Vyushṭa*."

wearing black antelope skins (*rauravājina-vāsibbiḥ*, Ādi. 181. 35) overshadowed Arjuna as masses of dark clouds cover the sun. This connects *Mahāparābha* with the rainy season, and confirms its identification with *Vyushṭa*, i.e. the New Year's day in Śrāvaṇa, considered from the accounts point of view to be the "Longest Afternoon" of the whole year.

### CH. III, SECTION 18. CURRENT PERSONAL NAMES

Personal names always contain valuable linguistic and chronological data. Proper names of different periods are marked by special features characteristic of that age. For example, the usual method of referring to a person in the *Rigveda* is to give his own name along with another epithet connected with his father's name. In the later Vedic literature it was the *gotra* name. Sometimes the personal name was coupled with the name of the country or locality, e.g. Bhīma Vaidarbha (*Ait. Br.*, vii.34). In the *Vaiśā* lists of the late Brāhmaṇa period we find the frequent use of metronymics. (P. V. Kane, Naming a Child or Person, *I. H. Q.*, June 1938, pp. 227-228). On the other hand there is no evidence in Vedic literature of individual names being derived from the names of Vedic gods or stars. Such naming came into vogue in much later times with a change in religious beliefs.

**CLASSES OF NAMES KNOWN TO PĀNINI**—These were of four principal classes: (1) *Gotra* names mentioned in Chap. IV, *pāda* 1 of the *Aṣṭādhyāyī*, e.g. Gārgya. (2) Patronymics, e.g. Upagu's son called Aupagava (*Tasyāpatyam*, IV.1.92). (3) Names derived from localities, where they or their ancestors lived (*nivāsa* and *abbijana*). They throw light on the geography of the country. (4) Personal names proper (*manuṣhya-nāma*, V.3.78-84) which are mainly dealt with in this chapter (also referred to as *saṁjñās*, V.3.75; VI.2.106; VI.2.159; VI.2.165).

**THEIR SPECIAL FEATURES**—Personal names in the time of Pāṇini show three special features, viz. (1) names as compounds of two units; (2) names formed by contraction, as *Devaka* for *Devadatta*; and (3) names derived from stars (*nakṣatra-nāma*), as *Svātīdatta*.

Names which are compound words normally consist of a *pūrvapada* and an *uttarapada* (V.3.82), and the compound is either *Babuvrihi* or *Tatpuruṣa*. Almost all names in this section (V.3.79-83; VI.2.106-115) are polysyllabic (*babvaḥ*), i.e. consisting of more than two syllables (*ūrdhvaṁ dvitīyā-dacchah*, V.3.83), the actual number of syllables being usually four or five. According to the *Gṛīhya Sūtras* a name should have a *Kṛit* ending, and not a *Taddhita*. Pāṇini mentions two examples of this, viz. *datta* and *śrūta* (VI.2.148). To these Patañjali adds *rakṣita* (I.189) and *gupta* (I.37, e.g. *Amragupta*, *Śālagupta*). The above two features of names are ascribed to the Yājñikas by Patañjali (I.4), who must have based themselves on the tradition of the *Gṛīhya Sūtras*.<sup>1</sup> Besides *kṛit-ending*, Pāṇini mentions *Mitra*, *Ajina* (VI.2.165; V.3.82) and *Sena* (IV.1.152; VIII.3.99) as the second part of personal names.

**CONTRACTION**—Contraction of names is unknown to Vedic literature, since the *Gotra* names were not susceptible to abbreviation. Only in the compound names do we find the elision of the *uttarapada* (V.3.82), or the retention only of its first two syllables (V.3.83). The contraction of a personal name is dictated by affection or endearment (*anukampāyām*, V.3.76); e.g., *Vyāghrājina* was simplified to *Vyāghraka* (V.3.82); and *Devadatta* to *Devika*, *Deviya*, and *Devila* (V.3.79). It might also be expanded into *Devadattaka* (V.3.78). In the opinion of the eastern grammarians, *Upendradatta* was shortened to *Upaḍa* and *Upaka* (V.3.80), and to *Upiya* and *Upila*, the last being the form which must have been transformed into *Upāli*, a name so well-known in Buddhist literature.

#### NAMES DERIVED FROM STARS (NAKSHATRA-

<sup>1</sup> For rules about names in the *Gṛīhyasūtras*, see *Hiranyakeśi*, ed. Kṛiste, II.4.10; *Āivalāyana*, I.13.5-6; *Kāthaka*, III.10.2; *Pāraskara*, I.17.2; *Āpastamba*, VI.15.9; *Mānava*, I.18.1. (I.H.Q., June, 1938, pp. 224-244, P. V. Kane); and also *Gobhila*, II.7.15-16; *Śāṅkhāyana*, I.24; *Khādīra*, II.2.31-32; *Bhāradvāja*, I.26; *Drahyāyana*, II.4.2.

NĀMA)—Pāṇini knows the custom of naming persons after the asterism of their birth (IV.3.34;37; VIII.3.100); e.g., Tishya (a boy born under Tishya); Punarvasu (a boy born under Punarvasu, IV.3.34.<sup>1</sup> Such *Nakshatra* names are practically unknown in the entire Vedic literature (except perhaps Chitra and Ashāḍha, which also may be differently interpreted.<sup>2</sup> This class of names is post-Vedic and constitutes a chronological landmark in social history separating the age of the *Sūtras* from that of the *Brāhmaṇas*.

The *Gṛīhyasūtras* show the earliest use of such names. According to Āpastamba, the *nakshatra* name is the sacred name of a person. The *Khādīra*, *Vārāha*, *Hiraṇyakeśi* and *Gobhila Gṛīhyasūtras* contain injunctions for giving names based on stars (*nakshatrāśraya nāma*). These fall in line with Pāṇinian tradition. The use of such names is also found in Pāli literature. The epigraphic records of the Maurya and Śuṅga-Sātavāhana periods also testify to the use of such names for about four centuries.

A detailed analysis of the proper names in use in Pāṇini's time is given below. They fall under three groups, I. Miscellaneous names, II. Star names, and III. Abbreviated names. I. *Miscellaneous Names*: (1) Names with *viśva* as the prefix (*Bahuvrībau viśvaṁ sahjñāyām*, VI.2.106). The pre-Pāṇinian examples are Visvāmūtra, Viśvamanas (*Jaiminiya Brāhmaṇa*), Viśvasāman; and Vissakamma (I.314), Vissasena king of Bārāṇasī (II.345), Vessabhū Buddha, Vessāmitta, a former king (*porāṇakarājā*) (VI.251), and Vessantara in the *Jātakas*.

(2) Names ending in *udara*, *aśva* and *iśhu* (*Udarāśveshu-*

<sup>1</sup> *Tishyaścha mānavakah Punarvasū cha mānavakan Tishya-Punarvasavah*. Patañjali takes these examples implied in *sūtra*, I.2.65 (*Bhāṣya*, I.231).

<sup>2</sup> As Chitra Gāṅgāyana (*Śākhā. Ār.* III.1); Ashāḍha Śāyavasa (*Jaiminiya Br.*) who was a *grāmaṇi* of the Śārkarākshyas; Āshāḍhi Sauśromateya (*Śatapatha Br.*, VI.2.1.37), son of Ashāḍha and Suśromatā.

*shu*, VI.2.107). The names cited in the *Kāśikā*, viz. Vṛikodara, Haryaśva, Maheshu seem to be pre-Pāṇinian. Allied classical instances are absent except Bahusodarī *Devadhitā* found in a *Jātaka* (VI.83).

(3) Names ending in *karṇa* (VI.2.112), as Mayūrakarṇa (*Śivādi-gaṇa*, IV.1.112), and a few others in the *Gaṇa-pāṭha*.

(4) Names ending in *kaṇṭha*, *prishṭha*, *grīvā* and *jaṅghā* (V.2.114). Such names are rare in Vedic literature, except Śitiprishṭha and Śitikaṇṭha. Pāṇini mentions Kalaśikaṇṭha, Dāmakaṇṭha, and Khārījaṅgha in the *Upakādi* group (II.4.69). Tālajaṅgha cited in the *Kāśikā* was an earlier name. Maṇikaṇṭha occurs in the *Jātakas* (II.282).

(5) Names ending in *śṛiṅga* (VI.2.115). Rishyaśṛiṅga is the only example in the Buddhist or classical period.

(6) Names with the instrumental form *manasā* as prefix (VI.3.4). The *Kāśikā* cites Manasādatta and Manasāgupta, but there is no instance of their actual use in literature.

(7) Names ending in *mitra* (VI.2.165). These were only few in Vedic literature, but are very popular in the post-Pāṇinian period, e.g. Sarvamitta (*Jāt.* V.13), Jitamitta (*Jāt.* I.37), Chandamitta (*Jāt.* I.41), etc. The later epigraphical records<sup>1</sup> show abundant use of *mitra*-ending names.

(8) Names ending in *ajina* (VI.2.165). *Kāśikā* cites Vṛikājina, Kulājina and Kṛishṇājina. In the *Jātakas* the only examples are Migājina (VI.58) and Kaṇhājina (daughter of Vessantara, VI.487). Pāṇini himself refers to Kṛishṇājina in the *Upakādi* (II.4.69) and *Tika-Kitavādi* (II.4.68) groups.

<sup>1</sup> The Sanchi inscriptions have Balamitra, Saṅghamitra (=Saghamita), Ahimitra, Satyamitra (=Sachamita) among males, and Nāgamitrā, Uttaramitrā, Vasumitrā, Rishimitrā (=Isimitā), Jitamitā, and simply Mitrā, among females (Bühler's *List of Proper Names from Sanchi Ins., Ep. Ind.*, Vol. II, pp. 403-407); Bhārhuṭ adds Saṅghamitra and Gargamitra (Lüders *List*, Nos. 759, 832); the Pañchāla coins give, Brihaspatimitra, Agnimitra, Bhānumitra, Bhūmimitra, Dhruvamitra, Phālgunimitra, Sūryamitra, Vishṇumitra (Allan, *Indian Coins*, p. cxvii); also Prajāpatimitra (*JNSI.*, III.1.1).

The paucity of *ajinānta* names in literature may be due to the elision of *ajina* as noted by Pāṇini: *Ajināntasy-ottarapada-lopaścha*, V.3.82. For example, *Vyagbrājina* was contracted to *Vyāghraka*.

(9) Names of species (*jāti-nāma*) adopted as personal names (*manushya-nāma*, V.3.81), e.g. *Vyāghaka*, *Simhaka*. Besides the suffix *ka*, the other forms were *Vyāghrila*, *Simhila* (Bühler's *Sanchi List*). This custom of deriving names from animals was unknown in the Vedic period. Pāṇini makes reference to the contemporary ideals of personal bravery in instituting comparisons with the strength of a tiger or a lion (*Upamitaṁ vyāghrādibhiḥ sāmānyāprayoge*, II.1.56).

(10) Names ending in *senā* (VIII.3.99). Pāṇini refers to *senānta* names in *sūtra*, IV.1.152 (*Senānta-lakṣhaṇa-kāribhyaścha*). Famous examples of such names in the lists of Vedic teachers are *Yājñasena* (*Taitt. S.* V.38.1; *Kāthaka. S.* XXI.4) or *Yājñasena*<sup>1</sup> and *Ṛṣiṭṣheṇa* (*Nirukta*, II.11); Patañjali adds *Jātasena* as the name of a *Ṛishi*. As ancient examples of such names among *Kshattriyas*, Patañjali points out *Ugrasena* *Andhaka*, *Vishvaksena* *Vṛishṇi* and *Bhīmasena* *Kuru*. They become common in the post-Pāṇinian times, e.g. *Vārishēṇa* and *Harishēṇa* in Patañjali (*loc. cit.*); *Sorthisena* (*Jāt.* V.88, *Skt. Svastisena*), *Sūrasena* (*Jāt.* VI.280), *Ugrasena* (*Uggasena* king of *Banaras*, IV.458), *Upasena* (*Jāt.* II.449), *Atthisena* (*Jāt.* III.352), *Nandisena* (minister of *Assakarāja*, *Jāt.* III.3), *Jayasena* (*Jāt. Nidāna*, p. 41), *Chandasena* (*Jāt.* VI.157) and *Bhaddasena* (*Jāt.* VI.134) in the *Jātakas*. Also *Dhamasena*, *Varasena* at *Sanchi*; *Nāgasena* (*Lüder's List*, 719), *Mahendasena* (*Lüder's List*, 850) at *Bharhut*; and *Asāḍasena* from *Pabhosā*.

As shown by Pāṇini (VIII.3.100) some personal names were formed by prefixing names of stars to the ending *senā*, e.g. *Rohiṇisena*, *Bharaṇisena*, etc., and *Śatabhishaksena*, a name

<sup>1</sup> Descendant of *Yājñasena* also called *Śikhaṇḍin*, *Kaṁsb. Br.*, VII.4. In a list compiled from the *Jaiminiya Br.*, Dr. Caland also gives *Sutvan Yājñasena*.

although seldom found in actual use, is implied in Pāṇini's rule, VIII,3.100 (*agakārād*).

(11) Names ending in *datta* and *śruta*, and implying blessing (VI.2.148), e.g. Devadatta, 'he whom the gods have bestowed,' and Viṣṇuśruta 'he whose wishes Viṣṇu may hear.' These are examples of names ending in a *Kṛit* suffix of which we hear so often in the *Gṛīhyasūtras*. We do not usually come across any real name ending in *śruta* in the Vedic or Buddhist literature. The number of names ending in *datta* is also limited, as Brahmadatta (*Jaim. Br.*, king of Kośala, also called Prāsenajita), Punardatta and Sūryadatta (*Śāṅkh. Ār.* VIII.8); but in Buddhist literature they are more common, as Devadatta, Bhūridatta (*Jāt.* VI.167), Matidatta (*Jāt.* IV.342), Yaññadatta Brāhmaṇakumāra (*Jāt.* IV.30), Somadatta (*Jāt.* VI.170). These become a regular feature in the post-Pāṇinian period, e.g. Aggidatta, Vāyu-, Yama-, Id-(=Indra-), Ṛishi-(=Isi-), Brahma-(=Baha-), Upendra-(=Upida- or Upeda-), Uttara-, Vaisramaṇa-, Pushya-, Gaṅga-, Dharma- and Nāga-datta, etc., (Cf. Bühler's *Sanchi List*). According to *Kātyāyana* (I.4.58-59), Maruddatta would be equal to Marutta (*Bhāṣya*, I.341). Patañjali cites Yajñadatta and Devadatta as typical names of Brāhmaṇas (*Bhāṣya*, I.1.3; I.189), often shortened simply to Datta (I.1.45; I.111).

(12) Śeṅvala, Supari, Viśāla, Varuṇa and Aryamā (*Śeṅvala-Supari-Viśāla-Varuṇ-Āryamādīnām tṛitīyāt*, V.3.84)—these formed the first part (*pūrvapada*) of names and the three endearment suffixes, *ika*, *iya* and *ila*, added after them caused the elision of all the syllables after the third. For example, Śeṅvaladatta or Śeṅvalendradatta was shortened to Śeṅvalika. Śeṅvaliya or Śeṅvalila; Suparyāśīrdatta to Suparika, Supariya and Suparila; and Viśāladatta to Viśālika, Viśāliya and Viśālila.

In the *Jātakas* the equivalent of Śeṅvala is Sīvalikumāra (I.408), or the feminine Sīvalīdevī, wife of king Mahā-Janaka (VI.37). The form Devī Sīvalā occurs at Bharhut in the name of this Jātaka (*Lüder's List*, No. 709).

The names in this *sūtra* seem to refer to minor deities who were propitiated to grant the boon of a son, to be named after them. Most probably these were names of *Yakṣas*. Viśāla is definitely a *yakṣa* named in the assembly of Kubera (*Sabhā-parva*, 10.16). Śeṣala, who gives *śeṣa* or treasure, also seems to be a *yakṣa*. Śeṣalendra would then denote, Kubera (lord of Śeṣala), and a child born by propitiating him was called Śeṣalendradatta, or by the shortened names Śeṣalika, etc. Even Vedic gods were worshipped as *yakṣas* in folk religion. According to the Āṅgānāṭiya Sutta (*Dīghanikāya*, 32) Indra and Varuṇa are both *yakṣas* like Maṇibhadra. Aryamā was closely related with child-birth and invoked for easy delivery (*Atbarva*, I.11.1). A child would thus be named after him, but the use of the name is rare, only one instance being recorded at Bharhut as Ayama (Lüder's *List*, No. 813). Varuṇa was also the name of a *Lokapāla* and of a *Nāgarāja*. Its use is frequent in the *Kumbha Jātaka* (V.12). Kātyāyana's *vārttika* on this *sūtra* begins with Varuṇa, not Śeṣala. It shows that the *sūtra* formed part of an earlier grammar from which Pāṇini borrowed and recast it by adding three names of tutelary deities famous in his days *viz.* Śeṣala, Suparī and Viśāla. But Kātyāyana retained for purpose of reference in his *vārttika* the original form of the *sūtra* as it began with Varuṇa.

(13) Names like Gośāla, Kharasāla (*Śtubhānānta-gośāla-kharasālāccheṣa*, IV.3.35), Vātsasāla or Vatsasāla (IV.3.36) are derived from places of birth. Gośāla is a historical example, also called Maṅkhali, which corresponds to Pāṇini's Maskarī (VI.1.154). As a popular name it occurs at Bharhut (Lüders' *List*, No. 853).

(14) Names ending in *putra*, and preceded by a masculine word (*Putraḥ pumbhyaḥ*, VI.2.132), as Kaunaṭiputra. They have an initial acute accent (*ādya-udātta*). As counter-examples, were names preceded by the name of the mother, as Gārgīputra and Vātsīputra, and distinguished by the acute accent on the final vowel. The practice of adding the mother's

name to *putra* is found in the Varuṣa list of teachers in the *Śatapatha Brāhmaṇa* beginning with Sāñjīvī-putra (*Vedic Index*, II.443; *Br. U.*, VI.5). A Kātyāyanī-putra (Jātū-karṇya) and a Prātiyodhī-putra also occur in the *Śāṅkh. Āraṇyaka* (III.10; VII.13). It shows that such names formed part of a well recognised practice considered honourable. According to Pāṇini, one's designation after the *gotra* name of one's mother (*gotra-stri*) implied censure (IV.1.147), because it was supposed that the mother's name would be adopted only in the event of the father's name being unknown (*Kāśikā, Pitur-asamvijñāne matrā vyapadeśo' patyasya kutsā*). But there seems to have been a change later on and Patañjali states that there is honour in being addressed by the mother's name, as Gārgimāta, Vātsimāta (*Bhāṣya*, VII.3.107; III.340 *mātrī-ñām mātach putrārtham arhate*).

Female names are regulated in *sūtra*, IV.1.113, on which the *Kāśikā* cites *Śikṣitā* and *Chintitā*. This rule also refers to women named after rivers, and also to their *apatya* or descendants, e.g. Yāmuna, son of Yamunā. The *Vārāha Ḡṛhyasūtra* states that a girl should not be named after a river, and this form of naming is not approved by Manu (III.9) also.

II. *Nakṣatra-Nāma*: (15) Pāṇini deals at length with names derived from stars (IV.3.34; 36, 37; VIII.3.100). The *Ḡṛhyasūtras* refers to the *nakṣatra* name in addition to the personal name. According to Āpastamba the star name was kept a secret; Gobhila enjoins that the teacher was to give his pupil a *nakṣatra* name which he used in bowing to him (*abbivādanīya nāma*, Gobhila *Ḡṛhyā*, II.10.23-24). The *Ḡṛhyasūtras* of *Śāṅkhāyana*, *Khādīra*, *Mānava* and *Hiraṇyakeśi* are also of the same opinion. Originally adopted as a secret name, the *nakṣatra* name as being convenient to utter became later on as popular as the *gotra* name, e.g. Moggallāna Tissa in which the star name and the *Gotra* name are coupled.

Birth under a particular asterism (*Tatra jātaḥ*, IV.3.25) inspired such names. In Pāṇini's time stars were regarded as

deities to whom regular worship (*bhakti*) was shown. As such the star names are indicative of the religious attitude of the people based on a belief in numerous tutelary deities, including those presiding over the several asterisms.

In star names the suffixes are often dropped (IV.3.37), e.g. Rohiṇa from Rohiṇī. Persons, both male and female, were named after Śravishṭhā (=Dhanishṭhā), Phālgunī, Anurādhā, Svāti, Tishya, Punarvasu, Hasta, Viśākhā, Ashāḍhā and Bahulā (*i.e.* Kṛittikā) without adding any suffix, *i.e.* the star name was synonymous with the personal name, e.g. Śravishṭhaḥ, Phalgunah, etc. From Abhijit, Aśvayuk and Śatabhishak the terminations were optionally dropped (IV.3.36), e.g. Abhijit and Ābhijita, etc.

As stated above the star names are unknown in Vedic literature, but became popular in the time of Pāṇini and later. For example, Viśākhā, Punabbasu, Chittā, Poṭṭhapāda, Phaggunī, Phussa and Tissa or Upatissa occur in the *Jātakas*; to which may be added Phaguna, Phagulā, Tisaka, Upasijha (=Upasiddhya), Sijhā, Pusa, Pusaka, Pusinī, Bahula (cf. Pāṇini's Bahula), Sātīla (=Svātīgupta, or -datta). Asāḍha, Mūla, Poṭhaka, Poṭhadevā (=Proshṭhadevī), Rohiṇī or Rohā, etc., from Sanchi; and Bharanideva, Anurādhā and Sonā (=Śravaṇa) from Bharhut (Lüders' *List*, 784, 874).

III. *Abbreviated Names*: (16) Names ending in *ika* (V.3.78). A polysyllabic name was shortened in order to express affection. Only the first two syllables were retained with a suffix added, e.g. Devika from Devadatta; Yajñika from Yajñadatta; Chhaḍika at Sanchi from Chhandodatta (*List*. 380); and Yaśika from Yaśodatta (*List*. 757).

(17) Names with *iya* suffix (=ghan, V.3.79) added as before, e.g. Deviya and Yajñiya. The *Jātakas* add Giriya (III. 322), Chandiya (=Chandakumāra, VI.137), Nandiya (II.199; same as Nandika, II.200, or Nandaka), Bhaddiya (=Bhadrasena, Bhadrakāra or Bhadrāsāla, I.140; VI.135), Meghiya (=Meghakumāra, IV.95) and Sabhiya (VI.329), but they

are rare in Bharhut and Sanchi inscriptions.

(18) Names ending in *ila* (=V.3.79), e.g. Devila from Devadatta, and Yajñila from Yajñadatta. The Jātakas mention Guttīla (II.248), Makhila (=Makhaḍeva, *Jāt. Nidānakathā*, p. 41); in Sanchi records are found Agila (=Agnidatta), Satila (Svāti-datta), Nāgila (Nāgadatta), Yasila, Yakhila (=Yakshadatta), Saṁghila, Budhila; and from Bharhut Mahila (L.L.766), Yakhila (846) and Ghaṭila (L.L.860).

(19) Names with the prefix *upa* were shortened in the opinion of Eastern teachers, by adding *aḍa* and *aka* (=vuch) (*Prāchām upāder-aḍaj-vuchau cha*, V.3.80), e.g. Upendra-datta shortened to Upaḍa and Upaka (in the east) and into Upiya, Upila and Upika according to other teachers (V.3.78-79), together with Upendradattaka.

Upaka occurs as a *gotra* name in Pāṇini (II.4.69), and Upagu and Upajīva in the *Jaiminīya Brāhmaṇa* (Caland 199.249). But such names became more popular after Pāṇini.

The Buddhist name Upāli (I.140) may be from Upila. At Sanchi, however, the name appears in full as Upedadatta, Upidadatta or Opedadatta. Other names with *upa*, were *Upaka*, an Ājīvika (*Jāt.* I.81), *Upakaṁsa* (*Jāt.* IV.79), *Upakañchana* (*Jāt.* IV.395) and *Upajotiya* (*Jāt.* IV.382).

(20) Names ending in *ka*, a suffix added to denote (1) inferiority (*kutsile*, V.3.75), e.g. Pūrṇaka, name of a servant; and (2) benediction (*āśishī*, III.1.150), e.g. *Jīvaka* (May you live!), *Nandaka* (May you prosper!).

**SHORTENED NAMES IN USE AFTER PĀṆINI**—Kātyāyana and Patañjali record in the following rules and suffixes post-Pāṇinian tendencies to form abbreviated names of later times:

(a) Retaining the first four syllables, against two in Pāṇini (V.3.83), e.g. Brīhaspatika from Brīhaspatidatta, Prajāpatika from Prajāpatidatta. Pajaka (*Jātaka*, III.463) derived from Prajaka (=Prajāpatidatta) follows Pāṇini's rule.

(b) Adding *ka* suffix for Pāṇini's *ika* (No. 16 above); e.g. Devaka and Yajñaka for Devadatta and Yajñadatta; also Pahaka (*Jāt.* I.40, Prabhākara) Sonaka (V.247, Śoṇananda), Sachchaka (VI.478, Satyayajña) in the Jātakas, and Balaka (for Baladeva, Balarāma, Balamitra), Pusaka, Dhamaka, etc., at Sanchi.

(c) Adding *la* for Pāṇini's *ila* (No. 18 above), after words ending in *u*, e.g. Bhānula for Bhānudatta: Vasula for Vasudatta; also Bandhula (Senāpati of Kōśala, *Jāt.* IV.148) and Rāhula (=Rāhudatta, born under the planet Rāhu).

(d) Eliding the first part of the name, against Pāṇini's second (*uttarapada-lopa*) and then adding the same suffixes, Devadatta would give, e.g. Dattika, Dattila, Dattiya, Dattaka; or Devadatta might become Datta, and Deva without any suffix. (Cf. *Bhāshya* giving Bhāmā for Satyabhāmā, I.111).

Pāṇini's Senaka (V.4.112), appears to be a Senānta name formed by dropping *pūrvapada* and adding *ka*, showing the antiquity of this custom.

Thus the single name Devadatta could appear in eleven forms: (1) Devadattaka, (2) Devika, (3) Devila, (4) Deviya according to Pāṇini; and (5) Devaka, (6) Dattika, (7) Dattila, (8) Dattiya, (9) Dattaka, (10) Deva, (11) Datta according to the later rules in the *Bhāshya*.

REŚUME—The following features of names in Pāṇini's time thus stand out: (1) The use of a personal name as distinct from a *gotra* name. A man was asked both his *nāma* and *gotra* (*Jāt.* VI.243, *nāma-gottañ cha pucchethi*); cf. also Virāṭa asking Yudhishtīra his *gotra* and *nāma* (Virāṭaparva, 7.11). The Bhikkhus who took *pabbajjā* retained their personal names as well as *gotras* (*nānānāma, nānāgotta, Vinayaṭīṭaka*, B. C. Law, *Pāli Lit.* I. xiii).

(2) Some names typical in Pāṇini but rare in Vedic literature had the endings *mitra*, *sena*, *datta*, *śrūta*, *karna*, *śringa*, or were prefixed by *upa*.

(3) Personal names after stars unknown in Vedic litera-

ture are numerous in Pāṇini, Gṛihasūtras and Pāli literature. The *Baudhāyana Gṛihasūtra* giving a list of star names offers the closest parallel to Pāṇini (*Asht.* IV.3.34-37; *Baud.* I.11.9-18).

(4) The shortening of names, unknown in the Vedic literature, and passed over in silence in the Gṛihasūtras, was popular in the time of Pāṇini and the Buddhist literature. Pāṇini knows of it as a practice well-established both in time and over a wide area including eastern India (V.3.80).

## CHAPTER IV

### ECONOMIC CONDITIONS

**VṚITTI (Economy)**—The science of economics later known as *Vārttā* may be connected with the word *Vṛitti*, or economic pursuits, such as *kṛishi* (agriculture), *vāṇijya* (trade and commerce) and *pāśupālya* (cattle-rearing), about which Pāṇini furnishes interesting particulars. Pāṇini uses the general term *jānapadī vṛitti* (IV.1.42) to indicate the economic pursuits followed in a region or State. The term *jānapadī* was older than Pāṇini and is referred to by Yāska in the expression *Jānapadīṣu vidyātāḥ puruṣa-viśeṣo bhavati*, 'One gains celebrity by proficiency in the economic pursuits of the Janapada State' (*Nirukta*, I.16).

#### 1. AGRICULTURE

**KṚISHI (AGRICULTURE)**—Pāṇini mentions agriculture as *kṛishi*, derived from the root *kṛish*, to plough, although the term was not restricted to mere ploughing. Kātyāyana and Patañjali have an interesting discussion that *kṛishi* denotes not merely ploughing, but includes collectively all other operations of agriculture, such as the supply of seeds, implements, animals, and human labour.<sup>1</sup>

Pāṇini refers to cultivators tilling the soil, to officers measuring the fields (*kṣhetrakara*), to agricultural implements as *bala* and *balī*, and to the various processes of agriculture, ploughing (*balayati*, III.1.21; III.1.117; III.2.183; V.4.58; V.4.121; IV.4.81; IV.4.97), sowing (*vāṇa*, IV.3.44; V.1.45), weeding (*mūlābarhaṇa*, IV.4.88), harvesting (*lavana*, VI.

<sup>1</sup> *Nānakriyāḥ kṛisher-artbhāḥ, nāvaiyam kṛishir-vilekhaṇe eva vartate, kim tarbi? Pratividhānēpi vartate yad asau bhakta-bijabalivardaiḥ pratividhānam karoti sa kṛishy-artbhāḥ* (*Bhāṣya*, III.1.26; II.33).

1.140), threshing (*kbala*, IV.2.50, 51) and winnowing (*nishpāva*, III.3.28).

**CULTIVATORS**—Pāṇini calls the husbandmen *kṛishīvala* (*Rajab kṛishyāsuti-parishado valach*, V.2.112), a new word which had replaced the older Vedic term *kṛishṭi*, denoting people in general, as the most numerous class amongst them was the agriculturists (*Vedic Index*, I.183). *Kīnāśa*, another Vedic term (*R̥igveda* IV.57.8; *Vedic Index*, I.159) for the tiller of the soil, is only referred to in a later *Uṇādi-sūtra* (*kli-śerich-chopadbāyāḥ kan lopās-cha lo nām cha*, V.56).

In the post-Brāhmaṇical period the older word *kṛishṭi* must have been replaced by the more expressive *kṛishīvala*, 'one following agriculture as his profession,' formed by adding to *kṛishī* the new suffix *vala*.

**LAND AND FIELDS**—A village included cultivated and uncultivated land. The land which was not under the plough included *ūshara* (wasteland, V.2.107), *gochara*, pastures (III.3.119), including cattle-ranches (*vraja*, III.3.119), and cattle-pens (*goshṭha*, V.2.18).

The cultivated land was divided into separate holdings known as *ksbetra* (*Dbānyānām bhavane ksbetre kbāñ*, V.2.1). The distribution of plots implied some kind of cadastral survey of which Pāṇini gives indication when he refers to the measuring of fields in terms of the *kāṇḍa* measure. Almost synonymous with *ksbetra* was *kedāra* (IV.2.40) which word is unknown in the earlier Brahmanical literature. But the *Arthaśāstra* understands *kedāra* in the sense of a wet-field, and possibly it was distinguished from *ksbetra* in this special sense. A collection of adjoining wet fields was known as *kaidārya* or *kaidāraka*. Other areas used as barn (*kbala*, IV.2.50) were close to one another in a group called *kbalinī* (IV.2.51) or *kbalyā* (IV.2.50). The general word for arable land was *karsha* (IV.4.97), but the area actually brought under the plough was called *balya* (IV.4.97) and *sitya* (IV.4.91). *Halya* was the unit of land cultivated with one plough, as

may be inferred from the examples *dvi-balya* and *tri-balya* cited in the *Kāśikā* (IV.4.97). Patañjali distinguishes a bigger unit of land measure called *parama-balyā*, in excess of the normal unit *balyā*, and similarly *parama-sītya* of *sītya* (*Bhāṣya*, I.1.72; I.186.)

The word *sītā* (IV.4.91) is as old as the *Ṛgveda* (IV. 57.6-7, and is used in the later *Saṁhitās* also, where it variously represents the personified deity of agriculture and also furrow. Gradually the former sense fell into disuse. In the *Artha-śāstra* *sītā* retains its older meaning of the goddess of agriculture only in one place and there also it appears to be in an old quotation: *Sītā me yidhyatām devī bījesu cha dhanesu cha* (*Arth.* Text, II.24). Its more common sense in Kauṭilya is agricultural produce, specially from the crown lands. 'Whatever in the shape of agricultural produce is brought in by the Superintendent of Agriculture (of crown lands) is termed *sītā*' (*Arth.* II.15, p. 93; also p. 60).

In the *Aśbādhyāyī* *sītā* has no such technical meaning. It means furrow described by a plough, and *sītya* denotes a field brought under the plough (*sītayā samitam saṅgatam, kshetram sītyam*, IV.4.91).

In the chapter *Sāsya devatā* (IV.2.24-33) Pāṇini mentions the Vedic deities of agriculture, *Śuna* and *Sīra* (IV.2.32). According to Yāska these represented Vāyu and Āditya, but according to others 'the share and the plough,' (*Vedic Index*, II.386). Oblations to these agricultural deities were known in the time of Pāṇini.

**MEASUREMENT AND SURVEY**—The distribution of plots among individual peasants must have depended on some kind of land survey which took note of the area and boundaries of fields. Pāṇini gives an indication of this when he prescribes the rule for expressing the area of a field in terms of a measure known as *kāṇḍa*. The *sūtra* *Kāṇḍāntāt kshetre* (IV.1.23) states that the word *kāṇḍa* preceded by a numeral takes the feminine affix *ṭāp*, if the derivative word relates to a field. The

word denoting the area of a cultivated field (*kshetra-bhakti*) must have been the object of the present *sūtra*. The *Kāśikā* cites *dvi-kāṇḍa* to denote a field measuring two *kāṇḍas*. Similarly, *tri-kāṇḍa* etc. with other numerals. *Kāṇḍa* is later interpreted as 16 cubits (*śbodaś-āratny-āyāmo daṇḍaḥ kāṇḍam*; *Bālaṃanoramā*). Thus 1 sq. *kāṇḍa*=24×24 sq. ft. *KSHETRAKARA* (III.2.21), 'maker of a field'—This term denoted an officer who divided the cultivable area into plots by survey and measurement. (Megasthenes also refers to officers whose duty was to measure lands for purposes of the assessment of revenue (*Frag.* 34). They might be the *Rajjagrābhakas* of the *Jātakas* who measured the land with a rope. He had the rank of an *amātya*, surveyed the fields and measured them with a rope tied to pegs, of which one end was held by him and the other by the owner of the field (*Kurudhamna Jāt.*, III.276). The *balya* measure of land is explained by Pāṇini as *balasya karśbaḥ*, i.e. the area cultivated by one plough (IV. 4.97). Multiples of the *balya* land measure were expressed as *dvi-balya*, *tri-balya*.) *Manu* refers to a measure of land called *kula* equivalent to two plough-lands (*Manu*, VII.119, *Kullūka*), same as *dobalikā* of land-grants.

**CLASSIFICATION OF FIELDS**—Pāṇini classifies fields, firstly on the basis of the crop grown (V.2.1-4), and secondly in terms of the quantities of seed required for their sowing (V.1.45-46).

As examples of fields named after the crops grown (*Dhānyānām bhavane kshetre khañ*, V.2.1), we have: *vraibeya* for *vrībi*, *śāleya* for *śālī* (V.2.2). Other similar names were *yavya* for barley, *yavakya* for a kind of rice, *śbaśṭikya* for the *śbaśṭikā* rice so called from its ripening in two months, *tilya* or *tailīna* for sesamum, *māshya* or *māshīna* for beans, *umya* or *aumīna* for linseed, *bhaṅgya* or *bhāṅgīna* for hemp, and *aṇavya* or *aṇavīna* field for the *aṇu* crop (*Panicum Miliaceum*, now called *chīnā*, V.2.3-4).

The size of a field is also indicated by the quantity of seed required for its sowing (*Tasya vāpaḥ*, V.1.45), e.g. a

field sown with a *prastha* measure of seed was called *prāsthika*; similarly *drauṇika* and *khārīka*. Pāṇini refers to *pātrika* as a field requiring a *pātra* measure of seed (V.1.46, *pātrasya vāpab*).

The fields were also called after the crops for which they were suitable (*Tasmāi hitam*, V.1.5), e.g. fields for barley called *yavya*, for beans *māshya*, and for sesamum *tilya* (V.1.7).

**AGRICULTURAL IMPLEMENTS**—The plough is named (*sīra-nāma*, VI.2.187) in several sūtras as *bala* (III.2.183; IV.3.124; IV.4.81; VI.3.83). *Lāṅgala*, a plough in the *Rig-veda* and later (*Vedic Index*, II.231), was one of the synonyms of *sīra* referred to in *sūtra*, VI.2.187.<sup>1</sup> A large plough was called *bali* (III.1.117), which was also known as *jitya*, perhaps from its utility to break even the hardest ground and to reclaim waste land. (III.1.117). The two words *bali* and *jitya* are still preserved in the Avadhī dialect where reciprocal assistance in tillage is called *barī* or *jīta* (Patrick Carnegie, *Kachabri Technicalities*, Allahabad (1877), p. 14). This implied the lending of one's plough and bullocks to one's neighbour.

Pāṇini mentions three classes of farmers: (1) not possessing a plough of their own (*abali*, also called *apabala*, *apasīra*, or *apalāṅgala*, VI.2.187); (2) having a good plough (*subalah*, *subaliḥ*); and (3) with a bad plough (*durhali* or *durhala*, V.4.121).

Kātyāyana considers the plough as a mark of prosperity in the benedictory formula '*Svasti bhavate sahalāya* or *sahalāya*', 'May you have good luck with your plough!'

The plough was made up of three parts: (1) the long wooden pole (*īśā*), (2) the central bent portion called *potra* (III.2.183), and (3) the plough-share or *kuśī* fitted in the *potra* and made of iron (*ayovikāra*, IV.1.42). In Vedic

<sup>1</sup> Kātyāyana is more explicit and mentions *lāṅgala* in a *vārttika* on III.2.9 (*Bhāṣya*, II.99, *lāṅgala-graha*).

literature the share was called *phāla* (*Vedic Index*, II.58; *Rig.* IV.57-58). The plough was drawn by bullocks (IV.4.81) called *bālīka* or *sairīka*, as distinguished from others for drawing carts and chariots (IV.4.76; IV.4.80). They were fastened to the yoke (*yuga*) by a rope called *yotra* or *yoktra* (III.2.182), or leathern thongs called *naddhrī* (III.2.182). In the *Khaṇḍikādi*<sup>1</sup> group we have *yuga* and *varatrā*, which refer to the yoke and the thick long rope used for lifting water from a well, still called *barat* in western and *barrā* in eastern Hīndi. The whip was called *vyaja* (III.3.119) and *totra* (III.2.182); the spade *khanitra* (III.2.184) and *ākhaṇa* or *ākhaṇa* (III.3.125); the hoe for uprooting weeds and stumps *stanibaghna* (III.3.83). The ripe grain was cut with a sickle for which besides the old Vedic word *dātra* (III.2.182) a new word *lavitra* (III.2.184) had come into use. Yāska (*Nir.* II.2.) says that the sickle was called *dātra* in the North, and *dātṛ* in the East. Patañjali repeats this information.

**AGRICULTURAL OPERATIONS**—The operations of agriculture are neatly summed up in the *Śatapatha Brāhmaṇa* (I.6.1.3), as ploughing, sowing, reaping and threshing (*kṛṣhantaḥ*, *vaṣantaḥ*, *lanantaḥ*, *mṛṇantaḥ*). In the *Ash-ṭādhyāyī* all these are distinctly mentioned.

(i) *Ploughing (karsa)*. The ploughed land was called *balya* (IV.4.97). Ploughing is referred to by the new term *balayati*, 'he holds the plough' (III.1.21).<sup>2</sup> (We learn from Patañjali that agricultural labour was employed for ploughing. It enabled the owner of the land to sit in a corner and supervise the ploughing done by five hired labourers ✓

<sup>1</sup> The *Khaṇḍikādi* group (IV.2.45) is one of those *gāṇas* which had been subjected to a searching analysis by Patañjali (II.280) and all subsequent commentators, and hence its text may be considered reliable.

<sup>2</sup> *Dātṛ lavanārtbe Prichyeshu, dātram Udichyeshu* (*Nir.* II.2; *Bhāṣya*, I.9).

<sup>3</sup> *Muṇḍa*, . . . . . *hala-kala-kṛṣa-tāstebhyaḥ nich*, III.1.21. According to Kātyāyana *hala* is the substitute for the original *hali* (See *Bhāṣya*, II.28).

(*ekānte tūshṇīm-āsīna ucchyate pañcabbir-halaiḥ kṛishatīti, tatra bhavitvyaṁ pañcabbir-halaiḥ karshayatīti, Bhāshya, II.33*). The labourers received *bhakta* or food in lieu of wages. This food was supplied at the time required.

The Greeks in India were struck with the amazing fertility of the soil (*Meg. Frag. I*) and the skill of the agriculturists (*Arr. Anab. V.6*). Pāṇini knows of deep ploughing. It was effected by driving the plough twice (*dvitīyā-karoti*), or thrice (*tritīyā-karoti, V.4.58*). The *Arthashastra* also (*II.24, p. 116*) refers to ploughing three times (*trīṇ karshakān*) in heavy rains. Pāṇini also refers to ploughings done more than three times (*Saṁkhyāyās-cha guṇāntāyāḥ, V.4.59*). To make cultivation more fruitful and intensive it was the custom to plough the same field over again from one end to the other in a reverse direction (*śambā-karoti, V.4.58; anulomakṛishṭaṁ kshetrāṁ punaḥ pratilomaṁ kṛishat-īty-arthah*). The Greeks testify to the careful ploughing habits of the people in this country (*Meg. Frag. I*). }

(ii) *Sowing (vāpa)*. After the soil was prepared by ploughing, it was fit to be sown (*vāpya, III.1.126*). In some cases ploughing was done in a field with seed already scattered in it, e.g. *bījākaroti (V.4.58)*, which the *Kāśikā* explains as *saba bījena vilekhanam karoti*.

The sowing of mixed crops was also known, specially during the rainy season. Patañjali states that sesamum was sown with beans, but in such combining beans predominated as the main crop and sesamum was subsidiary, so that the ploughing was done according to the requirements of the main crop. The seeds of the minor crop were scattered at sowing (*Bhāshya* on *VIII.4.13*). The trend of Patañjali's discussion is that the mixing of *tila* with *māsha* is not obligatory for good germination, for if it were so, then both the crops would have to be considered as principal crops. Only when one is the principal (*pradhāna*) as *māsha*, and the other secondary as *tila* (in this case), can the sentence *tilaiḥ saba māshān vapati* be an

appropriate example of *sūtra* II.3.19, *Sabayukte apradbāne* (*Bhāṣya* on II.3.19).

Farming is an operation vitally connected with Mother Earth and the farmers naturally attached great religious significance to the actual sowing of seed, for which purpose they selected auspicious days. Pāṇini tells us that one of the auspicious days for sowing was the full-moon day of the month of Agrahāyana (*Āśvayujī Paurṇamāsī*, IV.3.45). The *Sarat-pūrṇimā* is the brightest and clearest moonlit night in the whole year and is still considered auspicious for operations connected with agriculture and plantation.

(iii) *Reaping* (*lavana*, VI.1.140). The ripe grain<sup>1</sup> was cut by a sickle (*dātra* or *lavitra*, III.2.182; 184). The operation of mowing was called *abbilāva* (III.3.28, *Nirabhyoḥ pūlvoh*). In the present day dialects it is called simply *lāva*; at the time of *lāva* there is much buzzing activity in the fields and extra labour is engaged. The mowers were known as *lavakāḥ* (III.1.149). Pāṇini also refers to a special method of harvesting (VI.1.140, *Kiratan lavane*) expressed by the verb *uṣaskirati*, which refers to reaping, not from one end of the field to the other, but in an unsystematic manner. We learn from the *Kāśikā* that such a practice prevailed in the countries of Madra and Kashmir (*Uṣaskāraṁ Madrakā lunanti; uṣaskāraṁ Kāśmīrakā lunanti*). Some cereals such as *māsha* and *mudga* cannot be harvested without uprooting the whole plant and were called *mūlyāḥ* (IV.4.88, *Mūlamasy-ābarhi*). The stumps were weeded by a special kind of hoe called *stambaghna* (III.3.83).

(iv) *Threshing*: (*nishpāva*, III.3.28). The reaped crop was stacked on a threshing floor (*kbala*). A plot was set apart for purposes of threshing, and was called *kbalya*, 'good as a threshing floor' (V.1.7). A group of adjoining threshing floors was called *kbalyā*, (IV.2.50) or *kbalini* (IV.2.51).

<sup>1</sup> The grain which had so much ripened as to require immediate reaping would be called *lāva* (Cf. *Kāśikā* on III.1.125).

Kauṭilya prescribes clustered siting of threshing floors for the purpose of safety: 'The threshing floors of different fields shall be situated close to each other.' (*Artb.* II.24).

Winnowing was done by scattering corn (*utkāra* or *nikāra* from *kṛi dbānye*, III.3.30) with a winnowing fan (*śūrpa*, V.1.26) in the direction of the wind, and separating grain from chaff (*nishpāva*, III.3.28).

The stages as they followed in order of time in the process of harvesting are indicated by appropriate terms as given below:<sup>1</sup>

1. *lūyamāna-yavam*, when barley was being harvested (as explained by Vardhamāna in the *Gaṇaratna-mahodadhi*);
2. *lūna-yavam*, when the harvesting was completed;
3. *pūyamāna-yavam*, when barley was being winnowed;
4. *pūta-yavam*, when the winnowing was completed;
5. *kbale-yavam*, when barley grain was heaped on the threshing floor;
6. *kbale-busam*, when the straw was separated from the grain and heaped on the floor;
7. *Sāmbhriyamāṇa-yavam*, when barley was being collected;
8. *sambhṛita-yavam*, when it was garnered;
9. *sambhṛiyamāṇa-busam*, when the straw was being collected;
10. *sambhṛita-busam*, when the straw was gathered in.

Kauṭilya also directs that grains and other crops shall be collected as often as they are harvested. No wise man shall leave anything in the fields, not even straw (*Artb.* II.24). That

<sup>1</sup> The ten words in this list form part of the *Tishṭbadgu* group (II.1.17); Kātyāyana's *vārttika* on it, *kbale-yavadīni prathamāntāni anyapadārthe*, and Patañjali's comments on the same (*Bhāṣya*, I.381) show that the words were read by Pāṇini himself.

the above terms refer to the barley crop is suggestive of the place of their origin being the Punjab where barley was one of the staple crops. ✓

(Pāṇini knows of crop-loans and instances *yava-busaka* (IV.3.48), i.e. the loan to be repaid when the straw of barley would be available. Patañjali refers to bumper harvests of barley and rice (*Eko vrīḥiḥ saṁpannaḥ subhikṣaṁ karoti; eko yavaḥ saṁpannaḥ subhikṣaṁ karoti, Bhāṣya, I.230*). He also points out that barley was the staple crop of Uśīnara and Madra (Udīchya or Punjab), as rice was of Magadha ✓ (*Uśīnarāvan-Madreshu yavāḥ, Bhāṣya, I.147; tān eva śālīn bhuñjate ye Magadbeshu, I.19*). Barley was so important a crop that its cultivation was guarded by special officers mentioned by Pāṇini as *yavapāla* (*Go-tanti-yavaṁ pāle, VI.2.78*).<sup>1</sup>)

(RAINFALL—Pāṇini refers to the rainy season as *prāvṛṣh* (IV.3.26; VI.3.14) and *varṣā* (IV.3.18), the former was the first part of the season (Hopkins, *Epic Chronology, J.A.O.S., 1903, p. 26*). These two parts were known as *purva-varṣā* and *apara-varṣā* (*Avayavād-ritoh, VII.3.11*). He also refers to *varṣa-pramāṇa* (III.4.32), measurement of rain-fall, of which *goshpada* is mentioned as the measure of lowest rain-fall ✓ (VI.1.145). Kautilya speaks of the quantity of rain (*varṣa-pramāṇa*) in Jāṅgala and other parts of the country. Failure of rain or drought (*varṣa-pratibandha*) is referred to as *avagraba*<sup>2</sup> (III.3.51). Pāṇini mentions two crops in the year as *vāsantuka* (vernal) and *āśvayujaka* (autumnal) (IV.3.45; 46). Megasthenes also noticed that India had a double rain-fall and a double crop every year.

<sup>1</sup> Patañjali refers to danger to barley crop from herds of deer : *Na cha mṛigāḥ santīti pavā noḥpyante (Bhāṣya, I.100)*. This proverb with that of the *Śtālī* and *Bhikṣus* is quoted in the *Kāmasūtra* under the name of *Vātsyāyana*. 51

<sup>2</sup> Besides *avagraba* known to Pāṇini, Patañjali mentions other pests to crops from swarms of mice, locusts and hawks (*ākṣūṭṭha, śalabhottṭha, iyenottṭha, III.2.4; II.98*). ✓

IRRIGATION—Pāṇini refers to many important rivers as the Sindhu, Suvāstu (IV.2.77), Varṇu (IV.2.103), Sarayū (VI.4.174), Vipāś (IV.2.74), Chandrabhāgā (IV.1.45), which served as sources of irrigation. He also refers to Devikā (VII.3.1) the banks of which were specially suitable for growing paddy crops as pointed out by Patañjali (*Dāvikā-kūlāḥ śālayaḥ*, *Bhāṣya*, III.316). Pāṇini also refers to the melting of snow in the hills as *himaśratba* (VI.4.29) and glaciers as *bimānī* (IV.1.49). Irrigation with water from the wells was also known, as indicated by the word *udañchana* (III.3.123), the large leathern bucket used for lifting water, and also *yuga-varatrā*, 'the yoke and the rope by which the bullocks were driven for raising the water (*Gaṇa-pāṭha* to IV.2.45).

Patañjali speaks of canals for irrigating paddy fields (*śālyartham kulyāḥ prañīyante*, *Bhāṣya*, I.1.24; I.82).

CROPS—Crops were of two varieties, (1) *kṛṣhṭa-pachya* (III.1.114), grown by cultivation, and (2) *a-kṛṣhṭa-pachya*, naturally growing in the jungles as the *nivāra* rice. They are further classified according to the time of sowing (IV.3.44; 46) and the ripening of crops sown (*pachyamāna*, IV.3.43).

According to the time of sowing (*uṣṭe cha*, IV.3.44) there were three crops, (1) sown on the full-moon day of the month Āśvayuja or Āśvina (Sept.-Oct.), called *āśvayujaka* (*Āśvayujyā vuñ*, IV.3.45); (2) sown in summer, called *graiśhma* or *graiśhmaka*; and (3) sown in spring and named *vāsanta* or *vāsantaka* (*Grīśhma-vasantād-anyatarasyām*, IV.3.46).

The *āśvayujaka* crops are chiefly barely and wheat which ripen in spring. The crops sown in spring ripen in the rains, and those sown in summer ripen in autumn or the month of Mārgaśīrsha.

Kauṭilya also refers to the succession of crops from season to season, e.g. *vārshika sasya* (rainy crops) followed by *baimana mushṭi* (autumnal harvest) in Mārgaśīrsha (November-December); *baimana sasya* (autumnal crop) followed by *vāsantika mushṭi* (spring harvest) in Chaitra (March-April);

and finally *vāsantika sasya* (spring crop) followed by *vārshika mushṭi* (rains harvest) in Jyeshṭha (May-June). *Sasya* (crop) is the same as *vāpa* (sowing) and *mushṭi* (harvest) as *pachyamāna* (ripening) of Pāṇini. The evidence from these two sources may be thus tabulated:

1. Name of crop ( <i>sasya</i> ) in Kauṭilya according to sowing season ( <i>vāpa-kāla</i> )	2. Name of produce ( <i>mushṭi</i> ) in Kauṭilya according to ripening or harvesting season ( <i>pachyamāna</i> )	3. Time	4. Corresponding names in Pāṇini for the crops according to the time of sowing ( <i>upte cha</i> )
1. <i>Vārshika</i>	<i>Haimana</i>	<i>Mārgaśīrṣa</i>	1. <i>Graishma</i> and <i>Graishmaka</i> (IV.3.46)
2. <i>Haimana</i>	<i>Vāsantika</i>	<i>Chaitra</i>	2. <i>Āśvayujaka</i> (IV.3.45).
3. <i>Vāsantika</i>	<i>Vārshika</i>	<i>Jyeshṭha</i> and <i>Mūla</i>	3. <i>Vāsanta</i> and <i>vāsantaka</i> (IV.3.46).

Columns 1 and 4 are similar with the exception of Pāṇini's summer crop (*graishma*) for which there is rainy crop (*vārshika*) in Kauṭilya. (Although the *Arthasāstra* also knows of *graishmika* crops (*Arth.* II.24, p. 117),<sup>1</sup> their raising entailed much hard labour for the agriculturists.) (Hence Kauṭilya directs that only the king who is in financial trouble and who has exhausted other means of replenishing his exchequer, should prevail upon the peasantry through his collector-general to raise summer crops (*Arth.* V.2, Tr. p. 271).)

### AGRICULTURAL PRODUCE

1. *Cereals (Dbānya) and Pulses.* Pāṇini mentions the following food grains and pulses:

*Vrīhi.* Special fields for growing *vrīhi* and *śālī* are mentioned (*Vrīhi-śālyor-dbak*, V.2.2). The sacrificial cake made from rice is called *vrīhimaya* (IV.3.146). One who possessed a stock of rice was known as *vrīhimān*, *vrīhika* or *vrīhī*, all

<sup>1</sup> *Karmadaka-pramāṇena kedāraṁ haimanaṁ graishmikaṁ vā sasyaṁ tithāpayet*, *Arth.*, II.24.

being epithets of a rich man. *Babu-vṛibi*, the name of a compound (II.2.23) is synonymous with *vṛibimān*, i.e., one who has a plentiful stock of *vṛibi*. According to the *Taitt. Saṃhitā* (VII.2.10.2) *vṛibi* was an autumnal crop (*Vedic Index*, V.I.182).

The following varieties of rice are mentioned:

(i) *Śāli* (V.2.2). It was different from *Vṛibi* as stated by Kauṭilya also. *Vṛibi* corresponds to Hindi *dhān*, and *śāli* to *jaḍaban*. *Śāli* crop was harvested in the cold season, and *vṛibi* in the rainy season. *Vṛibi* is a much older word used in the *Vājasaneyī Saṃhitā* (XVIII.12) and the *Bṛihadāraṇyaka Upanishad* (VI.3.13) as the first of the cultivated grains (*grāmya-dhānyas*). Patañjali refers to red rice (*lobita-śāli*, I.403) and irrigation channels for watering the *śāli* crop.

(ii) *Mahāvṛibi* (VI.2.38), a well-known variety of rice in the time of Pāṇini, also mentioned in the *Taittirīya Brāhmaṇa*, III.1.5.2.

(iii) *Hāyana* (III.1.148), a kind of *vṛibi* grown by transplanting, popularly called *jaḍaban*.

(iv) *Shashṭikā*, ripening in sixty days (*Shashṭikāḥ shashṭi-rātrena pachyante*, V.1.90). According to Kātyāyana it was a specific term for rice irrespective of its etymology. Other crops taking sixty days to ripen would not be called by this term. (*Shashṭike samjñāgrahaṇam*; also *Bhāshya* on it II.360). *Sāṇṭhī* (Hindi name of *Shashṭika* rice) was best suited to grow in the Punjab, since it does with but little water. It is a coarse rice, the grains of which agglutinate when boiled (Watt's *Dictionary of Economic Products*, Vol. V, pp. 620-21).

(v) *Nivāra*, (*Nau vṛi dhānye* III. 3. 48), wild or uncultivated variety of rice included under *a-kṛishṇa-pachya* class.

2. *Yava* (Barley). Fields for growing barley were called *yavya* (V.1.7). Pāṇini refers to *yavānī* (IV.1.49), a kind of crude and coarse barley according to Kātyāyana. *Yavaka* (V.2.3) may be another variety of barley grown in

special fields (*yavakya ksbetra*, V.2.3).

Barley was sown in the beginning of winter, probably on the *Āsvayujī Pūrṇimā* (IV.3.45), considered auspicious for sowing. A ceremonial sowing of barley is still practised in Hindu homes on the first bright day of the month of *Āsvayuja*, and its young sprouts (*yavāṅkura*) are worshipped on the tenth day of the same month. Barley ripens as a vernal crop, and the season of its harvesting is referred to by Pāṇini by about half a dozen names, such as *yava-busa* (IV.3.48), *kbale-yava*, *lūna-yava*, *pūta-yava*, *pūyamāna-yava*, *saṁbṛita-yava* and *saṁbriyamāna-yava* (II.1.17).

3. *Mudga* (*Phaseolus Mungo*) (IV.4.25).

4. *Māsha* (*Phaseolus Radiatus*) (V.1.7, V.2.4).

These two names occur also in the list of the *Vājasaneyī Samhitā* (XVIII.13). Fields for growing *māsha* were called *māshya* and *māshīṇa*, from which the crop is still called *māśīnā*. As examples of crops harvested by uprooting, the *Kāśikā* quotes *māsha* and *mudga* on *sūtra* IV.4.88. (*mūlyāḥ māśbāḥ*, *mūlyāḥ mudgāḥ*). We are told by Watts that in certain districts the crop is cut, in others it is pulled out (*Watt's Dictionary*, Vol. VI, Pt. I, p. 189). Patañjali says that *mudga* also takes sixty days to ripen like the *śaśṭikā* rice (*Bhāshya*, II. 360). He also refers to *rājamāsha* (*rāja-māshabhyo bitam rājamāshyam ksbetram*, II.345) which is a variety of *māsha* grown principally in the Punjab.

5. *Tila* (*sesamum*). Both in the Vedic literature and Pāṇini *tila* is mentioned in connection with *māsha* (V.2.4. and V.1.7 *tila-māsha* and *māsha-tila*). Pāṇini does not explicitly mention the two varieties of *tila*, black and white, but he refers to the use of the same in the *śrāddha* ceremony (VI. 3.71; IV.2.58) where only the black grains are used. They are known to Patañjali also (*kṛishṇatīlebhyo bitaḥ kṛishṇatīlyah*, II.345). Pāṇini knows of the oil extracted from the *tila* seeds (IV.3.149), but later grammarians thought that there is no derivative sense attaching to the word *taila*, and

therefore, it should be taken not as a word but as a suffix in such names as *sarshapa-taila* and *inguda-taila* (*Bhāṣhya*, V.2.97; II.376).

6. *Aṇu* (*Panicum Miliaceum*, V.2.4). A very small grain consumed mostly by poorer people, growing as a rainy crop and mentioned with *priyangu* in the *Yajurveda* (XVIII.13).

7. *Kulattha* (*Dolichos Biflorus*, IV.4.4.), horsegram, popularly known as *kulatbī*, is grown specially in the Punjab in the Trigarta region (Hoshiarpur, Ambala, Simla) as an autumnal crop. It is eaten as pulses or groats, but Pāṇini mentions it as a flavouring ingredient (*saṁskāraka dravya*, IV.4.4). Like *shashṭhika*, *kulattha* also occurs for the first time in the *Ashtādhyāyī*. Kauṭilya notes it as a crop grown at the end of the rainy season (*Arth.* II.24).

The *Gaṇa-pāṭha* of IV.3.136 adds a few more names to the above list of cereals, e.g. *masūra* (*Ervum Hirsutum*), *godbūma* (wheat) and *gavedbukā* (*Coix Barbata*, *Vedic Index*, I.223). According to Kātyāyana *gavedbukā* formed part of the *Bilvādi* group (IV.3.136; *Bhāṣhya*, II.323).

II. FIBROUS PLANTS—Pāṇini mentions *umā* (linseed) and *bhaṅgā* (hemp) and also the fields named after them (V.2.4). Kauṭilya refers to *atasī* and *śaṇa* in place of *umā* and *bhaṅgā*. Pāṇini also mentions cloth made from linen as *auma* and from wool as *aurṇa* (*Umorṇayor-vā*, IV.3.158). For Pāṇini's acquaintance with *karpāsa* or cotton we have to depend on the reading of the *Bilvādi-gaṇa* (IV.3.134). He, however, knows *tūla* (III.1.25) which might have denoted cotton.

Patañjali raises an interesting discussion on *sūtra* V.2.4 as to whether *umā* (linseed) and *bhaṅgā* (hemp) can come under the category of *dhānyas* or not and sums up by saying that the derivative meaning of *dhānya* is 'what pleases', and since *umā* and *bhaṅgā* are profit-yielding commercial crops which must please the grower they too count as *dhānyas*. He further observes that the number of *dhānyas* is seventeen,

a list in which *śaṇa* i.e. *bhaṅgā* is also included, hence there should be no objection to treating *umā* and *bhaṅgā* as *dhānyas* for purposes of Pāṇini's rules.

III. SUGAR-CANE (IKSHU)—It is mentioned in *sūtra* VIII.4.5, and the manufacture of *guḍa* from sugar-cane is implied in rule IV.4. 103 (*Guḍādibhyashṭhaṇ*) on which the illustration *gauḍika*, meaning 'excellent for making *guḍa*' presumes sugarcane.

IV. KUSTUMBURU (VI.1.143), the spice coriander (*Coriandrum Sativum*). In the South Indian languages the words for coriander bear a closer affinity to Sanskrit *kustumburu*, e.g. *kotamalli* (Tamil), *kotimiri* (Telugu) and *kotambari* (Kanarese). It seems to have been a loan-word in Sanskrit.

V. DYE-STUFFS—Pāṇini refers to *mañjishṭha*, madder (VIII.3.97) and *nīli*, indigo (IV.1.42). *Mañjishṭha* (Indian madder, *Rubia Munjista*) is also mentioned in the *Aitareya* (III.2.4.) and *Śāṅkhayāna* (VIII.7) *Āraṇyakas*. Pāṇini derives *mañjishṭha* from *mañji* and *stha*, where *mañji* may mean a cluster of flower blossoms. The permanent dye made from madder has always been highly prized for its deep tinctorial quality. The great part of the madder used in the Punjab is that imported by the Lohani Afghans from the hills of North Baluchistan, Kabul and Khorasan to Multan and Peshawar. (Watt's Dictionary, Vol. VI, pt. I, p. 574).

(*Nīli* is according to Kātyāyana the name of the indigo plant. In Pāṇini's time *nīla* was a kind of cloth (*āchchbūdana*, IV.1.42), dyed with indigo blue. According to McCrindle: "It appears pretty certain that the culture of the indigo plant and the preparation of the drug have been practised in India from a very remote epoch." (*Periplus*, p. 17). In the post-Vedic language *nīla* describes the colour of dark blue objects, such as indigo, sapphire, etc. (*Vedic Index*, II. 246, foot-note). In Pāṇini the indigo plant as the source of this colour was known and this is the earliest reference to this plant in Sanskrit literature.

## CH. IV, SECTION 2. FLORA

The study of Pāṇinian flora furnishes an important chapter in the general history of Indian plants which still remains to be written on the basis of literary and archaeological sources. Pāṇini refers to the systematic cultivation of forests and groves of trees and plants and to early attempts at nomenclature on the basis of their flowers, leaves, fruits and roots. He is acquainted with the principal trees of north India, a good many of which are referred to by him for the first time. **FORESTS**—Pāṇini uses the term *vana* in a two-fold sense: (1) natural forests, such as *Puragāvana*, *Miśrakāvana* (Misrikh forest in Sitapur district, VIII.4.4); and (2) cultivated groves of trees and fruit-bearing plants, such as *āmravana*, *khadiravana*, *ikshuvana*, which were also used as common names (*asaṁjñāyām api*, VIII.4.5). Pāṇini calls a large forest *araṇya* (IV.1.49) and Kātyāyana *araṇyānī* (*Bhāṣya*, II.220).

Pāṇini refers to forests classified on the basis of their produce, e.g. (1) *oshadhi-vana*, tracts producing herbs, as *dūrvā-vana*, *mūrvā-vana*, and (2) *vanaspati-vana*, those producing timber trees as *śirīṣavana* and *devadāruvana* (VIII.4.6).

**OSHADHI AND VANASPATI**—The plant kingdom is usually classified into two convenient divisions as *oshadhi* and *vanaspati*, plants and trees (*Vibhāṣa-oshadhi-vanaspatibhyaḥ*, VIII.4.6). The word *vṛikṣa* is synonymous with *vanaspati* in *sūtra* IV. 3.135 (*Avayave cha prāṇy-oshadhi-vṛikṣebhyaḥ*), with which Kātyāyana agrees (*sūtra* II.4.12, which prescribes optionally singular number for compounds of tree names, *Bhāṣya* I. 475). *Tṛiṇa* and *dhānya* (grasses and cereals) mentioned separately from *vṛikṣa* (II.4.12), must have been included under *oshadhi*, which in addition to these two comprised other

divisions of annual plants, such as creepers.

Patañjali speaks of a tree as consisting of roots, trunk, fruits and leaves (*mūla-skandha-phala-palāśavān*, I. 219). Pāṇini mentions all these parts in different *sūtras*, and in his view the plants were named after the peculiarity of their leaves, flowers, fruits and roots (*parṇa*, *pushpa*, *phala*, and *mūla*, IV.1.64), e.g. *śaṅkhapushpī*, (*Andropogon aciculatus*), a herb with a flower white like conch-shell. He mentions that a fruit was generally named after its tree, without the addition of any suffix (*Phale luk*, IV.3.163), as *āmalaka*, fruit of the *āmalakī* tree.

**TREES**—The following trees are mentioned in the *sūtras*:

1. *Aśvattha* (IV.3.48), *Ficus religiosa*. Pāṇini takes *aśvattha* to signify the time when these trees bear fruit (*yasmin aśvatthāḥ phalanti*, *Kāśikā*).

2. *Nyagrodha* (VII.3.5), *Ficus bengalensis*. Pāṇini also mentions its other name *vafa* (VI.2.82), a new word unknown in Vedic literature.

3. *Plaksha* (IV.3.164), *Ficus infectoria*, mentioned in connection with its fruits called *plāksha*, and its groves called *plaksha-vaṇa* (VIII.4.5).

4. *Āmra* (VIII.4.5), *Mangifera indica*, with its groves called *Āmra-vaṇa*. This is one of the earliest references to *āmra* in Sanskrit literature.

5. *Palāśa* (IV.3.141), *Butea frondosa*. The *Palāśādigaṇa* mentions seven other trees, e.g. *Khadira*, *Śimśapā*, *Syandana*, *Karīra*, *Śirīṣa*, *Yavāsa* and *Vikāṅkata*.

6. *Bilva* (IV.3.136), *Aegle Marmelos*, the wood-apple tree.

7. *Khadira* (VIII.4.5), *Acacia catechu*. In Pāṇini *Khadiravaṇa* is both a proper name and also applied to a grove containing catechu trees. As a proper name it is mentioned as the abode of Revata, the foremost of the forest recluses (*Khadiravaniya*, *Āṅguttara Nikāya*, XIV.1; see *Journal of the Deptt. of Letters*, Calcutta University, 1920, p. 233).

Patañjali speaks of its white trunk (*gaura-kāṇḍa*), small leaves (*sūkṣhma-parṇa*), and hard bark (*kaṅkaṭavān*, I.113).

8. *Śimśapā* (VII.3.1), *Delbergia Sisoo*; also included in the *Palāśādi* group (IV.3.141).

9. *Varaṇa* (IV.2.82), *Crataeva religiosa*. (Hindi *barnā*; (Watt, *Dict.*, Vol. VI. pt. I, p. 340; Hindi name *chbaukrā* and *Varaṇā* (Gk. *Aornos*) situated near the groves of this tree.

10. *Śamī* (V.3.88 and IV.3.142), *Prosopis spicigera*, found in the arid dry zones of the Punjab, Sindh and Rajputana (Watt, *Dict.*, Vol. VI, pt. I, p.340; Hindi name *chbaukrā* and *jaṇḍ*). A small tree was called *śamīra*, and articles made of it *śamīla*.

11. *Pīlu* (V.2.24 and VI. 3.121), *Salvadora indica*, a large evergreen tree of the same habitat as *śamī*. Payment made, or incidents happening under the *pīlu* trees were called *pailumūla* (V.1.97). The Vāhika country had large forests of *pīlu* trees (Kārṇaparva, 44, 31). Such places were used by the cattle thieves as places for concealing stolen animals (Watt, *Dict.*, Vol. VI, pt. II, p. 448), and as out of the way places they gave scope to criminal acts, as stated in the *Mahābhārata* (Kārṇaparva, 44, 20-22). The ripe small berries of *Pīlu* were called *pīlukūṇa* in the time of Pāṇini (V.2.24), a word still surviving in the Punjabi dialect as *pīlaknā* (पिलकना).

12. *Kārshya* (VIII.4.5) synonymous with the *Śāla* (*Shorea robusta*). The reference to the forests of *Kārshya* trees (*Kārshya-vaṇa*) is important as pointing to the Terai forests of *Śāla* trees in eastern India.

13. *Pīyūksbā* (VIII.4.5) is a variety of *Plakṣha*, also mentioned in the *Tālādi* (IV.3.152) and *Kāśādi* (IV.2.80) groups.

14. *Tāla* (IV.3.152), *Borassus Flabelliformis*. Bows made of *Tāla* are referred to in the *Mahābhārata* and the *Kāśikā* (*Tālād-dbanuśi*).

15. *Jambū* (IV.3.165), *Eugenia jambolana*, of which the fruits were called *jāmbava* and *jambū*.

16. *Harītakī* (IV.3.167); *Terminalia chebula*, noted especially for its fruits, also called *harītakī* (yellow myrobalan).

17. *Vaniśa* (V.1.50) bamboo, also known as *veṇu* and *maskara* (VI.1.154); the latter is also mentioned in the *Rik-tantra* (*maskaro veṇuḥ*, *sūtra* 210).

18. *Kāraskara* (VI.1.156), stated as the name of a tree, is in the *Mahābhārata* the name of a people identified with the *Aratṭas* (Jayaswal, *J.B.O.R.S.*, 1933, p. 115), but the two words appear to be different.

19. *Sidbrakā* (VIII.4.4), mentioned as the proper name of a forest. The *Sāma-Vidhāna Brāhmaṇa* refers to the fuel of the *Saidhrika* tree (III.6.9), of which the wood was hard (*sāravṛkṣa* i.e. catechu; also *Taittirīya Brāhmaṇa*, III.4.10). *Sidbrakā* and *Saidbrika* were the same.

20. *Viśṭara* (VIII.3.93), a tree but unidentified.

The names of trees in the *gaṇas* are:

1. *Karkandbū* and *Badara* (V.2.24), *Zizyphus jujuba*.

2. *Kuvala* (V.2.24), as above.

3. *Kuṣaja* (V.1.50), *Holarrhena antidysenterica*.

4. *Pāṭalī* (IV.3.136), *Stereospermum suaveolens*. That Pāṇini included it in the *Bilvādi* group is inferred from Patañjali's example, *pāṭalāni mūlāni* (*vārttika* 2, *sūtra* IV.3.166; II.328). Patañjali implies that *Pāṭalī* takes *aṃ* by IV.3.136 to denote 'the roots thereof' and since the *aṃ* suffix is not elided as a case of exception to the *vārttika* *Pushpa-mūleshu cha babulam*, the *ī* of *Pāṭalī* is elided in the form *pāṭala*.

5. *Vikaṅkata* (IV.3.141), *Flacourtia sapida*.

6. *Ingudī* (IV.3.164), *Ximenia aegyptiaca*.

7. *Śālmālī* (IV.2.82), Silk cotton tree, *Bombax Malabaricum*.

8. *Udumbara* (IV.3.152), *Ficus glomerata*.

9. *Nīpa* (IV.3.152), *Naucllea kadamba*.

10. *Dārū* (IV.3.152) referring to *Piladāru* or *Devadāru* which as the name of a tree ending in *u* seems to be

implied in *sūtra* IV.3.139. *Pitadāru* also occurs in *Phit sūtra* (no. 37) and *Sarala*, a name of *Devadāru* (*Cedrus deodara*) in *Patañjali* (II.81).

11. *Robītaka* (IV.3.152), *Andersonia rohitaka*.

12. *Vibhītaka* (IV.3.152), *Terminalia belerica*.

13. *Śirīsha* (IV.2.80), *Mimosa sirisa* (*Albizzia Lebbeck*), mentioned in connection with the town *Śairīshaka* (modern *Sirsā*) named after it.

14. *Spandana* or *Syandana* (IV.3.141), *Ougeinia Dalbergioides*, an ancient tree known in the *Rigveda* (III.53.19). It is one of the best woods for shock-resisting ability and was used for making chariots, also called *syandana* cf. *Hindi Sāndan*).

15. *Kaṇṭakāra* (IV.3.152), *Solanum jaquini*.

16. *Karīra* (IV.3.141), *Capparis aphylla*. *Karīra-prastha*, a town, (VI.2.87) was named after this tree.

GRASSES AND WEEDS—Pāṇini mentions the following grasses (*tṛiṇa*, II.4.12) in the *sūtras*:

1. *Śara* (VIII.4.5), *Sacchrum arundinaceum*. Pāṇini mentions *Śaravaṇa* as the name of a forest and *Śarāvātī* (VI.3.15) as a river. *Patañjali* mentions the names of two grasses as *śara-śīryam* II.4.12, I. 476). *Śara* is well-known, and *śīrya* should be identified with *sairya*, mentioned earlier in the *Rigveda*, I.191.3.

2. *Kāśa* (IV.2.80 and VI.2.82), *Saccharum spontaneum*.

3. *Kuśa* (*Poa cynosuroides*) occurs in such words as *kuśāgra*, (V.3.105) and *kuśala* (V.2.63). Its feminine form was *kuśā* (IV.1.42). *Patañjali* mentions *kuśa-kāsam* as names of grasses (II.4.12; I.475).

4. *Muñja* (III.1.117), *Saccharum munja*. Pāṇini refers to *muñja* grass being treated (*vīpūya*) in water for its fibres. Its reeds were called *ishikā* (VI.3.65).

5. *Naḍa* (Reed), IV.2.87, in such names as *naḍvān*; IV.2.88, *naḍvala*; IV.2.91, *naḍakīya*, denoting a place abounding in reeds.

6. *Śāda* (IV.2.88), grass from which *śādvala*, a grassy land.

7. *Vetasa* (IV.2.87), cane or *Calamus rotang*.

8. *Katṭṛina* (VI.3.103), explained by Amara as *saugandhika*, a fragrant grass, probably same as *sugandhitejana* of the Vedic literature (*Vedic Index*, II.453).

*Grasses mentioned in the gaṇas.*

1. *Vīraṇa*, *Andropogon muricatus*, also called *uśīra* (IV.4.53; IV.2.80), a fragrant grass (*Kisārādi* group). The gathering of *vīraṇa* flowers was a favourite game in East India called *Vīraṇa-ṣuṣṭha-ṣrābhāyikā*, celebrated in the month of Vaiśākha (April-May).

2. *Balvaja*, *Eleusine indica*, (IV.2.80; IV.3.142).

3. *Darbha* (IV.3.142); also in the *Gavāśva* group II.4.11, where it occurs in such compounds as *darbha-śaram*.

4. *Pūtīka* (II.4.11), a grass, also known in Vedic literature (*Vedic Index*, II.11).

**FLOWERS** (*PUSHPA*, IV.1.64)—Pāṇini mentions *kumuda*, water-lily (IV.2.80, IV.2.87), and *ṣuṣṭhaka*, lotus (V.2.135). The *ṣuṣṭhakarādi-gaṇa*, also contains its other synonyms, e.g. *padma*, *utpala*, *bisa*, *mṛṇāla*. The *Haritakyādi-gaṇa* mentions *śeṣhālikā* (*Nyctanthes Arbor Tristis*), a sweet-scented flower, which was known to Patañjali who refers to a cloth dyed with its colour, called *śaiṣhālikā* (*Bhāṣya*, V.3.55; II.413).

Pāṇini tells us that the flowering plants or creepers derived their names from the name of their flowering season (*kālāt... ṣuṣṭhyat*, IV.3.43) on which the *Kāśīkā* cites *vāsantī kundalatā*, i.e. the creeper *Jasminum multiflorum* flowering in the spring season.

**HERBS** (*OSHADHI*). The formation of the names of herbs is the subject of *sūtra* IV.1.64, *Pāka-karṇa-ṣarṇa-ṣuṣṭha-mūla-bāl-ottara-padāch-cha*. Some herbs are cited in the four

*antar-gaṇa sūtras* to the *Ajādi* group IV.1.4, which also occur as *vārttikas* of Kātyāyana, although Haradatta treats them as part of the *gaṇa* (cf. *Padamañjarī* proposing to correct *sat-prāk-kāṇḍa* as *sadach kāṇḍa* on the basis of the *vārttika*). Thus *triphalā*, the traid of Indian myrobalans and *amūlā*, *Methonica Superba* (*Vedic Index*, I.31) appear to be old names. *Brāhmī*, a famous herb (*Herpestis Monnieria*; Watt, *Dict.*, Vol. IV, p. 225), is known to Patañjali (*Bhāṣya*, III.233 on Pāṇini VI.4.171).

**FRUITS (PHALA)**—Pāṇini takes fruits as the produce of trees (cf. IV.3.163-167), but Kātyāyana and Patañjali take *phala* to include even grains as rice, barley, pulses, sesamum, etc., produced by the annual plants which wither away after ripening (*phala-pāka-śuśbām upasaṃkhyānam*, II.327). This agrees with Manu who defines *oshadhi* as *phalapākāntā* (I.46). Pāṇini refers to fruit-bearing trees (*phalegrahi*, III.2.26) and has made rules for denoting the fruits of various *vanaspathis* (*Phale luk*, IV.3.163 etc.), stating that the linguistic form of the name of the fruit is generally the same as that of the tree.

Mango, *bilva*, and *jambu* are important fruit-bearing trees mentioned, and berries of *plaksha* and *haritakī* are also named (IV.3.164,167). The *drākṣā* vine, and its fruits occur in the *Gaṇa-pāṣṭha* (IV.3.167). Pāṇini's reference to *Kāpiśāyana* shows his acquaintance with the grapes and its wines from Afghanistan (IV.2.99). The word also occurs in the *Mālādi* and *Yavādi-gaṇas* (VI.2.88; VIII.2.9) and in a *Phitsūtra* (no. 57). Pomegranate (*dāḍima*) occurs in the *ardbarchādi gaṇa* (II.4.31), but the first definite mention of the fruit is found in Patañjali (*Bhāṣya*, I.38 and 217). Outside India, the fruit is carved on the ancient monuments of Persepolis, Assyria and Egypt, showing its pre-Pāṇinian antiquity.

**PĪLUKUNA**—In *sūtra* V.2.24, Pāṇini mentions the suffix *kuṇa* from *Pīlu* (*Salvadora indica*) and other tree names to denote their fruits. The ending *kuṇa* in this sense is a peculiarity of the Punjabi dialect round about Shahpur district in

north-west Punjab where *pīlukūṇa* denotes the ripe *pīlu* berries. In Sanskrit literature the *kūṇa*-ending is of rare usage and Pāṇini has taken here a word from the spoken dialect nearer home.

## CH. IV, SECTION 3. FAUNA

**CLASSIFICATION**—Pāṇini classifies creation into animate (*prāṇin*, IV.3.135; 154; also *prāṇabbhit*, V.1.129) and inanimate (*aprāṇin*, II.4.6; V.4.97 etc.), the two being also mentioned as *chittavat*, 'with mind' (V.1.89) and *achitta*, 'without mind' (IV.2.47). This becomes significant against the background of the Upanishadic thought where *prāṇa* (vitality) and *chitta* (mind) are considered as the two characteristics of life. The animate world is further subdivided into human (*mansushya*, IV.2.134) and animal (*paśu*, III.3.69) kingdoms; and the latter again on the basis of their habits into domestic (*grāmya-paśu*, I.2.73) and wild (*āraṇya*, IV.2.129). Other modes of classification are also referred to, *viz.* according to size, as *kṣudra-jantus* (II.4.8), or their food as *kravyād*, the carnivorous animals (III.2.69). Pre-Pāṇinian attempts at classification are reflected in such words as *ubhayatodanta* and *anyatodanta*, *dvipād* and *chatuṣpād*, *ekasāpha* and *dviśāpha* of Vedic literature (*Vedic Index*, I.510). *Mṛiga* is generally a wild beast in the *Aṣṭādhyāyī* (IV.3.51; IV.4.35), but in *sūtra* II.4.12 it stands for the cervidae, such as *ruru-pṛishatam* in the *Bhāṣya* signifying two species of deer. Birds are called *pakṣī* (IV.4.35) and *śakuni* (II.4.12). Pāṇini mentions the following animals:

1. An elephant is called *bastin* (V.2.133), *nāga* and *kuñjara* (II.1.62); a trumpeting elephant with prominent trunk was *śuṇḍāra* (V.3.88). A herd of elephants was called *bāstika* (IV.2.47). The height of an elephant constituted a measure as *dvibasti*, *tribasti* (V.2.38), as high as two or three elephants, words used with reference to the depth of a moat or the height of a rampart. Pāli *batthin* also denotes the size of an elephant (*Milinda*, p. 312; *Stede, Pali Dict.*) The tusk

of an elephant was called *danta* (V.2.113), used also as ivory; a tusker was *dantāvala*. Strength to kill or shoot an elephant was a mark of valour, expressed by the term *bastigbua* (III.2.54). A goad was *totra* (III.2.182).

Patañjali refers to the food for elephants as *basti-vidbā* (*vārttika* II.1.36.3, Bhāshya, I.388).

2. Camel is called *ushṭra* (IV.3.157) and camel corps *ausṭraka* (IV.2.39). A young camel (*karabha*) restrained by a chain during infancy was known as *śrīṅkhalaka* (*Bandhanam asya śrīṅkhalam karabhe*, V.2.79). Pāṇini refers to camel-riders (*ushṭra-sādi*, VI.2.40), and to mixed corps of camels and mules (*ushṭra-vāmi*). It seems that the term *ushṭra-sādi* and *ushṭra-vāmi* referred to the army units employed for quick transport.

Pāṇini mentions *ausṭraka* as the name of articles made from the parts (*vikārāvayava*, IV.3.157) of dead camels. Such articles were large and small sacks (*goṇī* and *goṇītarī*, V.3.90) made of camel hair, and leather jars of large and small size (*kutū* and *kutupa*, V.3.89), made of hides and intestinal integuments of camels (Watt, *Dict.* II.63-64).

3. *Aśva*. Horse and mare together were termed *aśva-vaḍava* in the masculine gender (II.4.27). Pāṇini mentions *Pārevaḍavā* (VI.2.42), a special breed of mares from across the Indus. Kautilya states that the best class of horses were imported from Kamboja, Sindhu, Bāhlīka and Sauvīra (*Arth.* II.30).

**HARAṆA**—A mare in heat is referred to as *aśvasyati* (VII.1.51) and the charges paid for her covering as *haraṇa*. *Haraṇa* has a technical sense in the *sūtra* *Saptamī-hāriṇau-dharmye' haraṇe* (VI.2.65). The object of the rule is to regularise the formation of words denoting some customary (*dharma*) dues of which *haraṇa* was one. The *Kāśikā* cites *vāḍava-haraṇa*, signifying a payment given to the owner of a sire for feeding him after covering the dame (*vaḍavayāḥ ayaṁ vāḍavaḥ, tasya bijanishbekād uttarakālāṁ yad diyate haraṇam iti taduchyate*, Kā-

*śikā*). Such dues in kind or cash, were fixed by custom (*dharmya*) as an obligatory charge. The *Mabābhārata* mentions *baraṇa* in the wider sense of nuptial presents, both in cash and kind, given at the time of marriage; as for example those given by Kṛishṇa and the Yādavas to Arjuna marrying Subhadrā (*baraṇam vai Subhadrāyā jñātideyaṃ*, *Ādiparva* 233.44). The example *vādava-baraṇam* cited in the *Kāśikā* seems to be an old stock-illustration.

*ĀŚVĪNA*—(V.2.19). Pāṇini mentions it as the distance travelled by a horse in one day (*aśvasy-aikābagamah*). The *āśvīna* distance is mentioned in the *Atharvaveda* (VI.131.3) and the *Aitareya* and *Tāṇḍya Brāhmaṇas* (*Vedic Index*, I.70; cf. also Caland's note in the *Pañchaviṃśa Br.*, XXV.10.16). The exact distance is not stated, but seems to have exceeded five *yojanas* (25 miles), since the *Atharva* mentions it as coming after five *yojanas*. Kauṭilya states that horses of the first, second and third class drawing a chariot (*rathya*) travelled 6, 9 and 12 *yojanas* in one day (a *yojana*=about 5 miles), cavalry horses 5, 8 and 10 *yojanas* respectively (*Arth.* II.30). Patañjali mentions an average horse going four *yojanas* and a horse of higher mettle eight *yojanas* in one day (*Bhāshya*, V.3.55; II.413). Thus the *āśvīna* distance travelled by a horse in one day ranged from twenty-five to sixty miles according to the class of horse and the nature of work. As against Pāṇini's *āśvīna* (*aśva khañ*), the form in the *Atharvaveda* is *āśvīna*, derived from *aśvin*, a horseman. Patañjali describes *śoṇa*, *hema* and *karka* (red, black and white) as colours of horses (I.251).

4. *Khara*, mentioned in connection with stables for asses, *khara-śāla* (IV.3.35).

5. *Aja* (Goat, IV.1.4; IV.2.39). A herd of goats was called *ājaka*. Goats and sheep together were called *ajāvi* and *ajaiḍa* (cf. *gaṇa Tishṭhadgu*). *Jābāla* denoted a goatherd, and *mabājābāla* (VI.2.38) one who was the owner of a big sheep-run. *Jābāla* does not seem to be a word of Sanskrit

origin. It may be traced to a Hebrew word *yobel* or *jobil*, signifying ram's horn, whence 'jubilee'. Pāṇini shows acquaintance with some Semitic and Iranian words in use across the frontier (e.g. *bailibila*, VI.2.38; Arabic *balabila* 'deadly poison', Steingass, Persian-English Dictionary, p. 1506), whence later Sanskrit *balābala* or *bālābala*; similarly *karsha*, berry).

6. *Avi* (Sheep, V.1.8) was also termed *avika* (V.4.28). A flock of rams is referred to as *aurabbraka* (IV.2.39). Kātyāyana mentions the dialectical forms *avidūsa*, *avimarīsa*, *avisodha*, as words for goat's milk (*avi-dugdha*, IV.2.36, II.278).

7. *Mṛiga* has a two-fold meaning in the *Ashtādhyāyī*, viz. (1) wild beast (IV.3.51) in general and (2) deer (II.4.12). Pāṇini mentions two species of deer, *ṛiṣya* a white-footed antelope (IV.2.80) and *nyaṅku*, a gazelle or small deer (VII.3.53), both being Vedic words (*Vedic Index*, I.115, 463). The female deer was called *eṇī* (IV.3.159). Patañjali refers to *rohit* as the female of the *ṛiṣya* deer (I.248).

Amongst carnivorous animals (*kravyād*, III.2.69) are mentioned *śimba* (VI.2.72), *vyāghra* (II.1.56), *vṛika* (V.4.41), *krośṭu* (jackal, VII.1.95), *biḍāla* (VI.2.72), and *śvā* (IV.4.11). Domestic dogs bred in royal kennels were called *kaṇḍeyaka* (IV.2.96; cf. *Kukkura Jāt.* I.22, *ye kukkurā rājakulambī baddhā*; also *Rāmāyaṇa*, II.70.20).

Of birds (*śakunī*, II.4.12, *pakṣī*, IV.4.35 or *tiryach*, III.4.60), individual names are *chaṭakā* (sparrow, IV.1.128), *mayūra* (peacock, II.1.72, also *kalāpin*, IV.3.48), *kukkuṭa* cock, IV.4.46), *dhvāṅkṣa* (crow, II.1.42), and *śyena* (hawk, VI.3.71). *Śuka* (parrot) is included by Patañjali in the *Khaṇḍikādi gaṇa* (IV.245). Pāṇini also refers to pecking birds as *viśhkira* (VI.1.150), amongst which Charaka counts the peacock and the cock (*Sūtrasthāna*, XXVII.46).

Of the *kṣudrajantus* (II.4.8), animals upto the size of a mungoose according to Patañjali, were *nakula* (mungoose, VI.3.75), *godhā* (big lizard, IV.1.129-130), *abi* (snake,

IV.3.56), *kṣudrā*, *bhramara*, *vaṭara* (kinds of bees, IV.3.119) and *vafi* (an ant, V.2.139).

Amongst aquatic animals mention is made of *nakra* (alligator, VI.3.75), *varshābbū* (frog, VI.4.84), and *matsya* (fish, IV.4.35) and *vaisāriṇa*, a species of fish (V.4.16).

**FEEDING AND STOCK**—A drove of cattle was called *samaja*, and a drive to the pasture *udaja* (III.3.69). Herds of domestic cattle (*grāmyapaśu-saṅgha*) such as cows and bulls grazing together (*saṅghibhūtāḥ*) were called *gāvah*, after the female of the species; similarly *mabishyah* (male and female buffaloes), and *ajāḥ* (he- and she-goats). But when their young ones (*ataruṇa*), as calves and heifers, formed a mingled herd, the masculine form *vatsāḥ* signified both. This idiom still holds good in such Hindi words as *gāen* and *bachharē*.

The age of an animal was expressed in terms of the number of its teeth (V.4.141) and the growth of horns (VI.2.1) and hump (V.4.146); e.g. a calf of tender age was spoken of as *dvidan* (with two teeth), *asamjāta-kakut* (without growth of hump), *aṅgula-śrīṅga* (with horns an *aṅgula* long); and one of mature growth as *chaturdan*, *shoḍan*, *pūrṇa-kakut*, *udgata-śrīṅga*, etc.

Pastures for cattle were called *gochara* (III.3.119), in which herds grazed and moved from one part to another as fodder was eaten up. An area once used for grazing and later abandoned was called *gaushthina* (*bhutaṭpūrva goshthi*, V.2.18); similarly a woody pasture with its fodder consumed was called *āsitaṅgavina aranya* (V.4.7). This indicates a system of shifting cowpens and pastures both in village settlements and in forest areas. Straw (*busa* and *kaḍaṅkara*) was the fodder for livestock, which feeding on it was called *kaḍaṅkariya* (V.1.69; if Hindi *ḍaṅgar*). Watering places for cattle are referred to as *nipāna* and *ābāva* (III.3.74), probably attached to a well as even today.

Pāṇini refers to the cattle craving for salt as *lavaṇasyati*

(VII.1.51). Kauṭilya prescribes salt to be given to cattle as part of their food.

The cow and the bull were together called *dhenu-anadūha* (V.4.77). Prosperity in cows and calves was blessed by the expression 'Svasti bhavate sagave savatsāya (Kātyāyana on VI.3.83). A cow-pen was *vraja*, and cow-stall *gośāla* (IV.3.35) and *goshṭha* (VIII.3.97). *Goshpāda* was the place for the cows to roam (VI.1.145, *gobhiḥ-sevito deśaḥ*, Kāśikā). Dense forests impenetrable to cows were *agoshpāda* (VI.1.145).

*Gotrā* in Pāṇini 'an assemblage of cows' (IV.2.51), recalls the earlier Vedic word *gotra*, as the common shed for cows belonging to several families. Pāṇini mentions two new synonyms of *gotrā*, viz. *gavyā* and *ādbenava* (IV.2.47).

The cowherds were called *gopāla*; special officers in charge of royal cattle were called *tantipāla* (VI.2.78). The son of a cowherd attaining the age when he was fit to take the cows out for grazing was called *anugavīna* (VI.2.78). This was analogous to the term *kavachabara* for a Kshattriya boy, marking the age of maturity.

**LIFE-STORY OF A COW**—The different stages in the life-cycle of a cow were expressed by suitable terms. The heifer attaining puberty (*kālyā prajane*) was termed *upasaryā* (III.1.104), and her first mating *upasara* (III.3.71). The *Mahā-bhārata* refers to a cow attaining full youth at the age of three (*mābeyī tribāyanī*, Virāṭa, 16.6, Poona ed.). If she miscarried she was called *vehat* (II.1.65). On the eve of delivery she was called *adyaśvīnā*, 'calving today or tomorrow' (V.2.13), a new term for the Vedic *pravayyā* (VI.1.83); and after calving *grishṭi* (II.1.65). Pāṇini also refers to *mahāgrishṭi* (VI.2.38), a better cow whose milking period continues up to the next calving, corresponding to Vedic *naityikī* (= *nityavatsā*, *naichikī*, Hemachandra, *Abhidhāna - chintāmaṇi*, IV.336). *Dhenu* was a cow in milk (II.1.65), also called *astikshīrā* by Kātyāyana (II.2.24.21). After about six months of her calving she became *bashkayaṇī* (II.1.65). A cow calving every

year was marked out from the rest as *samāṁsamīnā* (V.2.12). Patañjali speaks of that cow as excellent (*gotarā*) which not only calves every year but gives birth to a heifer (*strīvatsā*, II.413). A cow pledged to the creditor to pay off the debt from her milk was called *dhenusbyā* (IV.4.89).

**BULL**—A very young calf was *śakṛit-kari* (III.2.24), corresponding to Vedic *atṛiṇāda* (*Br. Up.* 1.5.2). Next it was called *vatsa* and a group of them *vātsaka* (IV.2.39). When the cows went out for grazing, the calves were confined to special enclosures called *vatsaśālā* (IV.3.36).

The wooden club hanging from the neck of a calf was called *prāsaṅga*, (cf. Hindi *paṣaṅgā*) and a calf so restrained while out grazing was *prāsaṅgya* (IV.4.76). A calf of two years was called *dityavāb* (VII.3.1; *Vedic Index*, I.359). A calf above the ordinary and selected to grow as a stud bull was called *ārshabhya* ('good for becoming a bull,' V.1.14). As such, he was termed *jātoksba*, 'growing up as a bull' (V.4.77), and was not castrated. Calves intended to grow as stud bulls are given special food and care. A young (*taruṇa*) bull was (*ukṣbā*), more developed *ukṣbatara* (V.3.91), when fully grown up *maboksba* (V.4.77), and declining in age *vṛiddboksba* (V.4.77) or *ṛishabhatara* (V.3.91).

Similarly a draught bull was *vatsa* in the first stage, *damya* when broken, and *balivarda* as a bullock (*Pat. on I.1.1*, 1.42).

At the age of two and a half years the young bull gets his first pair of permanent teeth. This age was expressed by the word *dvidan*. He became *chatur-dan*, 'with four teeth,' at the age of three (V.4.141, *Kāśikā*).<sup>1</sup> Then he was given

<sup>1</sup> Teething of young bulls and cows :

Age	Number of teeth
2—2½ years	2 teeth.
3 "	4 "
3½ "	6 "
4 "	8 "

The question of the number of teeth has its practical importance in judging

a nose-string (*nātba-bari*, III.2.25), and was broken (*damya*) and castrated.

The draught bulls were classified according to their work, e.g. *ratbha*, drawing a chariot (IV.4.76), *yugya*, a yoke (IV.4.76), *dburya* and *dbaureya*, a cart (IV.4.77), *śakaṭa* (IV.4.80) a cart-load, and *bālika* or *sairika*, the plough (IV.4.81). An ox accustomed to be yoked both on right and left of the yoke was called *sarva-dhurīṇa* (IV.4.78), and to one side only, *ekadhurīṇa*, the latter being of less worth.

**BREEDS**—Pāṇini mentions the famous *Sālvaka* breed of bulls reared in the Sālva country (IV.2.136, *Goyavāgvoścha*). He refers to Sālva as a large confederacy of several member-states, whose number is stated to be six in the *Kāśikā* (IV.1.173). Patañjali mentions Ajamīḍha, Ajakranda and Bodha amongst them (IV.1.170, II.269). The *Mabābbārata* names Mṛittikāvati as a Sālva capital, perhaps Mairta in Marwar. The location of Sālvas is further suggested by Ptolemy's Bolingai living on the western slope of the Aravallis, who appear to be the Bhūliṅgas, one of the six Sālvas. (McCrindle's *Ptolemy*, p. 163). The *Gopatha* couples the Sālvas with the Matsyas. Thus the Sālva *janapada* comprised the vast territory extending from Alwar to Bikaner or north Rajputana, and the Sālvaka breed of Pāṇini seems to be the same as the celebrated Nagauri bulls reared in the jungle-covered tracts of Nāgaur in the Jodhpur State (Hunter, *Imp. Gazetteer*, X.159) and those of Bikaner.

Patañjali adds the name of the Vāhika breed of bulls (1.354), and the *Kāśikā* two others, viz. of Kachchha (a

the age of an animal at the time of sale and purchase. The prospective buyer invariably examines the teeth to judge the age. The growth of the horns is likewise a sign of age as referred to by Pāṇini in VI.2.115 (*Śṛṅgam-avasthāyāṁ cha*). The stages of maturity were also expressed in terms of the development of the hump, e.g. the terms *akakut*, *pūrṇakakut* and *unnatakakut* denoted the three stages of infancy, youth and maturity (V.4.146, cf. *Kāśikā*).

counter-example to Pāṇini IV.2.134), and of the Raṅku country (IV.2.100). The former (*Kāchha gau*) reared in Kathiawar is considered by Watt as the finest in north-west India, its bullocks as powerful draught animals, and cows as excellent milkers (Watt, *Dict.*, V.669). The bull bred in Raṅku was called *Rāṅkava* and *Rāṅkavāyaṇa*.

**BRANDING OF COWS (LAKSHANA).** *Lakṣhaṇa* denoted the marks branded on the body, generally ears, of cattle to distinguish ownership (*paśunām svāmi-viśeṣa-sambandha-jñāpanārtham*, *Kāśikā*, VI.3.115). Pāṇini refers to the branding of cows in two *sūtras*:

- (1) *Karṇo varṇa-lakṣhaṇāt* (VI.2.112);
- (2) *Karṇe lakṣhaṇasy-āviśṭ-āśṭa-pañcha - maṇi-bhin-nachbinna-chbidra-sruva-svastikasya* (VI.3.115).

The first rule prescribes initial acute accent in such words as *dātrākarna*, 'whose ears are marked with a sickle.' The second *sūtra* dealing with vowel elongation incidentally gives a list of some marks used to indicate different owners, e.g. *viśṭa*, *āśṭa*, *pañcha*, *maṇi*, *bhinna*, *chbinna*, *chbidra*, *sruva* and *svastika*.

The branding of cows was known in the Vedic period. The *Ātharvaveda* refers to it as *lakṣma* and mentions the *mithuna* mark (VI.141.2-3; XII.4.6). The *Maitrāyaṇi Samhitā* (IV.2.9), *Mānava Śrauta Sūtra* (IX.5.1-3), and *Gonāmika Pariśiṣṭa* of the *Vārāha Śrauta Sūtra* give details of this ancient cattle rite and add a few more marks (*Journal of Vedic Studies*, Lahore, Jan. 1934, pp. 16 ff.). The *Mahābhārata* also refers to a census of the royal cattle (*smāraṇa*, Vanaparva, Ghoshayātrā, 239.4) by branding them (*aṅka*, *lakṣa*, Vanaparva, 240.4). The *Arthaśāstra* prescribes it for the Superintendent of Cows to 'register the branded marks, natural marks, colour and the spread of the horns of each of the cattle' as part of his duties relating to the cow-pen (*vraja-paryagra*, *Arth.* II.29, p. 129). The Edicts of Aśoka emphatically disallow the branding of horses and bullocks on certain specified

days (Pillar Edict, V)<sup>1</sup>. Patañjali refers to the mark (*liṅga*) being branded on the ear or the rump of the animal (*gobh saktbani karṇe vā kṛitaṁ liṅgam*, I.3.62; I.289); the mark being also called *aṅka* (*aṅkitā gāva ityuchyate' nyebhyo gobhyaḥ prakāśyante*, VIII.2.48; III.408).

**NAMES OF MARKS**—Pāṇini mentions nine marks (VI.3.115); to which other names may be added from the *Maitrāyaṇī Saṁhitā*, *Ṛik-Tantra*<sup>1</sup> and *Kāśikā*, as shown below. *Viśṭa-karṇī*, a mark in Pāṇini's list, is in the *Maitrāyaṇī Saṁhitā* a mark of the cows of Agastya, those of Jamadagni having a lute and of Vasishṭha a stake (*Vedic Index*, I.46). The *asṭa-karṇī* of Pāṇini occurs in the *Ṛigveda* (X.62.7) where Grassmann translates 'having the sign for (the number) 8 marked on the ear.' (*Vedic Index*, V.I.46). The use of the numerals 5 and 8 as marks put on the ears of cattle shows that writing was popularly known (Goldstücker, *Pāṇini, His Place in Sanskrit Literature*, p. 44).

Some of these marks (*lakṣhaṇa*) can be identified amongst the symbols stamped on punch-marks coins, e.g., <sup>1</sup>*sruva*, <sup>2</sup>*svastika*, <sup>3</sup>*aṅkuśa*, <sup>4</sup>*kuṇḍala*, <sup>5</sup>*plihā*, <sup>6</sup>*bāṇa*, <sup>7</sup>*mīlana*.<sup>2</sup>

<sup>1</sup> See also A.S.B. Memoir, *Animals in the Inscriptions of Piyadasi*, p.373, referring to it as an old custom described in the *sūtra* literature; *Pārashara*, iii.10; *Śāṅkhāyana* iii.10; *Āśvalāyana Gr. Parīśiṣṭa*, iii.-8. Also *Drāhyāyana Gṛihyasūtra*, III.1.46 (*bhuvana* mark); *Khādīra Gṛihyasūtra*, III.1.46.

<sup>2</sup> *Karṇe plih-āṅkuśa-kuṇḍal-ōpariṣṭ-ādhy-akṣata-bāṇānām*, *Ṛiktantra sūtra* 217.

<sup>3</sup> Allan, *Coins of Ancient India*, Index of Punch-marked Symbols, Index IV.

## List of Marks

SOURCE	NAME OF MARK	MEANING
Pāṇini (VI.3.115).	1. Viṣṭā (-karṇi)	Uncertain; also in <i>Mait. Sam.</i>
	2. Aṣṭa	Numeral 8 marked on the ear.
	3. Pañcha	Numeral 5.
	4. Maṇi	Jewel.
	5. Bhinna	Cleft ears.
	6. Chhinna	Clipped ears.
	7. Chhidra	Bored ears; also <i>Mait-Sam.</i>
	8. Sruva	Ladle.
	9. Svastika	Svastika sign.
	10. Sthūṇā	Stake (also <i>Vanaparva</i> , 167. 33 for stake mark on Arjuna's arrow).
Maitrāyaṇī Saṁhitā (IV.2.9).	11. Karkarī	Lute.
	12. Puchhindyā	Perhaps the tail.
	13. Dātra	Sickle; also in <i>Kāśikā</i> .
	14. Mithuna	Man and Woman.
Atharva- veda (VI. 141.2). Riktantra (sūtra 217).	15. Plihā	Spleen.
	16. Aṅkuśa	Goad.
	17. Kuṇḍala	Circle.
	18. Upariṣṭa	Twitched backwards.
	19. Adhi.	Ears twitched inside.
	20. Akshata.	Ears intact.
	21. Bāṇa	Arrow.
	22. Śaṅku	Spike.
	23. Dviguṇa	Folded twice.
	24. Trigūṇa	Folded thrice.
Kāśikā (VI.2.112; VI.3.115).	25. Dvyaṅgula	Two finger-marks.
	26. Aṅgula	A single finger-mark.

#### CH. IV, SECTION 4. ARTS AND CRAFTS

**MEANING OF ŚILPA**—Pāṇini mentions *śilpa* as a general word denoting both fine arts, like dance and music (III.2.55), and crafts (VI.2.62). Dancers (*nartaka*), musicians (*gāyana*) and instrumentalists (*vādaka*) are all called *śilpīns* (III.1.146; IV.4.56). This meaning agrees with that in Buddhist literature where the *śilpas* include the work of craftsmen and even acrobats. The *Kaushitakī Brāhmaṇa* also regards dance and song as *śilpa* (XXIX.5). The *Arthasāstra* considers proficiency in military science as a *śilpa*, trained soldiers being referred to as *śilpavantaḥ pādātāḥ* (*Arth.* V.3, p. 248), a king's inspection of military parade as *śilpa-darśana*.

Pāṇini refers to a worker in handicrafts as *kāri* (IV.1.152), which the *Kāśikā* explains as *kāru*, such as weavers, (*kāri-śabdāḥ kārūṇām tantuvāyādinām vāchakāḥ*). *Kāri* is absent in the *Arthasāstra*, but *kāru* is mentioned along with the *śilpīns* (*kāru-śilpīnaḥ*, *Arth.* II.36, p. 144). Kātyāyana uses the word *kāri* to denote an artisan (*vārttika* on IV.1.159).

**CLASSES OF ARTISANS**—Pāṇini mentions the village artisans as *grāmaśilpīns* (VI.2.62), e.g. the village carpenter (*grāma-takṣā*, V.4.95), potter and barber. Patañjali says that in each village there were at least five artisans (*tatra chāvarataḥ pañchakārukī bhavati*, I.1.48; I.118), amongst whom Nāgeśa includes the potter, black-smith, carpenter (*vardhaki*), barber and washerman.

Pāṇini mentions the skilled artisans as *rāja-śilpīns* (*Rājā cha praśamsāyām*, VI.2.63), e.g. *rāja-nāṭita*, *rāja-kulāla*. Perhaps these enjoyed the patronage of kings from whom they were so named. Patañjali clearly says that a carpenter engaged to work for the king did not entertain private work (*takṣā rāja-karmaṇī pravartamānaḥ svam karma jahāti*, *Bhāṣya*, II.2.1; I. 364).

Pāṇini condemns vile artisans as *pāpa-śilpī* (VI.2.68). The *grāma-takṣha* (V.4.95) was a carpenter who went to work on daily wages to the house of his clients in the village. On the other hand, the *kaṇṭa-takṣha* was one who worked on his own account in his own workshop (*kuṣī*) and was thus of a higher status. This distinction still obtains in rural economy (cf. Aurel Stein, *Harim's Tales*, p. 41). The carpenter working at his own house is paid for his work a share of the agriculture produce by his customers.

**NAMES OF ŚILPAS**—Of those devoted to the art of music Pāṇini mentions *gāṭbaka* (III.1.146), *gāyana*, (III.1.147), *māḍḍukika* (IV.4.56), *jhārjharika* (IV.4.56), *pāṇigba* (III.2.55), *tāḍagba* (III.2.25), and *nartaka* (III.1.145, with Kātyāyana's *vārttika*). Names of other craftsmen in Pāṇini are given below:

(1) **KULĀLA** (IV.3.118) potter; also *kumbhakāra* (in a *gaṇa*). Pottery or earthenware made by him was called *kaul-ālaka*.

(2) **TAKSHĀ** (V.4.95), carpenter. Pāṇini mentions *tanūkarāṇa* or hewing as the chief part of the carpenter's work (cf. III.1.76). Amongst his tools reference is made to *ud-ghana* (III.3.80), the bench on which he works. The village carpenter played an important part in rural economy, the various agricultural implements mentioned above were made by him.

(3) **DHANUSHKARA** (III.2.21), a maker of bows, which were made of the wood of *Tāla* tree (IV.3.152) and were of several sizes (cf. *maheshvāsa*, a bow of 6ft. ht., VI.2.38)

(4) **RAJAKA** (III.1.145 as interpreted by Kātyāyana). Pāṇini refers to several dyes then known, the cloth dyed being named after the dye (*Tena raktam rāgāt*, IV.2.1.). *Rāga* signified both colour and dye-stuff (VI.4.26,27). Cloth dyed with red colour was known as *lobitaka* (V.4.32); and with black colour *kālaka* (V.4.33). *Lākṣhā* (IV.2.2, also called *jatu*, IV.3.138) was a popular commercial dye produced in India from

very early times. Lacquer work was called *jātusba*. Madder (*manjishbhā*, VIII.3.97), indigo (*nīlī*, IV.1.42), and orpiment (*rochanā*, IV.2.2.) were also known as dyes. A garment dyed in indigo was known as *nīlā* (IV.1.42). According to Kātyāyana *śakala* (powdered potsherds) and *kardama* (black mud from the bottom of a pool) also served as dyeing stuff, probably for the first process of bleaching of coarser fabrics, thus called *śakalika* and *kārdamika* (*Bhāṣya*, IV.2.2; II.271). *Haridrā*, and *mabārajana* are mentioned by Kātyāyana as dye-stuffs (IV.2.2, *vārttika*).

(5) MINER—The miner (*khanaka*) is referred to by Kātyāyana on III.1.145. Mining revenue was called *ākarika* (cf. *Kāśikā* on IV.3.75). Pāṇini refers to seams as *prastāra* (III.3.32), on which the *Kāśikā* cites *maṇi-prastāra*, the vein of gems. The same word occurs as *prastāra* in Kauṭilya. Traders dealing in the *prastāra* minerals were called *prastārīka* (IV.4.72).

Amongst precious metals mention is made of gold (*bhiranya* or *jātarūpa*, nuggets, IV.3.153; cf. also Vedic *upachāyaya-priḍa*, III.1.123) and silver (*rajata*, IV.3.154). Iron (*ayas*, V.4.94), bell-metal (*kāṁśya*, IV.3.168) and tin (*trapu*, IV.3.138) are also mentioned. Pāṇini takes *ayas* both as a genus (*jāti*) and a species (*saṁjñā*), illustrated by the *Kāśikā* as *kālāyasa* (iron) and *lobitāyasa* (copper) respectively. *Sīsa* and *loha* are mentioned in a *gaṇa* (IV.3.154).

GEMS—*Lobitaka* (ruby) and *sasyaka* (emerald) are mentioned (V.4.30; V.2.68) as gems (*maṇi*). Both are referred to in the Arthasāstra (II.11, p. 77), the latter in the *Kalpāsūtra* as a precious gem (*śāsaga*, III.13). The mines of *vaidūrya* (cat's eye) were in the mount *Vālavāya*, but the gem was cut in *Vidūra* (*Bhāṣya*, IV.3.84; II.313) which gave it its name. *Vālavāya* mountain is cited on *sūtra* VI.2.77 in the *Kāśikā* as an old example.

(6) WEAVER. The word *tantuvāya* is implied in the *sūtra*, *Śilpini chākṛiṇah* (VI.2.76). The place where the weaver

plied his loom is referred to as *āvāya* (*āvayanti asmin*, III.3.122), the loom as *tantra* (V.2.70), and the shuttle as *pravāṇi* (V.4.160; *tantuvāya-śalākā*, *Kāśikā*). The process of weaving comprised stretching the warp and then weaving threads across it with a shuttle (cf. *Bhāṣhya*, *āstīṇam tantram*, *pro-tam tantram*, I.338). Pāṇini refers to a piece of cloth or blanket fresh from the loom as *tantraka* (*Tantrād-acbirāpah-ṛite*, V.2.70), meaning a new (*navaka*) unbleached piece; and also *nishpravāṇi*, 'separated from the shuttle as a mark of the weaving being completed' (V.4.160, *apanīta-śalākāḥ samāpta-vānaḥ*, *Kāśikā*).

Pāṇini refers to cloth and garments as *āchchbādana*. Patañjali names *Kāśika* as the famous cloth woven in Banaras; *Mādhyamika* as woven in Madhyamikā or Chittor; and *śāṭakas* woven in Mathurā (*Bhāṣhya*, V.3.55; II.413; I.19).

(7) **BLANKET-MAKERS** (*kambala-kāraka*, cf. Vālmiki, II.83.14). Woollen goods were called *aurṇa* and *aurṇaka* (IV.3.158). Pāṇini mentions several kinds of blankets, viz., (1) *prāvāra* (III.3.54), (2) *pāṇḍu-kambala* (IV.2.11), and (3) *paṇyakambala* (VI.2.42; to which Kātyāyana adds *varṇaka* (VII.3.45; cf. *Kauṣīya*, II.11, p. 80), and the *Kāśikā rāṇkava* (IV.2.100, a counter-example to the *sūtra*). *Paṇyakambala* (VI.2.42) was a blanket of commercial variety of standard length and breadth, being woven with a fixed measure of wool called *kambalya* by Pāṇini (IV.1.22, *Kambalāch-cha samjñāyām*), equal to 100 *palas* or 5 seers in weight (*Kāśikā*). *Prāvāra* was a special variety of light woollen covering woven on the loom (cf. *tantraka prāvāra*, V.2.70).

**PĀṆDUKAMBALA**—This blanket was used for the mounting of chariots, which were called *pāṇḍukambali* after it (IV.2.11). The *Kāśikā* explains *pāṇḍukambala* as a high class coloured rug used for royal seats (*rājāstaranasya varṇakambalasya vāchakāḥ*). The Jātakas mention it as the stuff for covering the throne of Indra (II.188; III.53; IV.8), and the back of a royal elephant (*Vessantara Jātaka*, VI.490), and also add

that it was of a bright red colour woven in Gandhāra (*Indagopakavaṇṇābbhā Gandhārā paṇḍukambalā*, *Ves. Jāt.*, VI.500). Gandhāra, the home of wool in Vedic times, continued later on as a centre of wool-weaving industry. The *paṇḍukambala* may be identified with the blankets still woven in the Swat valley, which have beautiful borders of scarlet colour.

Sir Aurel Stein during his tours of the Upper Swat valley found blanket weaving as an ancient craft there: 'One of the crafts is represented by those heavy and gaily but tastefully coloured woollen blankets that the North-West of India knows as 'Swātī Kambals' or rugs. They are all brought from Churrai and are mostly made by the womenfolk in the side valley of Chihil-dara which descends to that place from the high snowy range towards Kāna and Dubér on the east. To a lesser extent they are woven also in other side valleys of Torwal. That this local industry is as ancient as the Darad race that retains its hold there is proved by a passage of *Mahāvāṇija-Jātaka* which the great French Indologist M. Sylvain Lévi, quotes in his comments on that curious Buddhist Sanskrit text published by him under the title of 'Le catalogue géographique des Yakṣa dans la Mahāmāyūri.' The *Jātaka* passage referring to commodities of great value mentions also 'the fabric of Kāśī' or Benares, and the *kambala* of *Uḍḍiyāna*, *Kāśikāni cha vatthāni Uḍḍiyāne cha kambale* (IV.352). There can be no doubt about M. Sylvain Lévi rightly recognizing *Uḍḍiyāna*, the true ancient name of Swat, in that of the locality here mentioned... Indian literature can scarcely contain any earlier testimony to the antiquity of a still flourishing local industry than this *Jātaka* passage. Unfortunately though the ancient skill in weaving and the use of traditional patterns still survive, the introduction of aniline dyes has here, as elsewhere in the East, brought about a sad and rapid decline in the harmonious blending of colours. Rugs produced with the fine old vegetable dyes, such as were still obtainable at Peshawar some thirty years ago, could now no longer be found for me even in the remote

plied his loom is referred to as *āvāya* (*āvayanti asmin*, III.3.122), the loom as *tantra* (V.2.70), and the shuttle as *pravāṇi* (V.4.160; *tantuvāya-śalākā*, *Kāśikā*). The process of weaving comprised stretching the warp and then weaving threads across it with a shuttle (cf. *Bhāṣhya*, *āstīṛṇaṁ tantram*, *pro-taṇṁ tantram*, I.338). Pāṇini refers to a piece of cloth or blanket fresh from the loom as *tantraka* (*Tantrād-acbīrāpah-rite*, V.2.70), meaning a new (*navaka*) unbleached piece; and also *nishpravāṇi*, 'separated from the shuttle as a mark of the weaving being completed' (V.4.160, *apanīta-śalākāḥ samāpta-vānaḥ*, *Kāśikā*).

(7) **BLANKET-MAKERS** (*kambala-kāraka*, cf. Vālmiki, II.83.14). Woollen goods were called *aurṇa* and *aurṇaka* (IV.3.158). Pāṇini mentions several kinds of blankets, viz., (1) *prāvāra* (III;3.54), (2) *pāṇḍu-kambala* (IV.2.11), and (3) *paṇyakambala* (VI.2.42; to which Kātyāyana adds *varṇaka* (VII.3.45; cf. *Kauṭīlya*, II.11, p. 80), and the *Kāśikā rāṇkava* (IV.2.100, a counter-example to the *sūtra*). *Paṇyakambala* (VI.2.42) was a blanket of commercial variety of standard length and breadth, being woven with a fixed measure of wool called *kambalya* by Pāṇini (IV.1.22, *Kambalāch-cha samjñāyām*), equal to 100 *palas* or 5 seers in weight (*Kāśikā*). *Prāvāra* was a special variety of light woollen covering woven on the loom (cf. *tantraka prāvāra*, V.2.70).

**PĀṆDUKAMBALA**—This blanket was used for the mounting of chariots, which were called *pāṇḍukambalī* after it (IV.2.11). The *Kāśikā* explains *pāṇḍukambala* as a high class coloured rug used for royal seats (*rājāstarapaṇasya varṇakambala-sya vāchakāḥ*). The Jātakas mention it as the stuff for covering the throne of Indra (II.188; III.53; IV.8), and the back of a royal elephant (*Vessantara Jātaka*, VI.490), and also add

that it was of a bright red colour woven in Gandhāra (*Inda-goṣakavaṇṇābhā Gandhārā paṇḍukambalā, Ves. Jāt., VI.500*). Gandhāra, the home of wool in Vedic times, continued later on as a centre of wool-weaving industry. The *paṇḍukambala* may be identified with the blankets still woven in the Swat valley, which have beautiful borders of scarlet colour.

Sir Aurel Stein during his tours of the Upper Swat valley found blanket weaving as an ancient craft there: 'One of the crafts is represented by those heavy and gaily but tastefully coloured woollen blankets that the North-West of India knows as 'Swātī Kambals' or rugs. They are all brought from Churrai and are mostly made by the womenfolk in the side valley of Chihil-dara which descends to that place from the high snowy range towards Kāna and Dubér on the east. To a lesser extent they are woven also in other side valleys of Torwal. That this local industry is as ancient as the Darad race that retains its hold there is proved by a passage of *Mahāvāṇija-Jātaka* which the great French Indologist M. Sylvain Lévi, quotes in his comments on that curious Buddhist Sanskrit text published by him under the title of 'Le catalogue géographique des Yakṣa dans la Mahāmāyūrī.' The *Jātaka* passage referring to commodities of great value mentions also 'the fabric of Kāśi' or Benares, and the *kambala* of *Uḍḍiyāna, Kāsikāni cha vatthāni Uḍḍiyāne cha kambale* (IV.352). There can be no doubt about M. Sylvain Lévi rightly recognizing *Uḍḍiyāna*, the true ancient name of Swat, in that of the locality here mentined... Indian literature can scarcely contain any earlier testimony to the antiquity of a still flourishing local industry than this *Jātaka* passage. Unfortunately though the ancient skill in weaving and the use of traditional patterns still survive, the introduction of aniline dyes has here, as elsewhere in the East, brought about a sad and rapid decline in the harmonious blending of colours. Rugs produced with the fine old vegetable dyes, such as were still obtainable at Peshawar some thirty years ago, could now no longer be found for me even in the remote

tract where this manufacture has had its home for so many centuries.' (Sir Aurel Stein, *An Archl. Tour in Upper Swat and Adjacent Hill Tracts*, A.S.M., No. 42, p.63). In my visit to Peshawar in 1940 I also purchased a Swati blanket with brilliant red borders of attractive design, recalling the Jātaka description *indagopaka-vaṇṇābbā*. *Udḍiyāna* is known to Kātyāyana as Urddi and Aurddāyanī (*Vārttika* on IV.2.99).

(8) **LEATHER-WORKERS**—Articles made of leather (V.1.15, *Ccharmaṇo'ṇ*) are mentioned, e.g., *naddbrī*, strap (III.2.182) and *vardbra*, leather thong (IV.3.149) (called *naddbī*, *baddbī* in Hindi); sometimes *varatrā*, strong rope was also made of leather (*Kāśikā* on V.1.15). Pāṇini refers to skinning as *tvachayati* (III.1.25). An object entirely made of leather, such as a pair of shoes was called *sarva-charmīṇa*, which was a mark of its superior quality (*sarva-charmaṇaḥ kritah*, V.2.5) as explained by the *Kāśikā*. Pāṇini refers to the custom of manufacturing shoes to the order of a client as per measurement of his foot (*anupadam baddhā*), such a pair being called *anupadīnā* (V.2.9). Even now such articles are regarded as of better quality than those purchased direct from a shop.

(9) **BLACKSMITH (KARMĀRA)**—Of his tools mention is made of bellows (*bhastrā*, VII.3.47), sledge-hammer (*ayogbana*, III.3.82), axe (*drugbana*, III.3.82), tongs (*kauṭīlikā*, IV.4.18), from which the smith himself was known as *kauṭīlika*. He also manufactured iron plough-shares (*ayovikāra kuṣī*, IV.1.42).

(10) **GOLDSMITH (SUVARNAKĀRA)**—Besides reference to gold and silver coins, Pāṇini mentions some ornaments, as ear-rings (*karṇikā*), frontlets (*lalāṭīkā*, IV.3.65), torque (*grāiveyaka*, IV.2.96) and finger-rings (*aṅgulīyaka*, IV.3.62). The phrase *nishṭapati suvarṇam* 'he heats the gold in the fire only once,' (*Nisastaptāvanāsevane*, VIII.3.11.2) belongs to the goldsmith's vocabulary and needs to be explained. The village goldsmith seated before his miniature cupola,

has to deal with three kinds of orders. Firstly, new gold or silver in the shape of bar or ingot is brought to him to make ornaments. Secondly, old ornaments are brought in order to be melted and shaped into new forms. In these two cases he subjects gold to repeated heating and expands it by beating, for which the expression is *nistapati suvarṇam*. In the third case old ornaments are brought to him in order to be repolished or brightened by heating to look like new ones. For this the ornament is heated only once (*anāsevane*) and either rubbed or immersed in a solution to be made brighter. This operation was expressed by the cerebralised form *nishṭapati (suvarṇam suvarṇakārah)*.

Pāṇini also mentions *ākarsbika*, one skilled (*kuśala*) in testing gold on the touch-stone (*ākarsba*, V.2.64). The term *ākarsbika* (IV.4.9) was also applied to a person going round with a touch-stone and testing gold (*ākarsba iti suvarṇa-parīkshārtho nikashopalab*, *Kāśika*).

(11) **LIFTERS**—For scaffolding and lifting a large number of intricate knots and binding devices were being used. Pāṇini refers to them as *bandhas* (*Samjñāyām*, III.4.42, read with *Adhikaraṇe bandhaḥ*, III.4.41), on which the *Kāśikā* cites some old terms: (1) *kraunṭha-bandha*, 'heron-knot', (2) *mayūrikā-bandha*, 'peafowl-knot', (3) *aṭṭālikā-bandha* 'tower-knot' (*bandha-viśeshāṇāṃ nāmadbeyāni*). The *Arthasāstra* adds *vriśchika-bandha*, 'scorpion-knot' (*Arth.* IV.8, p. 221).

## CH. IV, SECTION 5. LABOUR AND WAGES

(SKILLED AND UNSKILLED LABOUR—Pāṇini refers to unskilled labourers engaged in hard manual work as *karmakara* (III.2.22), and their wages as *bhṛiti* (*karmaṇi bhṛitau*, III.2.22). He has a special expression for the employment of hired labour, viz., *karmakarān upanayate* (I.3.36).

Skilled workmen were called *śilpina*s and their wages *vetana* (*śilpino nāma syabbhūtyartham eve pravartante, vetanam eha lapsyāmabe*, *Bhāṣya*, III.1.26.14.; II.36). Pāṇini mentions a wage-earner as *vaitanika*, 'earning livelihood by means of wages' (*Vetanādibhyo jīvati*, IV.4.12). In the *Arthasāstra*, *vetana* includes both wages paid to artisans (*Arth.* II.23, p. 114) and salaries paid to government servants (*ibid*, V.3, p. 248).

WAGES—Both agricultural labour and skilled artisans worked to earn their livelihood (*jīvikārtha*, VI.2.73) through either wages, or as food received. The system of receiving a fixed payment in return for stipulated services rendered was called *parikrayaṇa* (I.4.44, *niyatakālaṃ vetanādinā svikaraṇam*, *Kāśikā*), the employer *parikretā* and the man employed *parikṛita*.

A hired workman was named after (1) the period for which he was engaged, e.g. *māsika* (V.1.80, *Tam-adbhīṣṭo bhṛito bhūto bhāvī*), and (2) the amount of wages fixed to be paid, e.g., *pañchaka* (V.1.56). A month was the unit of time for calculating wages, as seen in the examples to *sūtra* V. 1.80, viz., *karmakaraḥ māsikaḥ māsaṃ bhṛitaḥ*. This is also testified to by Kātyāyana's *vārttika* on V.4.116 (*māsād bhṛiti-pratyaya-pūrvapadāt-ṭhajvidhiḥ*) read along with *sūtra* V.1.56.

In his comments on the above *vārttika* Patañjali hints at the scale of monthly wages of labourers in his time, e.g. *pañchaka-māsikaḥ*, *ṣaṭka-māsikaḥ*, *daśaka-māsikaḥ*, i.e., a workman

receiving five, six or ten (silver *kārsbhāṇas*) per month. Again, he mentions a labourer working for one *pādika* coin (one-fourth of a *kārsbhāṇa*) a day, i.e., seven and a half *kārsbhāṇas* per month (*karmakarāḥ kurvanti pādikam ahar-lap̥syāmbe*, *Bhāṣya*, I.3.72; I.293). Kauṭilya directs that a *ṇa* and a quarter per month be paid to agricultural labour supplemented with food according to work done (*Arth.* II.24, p. 118). He states that wages in cash were convertible into kind at the rate of 60 *ṇas* per *āḍbaka* (*Arth.* V.3, p. 249). In Patañjali's time also food with clothing was given to *dāśas* and *karmakaras* (*yadetad-dāśa-karmakaram . . . . . bhaktam cha chelam cha lap̥syāmbe*, *Bhāṣya*, II.36). Pāṇini mentions workmen receiving daily food as *bhākta* or *bhāktika* (IV.4.68). The Jātakas also refer to wages in the form of food, such as *yavāgū* and *bhakta*. ✓

#### CH. IV, SECTION 6. TRADE AND COMMERCE

Pāṇini uses a variety of terms connected with trade, *e.g.*, currency and barter (*nimāṇa*), traders (*vāṇija*) and trade routes (*paṭha*), sale and purchase (*kṛaya-vikṛaya*), shops (*āpaṇa*), saleable commodities (*paṇya*), taxes on trade (*śulka*) and banking and loans (*ṛiṇa*).

**VYAVHĀRA (BUSINESS)**—Trade and commerce are implied in the general term *vyavahāra* (II.3.57), also called *paṇa* (II.3.57). Its main feature is *kṛaya-vikṛaya* (IV.4.13), *i.e.*, sale and purchase. It appears that *vyavahāra* included larger business such as export and import, while *paṇa* denoted local sale and purchase, whence saleable goods were called *paṇya* (IV.4.51).

**TRADERS**—Traders are called *vaṇik* (III.3.52) and *vāṇija*, (VI.2.13). These terms seem to have been applied to traders without reference to caste, *e.g.*, *Madra-vāṇija*, one who traded with the Madra country (VI.2.13).

Merchants were named after the nature of their business and the amount of capital they invested in it, *e.g.*, (1) *kṛaya-vikṛayika*, whose main occupation was buying and selling (IV.4.13); and (2) *vasnika*, a merchant who invested his own money in business (IV.4.13); and (3) *sāmsthānika*, a member of a commercial guild (*sāmsthāna*, IV.4.72). The last was probably the same as *sārthika* or *sārthavāha* mentioned in the Jātakas. Pāṇini also refers to other classes of traders, *e.g.*, *prā-stārika*, one who deals in minerals; *kaṭhine vyavharati*, one who deals in forest produce like bamboo (*vaṁśa*) and grasses (*vār-dha*, IV.4.72, *Kāśikā*).

The traders were also named after the articles in which they dealt and from the countries visited by them for business (*Gantavya-paṇyaṁ vāṇije*, VI.2.13), *e.g.*, *aśva-vāṇija*, a dealer

in horses, and *Gāndhāri-vāṇija*, a trader who goes to Gandhāra on business (*gatvā vyavaharati, Kāśikā*), *Kāśmīra-vāṇija*, *Madra-vāṇija*. These examples of merchants visiting distant provinces on business point to inter-provincial commercial intercourse and activity. The Jātakas often refer to merchants from eastern India going with their caravans to remote destinations in north-west India, e.g., trade relations between Videha and Kashmīra and Gandhāra (III.365), Magadha and Sovīra (*Vimānavatthu Aṭṭhakathā*, p. 336), Rājagriha and Śrāvastī (*Sutta Nip.*, vv. 1012-3), Banāras and Śrāvastī (II.294), and Banāras and Ujjain (II.248) [B. C. Law, *India as Described in Buddhist and Jain Texts*, p. 185]. As a matter of fact the names of merchants envisaged in Pāṇini's rule would better apply to merchants trading with distant countries.

**BUSINESS**—A place of business was called *āpaṇa* (III. 3. 119, *etya tasminn-āpaṇanta ityāpaṇaḥ, Kāśikā*) and articles of trade *paṇya* and *paṇitavya* (III. 1. 101). These when properly displayed in shops were called *krayya*, 'to be sold' (*Krayyatadarthe*, VI. 1. 82). *Paṇya* is a general term for merchandise, while *krayya* denotes wares marked out for sale.

The *sūtra Tena krītam* (V. 1. 37), 'purchased with that', points to the practice of sale and purchase of goods for a price fixed between the buyer and the seller. Pāṇini mentions several coins of gold, silver and copper which served as media of exchange (*infra*, Sec. 9).

The articles purchased in the market were named after the price paid for them. A variety of epithets are noted as applied to articles purchased for one *nishka* (V. 1. 20), 2 *nishkas*, 3 *nishkas* (V. 1. 30), 1 or 1½ *viṃśatika* coin (V. 1. 32), 1 *śatamāna* (V. 1. 27), 1 *kārshāpaṇa* or 1000 *kārshāpaṇas* (V. 1. 29), a *śāṇa* coin, or a *pāda*, or a *māsha* of copper (V. 1. 34-35), etc. Thus articles with a wide range of values are mentioned, e.g. those valued at one thousand or more silver pieces (*sahasra kārshāpaṇas*, V. 1. 27), and those of the lowest value like a copper *māsha*. The system of barter

(*nimāna*, V. 2. 47) was also known (*infra*, Sec. 7).

**EARNEST-MONEY**—In settling the sale and purchase of goods it is customary for the buyer to advance earnest-money to the seller as gurantee of good faith. Pāṇini refers to such a contract as *satyāpayati* (III. 1. 25) or *satyā karoti* (V. 4. 66) (*mayaitat kretavyamiti tatbyam karoti, Kāśikā*), and to the earnest money as *satyamkāra* (VI.3.70; cf. Hindi *sāi*, part of the price paid in advance).<sup>1</sup> The system of *satyāphana*, paying earnest money extends even to hired workmen, as confectioners engaged to work for a feast.

**CAPITAL AND PROFIT**—Profit is called *lābha* (V. 1. 47). Pāṇini draws a clear distinction between the capital invested called *mūla*, and the profit earned on it (*mūlena ānāmya*) as *mūlya* (IV.4.91, *paṭādīnām utpattikāraṇam mūlam, mūlyam bi saguṇam mūlam, Kāśikā*; 'mūla is the cost-price of cloth and mūlya is the cost with profits'). Pāṇini also notes a second meaning of *mūlya* to denote an object equivalent in value to the price paid (*mūlena samam*, IV. 4. 91). In the first instance, *mūlya* is taken as the cost price plus profit, accruing to the seller; in the second case the object is regarded as worth the money paid. Pāṇini refers to a sale transaction named after the amount of profit earned from it (*Tadasmin vṛiddhyāya-lābha-śulka-opadā dīyate*, V. 1. 47), e.g. *pañchaka*, *saptaka*, *śatya* or *śatika*, *sāhasra*, i.e. a deal giving a profit of 5, 7, 100 or 1,000 coins (*Kāśikā*). *Pañchaka*, giving 5 as profit, perhaps referred to a capital sum of rupees one hundred, as we know from Kauṭilya mentioning the profit of a middle man to be 5% (*Arth.* IV. 2).

**VASNA**—In the Vedic literature *vasna* denotes the 'price' paid for anything, or its 'value' or the thing as an object of purchase, 'ware' (*Vedic Index*, II.278). Pāṇini discusses *vasna* in three *sūtras* (IV.4.13; V.1.51; V.1.56), where its meaning is sale-price or value realised (*mūlya*, *Kāśikā*). In the first

<sup>1</sup>Cf. *Yāj. Smṛiti*, II.61; also Mallinātha on *Kirāta*, XI, 50.

instance a *vasnika* trader was one who only owned a financial interest in the profits of the deal as contrasted with *kṛaya-vik-rayika* (IV. 4. 13) who carried on actual business himself. Next a *vasnika* trader was named according to his *vasna* or share in the sale-proceeds (*so'syāṁśa-vasna-bhṛitayah*, V. 1. 56), e.g. *sāhasra*, 'whose share of sale-proceeds is one thousand.' This refers to some kind of corporate business as was carried on by the *sāṁsthānika* or *sārthavāha* traders.

Thirdly a *vasnika* merchant is distinguished from a *dravyaka* (V. 1. 51), the latter was a trader on outward journey conveying merchandise for sale (*dravya*), and the former was so-called because he carried the sale-proceeds on his return journey home. The three stages in the journey of a trader are thus called: (1) *harati*, at the source, (2) *vabati*, in the process of transport, and (3) *āvabati*, at the end of the journey. Thus a caravan merchant carrying goods from Mathurā to Takshaṣilā would be called *dravyaka* in three places, viz., at Mathurā whence he was carrying (Pāṇini's *harati*=*deśantarami prāpayati*, *Kāśikā*), on the way while transporting (*vabati*), and at Takshaṣilā where he arrived (*āvabati*). The same man returning from Takshaṣilā to Mathurā with the sale-proceeds was called *vasnika* at those very three stages of the journey. As specific instances of merchandise transported by the *dravyaka* traders, Pāṇini mentions *vamśa* (bamboo), *kuṭaja* (*Holarrhena antidysenterica*), *balbaja* (a coarse grass, *Eleusine indica*, Hindi *babai*), *mūla* (roots), *akṣha* (axle), *sthūnā* (pillar), *aśman* (stone), *aśva* (horses), *ikṣbu* (sugarcane) and *khaṭvā* (bedsteads), whence the traders were called *vāmśika* or *vāmśabhārika*, etc. *Vasna* went out of use after Pāṇini, but survives in Bhojapurī dialect. The *Arthaśāstra* uses the popular *mūlya*. Patañjali has it once in the sense of sale-price (*anyena hi vasnen-aikaṁ gām, kṛiṇāti, anyena dvau, anyena trīn*, *Bhāṣya*, I.95).

**TAXES ON TRADE**—*Śulka* denoted such taxes on trade as customs and octroi. Pāṇini mentions that the consignment

was named after the duty paid on it (V.1.47). The custom-house was called *śulkaśālā* and the income from customs *śaulkaśālīka* (stock-example on IV.3.75, *Ṭhag-āya-sthāne-bbṛyah*). *Ardha* (V. 1. 48) and *bbāga* (V. 1. 49) are mentioned as amounts of octroi duty, (both denoting half of a *kārshāpaṇa*), the consignment being called *ardhika* or *bbāgika* (also *bbāgya*).

Pāṇini makes a general reference to taxes levied in the eastern part of India (*Prācbāṃ kāra-nāma*), amongst which Patañjali includes toll-taxes, e.g. *avikaṭoraṇaḥ*, 'one ram levied per fold of sheep (*Kāranāmnī cha Prācbāṃ balādaḥ*, VI.3.10 *Bhāṣya*, III. 144). The *Kāśikā* cites other stock-examples as *yūtha-paśu*, one animal-head per herd of cattle; *nadī-dohanī*, one pailful milk levied at the ferry. Other similar taxes, but not on trade were *dṛishbadi-māshaka*, one *māshaka* coin collected per mill (household); *mukute-kārshāpaṇam*, one *kārshāpaṇa* coin per capita; *bale-dvipadikā*, two *pāda* coins per ploughshare, which seems to have been a tax on agriculture. Patañjali considers these to be names of current taxes sanctioned by usage (*loka*).

**TRADE ROUTES**—As already stated Pāṇini mentions roads leading from one city to another (*Tad-gachchhati pathi-dutayoh*, IV.3.85), and marked into well-defined stages (see illustration on *sūtra*, III.3.136). *Katyāyana* mentions different kinds of trade routes, as through forests (*kāntārapatha*), jungle-thickets *jaṅgalapatha*), on land (*sthala-patha*), and in water (*vāripatha*). The goods gathered (*āhṛita*) and transported along these routes were called after the route, e.g. *kāntāra-pathika*, goods coming by way of the forest. The *kāntāra-patha* seems to be the name of the route across the Vindhya forests which, as we know from Buddhist literature, connected Kośāmbī with Pratishṭhāna and Bharukachchha. *Ajapatha* (goat-track) and *śaṅkupaṭha* (precipitous route negotiated by spikes) were narrow pathways in mountainous regions (*vārttika* on V. 1. 77; *Bhāṣya*, II. 358).

Liquorice (*madhuka*) and pepper (*maricha*) were imported by the land route called *sthalapatha* (*Kātyāyana*), evidently from the south.

In the *Devapathādi-gaṇa* (V. 3. 100) Pāṇini refers to various kinds of routes, e.g. *vāripatha*, *sthalapatha*, *rathapatha*, *karipatha*, *ajapatha*, *śaṅkupatha*, *rājapatha*, *śimhapatha*, adding two more, viz. . . . *hamsapatha* and *devapatha*, which relate to air. We get an old record of some of these in the *Mahāniddeśa* e.g. *jaṇṇupatha* (correct reading *vaṇṇupatha*=Skt. *varṇupatha*, route through the sandy tract of Sindh-Sagar Doab, leading to Bannu, cf. *Vaṇṇupatha Jāt.*); *ajapatha* (goat-track), *meṇḍhapatha* (ram-track), *śaṅkupatha* (spike-track), *chhattapatha* (parasol-route), *vaṁsapatha* (bamboo-track), *sakuṇapatha* (bird-track, cf. Pāṇini's *hamsapatha*), *mūsikapatha* ('mouse passage'), *darīpatha* (cavern-path), and *vettachāra* (course of reeds) (*Mahāniddeśa*, Vol. I. pp. 154-55; Vol. II, pp. 414-15).

Light is thrown on Pāṇini's *ajapatha* by the *Bṛihatkaṭhā ślokaśaṅgraha* describing *ajapatha* during the course of a journey to *Suvarṇabhūmi* as a very narrow goat-track which could not be crossed by two persons from opposite sides (*Bṛihatkaṭhā ślokaśaṅgraha*, XVIII.416; Sylvain Lévi, 'Ptolémée, la Niddeśa et la Bṛihatkaṭhā', *Études Asiatique*, Vol. II, pp. 1-55, Paris 1925). Narrow tracks leading over high mountains and defiles were negotiated with the help of goats and rams to transport merchandise.

Pāṇini's *śaṅkupatha* refers to even more difficult mountainous ascents which could be negotiated only by scaling the heights with the help of spikes or nails carefully driven into the hill-side. A *Jātaka* passage also refers to *śaṅkupatha* (*vet-tāchāro śaṅkupatha pi chinne*, *Jāt.* III. 541). Pāṇini's *hamsapatha* corresponds to *sakuṇapatha* of the *Mahāniddeśa*. Kālidāsa also refers to *devapatha* (= *surapatha*), *ghanapatha* and *khaḡapatha* mentioned in the order of their relative heights (*Raghuvamśa*, XIII. 19). *Dēvapatha* originally was a track in the sky, but in the *sūtra* under reference Pāṇini refers to

*devapatha* as a technical term denoting the highest passage on the top of the rampart of a city, which derived its name from its height compared to the *devapatha* in the sky. We are indebted to the *Arthasāstra* for this technical meaning of *devapatha* implied in Pāṇini's *sūtra* (*Arthasāstra*, II. 3).

UTTARAPATHA—Pāṇini mentions *Uttarapatha* and the articles procured (*ābhyāsa*) along that route as *anttarapathika* (*Uttarapathen-ābhyāsa cha*, V. 1. 77), the latter also denoted the travellers on it (*Uttarapathena gacchchati*). The *Uttarapatha* may be identified with the ancient highway from east India to Gandhāra and thence towards farther west. The entire Grand Trunk Road within India and as far as the Oxus, was well known to the Greeks as 'Northern Route', a literal rendering of *Uttarapatha*.

Its Oxo-Caspian portion from India to the West by the Oxus and the Caspian is mentioned by Strabo (II. 73; XI. 509) and Pliny (Tarn, *The Greeks in Bactria and India*, p. 488, Appendix 14). 'Strabo, speaking of the Oxus, states (XI, 509) that it formed a link in an important chain along which Indian goods were carried to Europe by way of the Caspian and the Black Seas. He cites as one of his authorities Patrocles, who was an admiral in the service of Antiochus I, and thus makes it clear that the route was a popular one early in the 3rd century B.C.' (*Cambridge History of India*, Vol. I, p. 433). Strabo also wrote that 'The Oxus is sufficiently navigable for the Indian trade to be carried across to it and to be easily brought down the river to the Hyrcanian (sea) and the places beyond as far as the Black Sea by way of the rivers.' (Tarn, *op. cit.*, p. 489).

On the Indian side this route was linked up with Pāṭaliputra and ultimately with the mouth of the Ganges. As Rawlinson writes: 'The first thing which struck Megasthenes on entering India, was the Royal Road from the frontier to Pāṭaliputra, down which the envoy must have travelled to the capital. It was constructed in eight stages, and ran from the frontier town of Peukelaotis to Taxila; from Taxila, across the

Indus, to the *Jiblam*; then to the Beas, near the spot where Alexander erected his altars. From here it went to the Sutlej; from the Sutlej to the Jamna; and from the Jamna, probably *via* Hastinapura, to the Ganges. From the Ganges the road ran to a town called Rhodopha, and from Rhodopha to Kalinipaxa (probably Kānyakubja or Kanauj). From Kanauj it went to the mighty town of Prayāga at the junction of the Ganges and the Jamna, and from Prayāga to Pāṭaliputra. From the capital it continued its course to the mouth of the Ganges, probably at Tamluk, though Megasthenes never traversed the last stage of the road. At every mile along the road was a stone to indicate the by-roads and distances'. (*Intercourse between India and the Western World*, p. 42; also its Appendix I for the distances between the stages on the Royal Road, p. 64). This great highway passed through important *janapadas* and cities, such as Bālhika, Kāpiśī, Pushkalāvati, Takshaśilā, Śākala, Hāstinapura, Rathaspā (=Sk. Rhodopha, a name of the Rāmagaṅgā), Kānyakubja, Prayāga, Pāṭaliputra and Tāmralipti. Along this great highway must have passed up and down long caravans transporting merchandise (*bhāṇḍa*, III. 1. 20). On this route lay the town called Udbhāṇḍa (Ohind) as the destination where the merchandise was unloaded for transhipment across the Indus.

**ARTICLES OF TRADE**—As names of marketable articles (*Tadasya paṇyam* IV. 4. 51), Pāṇini mentions *lavaṇa* (salt, IV. 4. 52), perfumes like *kiśara*, *tagara*, *guggulu*, *uśīra* (IV. 4.53) and *śalālu* (a kind of perfume, IV.4.54; cf. Pāli *salala*, the sweet scented flower of *Pinus devadara*, Jāt. V. 420; *Sāratthapakāsinī*, III. p. 263. The *Asbṛādbyāyī* acquaints us with an interesting list of other economic products, such as silk fabrics (*kaśīya*, IV. 3. 42), wool and woollen stuffs (*ūrṇā* and *aurṇaka*, IV. 3. 158), linen and linen goods (*umā* and *auma*, IV. 3. 158), hemp (*bhaṅgā*, V. 2. 4), cotton (*tūla*, III. 1. 25; *karpāsī*, *gaṇa* of IV. 3. 136); cloth (*vastra*, III. 1. 21); clothing like *upasaṁvyāna* (I. 1. 36, *āchchhādana*, IV. 3. 143),

*bṛībatikā* (a dress reaching up to feet, V. 4. 6); blankets like *paṇya-kambala* of a fixed weight and set standard (VI. 2. 42; IV. 1. 22), *prāvāra* (III. 3. 54) and *pāṇḍu-kambala* (IV. 2. 11) imported from Gandhāra; deer skins (*ajina*, VI. 2. 194); skins of tigers and leopards (*dvaiṣa*, *vaiyāgbra*, IV. 2. 12) used as upholstering material for chariots; dye-stuffs (*rāga*), like lac (*lākṣhā*, IV. 2. 2), orpiment (*rochanā*, IV. 2. 2), madder (*mañjishṭhā*, VIII. 3. 97) and indigo (*nīlī*, IV. 1. 42); sacks and grain containers (*āvapana*), as *goṇī* (IV. 1. 42); big and small leather containers (*kutū* and *kutūpa*, V. 3. 89); leather goods as shoes (*upānah*, V. 1. 14), straps and thongs (*naddbri*, III. 2. 182, *vārdhra*, IV. 3. 151); iron chains (*śṛīṅgbala*, V. 2. 79), spikes (*ayaḥ-śūla*, V. 2. 76), tools and instruments like sickle (*dātra*, III. 2. 182), ploughshare (*kuṣī*, IV. 1. 42), yoke (*yuga*), axle (*aksba*, VI. 3. 104), spade (*khanitra*, III. 2. 184), oar (*aritra*, III.2.184), loom (*tantra*, V.2.70) and shuttle (*pravāṇi*, V.4.160); food stuffs like *guḍa* (IV.4.103), *phāṇita* (VII.2.18), milk (*kṣīra*), curds (*dadhī*), butter (*haiyaṅga-vīna*, V.2.23), vegetables (*śāka*, VI.2.128), cereals and pulses (*dhānyas*); utensils and pottery (*amatra*, IV.2.14; *kaulālaka*, IV.3.118) of various sizes to cook different quantities (III.2.33); intoxicating drinks like *madya* (III.1.100), *maireya* (VI.2.70), *surā* (II.4.25) prepared in distilleries (*āsuti*, V.2.112) and sold in booths (*śuṇḍika*, IV.3.76) and the costly *kāpiśāyana* imported from *Kāpiśī* in north Afghanistan (IV.2.99); gold and silver ornaments like *karnikā*, *lalāṭikā* (IV.3.65); gems (*maṇi*) like emerald (*sasyaka*, V.2.68), ruby (*lobitaka*, V.4.30) and cat's eye (*vaidūrya*, IV. 3. 84); metals as gold, silver, copper, lead and tin; arms and weapons (*śastra*, III. 2. 182), as spears (*śakti*, IV. 4. 59), javelins (*kāsū*, V. 3. 90), battle-axe (*paraśvadha*, IV. 4. 58), bows (*dhānu*), arrows (*iṣhu*, VI. 2. 107) and coats of mail (*varma*, III. 1. 25); musical instruments like lute (*vīṇā*, III. 3. 65), tabor (*maḍḍuka*) cymbals (*jbarjbara*, IV. 4. 56); and miscellaneous objects like images (*pratīkrīti*, V. 3. 96), gar-

land (*mālā*, VI. 3. 65), perfumery (IV. 4. 53; IV. 4. 54); balance (*tulā*, IV. 4. 91), weights (*māna*), measures (*pari-māṇa*), coins; and various conveyances like wagons (*śakata*), chariots (*ratna*) and boats (*nau*, IV. 4. 7), etc.

The *Kāśikā* illustrating Pāṇini VI. 2. 13 (*Gantavya-ṇayān vāṇija*) particularly mentions merchants who dealt in cows, bulls (*go-vāṇija*) and horses (*aśva-vāṇija*). Pāṇini himself refers to the famous breed of bulls from the Sālva country, (IV.2.136) and to the breed of mares from beyond the Indus (*pāre-vaḍavā*, VI. 2. 42).

There were some articles, trading in which was not approved, e.g. *soma-vikrayī*, *rasa-vikrayī* (*Kāśikā* on III. 2. 93, *Karmaṇīni vikriyaḥ*). The selling of *soma* plant and liquids as cow's milk was also banned by the law-books (cf. *Manu*, X. 86-89).

Trade depended upon provision of necessary stocks called by Pāṇini as *sambhāṇḍayate* (III.1.20; equal to *samāchayana* of Kātyāyana, and of ware-houses where they were stocked (*bhāṇḍāgāra*, IV.4.70).

## CH. IV, SECTION 7. EXCHANGE AND BARTER

Pāṇini refers to barter as *nimāna* (V. 2. 47), i.e. exchange of goods by agreement. What was given in exchange was considered as equivalent in price (*mūlya*) to what was received (*nimeya*). The *sūtra* *Samikhyāyā guṇasya nimāne mayat* seeks to regulate the grammatical formation expressing the barter ratio, on the pattern that the price of a portion of one thing is equal to so many portions of the other. For example, *dvimayam udaśvid yavānām*, "butter-milk is two-times the value of barley", i.e. two parts of barley is the price of one part of butter-milk (*udaśvit*). The comparison must be made with one portion of *nimeya* (thing to be bought) with several portions of the *nimāna*. The ratio must be  $x : 1$ , but never  $x : 2$ , or  $x : 3$ , etc., in which  $x$  denotes the *nimāna*.

**NATURE OF BARTER TRANSACTIONS**—The range of articles covered by barter mostly concerns simple things of ordinary use, such as food, clothing, and domesticated animals. Pāṇini refers to *vasana* or a piece of cloth as a medium of exchange, the thing purchased in exchange for cloth being called *vāsana* (V. 1. 27). In Hindi *bāsan* (=Skt. *vāsana*) means household utensils. It is thus indicated that the weavers exchanged pieces of cloth with utensils and other articles they needed. There is also reference to articles purchased for one *go-puchcbba* (*go-puchcbbena kṛitām*, *gaupuchcbbhikam*, V. 1. 19). Dr. D. R. Bhandarkar takes *go-puchcbba* literally to be the tail of a cow as a circulating medium, (*Anc. Ind. Num.*, p. 169-70), but *go-puchcbba* indicated the cow itself as in the analogous English term 'cattle-head'. The idiom had its origin in the ancient custom of transferring the ownership of a cow by holding her tail; the grazing tax levied per

head of cattle is still called *puchchbi* or tail-tax in north India. From the Vedic period the cow had formed a medium of exchange and a measure of value (*Vedic Index*, I. 196, 234). The term *gau-puchchbika* should thus be taken to have applied to an object received in exchange for one cow. Patañjali mentions an even bigger transaction negotiated in exchange for five cows (*pañchabbhir-gobbiḥ krītaḥ pañchaguḥ*, *Bhāṣya*, I. 2. 44; I. 216); and also the purchasing of a chariot for five *krośṭrīs* (VII.1.96; III. 273). The meaning of *krośṭrī* in *pañcha-krośṭrī-krīta-ratha* is not clear; it was perhaps the name of a particular stack of grain like *dhānya-gava* (bull-stack mentioned in *sūtra* VI.2.72. *Dvi-kambalyā*, *tri-kambalyā* cited on IV.1.22 refer to sheep purchased for two or three *kambalya* measures of wool, one *kambalya* being equal to 5 seers (*Kāśikā* on Pāṇini V.1.3). The *Kāśikā* cites *pañchāśvā* and *daśāśvā*, i.e. a female slave purchased for the price of five or ten horses (IV. 1. 22).

Mention is also made of *kanisa* (V. 1. 25), *śūrpa* (V. 1. 26) and *kbārī* (V. 1. 33) in connection with the purchase of commodities. Dr. D. R. Bhandarkar points out 'As these are clearly measures of capacity, the only inference possible is that such commodities were bought by means of these measures and most probably with grains which were the staple food of the province' (*Anc. Ind. Num.* p. 170). In several examples and counter-examples we find reference to other measures of weight used in bartering transactions, e.g. *dvyañjali*, *tryañjali*, purchased for two or three handfuls (*dvābbām añjalibhyāṁ krītaḥ*, *Kāśikā* on V.4.102, *Dvi-tribhyām añjaleḥ*). Similarly, an object purchased for two or three *āchita* measures was called *dvyačhitā*, *tryāchitā* (IV.1.22, *āchita* = 10 *bhāra* or 25 maunds). Pāṇini mentions *śaurpa* and *śaurpika* as applied to articles purchased for one *śūrpa* measure (V. 1. 26), to which Patañjali adds *dvi-śūrpa* and *tri-śūrpa* (II. 346, 348). The *goṇī* measure (I. 2. 50) was equal to two *śūrpas* and is mentioned in connection with barter in such

phrases as *pañcha-goṇih* and *daśa-goṇih*, 'purchased for 5 or 10 *goṇis*' (I. 226), the articles so purchased being cloth according to the *Kāśikā* (I. 2. 50).

The examples *pañcha-nauh*, *daśa-nauh* refer to a big deal in exchange for five or ten boatfuls of merchandise (*Kāśikā* on *Nāvo Dvigoḥ*, V. 4. 99). *Patañjali* refers to consignments of five hundred boats or five hundred rafts (*pañch-oḍupa-śatāni tīrnāni*, *pañcha-phalaka-śatāni tīrnāni*, *Bhāṣya*, II. 356), which point to a flourishing riverine traffic in goods which rich merchants (*parama-vāṇija*, *uttama-vāṇija* on Pāṇini V.2.13) must have handled.

## CH. IV, SECTION 8. MEASURES AND WEIGHTS

**TERMS**—The word *parimāṇa* in the *Ashtādhyāyī* denotes cubic and gravitational measures, and *pramāṇa* a lineal measure. According to Patañjali<sup>1</sup> *unmāna* is a measure of weight, *parimāṇa* of volume or capacity (*sarvatomānam*), and *pramāṇa* a lineal measure (*āyāma*). *Paulava* used in the *Artśāstra* (Cf. *Paulavādhyakṣha*, Superintendent of Weights and Measures) is unknown to Pāṇini.

*Parimāṇa* has a two-fold sense in the *Ashtādhyāyī*. In its technical (*rūḍha*) sense it excludes *saṅkhyā* or number as in *sūtra* V. 1. 19 where both words are used together; and in a more general sense it includes even *saṅkhyā*, as in *sūtras* III. 3. 20 and IV. 3. 156 (where the *Kāśikā* specially notes the comprehensive meaning of *parimāṇa*). *Parimāṇa* thus denoted weights and measures from which the numerals as also measures of time were excluded, as stated by Patañjali on the authority of an old *vārttika* (*jñāpakam tu kāla-parimāṇānām parimāṇāgrahaṇasya*, III. 321; VII. 3. 15). The lineal measures whenever they are mentioned are strictly distinguished as *pramāṇa*.

**SCALE**—A scale is called *tulā*, and articles weighed with a balance *tulya* (*tulayā sanimitam*, IV.4.91). The string fastened to the horizontal rod in order to lift the scales was called *pragraha* in the language of traders (*Pre vaṇijām*, III. 3. 52). The measures appear to have been made of wood. The word *dravya* found earlier in the *Atharvaveda* (V. 20. 2) and meaning 'wooden', is mentioned by Pāṇini to denote a measure (*Māne vayah*, IV. 3. 162) and is reminiscent of the times when wooden measures were in use. A tradition recorded in gram-

<sup>1</sup> *Ūrdhvamānam kilomānam parimāṇam tu sarvataḥ, Āyāmas tu pramāṇam syāt saṅkhyā bāhyā tu sarvataḥ, Bhāṣya*, V.1.19; II.343.

metrical literature credits a Nanda king with the standardising of weights and measures for the first time (*Nandopakramāṇi mānāni*, *Kāśikā*, II. 4. 21 and VI. 2. 14). This may have been due to meet the needs of a vast empire. By the time of Patañjali, measures like *droṇa*, *kbārī* and *āḍhaka*, etc., had been fixed as of an approved standard (*akṭaḥparimāṇanām arthbānāni vācbakā bhavanti naivādbike bhavanti na cha nyūne*, *Bhāṣhya*, I.4.13; I.216).

**WEIGHTS**—Pāṇini mentions the following weights:

(1) *Māśa*—It occurs as the name of a coin (V. 1. 34), and also denoted a corresponding weight, which was 5 *rattis* for gold and copper and 2 for silver (*Arth.* and *Mann*).

Pāṇini also refers to *nishpāva* (III. 2. 28), which finds mention in Jain literature (*Anuyogadvāra Sūtra*, 132) after *guñjā* and *kākiṇī* and was used for weighing gold, silver, jewels, pearls, etc.

(2) *Śāṇa*—It is referred to in two *sūtras* (V. 1. 35; VII. 3. 17) as the name of a coin. According to the *Mahābhārata* *śāṇa* was one-eighth of a *śatamāṇa* or 100 *rattis* (*Vanaparva*, 134. 14), and thus weighed  $12\frac{1}{2}$  *rattis*. Charaka refers to *śāṇa* as one-fourth of a *suvarṇa*, i.e. four *māśakas* or 20 *rattis* (*Kalpasthāna*, XII. 89), and its half-weight as *śāṇārdha* for weighing small doses of medicine (*Chikitsāsthāna*, XXVI, 248).

(3) *Bista* (IV. 1. 22; V. 1. 31). Pāṇini refers to articles purchased for two or three *bistas*. The *Amarakośa* explains *bista* as a synonym of *karṣa* or *akṣa* used for weighing gold. Charaka treats *karṣa*, *suvarṇa* and *akṣa* as synonyms. It appears that Pāṇini used *bista* as a synonym for *suvarṇa*. Thus *bista* was equal to 80 *rattis*.

(4) *Añjali* (V. 4. 102). In such phrases as 'purchased for two or three *añjalis*' (*dvya-añjali*, *try-añjali*) *añjali* is a definite measure. According to Charaka 16 *suvarṇas* make one *añjali*, which was also called *kuḍava*. Kautilya makes *kuḍava* as the basis of calculating higher weights, e.g. four *kuḍavas*==

one *prastha*, and four *prasthas*=one *āḍbaka* (*Arth.*, Vol. II.19). This is the same scale as in Charaka.

(5) *Āḍbaka* (V. 1. 53). It was a weight equal to 16 *kuḍavas* or 256 *karṣas*. Charaka makes *pātra* a synonym of *āḍbaka* (Kalpasthāna, XII.94). Pāṇini mentions both these in *sūtra* V. 1. 53, with reference to cooks able to handle so much quantity. Special mention is made of fields requiring one *pātra* of seed for sowing (V. 1. 46, *pātrikaṁ kṣhetram*, *pātrikī kṣhetrabhaktiḥ*).

(6) *Kaṁsa* (V. 1. 25; VI. 2. 122). Charaka explains *kaṁsa* as equal to 8 *prasthas* or 2 *āḍbakas*. In the older literature *kaṁsa* is said to have denoted a pot or vessel of metal (*Vedic Index*, 1.130).

(7) *Mantha* (VI. 2. 122). The exact weight is not indicated in any table, but Pāṇini mentions it after *kaṁsa* and before *śūrpa* as a measure-denoting word, and this makes it highly probable that *mantha* corresponds to *droṇa* with its synonyms of *kalāśa* and *ghaṭa* in the table of Charaka. A *mantha* would thus be equal to 4 *kaṁsas* or 8 *āḍbakas*.

(8) *Śūrpa* (V. 1. 26; VI. 2. 122). It was a measure equal to two *droṇas* (Charaka).

(9) *Kbārī* (V.1.33). Pāṇini refers to an article purchased for 1½ *kbārī* called *adhyardha-kbārīka*, and says that in the opinion of the Eastern grammarians *kbārī* becomes *kbāra* in a *Dvigu* compound (V. 4. 101, *Kbāryāḥ Prācām*). *Kātyāyana* mentions the latter form in the *vārttika kbāra-śatādyartham* (V. 1. 58). It appears that *kbārī* was the unit for measuring large heaps of corn, as in the expression *kbāra-śatika rāśi* and *kbāra-sahasrika rāśi*, heap of corn on the threshing floor weighing 100 and 1000 *kbārīs* (*Bhāṣya*, II. 353). A *kbārī* was certainly a higher weight than *droṇa* as Patañjali would have it (*adbiko droṇaḥ kbāryām*, II. 387; V. 2. 73). The *Arthaśāstra* defines *kbārī* equal to 16 *droṇas* (II. 19). In the table of Charaka 4 *droṇas* make 1 *kbārī*.

(10) *Goṇī* (I. 2. 50). A *śloka-vārttika* interprets *goṇī*

as a measure (*Bhāṣya*, I.2.50 I.226), *goṇīmātramidaṃ goṇiḥ*). According to Charaka *goṇī* is synonymous with *khārī*.

(11) *Bhāra*. It is referred to in *sūtra* VI. 2. 38, in connection with the derivation of *mahā-bhāra*. The exact significance is uncertain, but like other words of that *sūtra* it was a *saṃjñā* word with a definite meaning, and not a common noun. According to the table given in the *Amarakośa* (II.9. 87) 1 *bhāra*=8,000 *karsbas* or nearly 2½ maunds. This is supported by Kauṭilya defining *bhāra* as equal to 20 *tulās* (*vinīṭi-taulikō bhārah*, II. 19); a *tulā* being equal to 100 *palas*, a *bhāra* would be=2,000 *palas* or 2½ maunds. It appears that the quantity weighed at one time by a hand-balance was one *tulā* or 5 seers. *Bhāra* appears to be a head-load carried by a human being, and *mahā-bhāra* would indicate a quantity much in excess of this, most likely a cart-load.

(12) *Āchita* (IV.1.22; V.1.53). According to *Amara*, *āchita* is a cart-load (*śākaṭobbhāra āchitaḥ*, II.9.87), consisting of 10 *bhāras*, which is equal to 20,000 *palas*, or 25 maunds.

Other measures mentioned are *pāyya* (III. 1. 129), *kulija* (V. 1. 55), *śbaśṭhaka* (V. 3. 51), the exact significance of which is not known. The *pāyya* seems to be the measure called *pāi* in Punjab and Rajputānā and *pyā* in the U. P., used for measuring grain and having a capacity of 5 to 7 seers. Its smaller unit of about 3 seers is called *pāyali* in Bombay.<sup>1</sup> In *sūtra* VI. 2. 122 Pāṇini regulates the accentuation of *pāyya* in a numeral compound. *Kulija* is mentioned in the *Kauśika Sūtra* (12 and 43). *Śbaśṭhaka* seems to be related to *śbaśṭhāmśa* a sixth part, being the amount of grain taken by the king as tax. Its minimum unit seems to be a *droṇa* measure as indicated by the term *droṇa-māpaka*, an officer appointed to collect one-sixth share of the produce (*Kurudhamma Jāt.* III.276). *Vaba* (III. 3. 119) and *kumbha* (VI. 2. 102) are also mentioned without being specified as measures, but in the *Artha-*

<sup>1</sup> Cf. Burmese *pyi*, a measure, about a quart (B.S.O.S., X.p.39).

*śāstra kumbha* was 20 *droṇas* and *vaha* equal to 10 *kumbhas*.

*Paṇa* is also stated to be a *parimāṇa*, but not with reference to the famous coin of that name. It rather signifies bundles of vegetables tied together and sold as a unit, e.g. *mūlaka-pāṇa*, *barita-paṇa* (III.3.66).

## MEASURES OF LENGTH

**PRAMĀṆA**—*Pramāṇa* denotes a measure of length, except in VI.2.4, where it includes weights also, as *go-lavaṇa*, *aśva-lavaṇa*, salt for the cow and the horse, and in VI.2.12 where the length of time is also indicated by it as *Prāchya-saptasamaḥ*, *Gāndhāri-saptasamaḥ*, meaning a resident of seven years' standing in the *Prāchya* or *Gandhāra* country.

Pāṇini mentions the following measures of length:

(1) *Aṅguli* (V. 4. 86). 8 barley grains (*Arth.* II. 20, p. 106) =  $\frac{1}{4}$ th of an English inch.

(2) *Disbhi* and *Vitasti* (VI. 2. 31). Both are synonymous terms (*Bhāṣya*, quoting a *śloka-vārttika*, VI.2.1; III.122). *Vitasti* in the table of the *Arthaśāstra* = 12 *aṅgulas* (II. 20). But *disbhi* as a measure is of very rare occurrence in Indian literature. The word occurs in the Kharoshthī documents from Central Asia as *diṣbi*, corresponding to the Iranian measure *distay*, no doubt equivalent to a span (F. W. Thomas, *Some Notes on Central Asian Kharoshthī Documents*, B. S. O. A. S., XI, 1945, p. 547).

Patañjali also mentions the *śama* measure before *disbhi* and *vitasti* (*Bhāṣya*, V. 2. 37; II. 378), which according to the *Arthaśāstra* was equal to 14 *aṅgulas*. Probably the word *śambā* in Pāṇini (V. 4. 58) was connected with the *śama* measure, and indicated that kind of intensive ploughing in which the furrow was deepened to a *śama* or 14 *aṅgulas* of depth (*śambā karoti*).

(3) *Puruṣa*. Pāṇini mentions the *puruṣa* measure, preceded by a numeral, to denote depth (*Puruṣāt pramāṇe' nyatarasyām*, IV.1.24), e.g. *dvīpuruṣā*, *dvīpuruṣī*; *tripuruṣā*,

*tripurusbī parikbā*, a moat 2 or 3 'purusbas' deep; or *dvīpurusbham*, *tripurusbham udakam*; water 2 or 3 *purusba* measures deep (*Purusba-bastibhyām-aṇ cha*, V.2.38, *Kāśikā*). Anything equal to 1 *purusba* measure in depth was called *ṇpurusba*.

The *purusba* measure is stated in the *Arthaśāstra* to be of three kinds:

- (i) 5' 3" = 84 *aṅgulas* = 1 *vyāma* = 1 *kbāta purusba*, for measuring ropes, moats and depths;
- (ii) 6' = 96 *aṅgulas* = 4 *aratni* = 1 *purusba*, being the standard height of a man, probably to measure recruits for the army;
- (iii) 6' 9" = 108 *aṅgulas* = 4½ *aratni* = 1 *purusba* measure, for sacrificial altars.

Thus a moat of 2 *purusba* measures was 10½ ft. in depth and of 3 *purusbas* 15¾ ft. According to Baudhāyana the *purusba* measure or altars was slightly bigger: *Pañchāratniḥ purusbo vyāmaścha* (Baudh. S. XXX. 1. p. 389), i.e. a *purusba* or *vyāma* is equal to 5 *aratnis* or 7½ ft. (cf. also *Padamañjarī* on IV. 1. 24, *Pañchāratniḥ purusba iti Śulva-vidah*).

(4) *Hastin*. A *bastī* measure is to be determined from the standard measurement of an elephant of the best class at forty years age, viz. 'seven *aratnis* in height, nine *aratnis* in length, ten *aratnis* in circumference' (*Arth.* II. 31).

Kauṭilya, refers to the *bastī* measure twice, and at both places the length of the animal (*bastyāyāma*) is taken and not its height (p. 136). It shows that in general practice the *bastī* measure was based on the length of the animal, which was 9 *aratnis* = 13½ ft.

The height of a rampart in the *Mahāsutasoma Jātaka* (V. 477) is stated as 18 cubits (*aṭṭhārāsa-batṭha-pākārena*), or 27 feet, which would be equal to 2 *bastī* measures. Even today a fort-wall is built to be 18 cubits in height.

(5) *Kāṇḍa* (IV. 1. 23) is referred to as a measure for measuring the area of fields. The *Arthaśāstra* in the table of

field measures refers to 1 *daṇḍa*—six *kāṁsas* or 192 *aṅgulas*, i.e. 12 ft. (*Arth.* II. 20, p. 107). *Dvikāṇḍī*, *trikāṇḍī* *rajjuh*, cited in the *Kāśikā* shows that *kāṇḍa* was a submultiple of *rajjū*. The *Bālaṁanoramā* takes *kāṇḍa* and *daṇḍa* to be synonymous with a length of 16 *hastas* or 27 ft. The *Jātakas* mention the *Rajjugābaka* officers connected with land-surveying (*Kurudhama Jat.* III 276). 1 *rajjū* measure was equal to 10 *daṇḍas*. *Nivartanā* an ancient square measure for measuring the area of fields was equal to 3 *rajjus*. When *kāṇḍa* denoted merely a lineal measure it took the suffix *nīp*, as *dvikāṇḍī rajju*, but when a square measure or area of a field (*kshetrabbakti*) it took *ṭāp* in the feminine gender, as *dvi-kāṇḍā kshetrabbaktiḥ*.

(6) *Kishku*. It is included in the *Gaṇa-pāṭha* of VI. 1. 157 (*Pāraskara-prabhṛitini cha saṁjñāyam*), which on the authority of Patañjali (III. 96) may be taken as a genuine reading. According to the *Arthasāstra*, *kishku* was = 32 *aṅgulas* (2 feet) in ordinary usage, but = 42 *aṅgulas* for sawyers and blacksmiths. It was a measure employed in connection with camping grounds, forts and palaces (*Arth.* II. 20). It is referred to in the *Mahābhārata* (*Āraṇyakaparva*, 126.29).

(7) *Yojana* (V.1.74), a measure=4 *gorutas* or *krośas* =2,000 × 4 yards, or 4.54 British miles. (Cf. *Arth.* Trans. by Dr. Shamsastri, p. 118 with footnote).

A summary of lineal measures is given below; those in Italics being from Pāṇini.

8 Yavas	= 1 Aṅgula	= ¾ in.
12 Aṅgulas	= 1 <i>Dishti</i> or <i>Vitasti</i>	= 9 in.
2 Vitastis	= 1 Aratni	= 1½ ft.
42 Aṅgulas	= 1 <i>Kishku</i>	= 2' 7½"
84 Aṅgulas	= 1 <i>Khāṭa Pauruṣa</i>	= 5 1½ ft.
216 Aṅgulas	= 1 <i>Hastī Āyāma</i>	= 13½ ft.
192 Aṅgulas	= 1 <i>Dāṇḍa</i> = <i>Kāṇḍa</i>	= 12 ft.
10 Daṇḍas	= 1 <i>Rajju</i>	= 40 yds.

## CH. IV, SECTION 9. COINAGE

The *Ārbīya* section of the *Asbādhyāyī* (*Adhyāya* V, *pāda* 1, *sūtras* 19-37) furnishes some important data in respect of the oldest coinage of India.<sup>1</sup> The general sense governing these *sūtras* is that of *Tena krītam* (V. 1. 37), 'purchased with that', and *Tad-arhati* (V.1.63), 'worth that'. An attempt is made here to bring together the available evidence from the *sūtras* and their commentaries, and to discuss it with a view to identifying the denominations and value of those coins in the light of facts known from ancient Indian numismatic history.

**GOLD COINS—*Nishka* and *Suvarṇa*.**

1. *Nishka*. 'As early as the *Rigveda* traces are seen of the use of *Nishka* as a sort of currency, for a singer celebrates the receipt of a hundred *Nishkas* and a hundred steeds: he could hardly require the *Nishkas* merely for purposes of personal adornment. Later the use of *Nishkas* as currency is quite clear.' (*Vedic Index*, I. 455). The *Śatapatha Brāhmaṇa* refers to a *nishka* of gold (XI. 4. 1. 8). The *Jātakas* also mention *nishka* as a gold coin (*A. I. N.*, p. 48).

Pāṇini mentions *nishka* in the following three *sūtras*:

(i) *Asamāse nishkāḍibhyaḥ* (V.1.20), i.e. the *ṭhak* suffix is added in the sense of *tena Krītam*, etc. to *nishka* and others including *paṇa*, *pāda*, *māśa*, when not in a compound. For example, *naishkika* means 'purchased for' or 'worth' one *nishka*. Similarly *pāṇika*, *pāḍika* and *māśika*, denoted an article purchased for these coins.

(ii) *Dvi-tri-pūrvān-nishkāṭ* (V. 1. 30). It refers to a transaction concluded for two or three *nishkas*, for which

<sup>1</sup> Cf. D. R. Bhandarkar's *Lectures on Ancient Indian Numismatics*, p. 55, referred to here as *A.I.N.*

special forms were *dvi-nishkam*, *dvi-naishkikam*; *tri-nishkam*, *tri-naishkikam*.

(iii) *Śata-sabarāntāchcha nishkāt* (V. 2. 119), i.e. the affix *śhañ* comes in the sense of *matup*, after the words *śata* and *sahasra*, when they are prefixed to *nishka*. Thus in Pāṇini's time a possessor of one hundred *nishkas* was called *naishka-śatika*, and of one thousand *nishkas*, *naishka-sahasrika*. These appear to be real titles indicating the degree of opulence (*ādhyabhāva*, III. 2. 56) of the person so designated. The *Mbb.* also refers to these two degrees of wealth, consisting of 100 and 1000 *nishkas* (*śatena nishka-gaṇitam sahsreṇa cha sañmitam*, Anuśāsanaparva, 13. 43). Patañjali uses the terms *nishkadhana*, and *śata-nishkadhana* (owner of 1 *nishka* or 100 *nishka* pieces, II. 414). The *Kāśikā* adds that it was not usual to add the word *suvarṇa* before *nishka*, evidently because *nishka* was already understood as a gold coin (*Kāśikā*, V. 2. 110, *suvarṇa-nishka-śatam asy-āst-īty-anabbhidhānān-na bhavati*). The *Śatapatha Brāhmaṇa* states that the *nishka* offered by Uddālaka Āruṇi to his learned rival Svaiddāyana was of gold (*Ś. Br.* XI. 4. 1. 8). The *Kubaka Jātaka* refers to a farmer bringing his hundred *nishkas* of gold to an ascetic (1. 375). According to the *Mbb.* the unit of wealth was reckoned at 108 *nishkas* of gold (*sāshṭam śatam suvarṇānām nishkam ābuddhanām tathā*, Droṇaparva, 67. 10). The *Vessantara Jātaka* mentions a thousand *nishkas* as the amount for the redemption of *Vessantara's* son (VI. 546).<sup>1</sup>

*Nishka* as a gold coin also seems to have had its submultiples. Dr. D. R. Bhandarkar suggested that the 20,000 *pādas* offered by king Janaka as prize to the most learned Brāhmaṇa in the assembly of philosophers were gold coins related to *nishka* (*A. I. N.*, p. 60). He also supposed that this *pāda* coin was the same as that referred to in Pāṇini's *sūtra Paṇa-pāda-māsha-śatādyat*, V. 1. 34. While it is likely that king Janaka

<sup>1</sup> Dr. Bhandarkar, *A.I.N.*, pp. 48, 49. Also *Juṅha Jātaka* (No. 456, IV.97) referring to more than a 1,000 gold *nishkas*.

offered gold pieces called *pāda* as *dakṣhiṇā* it is not certain if *pāda* of *sūtra* V. I. 34 was a token coin of the gold *nishka*. From its juxtaposition with *paṇa* it may as well have been related to the silver *kārshāpaṇa*, in which series it is mentioned by Kautilya (*Arth.* II. 12, p. 84). The submultiple *pāda* coin of *nishka*, however, did exist, as Patañjali refers to it as *pannishka* and *pāda-nishka* (*Nishke chopśaṅkhyānam kartayam, sūtra* VI. 3. 56; III. 163, '*pāda* optionally becomes *pad* before *nishka*'). Manu defines *nishka* as equal in weight to four *suvarṇas* or 320 *rattis* (*chatuḥ-sauvarṇiko nishkaḥ, Manu*, VIII. 137). This would make a *pādanishka* synonymous with *suvarṇa*, but since no specimens of either the *nishka* or *suvarṇa* have yet come to light, it is not possible to indicate their relative weights. The *Kāśikā* instances *nishka-mālā* (VI. 2. 55), a necklace of *nishkas*, as indicative of wealth in coins (*hiranya-parimāṇa*).

2. *Suvarṇa*. Pāṇini does not name the *suvarṇa* coin, but the same is implied in *sūtra* *Hiranya-parimāṇam dhane* (VI. 2. 55), which refers to a person's wealth in terms of coined gold, e.g. *dvi-suvarṇa-dhanam* (*Kāśikā*).

Kautilya mentions *suvarṇa* as a weight equal to 1 *karṣa* or 80 *guṇjās* (=140 grains). Older specimens of punch-marked *suvarṇa* coins are wanting, but this theoretical weight is confirmed by the *suvarṇa* coins of the Gupta period which were struck after an indigenous weight standard. From such examples as *dvi-suvarṇa-dhana*, *adhyardha-suvarṇa*, *dvi-suvarṇa* (purchased for 1½ or 2 *suvarṇas*, V. 1. 29), it is certain that *suvarṇa* was a coin with a weight of 1 *karṣa*.

When the words *hiranya* and *suvarṇa* are found associated together, the former denotes bullion and the latter coined gold (*hirañña-suvarṇa* in the *Jātakas* and the *Arthśāstra*, V. 2, p. 245, A. I. N., p. 51).

In another *sūtra* Pāṇini refers to pieces of gold equal to a standard weight (*Jātarūpebhyah parimāṇe*, IV. 3. 153). Obviously such pieces were gold coins, as shown by its examples cited in the *Kāśikā*, viz. *bhāṭako nishkaḥ*, *bhāṭakam kārsāpaṇam*,

gold pieces or coins called *nishka* and *kārshāpaṇa* struck to a standard weight. Gold *kārshāpaṇas* are not mentioned elsewhere; and *Kāśikā*'s reference is either to *suvarṇa* coins of one *karsha* weight, or to the much later gold coins of *Kedāra* *Kushāṇas*, also referred to by it as *Kedāra* (V.2.120).

Whereas literary evidence supports the existence of a gold currency, so far not a single specimen of a gold punch-marked coin of any denomination has been found in any hoard. *Patañjali* is possibly hinting at gold currency when he refers to the purchase of two *droṇa* measures of corn with gold sufficient for it (*dvi-droṇena hiranyena dhānyaṁ krīṇāti*), or to the purchase of one thousand horses with the amount of gold sufficient for it (*sahasra-perimāṇam sāhasram; sāhasreṇa hiranyena aśvān krīṇāti*, *Bhāṣya*, II. 3. 18; I. 452).

3. *Suvarṇa-Māshaka*. The *māsha* coin in gold and copper weighed 5 *rattis* and in silver 2 *rattis* (cf. *A. I. N.*, p. 52; *Artb.* II. 18. p. 103). Specimens of silver and copper *māshas* are known, but *suvarṇa-māshaka* occurs only in literature. The *Udaya Jātaka* mentions a golden dish with *suvarṇa-māshakas*, a silver dish with the same, and a copper dish with silver *kahāpaṇas*, the three being mentioned in order of their diminishing value (*suvarṇa-māśaka-pūrāṁ ekāṁ suvarṇa-pātim*, *Udaya Jātaka*, IV. 106-8). A silver *kārshāpaṇa* (32 *rattis*) was thus lower in value than a gold *māshaka* (5 *rattis*). Gold and silver were thus related in the ratio of about one to seven in the period of the *Jātakas*.

**SILVER COINAGE—Śatamāna.** It is referred to in the *sūtra* *Śatamāna-vimśatika-sahasra-vasanād-aṇ* (V. 1. 27), i.e. the affix *aṇ* comes after *śatamāna*, *vimśatika* and others in the prescribed sense, e.g. *śatamānena krītaṁ śatamānam*, an article purchased for one *śatamāna* was called *śatamāna*. From the *Śatapatha Brāhmaṇa* (V. 5. 5. 16 *tasya trīṇi śatamānāni hiranyāni dakṣiṇā*; VIII. 2. 3. 2, *hiranyam dakṣiṇā suvarṇam śatamānam tasyoktam*), it is evident that *śatamāna* was also a gold coin. According to the *Vedic Index*, *māna*

in Vedic literature was a measure of weight equivalent to the *kṛishṇala* or *raktikā* (II. 152). Thus the weight of *śatamāna* taken literally would be 100 *rattis*.

But the *śatamāna* was more properly related to silver coinage. In the *Śatapatha Brāhmaṇa* (XIII. 2. 3.2) it is stated: 'Gold and silver will be the fee for the sake of variety to correspond to the manifold forms of the deity, and that *dakṣhinā* will be *Śatamāna*, since a human being lives for one hundred years' (*Rajataṇi biranyaṁ dakṣhinā nānārūpatayā śatamānaṁ bhavati śatāyur-vai purnashab*, ŚB., XIII.4.2. 10). Here is a definite reference to a silver *śatamāna* coin of 100 parts, i.e. 100 *ratti* wt. Manu mentions the silver *śatamāna* as equal to ten *dharāṇas* or 320 *rattis* in wt. (VIII. 137), but no actual specimen of a silver punch-marked coin conforms to the extraordinary weight of 560 grains.

The heaviest silver punch-marked pieces so far discovered are the oblong bars found by Sir John Marshall in the Bhira mound at Taxila along with two coins of Alexander the Great and one of Philip Aridaeus, 'fresh from the mint' and therefore assignable to about the middle of fourth century B. C. Their weights range between 155.7 grains (in the case of much worn pieces) to 177.3 grains (Allan, *Anc. Ind. Coins*, p. xiii, also pp. 1-2). Allan connects them, without good reason, with the weight standard of the Achaemenid *siglos* and thinks that they were struck as double *sigloi*. Now, the maximum weight of the Persian *sigloi* is said to be 86.45 grains and that of a double *siglos* could not have exceeded 173 grains, which makes Allan's identification untenable (cf. Durga Prasad, *Science and Culture*, 1938, pp. 462-65). In terms of an Indian weight standard these oblong bars approximate to 100 *ratti* or 180 grains weight, the heaviest one of 177.3 grains being equal to 98.5 *rattis*, a *ratti* weighing 1.8 grs. Taking the literal meaning of *śatamāna*, 'of the weight of 100 *māna*' or *kṛishṇalas* as suggested in the *Vedic Index* (II. 152), it would appear that the Takshaśilā bent-bar coins (*śalākā*) represent the ancient

*śatamāna* coins of silver. They are struck with symbols with regular orientation and were part of the oldest punch-marked currency. Kātyāyana mentions *śatamāna* in a *vāttika*<sup>1</sup> to regularise such formations as *adbyardba-śatamānam*, *dvi-śatamānam* (purchased for 1½ or 2 *śatamānas*) which suggests that the *śatamāna* was a current coin up to the time of Kātyāyana (cf. also *Bhāṣya* on V. 1. 29).

*Śāṇa*. Pāṇini refers to a range of prices in terms of *śāṇa* coins, such as 1½ *śāṇa* (*Sāṇād-vā*, V.1.35, *adbyardbaśāṇam*, *adbyardba-śāṇyam*), 2 *śāṇas* (*dvi-śāṇam*, *dvaishāṇam*, *dvi-śāṇyam*), and 3 *śāṇas* (*tri-śāṇam*, *traiśāṇam*, *tri-śāṇam*, V.1.36), to which Patañjali adds *pañcha-śāṇam* and *pañcha-śāṇyam* (*Bhāṣya*, II.350). This shows *śāṇa* to have been quite a popular coin. Pāṇini also mentions *śāṇa* as a *parimāṇa*, i.e. weight (*Parimāṇāntasyāsamjñā-śāṇayor*, VII. 3. 17), but such examples as *dvai-śāṇa*, purchased for 2 *śāṇas*, show that it was the name of a coin. Charaka refers to *śāṇa* as a weight equal to one-fourth of a *suvarṇa* or *karṣa*, i.e. 20 *rattis*. This may have been a gold *śāṇa* of which we are not certain. But *śāṇa* as a real silver coin was one-eighth of one *śatamāna* as stated positively in the *Mahābhārata* (*ashtau śāṇāḥ śatamānam vahanṭi*, *Āraṇyakaparva*, 134.14); its weight therefore was 12½ *rattis* or 22.5 grs. (Cf. J. N. S. I., XIV, pp. 22-26).

Pāṇini refers to certain taxes levied in east India (VI.3.10), on which the *Kāśikā* cites *sūpe-śāṇaḥ* (VI.2.64 and VI.3.10), a special cess at the rate of one *śāṇa* coin per kitchen (*sūpa*) or household.

*Kārśbāpaṇa*. Pāṇini refers to *kārśbāpaṇa* in *sūtra* V. 1. 29 (*Vibhāṣhā kārśbāpaṇa-sahasrābhyām*)<sup>2</sup> regulating the forms

<sup>1</sup> *Vār. Suvarṇa-śatamānayor=apasaṅkhyānam.*

*Bhāṣya. Adbyardba-śatamānam, adbyardba-śatamānam, dvi-śatamānam, dvi-śatamānam.*

<sup>2</sup> That the word *kārśbāpaṇa* was also included in the *Ardbachādi* group (II.4.31) may be stated on the strength of Patañjali (I.480) using both the masculine and neuter forms *kārśbāpaṇaḥ*, *kārśbāpaṇam*.

*adbyardha-kārshāpaṇam*, *dvi-kārshāpaṇam*, purchased for  $1\frac{1}{2}$  or 2 *kārshāpaṇa* coins.

The word *kārshāpaṇa* is unknown in the Samhitā or Brāhmaṇa literature (excepting once in the *Sāmavidhāna Br.* III.7.9.) and is peculiarly a term of classical Sanskrit coined in the Sūtra period.

*Kārshāpaṇa* was the name of the silver punch-marked coin of which numerous hoards have been found in various parts of India. It was the standard medium of exchange from about the sixth century B. C. downwards. Like the present rupee it had its sub-multiples, of which Pāṇini mentions  $\frac{1}{2}$  as *ardha* (V. 1. 48, *ardha-śabdo rūpakārdhasya rūdbhiḥ*, *Kāśikā*) and *bbāga* (V. 1. 49 *bbāga-śabdo' pi rūpakārdhasya vāchakah*);  $\frac{1}{4}$  as *pāda* (V. 1. 34); and  $1\frac{1}{16}$  as *māsha* (V. 1. 34). When Pāṇini refers to big sums (V. 1. 27; 29; 34) without specifying the name of the coin it is the silver *kārshāpaṇa* that is meant as being the standard coin of his time. The *Jātakas* also show that the *kārshāpaṇa* was then the standard coin of the country (cf. D. R. Bhandarkar, A. I. N. p. 79). In *sūtra* V. 1. 21 Pāṇini teaches a suffix after 100 (*śata*) without the name of a coin in the sense of 'purchased therewith'; in *sūtra* V. 1. 27, after 1000 (*sahasra*); and in V. 1. 29 after 1,500 (*adbyardha-sahasra*) and 2000 (*dvi-sahasra*), etc. In all these cases the standard coin, viz. the silver *kārshāpaṇa*, is to be understood. The *Gaṅgamāla Jātaka* likewise mentions big amounts of a hundred thousand and fifty thousand pieces where *kārshāpaṇa* is understood. Similarly, the *Arthaśāstra* (p. 368) refers in a descending order to *śata-sahasra*, *pañchāśat-sahasra*, *daśa-sahasra*, *pañcha-sahasra*, *sahasra*, *śata* and *viṃśati* coins, which meant so many silver *paṇas* (*kārshāpaṇas*). The same linguistic form is known to Patañjali who mentions *śata-sahasra* coins without the word *kārshāpaṇa* (II. 1. 69. 5; I. 404), and refers to a hundred pairs of *sāris* purchased for one hundred, i.e. 100 silver *kārshāpaṇas* (*śatena kṛitam śatyam śātaka-śatam*, *Bhāshya*, V.1.21; II.3.46). On Pāṇini V.2.45 (*Tad-asminn-adbi-*

*kam-iti daśantād-daḥ*) Patañjali definitely says that the phrase *ekādaśam śatam* and *ekādaśam sahasram* are understood to refer respectively to a hundred and a thousand *kārshāpaṇas* exceeded by eleven. Similarly *śata* in V. 1. 34 prefixed by *adhyardha*, *dvi* and *tri* would refer to 150, 200 and 300 *kārshāpaṇas*, and the same standard coin is meant in *sūtra* V. 4. 2 in such phrases as *dvi-śatikām daṇḍitaḥ*, 'fined two hundred (*kārshāpaṇas*).

It is worth noting that the *Jātakas* invariably refer to the name of the current coin as *kaḥāpaṇa*. The *Aṣṭādhyāyī* uses both names, *kārshāpaṇa* (V. 1. 29) and *paṇa* (V. 1. 34); whereas the *Arthaśāstra* uses hundreds of times only the shorter form *paṇa*. It is possible that some kind of chronological sequence is indicated here. Kātyāyana records one more name for *kārshāpaṇa*, viz. *prati*, an article purchased for one *kārshāpaṇa* being called *pratika* (*kārshāpaṇād vā pratiś-cha*, V. 1. 25; II. 347). *Prati*, a much later name for *kārshāpaṇa*, is also mentioned in the *Sabhāparva* (*pratikaṁ cha śatam vṛiddhyā dadāsy-ṛiṇam anugraham*, 5.68, i.e. a relief loan at 1 p. c. interest), and also in the Nasik Cave Ins. of Ushavadāta recording 1 *pratika* interest on 2000 and  $\frac{3}{4}$  *paḍika* on 1000 *kaḥāpaṇas* (Ep. Ind. VIII. 82). [See also J.N.S.I., VII. 32].

### The Table of Kārshāpaṇa

In order to understand more clearly the lower denominations of the *kārshāpaṇa* which Pāṇini has mentioned, a comparative table of *kārshāpaṇa* and its sub-multiples is given below. Our best source is a passage in the *Arthaśāstra*<sup>1</sup> (*Arth.* II.12, p. 84), and another in the *Gaṅgamāla Jātaka*<sup>2</sup>, which together with the evidence from the grammatical literature furnish the following names:

<sup>1</sup> पणमर्चपणं पादमष्टभागमिति । पादाज्जीवं ताम्ररूपं माषकमर्धमाषकं काकिणी-मर्धकाकिणीमिति । (अर्थ शास्त्र २।१२)

<sup>2</sup> तेन हि पञ्चास-सहस्रानि चत्तारो-तिस-वीसति-दस-पंच-चत्तारि-तयो द्वे एको कहापणो, अड्डो पादो चत्तारो मासका, तयो द्वे एको मासको तिपुच्छ । सर्व्वं पटि-ज्जिपित्वा अड्डमासको ति वुत्ते आम देव एतत्तं महत्तं धनं (गंगमाल जातक ३।४४८)।

Division	Pāṇini	Jātakas	Arthśāstra
1 1	Kārshāpaṇa and Paṇa	Kaḥāpaṇa	Pana
1 2	Ardha; also called Bhāga	Aḍḍha	Ardha-Paṇa
1 4	Pāda	Pāda; Chattāro Māsakā.	Pāda
1 8	Dvi-Māsha	Dve-Māsakā	Ashtabhāga
1 16	Māsha	Eka-Māsaka	Māshaka
1 32	Ardha-Māsha	Aḍḍha-Māsaka	Ardha-Māshaka
	Kakaṇi (Vārt. on V. 1. 33)	Kākiṇi	Kākaṇi
	Ardha-Kākaṇi (Vārt.)		Ardha-Kākaṇi

(2) HALF-KĀRSHĀPAṆA (*Ardha* and *Bhāga*)—Pāṇini refers to *ardha* (V.1.48) as the name of a current coin. *Kāśikā* explains it as a half *kārshāpaṇa*. A small transaction involving a profit, income, tax, etc. of an *ardha* was called *ardbika*. The *Mahāsupīna Jātaka* mentions *aḍḍha* and *pāda* as current coin names coming after *kārshāpaṇa* (*Kaḥāpaṇ-aḍḍha-pāda-māsa-rūpādini*, *Jāt.* 1. 340). Kauṭilya refers to *ardhapana* and *Kātyāyana* to *ardha* as a coin by itself (*Tiṭhan ardhāch-cha*, *Vārttika* on V. 1. 25); that which was purchased for an *ardha* was called *ardbika* or *ardbiki*.

Another important name of the *ardha* coin given in the *Ashtādhyāyī* is *bhāga*, to indicate the main sub-multiple of a *kārshāpaṇa* (*Bhāgād yach cha*, V. 1. 49; *Kāśikā*, *Bhaga-śabdo'pi rūpak-ārdhasya vāchakah*).

(3) QUARTER-KĀRSHĀPAṆA—Pāṇini refers to *pāda* in *sūtra* V. 1. 34. Patañjali calls it *pādika* paid as daily wages to a labourer (*karmakarāḥ kurvanti pādikam-ahar-lapsyāmābhi*, *Bhāshya*, I.3.72; I.293). The terms *dvipadikā* and *tripadikā* signifying two and three *pādas* respectively are obviously implied in *sūtra* V. 4. 1 (see *Bhāshya*, III. 362 for these names;

(4) **ONE-EIGHTH KĀRSHĀPAṆA**—Kauṭilya refers to it as *asbṭabbhāga*, an actual coin related to the *paṇa* (*Arth.* II.12, p. 84). Manu calls it *pādārdha* (VIII. 404). The *Asbṭādhyāyī* implies *dvi-māsha* in *sūtra* V. 1. 34; the *Arthasāstra* makes it a unit of weight in the *Suvarṇa* series (p. 103). The *Jātakas* are silent about one-eighth *kāhāṇa*.

(5) *MĀSHA*—*Sūtra* V. 1. 34 mentions *māsha* after *paṇa* and *pāda*. *Māsha* was both a silver and a copper coin. For purposes of grammatical formations the word-form would remain the same. A silver *māsha* was one-sixteenth part of a *kārshāpaṇa* and weighed 2 *rattis* (3.6 grs.), as stated by Manu (VIII. 135, *Dve kṛishṇale samadhṛito vijñeṇo rauṇya-māsha-kaḥ*). Actual specimens of silver *māsha* coins (*rauṇya-māsha*) have now been found in a hoard at Bhīr mound, Takṣaśilā, and at Ṭhaṭhārī in C.P. They are minute coins with a single symbol stamped on one side, weighing 2 to 3 grains and with a diameter of .2 inches (*J.N.S.I.*, VIII. 41; XIII, 168).

267

which shows his acquaintance with an actual coin called *ardha-māsha*. This *ardha-māsha* was a copper coin.<sup>1</sup> The *aḍḍhamāsaka* coin is referred to in the *Jātakas* (*Aḍḍhamāsaka Jāt.*).

Pāṇini does not mention the *kākaṇī* and *ardha-kākaṇī*, but Kātyāyana knows them as current coins (*vārttika* on V. 1. 33).<sup>2</sup> Both *kākaṇī* and *ardha-kākaṇī* are mentioned in the *Arthaśāstra* (II. 12) as copper pieces, *kākaṇika* being the charge per day for stamping weights and measures (II. 19). The *Jātakas* know of the *kākaṇī* coin, e.g. the *Cbullaseṭṭhi Jātaka* states one *kākaṇī* as the price of a dead mouse (I. 120), and the *Sālittaka Jātaka* refers to village boys giving a *kākaṇī* coin to a cripple saying 'Make an elephant,' 'Make a horse' (*Jāt.*, I. 419). It is possible that the *kākaṇī* came into use after Pāṇini's time, otherwise such a singular grammatical formation would not have escaped his notice.

**VIMŚATIKA**—(a silver punch-marked coin of 20 *māshas*). Pāṇini knows of a heavier *kārshāpaṇa* called *vimśatika* equivalent to 20 *māshas* as against the standard *kārshāpaṇa* of 16 *māshas*. *Vimśatika* is mentioned in the following *sūtras*:

*Satamāna-vimśatika-sahasra-vasanād-ay* (V. 1. 27);

<sup>1</sup> I once thought that an *aḍḍhamāsa* of silver (of 1 *ratti*=1.8 grs. theoretical weight) would be too minute to be handled and did not exist. Recently a number of minute coins were brought to me, obtained by the gold-washers in the Indus near Jahangira. The lot contains several specimens of silver *ardha-māshakas*, weighing 1.518, 1.132, 1.577, 1.22 grs. etc., and .160" dia. in size. One silver specimen weighs .4783 grains and is .102" in size. Nevertheless it is a regular specimen with a symbol consisting of seven globules on one side. It is an *ardhakākaṇī* coin in silver. I am inclined to believe that a *kākaṇī* and an *ardha-kākaṇī* coin in silver also existed. This would be true of the post-Pāṇinian, or the Mauryan epoch. For these and other specimens from Ujjain, see J.N.S.I., XIII, 164-174.

<sup>2</sup> *Vārtt. Kākanyāi-chopasamkhyānam.*

*Bhāṣya*—*Adhyardha-kākaṇīkam, dvi-kākaṇīkam.*

*Vārt.*—*Kevalāyāi cha.*

*Bhāṣya*—*Kevalāyāi-ch-eti vaktavyam, kākaṇīkam.*

i.e. an article purchased for one *kākaṇī* coin, or 1½ *kākaṇī* or 2 *kākaṇīs*.

*Vimśatikāt kbaḥ* (V. 1. 32).

The first rule states that the affix *an* is added to *vimśatika* and others in the sense of 'purchased for so much' (and other meanings taught upto V. 1. 63). For example, *vaimśatika*, 'that which is purchased for a *vimśatika* coin'.

The second *sūtra* enjoins *kba* affix in the same sense after the word *vimśatika* when preceded by the word *adhyardha* or a numeral in a *Dvigu* compound, e.g. *adhyardha-vimśatikīnam*, *dvi-vimśatikīnam* and *tri-vimśatikīnam*, purchased for 1½, 2 and 3 *vimśatika* coins.

Again in *sūtra* V. 1. 24 (*Vimśati-trimśadbhyām dvunn-asamjñāyām*) Pāṇini mentions *vimśatika* and *trimśatka* as counter-examples which in this context were names (*samjñā*) of coins. Thus Pāṇini knows of these two special coins in a very intimate manner. The *vimśatika* as its name implies was a coin of twenty, and the *trimśatka* of thirty parts, i.e. *māshas*.

As to the real nature and identity of the *vimśatika* coin, the following evidence throws light on a coinage system based on twenty divisions :

(1) The commentary *Samanta-pāsādikā* of Buddhaghosha on the *Vinaya-Piṭaka* tells us that in the time of king Bimbisāra in the city of Rajagṛiha a *kabhāpaṇa* was equal to twenty *māsakas*, wherefore one *pāda* equalled five *māsakas*.<sup>1</sup> This statement is confirmed by *Sāratthadīpanī* of Sāriputta Thera, a commentary on the *Samanta-pāsādikā*.<sup>2</sup>

(2) The *Gaṅgamāla Jātaka* (*Jāt.* III. p. 448), while mentioning the sub-divisions of a *kārshāpaṇa*, speaks of a four-*māshaka* piece as being lower in value than a *pāda*, which is possible only if the *pāda* coin be equal to five *māshakas*, being

<sup>1</sup> *Tadā Rajagabe viśatimāsako kabāpaṇo hoti, tasmā pañcamāsako pādo*. See, *Some New Numismatic Terms in Pali Texts*, by Mr. C. D. Chatterji M.A., J.U.P.H.S., VI, May 1933, p.157. Also Dr. Bhandarkar, A.I.N., pp. 111, 186; Dr. D. C. Sirkar, J.N.S.I., XIII. p. 187.

<sup>2</sup> *Iminā va sabba-jaṇapadesu kabāpaṇassa viśatimo bhāgo māsako ti*. (Mr. Chatterji, *op. cit.*, p. 158).

one quarter of a *kārshāpaṇa* of twenty *māśakas*. (Dr. Bhandarkar, A.I.N., p. 112).

(3) The *Yājñavalkya-Smṛiti* mentions a *pala* weight equal to four or five *suvarṇas* (I.364) on the basis of which the *Mitākṣarā* notes : *Pañcha-suvarṇa-pala-pakshe viṃśati-māśaḥ paṇo bhavati* (Yāj. Smṛiti, I.365), i.e. in the case of a *pala* equalling five *suvarṇas*, the *paṇa* has a weight of twenty *māśas*.

(4) The *Kātyāyana-Smṛiti* also preserves a tradition that a *kārshāpaṇa* equalled twenty, and not sixteen *māśas*. (Bhandarkar, A.I.N. p. 186).

(5) Patañjali cites another teacher (*apara*) stating that 'in times past sixteen *māśas* made one *kārshāpaṇa*', implying that in his time the *kārshāpaṇa* of 20 *māśas* or *viṃśatika* was known in his locality. It seems that both *viṃśatika* and *kārshāpaṇa* were in circulation in different localities in the same period. It is interesting to note that actual specimens of *viṃśatika* weight coins and their lower denominations have been found in the Pañchāla coinage (Cunningham, *Coins of Ancient India*, p. 81).

The passages from the above sources of different periods show that the *viṃśatika* was a current coin in certain localities, e.g. Magadha and Pañchāla, as the *kārshāpaṇa* of 16 *māśas* was in other localities. The Pāli texts definitely describe it as *vīsati-māsaka kabāpaṇa*, whereas Pāṇini calls it simply a *viṃśatika*, as a specific name (*saṃjñā*) in popular usage. He is thus referring to the *viṃśatika* and the *kārshāpaṇa* as two varieties of coins of different values.

**ACTUAL SPECIMENS OF VIMŚATIKA COINS**—B. Durga Pd. of Banaras informed me that he obtained heavy *kārshāpaṇas* of silver from Rājgīr. These coins weigh from 78 to 80 grains. They are now in the Lucknow Museum (acquired as part of the late numismatist's collection), and from their fabric and symbols it can be said with certainty that they represent an earlier stage than the 32 *ratti kārshāpaṇas*.

The period of transition from 20 *māshas* weight to 16 *māshas* seems to be the epoch of the Nanda kings who are credited with the standardisation of weights. It were most probably the Nandas who initiated a bold reform in the punch-marked currency in the matter of weight, symbols and fabric. All these factors become evident even by a superficial comparison of the *vimśatika* coins with the standard *kārshāpaṇas* of 16 *māshas* and 5-symbol groups.

**TRIMŚATKA**—Besides *vimśatika*, Pāṇini also mentions another specific coin named *trimśatka* (V. 1. 24), a name which is found only in the *Ashtādhyāyī* and not elsewhere. The *trimśatka* apparently stands for a coin of 30 *māshas*, or 60 *rattis*. B. Durga Prasad obtained from Bihar specimens of silver punch-marked coins, weighing 104 grains and 105.7 grains or about 58 *rattis*, which should be identified as *trimśatka* (cf. J.U.P.H.S., July, 1939, p. 33.).

The *vimśatika* and *trimśatka* coins also appear in copper, weighing respectively  $20 \times 5 = 100$  and  $30 \times 5 = 150$  *rattis*. As seen in the Pañchāla coinage, the heavier issues in copper continued in use much longer than in silver.

The *vimśatika* seems to have had its own sub-multiples of  $1\frac{1}{2}$ ,  $1\frac{1}{4}$ ,  $1\frac{1}{8}$ ,  $1\frac{1}{16}$ , all related to the weight standard of 40 *rattis* in silver and 100 *rattis* in copper.

**RŪPA** (Punch-marked symbols)—A large number of symbols are found stamped on ancient *kārshāpaṇa* coins,<sup>1</sup> on account of which they have been called punch-marked, corresponding to *signati argenti* of the Greek historian Quintius Curtius. The mode of manufacturing these coins was first to get ready a hammered sheet, which was then cut into strips, and sub-divided into lengths of approximately the

<sup>1</sup> The work of correctly identifying these symbols was initiated by Mr. W. Theobald (JASB, 1890 & 1901). Recently B. Durga Prasad illustrated about 564 such symbols from a large number of well preserved coins and described them in his Essay entitled 'Classification and Significance of the Symbols on the Silver Punch-marked Coins of Ancient India', *Numismatic Supplement*, No. XLV, 1934, p. 9ff.

desired weight, which was adjusted by clipping the corners when necessary.' (Smith, *Cat. of the Coins in the Indian Museum*, p. 134). After this the metallic pieces were subjected to the process of stamping symbols on them by means of a separate punch for each symbol. It is this particular stage in the process of manufacture to which Pāṇini refers in the following *sūtra* :

*Rūpād ābata-praśamsayor-yap* (V. 2. 120)

The word *rūpa* takes the affix *yap* in the sense of *ābata*, 'impressed', or *praśamsā*, praise, e.g. *Rūpyo gauḥ*, a bull of praiseworthy form; and *ābataṁ rūpaṁ asya rūpyo dīnāraḥ*, *rūpyo kedāraḥ*, *rūpyam kārshāpaṇam*.

The first two examples of *dīnāra* (*Denarius*) and *kedāra* (coins of the Kedāra Kushāṇas, 3rd-4th century A.D.) do not seem to be in order, as these coins were cast in moulds and not punched. The example *rūpyam kārshāpaṇam* was a genuine old example. According to the *Kāśikā* the symbols on such coins were struck with a punch (*nigbātikā-tāḍanā-dinā*). A metal piece as long as it was not stamped (*ayantrita*) had no use as currency.

The word *rūpa* in Pāṇini's *sūtra* being in the singular number, points to one symbol stamped with one punch at a time, i.e. for each symbol separate punching was required. We know from the standard silver coins of 16 *māshas* that each bears a group of five symbols of great variety, and each figure was stamed with its particular punch. On most of the specimens the two symbols in each group are the sun and a six-armed symbol (*śaḍvara*), but no definite order seems to have been observed in punching and there is considerable overlapping of symbols. Some of the names of the *rūpas* or figures on these coins were the same as the names of marks (*lakṣaṇas*) used in branding cows, as already pointed out (Ch. IV, Sect. 3).

Sometimes the term *rūpa* was used for the coin itself, as in the *Mahāsuṇḍina Jātaka* (I.340). Kauṭilya mentions an officer called *Rūpadarśaka* (*Arth.* II. 9, p. 69; 245), Exa-

miner of Coins. In his comment on a *vārttika* to Pāṇini's *sūtra* I. 4. 52, Patañjali also refers to an officer called *Rūpatarka* whose duty was to scrutinise the current *kārshāpaṇa* coins (*paśyati Rūpatarkaḥ kārshāpaṇam*, I.337).

#### CH. IV, SECTION 10. BANKING AND LOANS

**WEALTH**—Wealth is referred to by several terms, such as *dhana*, *sva*, *dravya*, *mūla*, but a new classical word unknown in the Brāhmaṇa and Aranyaka literature was *svāpateya* (property), corresponding to Pāli *sāpateyya*, of which Pāṇini gives a rather legal definition as *svapatau sādhu* (IV.4.104), that in which the owner (*sva-pati*) has valid title (*sādhu-tā*).

Pāṇini refers to a wealthy man as *āḍhya* (III. 2. 56), corresponding to Pāli *aḍḍho*. The Jātakas also refer to *ibbhas* (Skt. *ibhya*) who appear to be of the same status as *aḍḍhas*. Wealth was indicated in terms of coined gold or silver, e.g. Pāṇini mentions *naishka-śatika*, one whose wealth amounted to 100 *nishkas* of gold, and *naishka-sahasrika*, to 1000 *nishkas* (V. 2. 119). Pāṇini also refers to persons possessing one hundred (*aika-śatika*) or one thousand (*aika-sahasrika*, V. 2. 118), evidently *kārshāpaṇas* of silver. The Jātakas refer to fabulous treasures of eighteen crores or fifty-four crores, as in the case of *setṭhi* Anāthapiṇḍaka.

**MONEY-LENDING**—Pāṇini mentions a creditor as *uttam-arna* (I.4.35); a debtor as *adhamarna* (III.3.170); loan as *ṛiṇa* (IV.3.47); interest as *vṛiddhi*; repayment as *pratidāna* (I.4.92); and surety as *pratibbū* (III.2.179; II.3.39).

The Jātakas refer to lending money at interest (*iṇa-dāna*) as a means of lawful occupation, together with tillage, trade, and harvesting as four honest callings (*Jāt.* IV. 422; *Cambridge History of India*, Vol. I, p. 218). Pāṇini distinguishes interest on a loan as *vṛiddhi* (V. 1. 47) from usury as *kusīda* (IV.4.31), which is condemned (*Prayacchbati garbyam*, IV.4.30). The special term *kusīdika* was meant to mark out the usurer for social opprobrium. The odium attaches even to his family, singled out as *kusīdāyī* (wife of a usurer, IV.1.37).

Kātyāyana calls usurious interest *vṛiddbusbi* and the usurer *vārdbusbika* (IV.4.30.3).

**INTEREST**—Pāṇini mentions a definite rate of interest in the expression *daśaikādaśa*, the creditor who gets back 11 (*ekādaśa*) by lending 10 (IV.4.31). This amounts to the rate of about 10 percent considered usurious, and is condemned as such (*garhya*) by Pāṇini. Kauṭilya takes the lawful rate of interest to be  $1\frac{1}{4}\%$  per month, (*sapāda-panā dharmyā māsa-vṛiddbiḥ paṇa-śatasya*, *Arth.* III.11). Manu (VIII.140-43) and Yājñavalkya quote the same rate and call it as one-eightieth (of the principal) per month. Vasishṭha (II.51) states the legal rate to be five *māshas* a month for twenty *kārshāpaṇas*. Taking the latter to be a *viṃśatika* *kārshāpaṇa* of twenty *māshas*, the rate of interest works out to one-eightieth part, the same as in Manu. Nārada and Gautama agree with the above, and so also Vyāsa, if the loan is against a pledge. Thus 15% was regarded as an equitable rate of interest (*dharmyā vṛiddbi*). Baudhāyana prescribes 20% as interest (J.B.O.R.S., 1920, p. 117). In contrast to this the rate of the *daśaikādaśa* loans working out to a little less than 11% was considered reproachful in Pāṇini's time. Patañjali cites two more examples of usurious loans, in which the lender earned exorbitant amounts as interest and was rightly censured as *dvai-guṇika* and *traiguṇika* (IV.4.30; II.331). These must have referred to short term petty loans.

Pāṇini also refers to a much lower rate of interest of half a *kārshāpaṇa* per month called *ardha* and *bbāga* (V.1.48-49) which was equivalent to 6% per annum, the loan transaction being called *ardhika* or *bbāgika*. The *Kāśikā* explains it either as  $\frac{1}{2}$  percent (*bbāgikam śatam*) or  $2\frac{1}{2}$  percent (*bbāgikā viṃśatiḥ*) per month, which would make the rate of interest vary from 6% per annum to 30%.

Loans were also named from the amount of interest earned on them, e.g. *pañcaka*, i.e. a loan earning 5 as interest. Patañjali also refers to 7, 8, 9, and 10 as the amount of accru-

ing interest (II.351). Such loans would come under the system called *daśaikādaśa* by Pāṇini. For example, a loan of ten rupees which would become rupees fifteen after five months was called a *pañchaka* loan; similarly *saptaka*, *ashtaka*, *navaka* and *daśaka* respectively. These loans applied to agricultural crops, i.e. loans advanced at sowing and repaid at harvesting.

Loans were also called after the periods stipulated for their repayment (*Deyam-rīṇe*, IV.3.47), e.g. *sāmvatsarika*, loan for a year (IV.3.50); *āvarsamaka* loan for six months (IV.3.49).

There is mention of loans to be repaid in particular seasons, e.g. *grāismaka* (IV.3.49), loan to be paid back in summer, by the full-moon of *Ashādha* marking the close of the financial year. These were probably repaid out of the income from the special crops grown in summer, such as melons, water-melons and vegetables. The next season for repayment was that of the rains (*varshā*), nicknamed as the 'season when peacocks cry' (*kalāpī*); a loan stipulated to be repaid at that time being called *kalāpaka* (IV.3.48). In the section on Agriculture we have referred to the rotation of crops known to Pāṇini and Kautīlya. By looking at it we find that there is a close connection between the *kalāpaka* loans and the crops harvested in the rainy season and therefore called *vārshika*. Pāṇini refers to *aśvatthaka* (IV.3.46) as another euphemism for loans repayable during the rains. *Aśvattha* was an old Vedic synonym of the asterism *Śroṇā* found in the *Kāṭhaka Samhitā*, a text known to Pāṇini (VII.4.38), and from this was derived *aśvatthaka* to denote a loan repayable in the month of *Aśvattha* or *Śrāvaṇā* constellation (IV.3.48). The *Kāśikā* explains *aśvattha* as the season when the trees called *Ficus religiosa* bear fruit (*yasmin-aśvatthbāḥ phalanti*).

The next season for settling loan accounts from agricultural produce was *Agrahāyaṇa*, when the crops of the

*Hemanta* season are harvested. These crops (called *baimana* in Kauṭilya) were sown during the rainy season; they are still one of the two principal crops of the year known as *kharīf*, producing rice, pulses, sesamum, maize and millet. Pāṇini mentions such loans as *āgrahāyaṇika* (also *agrabāyaṇika*, IV.3.50), which were to be repaid on *Āgrahāyaṇī*, the Full-moon day of the month *Āgrahāyaṇa*. It incidently shows that the month was reckoned to close on the full-moon day, for it would be natural to fix the period of repayment in terms of full and not half-months. We may thus understand how a *daśaikādaśa* debt contracted in the month of *Śrāvaṇa*, to meet the expenses of sowing the rainy crop, with stipulation to be repaid on the *Āgrahāyaṇī* day would be called *pañcaka*, on account of the interest-bearing period being five months.

The other important crop was *vāsantika* harvested in the spring season. This crop is now called *rabī*, with barley, wheat, and oil-seeds as its main produce. On account of its association with barley and its straw, the season itself was nicknamed *yava-busa*, and Pāṇini refers to loans due for repayment at this time of the year as *yava-busaka* (IV.3.48).

It appears that the ten-rupee loan referred to by Pāṇini in the phrase *daśaikādaśa*, became later the norm. By the time of Kātyāyana we find that *daśārṇa*, a loan of ten rupees, had become a regular linguistic expression (VI.1.89.8; III.69). The ten-rupee loan still continues to be the basis of petty agrarian loans under the name of *das-ke-bārah* (ten-for-twelve system). Kātyāyana also mentions special loans like *vatsatarārṇa* 'contracted for purchasing a young bull'; *kambalārṇa*, 'loan for buying a blanket of standard size', which according to Pāṇini was manufactured out of a *kambalya* measure (five seers) of wool; and *vasanārṇa*, loan for buying cloth. We should understand *vasana* as a cloth of standard measurement, weight and price so that it could be used as a unit of exchange in such transactions as envisaged in *sūtra*

V.1.27 (purchased for one *vasana*). *Vasana* was most likely the standard *śāṭaka* cloth mentioned by Patañjali as costing, one *kārśāpaṇa* each (V.1.21; II.346).

**CORPOREAL INTEREST**—According to Gautama there were six special forms of interest, *viz.* compound interest, periodical interest, stipulated interest, corporeal interest, daily interest, and use of a pledged article (*Gautama Smṛiti*, XI.34-35). Of these Pāṇini knows of periodical interest as in *daśaikādaśa*; stipulated interest as in *pañchaka*, *saptaka*; compound interest as in *pravṛddha* (VI.2.38); and use of pledged article as in IV.4.89. A reference to corporeal interest may be traced in *sūtra* II.3.34 (*Akartya-ṛiṇe pañchamī*) intended to regularise the formation of such linguistic expressions as *śatād baddhah*, *i.e.* 'bound for a debt of one hundred'. We know it from Kauṭilya that free persons pledged or mortgaged themselves to repay debts contracted by them; this custom was also known in Pāṇini's time.

**USE OF A PLEDGE**—Pāṇini knows of this form of interest in *sūtra* IV.4.89, which refers to *dbenusbyā*, as a cow whose milk was pledged to the creditor for satisfaction of the loan advanced by him (*yā dbenur-uttamarṇāya ṛiṇapradānād doha nārtham dīyate sā dbenusbyā*, *Kāśikā*).

**MAHĀ-PRAVṚDDHA**—(VI.2.38). Pāṇini has cited the formation *mahā-pravṛddha* for its particular accent. But the word denotes the limit of interest (*vṛiddhi*) allowed on a loan. Manu says that the maximum accumulated interest should not exceed the principal sum (VIII.150). Kauṭilya directs that if the interest is allowed to pile up owing either to the absence abroad of the creditor or debtor, or deliberate intention, the amount payable shall be equal to twice of the principal sum (*mūlya-dviguṇa*, *Artha*. III. 11, p. 174). This is also endorsed by Śukra stating that the debtor shall not be required to pay more than twice the principal sum in discharge of his debt and interest (IV.5.631-2). Thus the maximum limit of accumulated interest was a sum equal to the principal; and

when the original amount of loan, say a hundred *kārsbāṇas*, had by the adding to it of compound interest (*pra-vṛiddha*) increased to two hundred *kārsbāṇas*, the loan was considered to have reached its maximum increment (*mahā-pravṛiddha*). **APAMITYAKA** (IV.4.21).—Pāṇini mentions *apamityaka* as something borrowed with a view to be returned in kind (*vyatibhāra*, III.4.19). The term is explained by Kauṭilya as applicable to grain borrowed with a promise to return an equal quantity (*Arth.* II.15, p. 94). The use of this word in connection with the borrowing of grain was as old as the Atharvaveda: 'Whatever grain I have borrowed for eating, may I return to redeem my debt' (*Apamitya dhānyam yaj-jaghās-āham idam tadagne anṛiṇo bhavāmi*, VI.117.8). The *apamityaka* arrangement was a well-recognised practice of rural economy, with a very ancient origin. Kauṭilya refers in the same context to *prāmityaka*, i.e. grain borrowed, but without obligation to return (*sasya-yāchanam anyataḥ prāmityakam*, *Arth.* II.15). Pāṇini mentions this as *yāchitaka* (*Apamitya-yāchitābhyām kak-kanau*, IV.4.21).

## CHAPTER V

# EDUCATION, LEARNING AND LITERATURE

## SECTION 1. EDUCATION

Pāṇini's grammar was the outcome of a considerable development of language and literature. That linguistic and literary development was in its turn the product of a suitable educational system amply justified by its results. The *Ashṭādhyāyī* throws valuable light on the evolution of different literary forms and types of compositions, educational institutions, students and teachers, methods of instruction, subjects of study, and works then known—a fact of great importance for the literary history of ancient India. Patañjali supplements Pāṇini's information in many ways.

**STUDENTSHIP**—The educational system was based upon what is known as the ancient system of *Brahmacharya* (*Tadasya brahmacharyam*, V.1.94) which laid more emphasis on life (*charyā*) than mere learning or instruction. It was based upon a constant personal touch between teacher and pupil bound together by a spiritual tie (*vidyā-sambandha*; IV.3.77) living in a common home (*śālā*). The pupil was thus truly the *antevāsi* (IV.3.130) of his *āchārya*. A student was generally called *Brahmachārī* (*Charaṇe Brahmachārīṇi*, VI.3.86). The religious student belonging to the upper three classes of society was known by the special term *varṇī* (V.2.134), a new title unknown in the *Saṁhitā* and *Brāhmaṇa* literature. As a pupil, he was called *chbātra* (IV.4.62, *Chbatrādibhyo naḥ*), because his duty (*chbatram śilamasya*) was to be always at his teacher's service (*guru-kāryeshu avabitaḥ*) and protect him from harm like an umbrella (*tach-chidrāvaraṇa-pravṛittāḥ*, *Kāśikā*).

Two classes of pupils are distinguished (1) *daṇḍa-māṇava*,

and (2) *antevāsī* (Na *daṇḍamāṇavāntevāsibū*, IV.3.130). The *daṇḍa-māṇava*, also called by the shorter name *māṇava* (VI.2.69) was a novice, not initiated in the Vedic study (*anṛicba*), as observed by Patañjali (*anṛicbo māṇave Babvṛicbaś-charaṇākhyāyām-iti*, V.4.154; II.444). He was named after his distinctive emblem, a wooden staff which he carried (*daṇḍa-pradhānaḥ māṇavaḥ*, *Kāśikā*). Pāṇini mentions the religious staff of the student as *āśbādha* (V.1.110), being named after the wood of the *palāśa* tree (*Butea frondosa*) of which it was made. The *Tattvabodhinī*, a late commentary, takes *daṇḍa-māṇavas* to be students without *upanayana*. The *Ma-taiṅga Jātaka* refers to a *māṇava* as being of tender age (*bāla*), moving to and fro with a *daṇḍa* and wearing sandals (*Jāt.* IV.379). A class of such young pupils was called *māṇavya* (IV.2.42).

Students initiated by teachers of the rank of an *āchārya*, were called *antevāsins*. Pāṇini calls the ceremony of initiation as *āchārya-karaṇa* (I.3.36). This was expressed by the formula *māṇavakam upanayate*. He brings the pupil close to himself as his 'Āchārya'. This is further explained by the *Kāśikā* as *ātmānam āchāryīkurvan-māṇavakam ātmasamīpam prāpayati*, 'converting himself into a teacher he draws close to himself the tender youth as his pupil'. The *antevāsin* was thus the *Brahmachārī* proper, wearing a particular uniform consisting of a deer skin (*ajina*, VI.2.194) and a *kamaṇḍalu* (IV.1.71). Patañjali refers to a student marked by the *kamaṇḍalu* in his hand (*kamaṇḍalu-pāṇi chbātra*, I.347), getting food offered by pious families (I.133, *yājyakuḷāni gatvā agrā-śanādīni labhate*). An *antevāsī* *Brahmachārīn* was considered to be a full-fledged member of his school called *Charaṇa*, and this bond of comradeship applying in common to all fellow-students was expressed by the phrase *sa-brahmachārī* (VI.2.86).

**THE PUPIL'S DUTIES**—The *Brahmachārī* was bound to his teacher by a spiritual relationship (*vidyā-sambandha*, IV.3.77),

not less real than blood relationship (*yoni-sambandha*). Pāṇini refers to the teacher as *anūcbāna*, 'one who expounds the texts' (III.2.109), and also *pravachanīya*, 'one who orally imparts instruction' (III.4.68, *pravachanīyo guruḥ svādhyāyasya, Kāśikā*); and the pupil as *śūśrūṣu*, 'one who intently listens to the words of his teacher' (I.3.57; III.2.108). They were always close to each other (*upasthānīya*, III.4.68), the teacher to be served (*upasthānīyaḥ sisbyeṇa guruḥ*), and the pupil to be taught (*upasthānīyo' ntevāsī guruḥ, Kāśikā*). Sometimes the father acted as teacher to his son, the pupil being then called *pitur-antevāsī* (VI.3.23). Pāṇini refers to *āchārya-putra* along with *rāja-putra* and *ṛitvik-putra* (VI.2.133), all three standing on the privileges of their fathers. The teacher's son was for the pupils like the teacher himself (*Kātyāyana, gurunvad guru-putra iti yathā*, I.1.56.1; *Bhāṣya*, I.133).

**TEACHERS**—Pāṇini mentions the following classes of teachers: (1) *Āchārya*, (2) *Pravaktā*, (3) *Śrotṛiya*, and (4) *Adhyāpaka* (II.1.65). The *Āchārya* was of the highest status. By the particular religious ceremony of *upanayana*, he became *āchārya* (*āchārya-karaṇa*, I.3.36), and the student his *antevāsī*. This was expressed in the language as *mānavakam upanayate*. The *Attharvaveda* puts it clearly thus: 'the *āchārya* by drawing the pupil within himself as in a womb, gives him a new birth' (*āchārya upanayamāno Brahmacāriṇam kṛiṇute garbbhamantaḥ*, XI.5.3). The close association of a teacher and his pupil is shown by the practice of naming the pupil after the *āchārya*. This is expressed by Pāṇini in the *sūtra* *Āchāryo-pasarjanaś-cbāntevāsī* (VI.2.36; VI.2.104), 'the *antevāsī* is known after his teacher', e.g. *Āpīśala, Pāṇinīya*, the pupils belonging to the schools of Āpīśali and Pāṇini. Such founders of Schools distinguished as *āchāryas*, e.g. *Āchārya Sākaṭāyana, Āchārya Pāṇini*, represented the highest academic degree and distinction.

*Pravaktā*: The *pravaktā* appears to be a teacher who was an exponent of the traditional sacred texts, or *prokta* literature, under the general direction of an *āchārya*. The three classes of teachers, *pravaktṛi*, *śrotriya* and *adhyāpaka*, in *sūtra* II.1.65, seem to be mentioned in the order of their precedence in the educational system.

*Śrotriya*: Pāṇini defines a *śrotriya* teacher as one who could recite the *Cḥbandas* or Veda (*Śrotriyaṁś-cḥbando' dbhite*, V.2.84). He specialized in committing to memory the Vedic texts in the various forms of recitations (*pāṭha*), as *sambhitā*, *pada*, *krama*, etc. The literary apparatus for conserving the Vedic texts without change of a syllable or accent had been perfected several centuries before Pāṇini, who mentions students called *kramaka*, who specialized in memorising the *krama* text (IV.2.61), and *padaka*, the *pada* text of the Vedas. Teachers who instructed such pupils were themselves named after the mode of recitation they had mastered (*tad-veda*), e.g. *kramaka*, *padaka*, 'knowers of the *krama* and *pada* texts.'

*Adhyāpaka*: The *adhyāpaka* (II.1.65) seems to have been a teacher entrusted with the teaching of secular and scientific treatises, whose later designation *upādhyāya* is often mentioned in the *Mahābhāṣya*.

**DISAPPROVED PUPILS**—Several terms express the censure attaching to students who misused their privileges or contravened the rules proper for them, e.g. *tīrtha-dhvāṅksba*, *tīrtha-kāka*, 'fickle as a crow' in changing his teachers and schools too frequently (II.1.41 with *Bhāṣya* I.391, *yo gurukulāni gatvā na chiraṁ tishṭhati sa ucchyate tīrtha-kāka iti*); *khatv-ārūḍba*, 'a pupil who takes to the luxury of a householder by sleeping on a cot', (*Khatvā kshepe*, II.1.26).

In *sūtra* VI.2.69 (*Gotrāntevāsi-māṇava-Brāhmaṇeṣhu kshepe*) Pāṇini refers to both junior (*māṇava*) and senior (*antevāsi*) students who joined their schools under motives deserving of censure, e.g. *bhikṣā-māṇava*, 'a novice attracted to the school for its benefit of free boarding' (*bhikṣām la-*

*syē' hamiti māṇavo bhavāti*, *Kāśikā*). The *Vālmīki Rāmāyaṇa* refers to the *māṇavas* of the Kaṭha-Kālāpa Schools as running after delicacies of food (*svādu-kāmāḥ*) given to laziness (*alasāḥ*), and avoiding due service to the teacher under pretext of study (*Ayodhyākāṇḍa*, 32.18). As instances of elderly students joining the teacher with such malafide motives, Patañjali cites *kambala-Chārāyaṇīyāḥ*, pupils joining the school of *Chārāyaṇa* with an eye on its blankets; *odana-Pāṇinīyāḥ*, pupils joining the school of Pāṇini for its worldly advantages, such as provision of rice; *ghṛīta-Rauḍhīyāḥ*, pupils joining the school of Rauḍhi for its provision of butter (*Bhāshya* I.1.73; I.190). To these examples, the *Kāśikā* adds a worse case, e.g. *kumārī-Dākṣbāḥ*, pupils joining the school of Dakṣha for its access to girls (as co-students).

In the above examples *Chārāyaṇa* is cited by Kauṭilya as an ancient author of *Arthasāstra*, and may be identified with the great minister of king Prasenajit of Kosala. Similarly Rauḍhi was a junior contemporary of Pāṇini himself, as shown by the example *Pāṇinīya-Rauḍhīyāḥ*, in which the names are cited in a chronological order (*Kāśikā*, VI.2.36; also *Bhāshya*, IV.1.79; II.233).

**NAMING OF STUDENTS**—Students derived their names from three factors, *viz.* (1) name of the subject, or treatise of study (*tadadbhīte*); (2) name of the Vedic School (*cbaraṇa*) to which they belonged; and (3) name of the teacher under whom they were studying, or whose works they studied.

As examples of (1) Pāṇini mentions *yājñika* (IV.3.129) and *vaiyākaraṇa* (VI.3.7), 'students of the sacrificial ritual and grammar' respectively. Amongst other students taking up special courses, Pāṇini refers to students of *Kratu* or *Soma* sacrifices (IV.2.60), e.g. *Āgnishṭomika*, *Vājapecyika* (*Kāśikā*); and to students specialising in the *Anubrāhmaṇa* literature and thence called *Anubrāhmaṇī* (IV.2.62); and others devoted to Vedic recitation such as *Kramakāḥ*, *Padakāḥ* mentioned above (IV.2.61).

Students were also named after the special seasonal courses which they were pursuing. For example, the books that were taken up for study in the *Vasanta* (spring) season were also known as *Vasanta*, and the student who was reading that treatise or course at the assigned time was classed as *Vāsantika* (*Vasantādibhyash-ṭhak*, IV. 2. 63, *vasanta-sabacharito'yanī grantho vasantas-tam adbīte*). We learn from the Smṛitis that the *vasanta* session in colleges was inaugurated on the *Vasanta-pañchanī* day in the month of Māgha, and the course mainly consisted of Vedāṅga texts (*Manu*, IV.98). Courses were similarly offered for the other seasons like *Varshā*, *Śarad*, *Hemanta* and *Śiśira*, and the students of these short term courses were then called *Vārshika*, *Śāradika*, *Haimantika* and *Śaiśirika* (*Gaṇa-pāṭha* to IV.2.63). These seem to be planned on the lines of modern Summer schools.

**NAMING OF VEDIC STUDENTS**—Students were called after the names of the Chhandas works then studied in the different recensions or *Śākhās*, in the Vedic schools (*charaṇas*). According to Pāṇini the names of Chhandas works and the Brāhmaṇa texts attached to each *Śākhā* were not used as current except with reference to the students or persons learned in them (*Chhando-Brahmaṇāni cha tadvisṭayāṇi*, IV.2.66, under the context *Tadadbīte tadveda*). The grammatical form undergoes a double process. For example, the original teacher (*pratyakṣa-kārī*, IV.3.104.1) Kaṭha was the promulgator of a Chhāndasa *Śākhā* text. The relationship between Kaṭha and his work was first expressed by a suffix taught under *Tena proktam* (IV.3.101). To the word thus formed was added a second suffix to denote a student studying that text. In practice the second affix denoting the student was elided (*Proktāl-luk*, IV.2.64), with the result that the name of the *Śākhā* and the name of the Brāhmaṇa work always pointed to the students studying them. This position is emphasized by the fact that the names of Vedic texts could not be used alone except in relation to their students, e.g. *Kaṭhāḥ*, the students

of the *Kaṭha Śākhā*, promulgated (*prokta*) by the teacher Kaṭha (*Kaṭhena proktam adbīyate*). The word Kaṭha which ordinarily should have been the name of the book was reserved to denote the entire body of those students and teachers who devoted themselves to its study (*adbīyāna*) and attained proficiency therein (*tad-veda*). The Kaṭhas stood for a real school. The same principle of naming held good for hundreds of other Vedic *Śākhās* or *Samhitās* and *Brāhmaṇas*, which had then become established for long not merely as books, but as institutions with a fellowship of teachers and pupils devoted to their study. This is the main purport of the important *sūtra Chbando-Brāhmaṇāni cha tadvisṭayāni*. The text of a Vedic *Śākhā* would grow into a living institution and spread into offshoots claiming numerous teachers and students within its fold. The original teacher was the nucleus round whom there grew up an appropriate literature of exposition like the *Brāhmaṇas*, to which contributions were made by teachers and pupils of successive generations, expanding their literary heritage. The *Charaṇa* began as an educational institution following a particular *Śākhā* text; in course of time it developed its full literature comprising *Brāhmaṇa*, *Āraṇyaka* and *Upanishad* texts, *Kalpa* or *Śrauta Sūtras* (cf. *Purāṇa-prokṭeṣu Brāhmaṇa-Kalpeṣu*, IV.3.105), and later on even its *Dharmasūtra* to which Pāṇini refers in the *sūtra Charaṇebhyo Dharmavat* (IV.2.46). This represented its normal evolution, but there were many subsidiary schools confined to one or more classes of texts, and justifying their activity by even a *Sūtra* text (*sūtra-charaṇa*). A good number of the names of these Vedic schools, or, which is the same thing, of their students, are preserved in the *Aṣṭādhyāyī*, constituting a rich record of the Vedic literature existing before Pāṇini, which will be noticed later.

Under the third category were scholars studying the newly discovered scientific treatises, and thus known after the names of the teachers who had composed them (IV.2.64).

For example, Śākaṭāyana and Āpiśali were two great Āchāryas who lived before Pāṇini. They were the founders of different grammatical systems named after them, e.g. *Āpiśala*, the work of Āpiśali, whose students also were called Āpiśalas. Although the mode of indicating the students of such secular works, was grammatically identical with that for the students of Chhandas works, the fact is that such names as Śākaṭāyanīya and Pāṇinīya, as applied to a student, indicated his allegiance to one particular study, rather than to a broad literature such as that of a Vedic school. From the point of view of educational organisation the *Charaṇas* were the larger schools promoting the study of the entire Vedic literature and based on a fellowship of teachers and pupils, as distinguished from the more restricted grammatical schools confined to the study of a particular treatise or branch of learning and functioning independently of the *Charaṇas*.

**EDUCATION OF WOMEN**—Both Pāṇini and Patañjali refer to women admitted to Vedic study in the *Charaṇas*. The term *jāti* in *sūtra* IV.1.63 (*Jāter-astrī-vishbayād-ayo-padbāt*) includes the female members of *gotras* and *charaṇas* (*gotram cha charaṇāni cha*, *Bhāṣya* II.225). Thus a woman student of the Kaṭha school was called *Kaṭhī*, and of the Ṛigvedic Bahvṛicha school *Bahvṛichī*. It appears that the three principles of naming the male students applied equally to the female students also. For example, Kātyāyana and Patañjali refer to Brāhmaṇa women students studying the grammatical system of Āpiśali and thence called *Āpiśalā Brāhmaṇī* (*Pūrvasūtra nirdeśo vāpiśalam adbīta iti*, IV.1.14, *vār.* 3). Kātyāyana here refers to a rule of a previous writer, in all probability Āpiśali himself. Similarly *Pāṇinīyā Brāhmaṇī* (*Kāśikā* on IV.2.64). Female students were also admitted to the study of Mīmāṃsā, e.g. *Kāśakṛitsnī*, a female student studying the Mīmāṃsā work of Kāśakṛitsni, son of Kāśakṛitsna (*Bhāṣya*, 11.206). Pāṇini refers to female students as *Cbbātri* and their hostels *cbbātri-śālā* (VI.2.86). The wife

of an *ācārya* is referred to as *ācāryānī* (IV.1.49), but *ācāryā* was the title of female teachers corresponding in status to an *ācārya* (counter-example in the *Kāśikā*). Patañjali refers to the female teacher Audameghyā and her pupils (IV.1.78; II.230). The term *Kaṭhī-vṛindārikā*, the foremost female student of the *Kaṭha Śākhā*, points to the success of women as students of Vedic schools. Patañjali refers to a female student as *adhyetrī* and a female novice as *mānavikā* (IV.193; II.249).

**SCHOOL REGULATIONS**—The *antevāsī* was to lead the life of a regular Brahmacharī in the house of his teacher. Special hostels for female students had also come into existence (*chbātri-śālā*).

Pāṇini refers to the working days of the school as *adhyāya* (III.3.122; *adhyāte' sminn-ityadhyāyaḥ*, *Kāśikā*). On this etymology was based the opposite word *anadhyāya* denoting holidays, about which elaborate instructions are given in the *Gṛhya-sūtras*. These rules are anticipated in Pāṇini's *sūtra*, *Adhyāyiny-adeśa-kālāt* (IV.4.71), showing that study was to be suspended outside its time and place. It is significant that Pāṇini should have found it necessary to mention students contravening the proper rules by carrying on their study in unapproved places, on which the *Kāśikā* cites *śmāśānika*, *chātuspathika*, 'one who reads in a cremation-ground or a market-place', and on non-working days, e.g. *chāturdaśika*, *āmāvāsyika*, i.e. studying on *Chaturdaśī* and *Āmāvāsyā* days which were set apart for religious purposes like the *Darśa-Paurṇamāsa* and not for study (*Kāśikā* on IV.4.71). The opprobrium implied in these terms lasted only for the time being.

Students belonging to the same school were called *sabrahmachārins* (*Charaṇe Brahmachārīṇi*, VI.3.86), and those studying under a common teacher *satīrthya* (*Samānatīrthe vāsī*, IV.4.107 and VI.3.87, *Tīrthe ye*; *Kāśikā*, *samānopadhyāya*).

In schools following varied curricula, some kind of grouping in the form of classes was inevitable. This grouping was of two kinds: firstly, grouping of such students as were studying the same subjects, and secondly forming bigger congregations of such different groups occasionally for some common purpose, provided their subjects of study were allied (*Adhyayanataḥ prakṛiṣṭākhyānām*, II.4.5). For example, Pāṇini mentions students of the *Krama-pāṭha* forming the class *Kramakāḥ*, and of the *Pada-pāṭha* *Padakāḥ* (*Kramādibhyo vun*, IV.2.61). Instruction in *Pada*-recitation immediately preceded that of *Krama*-. The two classes functioned separately in the school-routine, but on special occasions were grouped as a joint class called *Padaka-Kramakam*, a compound name in singular number. For a common social programme like feasting, the teacher would direct the two allied classes to go together, e.g. *Padaka-Kramakam gachchhantu*, i.e. 'Let the *Padaka* and *Kramaka* students go'. The *Kāśikā* cites *Kramaka-Vārttikam*, showing that after completing the *Krama* recitation of the Veda, the students took up *Vṛtti* or grammatical lessons. Patañjali also states that in his time the custom was for students to be trained first in Vedic recitation; the study of grammar therefore must have followed.

**GRADATION OF COURSES**—The grouping of classes as shown above points to a system of planned courses. The various categories of students like *mānava* (the novice), *antevāsi* (the full-fledged Brahmachārī), and *charaka* (the advanced visiting scholar, IV.3.107) and of teachers like *adhyāpaka*, *pravaktā* and *āchārya*, point to different stages in the academic career.

Pāṇini has noticed the linguistic forms indicative of stages in academic progress. The stages of secular studies were expressed in terms of the particular treatise studied (*Granthānatādbike cha*, VI.3.79), e.g. 'studies the science of astrology upto the chapters *Kalā* and *Mubūrta*, *sakalam*, *samuburtam* *jyautisbam adbhīte*; or reads grammar upto the treatise called

*Saṅgrāha* (*sasaṅgrāham vyākaraṇam adbīte*, *Kāśikā*). The completion of a course is indicated by the term *anta-vachana* (II.1.6), i.e. study upto its concluding chapter, for which older examples were, *sāgni adbīte*, 'he completes his studies upto the text called *Agni* (Books V-IX of the *Śatapatha Brāhmaṇa* dealing with the Fire ritual); or *sesbī-ṣāṣu-bandham*, upto the text called *Isbī* (Books I-II of the *Śatapatha* dealing with the *Isbīs* or New and Full-Moon sacrifices), and *Ṣāṣu-bandha* (Books III-V of the *Śatapatha*, dealing with the Soma sacrifices). Completion of a particular topic of study was called *vṛitta* (VII.2.26, *Ṇeradhyayane vṛittam*); e.g., in reply to the question 'How much has Devadatta read?', it was stated: *Vṛitto guṇo Devadattena*, *Vṛittam pāṛāyaṇam Devadattena*, 'Devadatta has finished the study of the topic called *guṇa* (i.e. strengthening of vowels in grammatical formations); or *pāṛāyaṇa* (Vedic recitations). Two linguistic forms were current to indicate the progress of studies, either by topics or the prescribed books completed.

As already stated (IV.2.63), the syllabus for the year was divided according to the seasons. A particular course of study was prescribed for each season, and the studies associated with each were named after it, e.g. *Vasanta*, 'Spring Lectures', *Grīṣma*, 'Summer School', *Varṣā*, 'Monsoon Lectures', *Śarad*, 'Autumn Lectures', etc.

The system of short term courses involving a study of special topics or parts of a subject was also in vogue, as implied in the expression *Tadasya brahmacharyam* (V.1.94). It regulates the names of students according to the period for which they had got themselves admitted e.g. *māsika Brahmacārī*, a student for a month; similarly *ardha-māsika*, a student for half a month, and *sāmvatsarika*, a student for one year (*Kāśikā*). Kātyāyana mentions *mahānāmni* students, those who restricted themselves to the study of *mahānāmni* verses (*Mahānāmnyo nāma ṛcho vrataṁ tāsām char-yate*, *Bhāṣya* II.360); similarly *ādityavratika*, a student of

*Ādityavrata*. The *Gobhila Grihyasūtra* refers to these special vows of studentship (III.1.28; III.2.1-9). The *Mahānāmni* vow was alternatively called *Śakvarī vrata*. According to the *Rauruki Brāhmaṇa*, the *Mahānāmni* verse was regarded as the highest religious study aimed at by students in that ancient system. The mothers wished their new-born babes: 'O darlings, may ye complete the vow to master the *Śākvarī* verses!'<sup>1</sup>

The completing of study was called *samāpana* (*Samāpanāt-sapurvapadāt*, V.1.112), e.g. *cchbandaḥ-samāpanīya*, *vyākaraṇa-samāpanīya*, studentship with the avowed object (*prayojana*) of mastering prosody or grammar.

**PEDAGOGY**—The teacher expounding a subject was called *ākhyātā*. Tutition in the prescribed religious manner was *upayoga* (*niyama-pūrvakam vidyā-grahaṇam*, *Kāśikā* on I.4.29). According to the commentator learning of secular subjects as dramatic art did not come under the category of *upayoga*, e.g. 'takes instruction about drama from an actor' (*naśasya śrīṇoti*). The teacher in his capacity of expounding to his pupil the religious texts of *svādhyāya* was called *pravachanīya* (III.4.68, *pravachanīyo guruḥ svādhyāyasya*). This term was also applied to the subject expounded as *pravachanīyo guruṇā svādhyāyaḥ*. This has reference to the teacher mentioned by Pāṇini as *pravaktā* (II.1.65). Pāṇini refers to another class of teachers called *anūchāna* (III.2.109), who according to Bodhāyana discoursed on the Vedāṅgas (*āṅgādhyāyā anūchānaḥ*, *Bodhāyana Grihyasūtra*, I.4).

Preparations for study with a teacher were called *anupravachanīya* (V.1.111). A teacher was respectfully approached (*adbhīṣṭa*) by the father or guardian with request to undertake the instruction of his ward: 'I pray that you be pleased to admit this tender youth to your instruction' (*adbhīcbbhāmo bhavantam māṇavakam bhavān upanayet*,

<sup>1</sup> अथ ह रौरुकि ब्राह्मणं भवति । कुमारान् ह वै मातरः पाययमाना आहुः  
शाक्वरीणां व्रतं पारविष्णवो भवतेति । गोभिलगृह्यसूत्र, III 2-7-9

*Kāśikā* on III. 3. 161). The teacher was named after the period of his instruction (*tam adbhīśṭaḥ*, V. 1. 80), e.g. *māsiko adhyāpakaḥ*, 'teacher for a month' (*māsam adbhīśṭaḥ satkṛitya vyāpāritaḥ*).

The life of the student was subjected to rigorous discipline. The difficulty of study is referred to in such expressions as *kashṭo' gñih*, *kashṭam vyākaraṇam*, *tatopi kashṭatarāṇi sāmāni*, 'hard to master is the Fire ritual (*Śatapatha*, Bks. VI-IX); so is Grammar; but still more difficult are the *Sāman* songs' (*Kāśikā*, VII. 2. 22).

It is interesting to read in the *Ashṭādhyāyī* about teachers who were strict relentless disciplinarians (*dāruṇādhyāpaka*, *ghorādhyāpaka*). As against them were teachers described as perfect (*kāshṭhādhyāpaka*) and good (*svādhyāpaka*) (*Pūjanāt pūjitam anudāttam kashṭhādibhyah*, VIII.1.67). Retired teachers were called *prāchārya* and Old Boys *prāntevāsi* (*Bhāshya*, II.2.18; I.416).

**PĀRAYANA (VEDIC RECITATION)**—The method of study varied with the nature of its subject. Vedic texts had to be learnt by repetition; the master of such texts was called a *Śrotriya* (V.2.84). Recitation of Vedic texts without attending to meaning was called *pārayana*; one engaged in such study was called *pārayanika* (*pārayanam vartayati*, V.1.72). Students gifted with strong memory so as to learn the text by heart without effort (*akṛichchbra*) were indicated by such expressions as *adbīyan pārayanam*, 'facile in recitation', *dhārayan Upanishadam*, 'memorising the Upanishad' (*In-dhāryoh śatrakṛichchbriṇi*, III.2.130).

There are several *sūtras* relating to details about recitation. Firstly, there is provision to indicate the number of repetitions (*adhyayana*) required to memorise the text (V.1.58), e.g. *pañchaka adhyayana*, reciting (*āvṛitti*) a text five times, repeating its words five times (*Pañcha vāra*), and in five ways (*pañcha rūpa*, *Kāśikā*); similarly *saptaka*, *aṣṭaka*, *navaka* referring to higher numbers. Second-

ly, there were appropriate phrases to express faults in recitation, by way of an individual word pronounced wrongly (*padam mithyā kārayate*), or accents in a faulty manner (*svārādi durbhāṣam*), and repeating the mistakes (*asakṛit ucbhārayati*; *Mithyopapadāt kriṇō' bhyāse*, I.3.71). Finally, students were tested with reference to the number of mistakes committed in recitation (*Karmādhyayane vṛttam*, IV.4.63-64), *aikānyika*, i.e. one who at the time of examination (*parīkṣā-kāle*) commits one mistake (*Kāśikā*); similarly *dvaianyika*, *traiyanyika*, and so on up to ten. The Sanskrit words for numerals up to ten consist of two syllables. But Pāṇini also teaches the manner of indicating the lapses when the numeral is of more than two syllables (*babhāvach*, IV.4.64), e.g. *dvādaśānyika*, *trayodaśānyika*, *chaturdaśānyika*, one with 12, 13, or 14 mistakes in recitation. This method of oral teaching and committing texts to memory has amply justified itself by the conservation and transmission of India's sacred learning through the ages before it was stored up by writing in manuscripts. The secret of success of this oral tradition (*śruti*) lies in the faith that sacred words by themselves have a value and should be treasured up in memory as abiding stores of knowledge.

Strict regulations characterised the *pārāyaṇa* of Vedic texts by *pārāyaṇika* students observing the vow (*pārāyaṇam vartayati*, V.1.72). Naturally a particular mode of recitation was selected at one time, such as *sambhīṭā-pārāyaṇa* (*nirbbhuja*), *pada-pārāyaṇa* (*pratīṣṭha*) and *krāma pārāyaṇa*. Each school had carefully computed the extent of its Vedic text for the purpose of *pārāyaṇa*; the *Charaṇavyūha-parīśiṣṭa* of Śaṅkara states the *pārāyaṇa* text of R̥gveda to comprise 10,580 verses (I.10).

The student commenced the *pārāyaṇa* with a formal ceremony described in the *Gṛhya* texts of Bodhāyana and others. He slept on a platform (*sthāṇḍila*) as part of his vow, for which he was marked as *sthāṇḍila* (*Sthāṇḍilāch-cbhayitāri vrate*, IV.2.15). He also observed the vow of silence during

*pārāyaṇa*, being then known as *vācchamyama* (*vāchi yamo vrate*, III.2.40). He was also to restrain himself in the matter of food, eating sparingly and taking only water, milk or fruits according to his physical endurance, e.g. if he took only milk he was spoken of as *ḥayo vratayati* (III.1.21), 'observes the vow by living only on milk'. Besides the above regulations Mahidāsa hints at the fact that students often undertook repeated courses of *pārāyaṇa* recitation, and the *Kāśikā* mentions *dvaipārāyaṇikah* as an illustration (IV.1.88). *Pārāyaṇa* could also be observed in later life.

**INTELLECTUAL APPROACH**—This mechanical method of learning by rote gives only a limited picture of the educational system. Yāska sounds a note of protest against too much emphasis being laid on mere memorising of words as means of learning, and Patañjali compares it to dry fuel thrown in a place where there is no fire to ignite it<sup>1</sup> (*Bhāṣya* I.2.). Pāṇini's own work the *Aṣṭādhyāyī* was the result of much hard and scientific thinking applied to the study of words and their significance by analytical methods. The *Nirukṭa* of Yāska and the grammatical works of Śākaṭyāna and Āpiśali were similar products of the scientific mind. The original treatises produced as a result of creative intellectual activity are distinguished by Pāṇini as *upajñāta* and as being different from the commentaries or expositions (*vyākhyāna*) of older texts.

Pāṇini uses a number of terms to indicate the various methods employed in learning and education, e.g. extempore composition at the spur of the moment (*prakathana*, I.3.32); illuminating interpretation (*bbāsana*, I.3.47); true exposition of knowledge (root *vad* in the sense of *jñāna*, I.3.47, *samyag-avabodha*); presentation of divergent opinions (*vimati*, I.3.47, *vipralāpa*, I.3.50); enunciation of one's doctrines (*pratiśra-*

<sup>1</sup> यदधीतमविज्ञातं निगदेनैव शन्यते ।

अनग्नाविव शुष्कैवो न तज्ज्वलति कर्हिचित् ॥

*vaṇa*, VIII.2.99; or *pratijñāna*, e.g. *nityam śabdani saṁgirate*, 'he affirms that word is eternal', I.3.52); seeking after knowledge (*jijñāśate*, I.3.57). All these terms are indicative of *vāda* (debate) and *vivāda* (discussion) as a method of learning and approach to truth. This method of education is amply testified to in the Upanishads and also in Buddhist literature. Again, Pāṇini also refers to judges at the time of disputations (*madbye-kṛitya*, I.4.76), silencing of an opponent (*nivachane-kṛitya*, I.4.76) and restraining him by exposing his views (*nigrihya anuyoga*, VIII.2.94), the words *nigraha* and *anuyoga* being regular terms of Nyāya dialectics. Forms of language to arrive at the truth by the process of reasoning (*vichārya-mānānām*, VIII.2.97; *pramāṇena vastu-parikṣhaṇam*, Kāśikā), and firmly establishing one's own position (*jñānam*, *prameya-niśchayaḥ*, I.3.36) are also referred to. The person who came out triumphant in the debate was the recipient of high honours (*sammānana*, I.3.36), and he was from that time regarded as the leading exponent of that subject or school. As an example the *Chāndravṛtti* mentions Pāṇini himself as leading in the science of grammar (*nayate Pāṇinir-vyākaraṇe*, I.4.82). Knowledge transmitted from teacher to pupil benefited by its expansion (*tāyana*, I.3.38) in the process. We know how the treatise of Pāṇini himself was enriched by his brilliant successors Kātyāyana and Patañjali. Sometimes it so happened that founders of schools became known not so much by their own works as by those of their pupils or followers shedding lustre on them. Pāṇini himself mentions the names of Kalāpin and Vaiśampāyana as teachers of this type whose discourses were so fruitful that they gave rise to different schools of thought, all within the domain of the subject-matter of those discourses (*Kalāpi-Vaiśampāyanāntevāsibhyaśchā*, IV.3.104; Dr. R. K. Mookerji, *Ancient Hindu Education as Revealed in the Works of Pāṇini, Kātyāyana and Patañjali*).

CHARAṆA, THE VEDIC SCHOOL—*Charaṇa* represents the type of educational institution in which one particular recen-

sion or *Śākbā* of the Veda was studied by a group of pupils called after the original founder and organized as a corporate body (*charaṇa-śabdaḥ śākbānimittikaḥ puruṣeṣu vartate, Kāśikā*, II.4.3). The various branches of sacred literature were developed under the aegis of the *Charaṇa* organization, viz. the Chhandas text which was originally enounced by a *Ṛishi*, its Brāhmaṇa embodying the liturgical, religious, and philosophical doctrines developed in relation to *yajña*, and later on the Kalpa works dealing with systematised sacrificial ritual better known as *Śrautasūtra*. This elaboration of literary types had gone on in the *Charaṇas* prior to the time of Pāṇini (cf. *sūtras* IV.2.66; IV.3.105). In fact different Vedic *Śākbās* and *Brāhmaṇa* works were considered such an integral constituent of a *Charaṇa* that they were thought of only in terms of the students who studied them and who actually constituted the *Charaṇa*. The *Śākbās* no longer remained mere books, but developed into institutions comprising under their aegis such works as the *Brahmaṇas*, *Āraṇyakas* and *Śrauta-sūtras*, etc. Pāṇini speaks of a still wider basis, viz. the development of a new type of literature represented in the *Dharmasūtras* (*Charaṇebhyo dharmavat*, IV.2.46; *Charaṇād-dharmāmṇāyayoh, Vār.* on IV.3.126). This marked a further stage in the evolution of the *Charaṇa*, and also marked its final phase, because at the time as *Dharma* or Law was introduced in the curricula of a *Charaṇa* many specialised branches of learning were coming into existence independently of and outside the organisation of the Vedic schools. The *Nirukta* of Yāska and the grammar of Pāṇini are examples of this later development. It is not possible to trace their association with one particular Vedic school. In fact we owe to Patañjali the significant statement made with regard to the *Aṣṭādhyāyī* that it was not attached to any particular Vedic school, but was claimed by all Vedic schools as their common study:

संविद्यापरिषदं हीदं शास्त्रम् ।

(II.1.58; I.400; VI.3.14; III.146).

**PARISHAD**—Three varieties of *Parishads* were known to Pāṇini, (1) academic, (2) social and (3) administrative. The first kind of *Parishad* was an academy of specialist scholars within the *Charaṇa* whose function was to fix the *Śākbā* text to be adopted by the *Charaṇa* with special reference to its phonetical and grammatical points. Pāṇini refers to the *Charaṇa-Parishad* in *sūtra* IV.3.123 (*Patrādhvaryu-parishadaś-cha*) regulating the term *pārishada* to denote something that appertained to a *parishad* (*parishadaḥ idam*). The Āchārya along with his academy (*sapariśatka āchārya*) greeted the student on his first admission (यत्नमिव चक्षुः प्रियो वा भूवासमिति सपरि-पत्कमाचार्यं मन्वेत्य ब्रह्मचारी पठति, *Gobhila Gṛihyasūtra*, III.4.28; *Drāhyāyana Gṛihya*, III.1.25). Charaka records full details of an academic *Parishad* (*Vimānasthāna*, VIII.19-20). Patañjali mentions *pārishada* as a work which was the product of a Vedic *Charaṇa* (cf. *Sarva-Veda-Pārishadam*, quoted above). Its earlier variant in the *Nirukta* was *Pārshada* which Yāska mentions as works composed in the *Charaṇas* (*pada-prakṛitīni sarva-charaṇānām pārshadāni*, *Nirukta*, I.17). Patañjali also gives the form *pārshada* for Pāṇini's *Pārishada* works of the Sātyamugri and Rāṇāyaniya schools of the *Sāmaveda* (*Bhāshya*, I.22). As Durgāchārya explains, the *Pārshada* works were the *Prātisākhya*s produced in the *parshad* (= *parishad*) of each *Charaṇa*, and dealing mainly with phonetical and grammatical topics.

There were two other kinds of *parishads*, viz. social and administrative. The term *pārishadya*, for a member of a *parishad* (*parishadam samavaiti*, IV.4.44) indicates that the *parishad* was a social or a cultural club, something like a *samāja*. The third kind of *Parishad* was an administrative body, as in the expression *parishadadvalo rājā* (V.2.112), 'a king governing with his council of ministers. The term *pārishadya*, one eligible (*sādhū*) for membership of a *parishad* (*Parishado nyah*, IV.4.101) takes the *parishad* in the sense of an administrative body. The fact remains that originally the *parishad* began as

a body of scholars inside the Vedic schools, which influenced and directed their literary activities and helped in the evolution of those schools.

**WORKING OF A CHARAṆA**—Pāṇini throws light on the activities and constitution of *Charaṇas* with reference to the following points:

(1) *Name*—As already pointed out, the name of a *Charaṇa* was also the name of the students who constituted it. There were two stages in the formation of these names which may have represented actual stages in the evolution of a *Charaṇa*. First came the founder Ṛishi who gave the *Charaṇa* a text as its basis (IV.3.102). Next, the Vedic text attracted to the school students who sought its study. For example, Ṛishi Tittiri promulgated the *Taittirīya Śākhā*, of which the students were also called *Taittirīyas* (*Tittirīṇā proktaṁ adbhīyate*). Grammatically, the term *Taittirīya* in the sense of a text (*Tena proktaṁ*, IV.3.101-102) could not be used by itself; it needed another suffix to indicate its students (*Chabando Brāhmaṇānī cha tad-vishayāṇi*, IV.2.66), but this second suffix did not appear in the formation (*Proktāl luk*, IV.2.64). In practice the word denoting the text did not differ in form from the word denoting its students. It is a curious phenomenon that in forming the names of *Charaṇas*, the first suffix denoting the text (*prokta*) was retained but lost its meaning, whereas the second suffix denoting the students and professors (*adhyetṛi-veditṛi*) was dropped but retained its meaning. It may well be that Pāṇini was here summarizing an actual position so as make theory and practice accord with each other. It was the case of an institution deriving its name from the founder, but later signifying the body of scholars and students who belonged to it.

The names of the *Charaṇas* in the *Ashṭādhyāyī* and its *Gaṇā-pāṭha* are shown later.

(2) *Rise (Udaya) and Expansion (Pratiśṭhā)*—A *Charaṇa* was not necessarily bound to a place. For instance,

the Kaṭha and Kālāpa *Charaṇas* spread from village to village by their popularity, as Patañjali informs us (*Grāme grāme Kāṭhakam Kālāpakam cha prochyate*, IV.3.101; II.315). Pāṇini mentions that the compound names of *Charaṇas* were used in singular when *anuvāda*, 'restatement', was implied (*Anuvāde Charaṇānām*, II.4.3). The *Kāśikā* says that *anuvāda* is repetition of an already well-known fact (*pramāṇānuvāgata-syārtḥasya śabdena samikīrtana-mātram anuvādaḥ*). Kātyāyana explains that the linguistic forms intended by Pāṇini anticipated only the roots *sthā* and *iy* in past tense. For this Patañjali cites the forms *udagāt* and *pratyashṭhāt*, referring to the rise (*udaya*) and expansion, (*Pratiśṭhā*) of two *Charaṇas* jointly, like Kaṭha-Kālāpa, Kaṭha-Kauthuma, Mauda-Paippalāda (*Bhāṣya*, II.4.3; I.474). A person who already knows the fact of the spread of these schools remarks in the course of conversation, 'The Kaṭha-Kālāpa *Charaṇas* have made such progress and have established themselves so well'. This statement was of the nature of an *anuvāda*, i.e. restating what was already a known fact about the popularity of these two schools. The Vedic schools were expanding both geographically and in their scholarly activities, or subjects of learning included within their fold, which is the background of the present *sūtra*.

(3) *Anuvāda* (*Literary Collaboration*)—This term *anuvāda* is different from the term discussed above. The *sūtra* *Anorakarmakāt* (I.3.49) contemplates some kind of literary collaboration in the matter of recitation amongst different Vedic schools; e.g. *anuvadate Kaṭhaḥ Kālāpasya*, *anuvadate Maudaḥ Paippalādasya*, i.e. the Kaṭha school follows the method of the Kālāpa school in recitation (*yathā Kālāpo dhīyāno vadati tathā Kaṭhaḥ*, *Kāśikā*). The Kaṭha and Kālāpa were related to the *Kṛishṇa Yajurveda* and the Mauda and Paippalāda to the *Atharvaveda*. This example points to intellectual co-operation between different *Charaṇas* of the same Veda. Pāṇini names some *Charaṇas* as forming a collective unit, e.g.

*Kaṭha-Kālāpāḥ*, *Kaṭha-Kaṭhūmāḥ*, *Kaṭhuma-Laṅgāksbāḥ* *Mauda-Paiṣpalādāḥ* (*Kārta-Kauṣapādayaścha*, VI.2.37). Such union of *Charaṇas* must have been due to their cultural affinity, or geographical proximity.

(4) *Enrolment*—The *Charaṇas* were open to admission of students, which Pāṇini mentions as *tad aveta*, 'gets admitted to it' (V.1.134), e.g. *Kāṭhikām avetaḥ*, 'has become a member of the Kaṭha *Charaṇa*', or as the *Kāśikā* explains it 'obtained the fellowship of the Kaṭha school' (*Kaṭhatvaṁ prāptaḥ*).

The Kaṭha *Charaṇa* as a corporate body (*Charaṇa-samūha*), was called *Kāṭhaka*, 'the corporation of the Kaṭha scholars' (*Kaṭhānām samūhah*, *Charaṇebhyo dharmavat*, IV.2.46).

(5) *Fellowship*—Fellow students belonging to the same *Charaṇa* as their *alma mater* were called *sa-Brahmachārins* (*Charaṇe Brahmachārīṇi*, VI.3.86). Academic fellowship had a social significance. Yājñavalkya refers to the custom of entering the name of a person's *Charaṇa* in legal documents. Patañjali has the following query: '*Kim-sabrahmachārī tvam?*', 'From which School are you?', implying that a student was known by the school from which he graduated and also in association with other fellows of the same school. This query, he says, may be put in three possible ways: (1) Who were fellows of the same school? (*ke sabrahmachārīṇaḥ*); (2) Whose fellow-student are you? (*keśhām sabrahmachārī*); (3) Who was your fellow-student? (*kaḥ sabrahmachārī tava*, II.2.24; I.425). These queries bring out the relative academic distinctions of students in life.

(6) *Women Students*—*Sūtra* IV.1.63 (*Jāte-rastrī-viśbayād-ayopadbāt*) as interpreted by Patañjali shows that a woman could be a member of intellectual fellowships like *Charaṇas* which were socially assuming the status of *jāti* or caste (*Charaṇa* as *jāti* is admitted in *gotraṁ cha charaṇaiḥ saba*). The term *Kaṭhī*, for instance, denoted a female member of the Kaṭha school, an individual regarded as foremost

of her class being called *Kaṭha-vṛindārikā*, and another deserving of special distinction as *pūjyamāna-Kaṭhī* (II.1.62). The term *Kaṭha-mānini* points to proud honour felt owing to academic lineage as a *Kaṭhī*. *Kaṭhajāliya* and *Kaṭhadeśiya*, understood in the light of Pāṇini V.3.67 (*Īśhadasamāptau* etc.) were applied to those who were not full-fledged members of the Kaṭha School, i.e. not endowed with the learning born of academic life therewith but belonging to the fellowship (*jāti*) or the region (*deśa*) of the Kaṭhas.

(7) *Social Honour*—Membership of a *Charaṇa* carried with it social honour and dignity, of which probably some were not slow to take advantage by assuming superior airs against other persons not possessing that distinction. Pāṇini hints at this sense of pride in the term *ślāgbā*, e.g. *Kāṭhikayā ślāgbate*, 'he glorifies himself in vanity as a Kaṭha.' At times such vanity would result in the disparaging of others, which Pāṇini refers to as *atyākāra*, e.g. *Kāṭhikayā atyākurute*, 'being puffed up as a Kaṭha he looks down upon others', (*Gotra-charaṇāch-chblāgbātyākāra-tadavetesu*, V.1.134).

(8) *Intellectual Ideal*—The *Charaṇas* were the custodians of the cultural traditions created by generations of their students and teachers. These traditions were recorded in their literature built up through the ages. We have seen how Pāṇini is acquainted with the various types of literature as the output of the *Charaṇas*, viz. (1) the Vedic Śākhā texts, (2) Brāhmaṇa works, (3) Kalpa works, (4) the Dharma-sūtras (*Charaṇebhyo dharmavat*, IV.2.46). With the development of the *Dharma-sūtra* or legal literature there set in a process of gradual separation between the secular and scientific studies on the one hand and religious and ritualistic on the other. The *Aśbādhyaī* itself is an example of this process at work, which introduced new subjects of study besides those traditionally comprised within the *Charaṇas*. For instance, the *parishads* of the Vedic *Charaṇas* themselves took the lead in promoting such studies, as phonetics, linguistics, grammar, and the like,

which later on became independent of Vedic studies and were cultivated in their own schools. The *Pārśhada* work of each Vedic school concerned itself with linguistic and grammatical questions which gave scope to the rapid growth of these studies. It is to be remembered that whereas an individual *Charaṇa* specialised in its own text or *Śākhā* of the Veda, and developed its related Brāhmaṇa and Sūtra, the different *Charaṇas* of the same Veda possessed in common their *Pārśhada* work or *Prātiśākhya*, conceived as belonging to all the offshoots or branches (*śākhās*) of the same Vedic tree (*Śākhādibhyo yaḥ*, V.3.103; *Śākhēva śākhyaḥ*).<sup>1</sup>

(9) *The Charaṇa as a Saṅgha*—The *Charaṇas* were organized as autonomous bodies making their own rules and regulations as an expression of the democratic ideal in the sphere of learning and education and adopting the method and procedure of the *Saṅghas* in their management. Pāṇini cites the specific instance of the *saṅgha* of students studying the Vedic text of the teacher *Śākala*, and thence called *Śākala* or *Śākalaka* (*Śākalād-vā*, IV.3.128; *Śākalena proktam adbhīyate Śākalāḥ; tesām saṅghaḥ*). It is obvious that the *Śākalas*, as also other *Charaṇas*, possessed an individual entity for social, economic or organised life in particular. This is illustrated by the fact that the name *Śākala* was also applied to the legend (*aṅka*) and the emblem or heraldic symbol (*lakṣaṇa*) adopted by the School on their *reals* and documents; the same word also denoted their separate settlement or campus (*ghoṣa*).<sup>2</sup>

<sup>1</sup> वृक्षादीनां शाखेवास्य वेदकल्पवृक्षो ऽवयवाः शाखाः । शाख्यं शाख्यं प्रतीतिं प्रातिशाख्यम् । दधिकृत्य कृतं प्रातिशाख्यम् ।

<sup>2</sup> *Sūtra* IV.3.128 (*Śākalād-vā*) as interpreted in the light of IV.3.127 (*Saṅghaṅka-lakṣaṇeṣu aṅ-yañ-inām aṅ*); cf. the examples in *Kāśikā*, *Śākalāḥ aṅkaḥ*, *Śākalam lakṣaṇam*, *Śākalāḥ ghoṣaḥ*; similarly *Śākalakaḥ* (Cf. K. P. Jayaswal, *Hindu Polity*, (1924), 1.42).

## CH. V, SECTION 2. LEARNING

**AGENCIES OF LEARNING**—The various agencies in the spread of learning comprised (1) teachers, (2) authors, (3) regular students, (4) travelling scholars (*charakas*), (5) educational institutions, (6) learned assemblies and conferences, (7) discourses, (8) expositions and (9) literature. The cumulative work of these agencies resulted in a nationwide expansion of education and learning.

**IDEALS.** The ideals of learning must have played an important part in the moulding of educational activities. Both the teacher and the taught (*ācāryāntevāsinaḥ*) were inspired by the literary and cultural ideals of their age. We get from Pāṇini a graphic picture of the types of literature then developed, *viz.* Chhandas and Brāhmaṇa works, Vedāṅga literature like Kalpa and Vyākaraṇa, secular works and poetry, dramaturgical treatises and stories (IV.3.110-111), *gāthās* and *ślokas* (III.2.23). Students would prepare themselves for the study of one or other of these different classes of literature (*tadadbhite*). In the sphere of teaching, there were different classes of teachers dealing with the several classes of literature, e.g. *ācārya* for the esoteric knowledge of the Veda, *śrottriya* for recitation, *pravaktā* for *prokta* literature, *ākhyātā* imparting religious teaching, *anūchāna* for the Vedāṅgas, and *adhyāpaka* carrying on general teaching work. But from the point of view of scholarly attainments a large number of specialists in each branch of learning were coming into existence. In fact from Pāṇini's account of specialist scholars we learn that each text or subject of knowledge was represented by the learned men who had mastered it (*tadveda*, IV.2.59). For example, there is mention of experts in the various Soma sacrifices (*kratus*), named after the particular ritual which they

had mastered, as *āgnishṭomika*, *vājapeyika* (IV.2.60); the reciters of *uktha* and the various forms of orthoëpic recitations of Chhandas texts, as the *krama-pāṭha* and *pada-pāṭha* (IV.2.61); exponents of the Brāhmaṇa and Anubrāhmaṇa works (IV.2.62), and Sūtra works (IV.2.65) dealing with the several classes of scientific literature. The Vedāṅga literature was represented by its specialists, such as *vaiyākaraṇa*, (grammarians), (VI.3.7), *nairuktika*, (etymologists), and *yājñika*, (experts in Kalpa or ritual) (IV.3.129). Patañjali's elaborate list of works in the *vārttikas* appended to *sūtra* IV.2.60, shows the tendency towards specialization carried to extremes in his time, mention being made of experts in ornithology (*vāyasa-vidyā*), bodily signs (*aṅga-vidyā*), knowledge of cows (*golakṣhaṇa*), horses (*aśva-lakṣhaṇa*), military science (*kṣhattra-vidyā*). Multiplication of works had advanced and each is spoken of in terms of its exponent. Even the story literature had its devotees, e.g. *Yāvakrītika* (adept in the story of Yavakrīta, (related in the Vanaparva, Chs. 133-38, A.B.O.R.I., XXI.282); *Yāyātika* (proficient in the legend of Yayāti, cf. examples on VI.2.103), *Vāsavadattika* (well-versed in the romance of Vāsavadattā), and *Saumonottarika* (a special student of the romance of Sumananottarā, related at length in Buddhist literature (*Dict. of Pāli Proper Names*, I.361). Pāṇini himself refers to special works dealing with *ākhyāna* material (VI.2.103).

**CHARAKA**—The peripatetic scholar was called *charaka*, as distinct from the *māṇava* and *antevāsin* who were attached to their schools (V.1.11, *Māṇava-charakābhyām khañ*). Vaiśampāyana was called a *charaka*, obviously on the basis of his literary activities from place to place; his pupils following in his footsteps were also known as *charakas*. The *charakas* were like post-graduate scholars who after finishing their studies sought higher knowledge by travelling. The expression *chārikam charantā* is applied in the *Jātakas* to advanced students of the Takṣaśilā university, who after reaching the end

of their studies travelled to train themselves in the direct knowledge of country observances (*Sonaka Jātaka*, V. 247). In the *Bṛihad. Up.* we find Bhujyu Lāhyāyani mentioning to Yājñavalkya his wanderings in the Madra country as a *charaka* (*Madresbu charakāḥ paryavrajāma*, III.3.1). Yuan Chwang mentions about Pāṇini himself that he travelled widely in search of linguistic material, interrogating learned men in different localities.

**AUTHORSHIP**—Specialists justified themselves by creative activity in producing advanced literature. Pāṇini makes mention of *granthas* or works composed (IV.3.87; IV.3.116).

He refers to the following classes of authors: (1) *mantrakāra*, (2) *padakāra*, (3) *sūtrakāra*, (4) *gāthākāra* and (5) *śloka-kāra* (III.2.23). These terms point to the different types of literature and styles of composition which they represented.

A writer on grammar is named *śabdakāra* (III.2.23), or *śābdika* (IV.4.34, *śabdān karoti śābdiko vaiyākaraṇaḥ*). The literature of commentaries (*vyākhyāna*, IV.3.66) was also growing and was the work of learned men who were inspired to produce them by their mastery of the original works. The highest intellectual output of the age was, however, the work of master-minds and original thinkers like Āpiśali, Yāska, Śākaṭāyana and Pāṇini, who discovered and opened up new fields of knowledge. The literary efforts of these geniuses were aptly called *upajñā*, new knowledge promulgated, or *ādya āchikhyāsā*, knowledge presented for the first time (*sūtras* II. 4.21, *Upajñōpakramān tadādyāchikhyāsāyām*; IV.3.115; VI.2. 14). An indication of the great pains which these pioneers of learning took in order to enrich their subjects is given by Patañjali when he speaks of Pāṇini as *mahatā yatnena sūtram prapayati sma*, i.e. 'he planned and composed the *sūtras* with strenuous effort'. Pāṇini himself speaks of a perfect *sūtra* as *pratishṇāta*, 'immersed', i.e. emerging out of concentrated thought (VIII.3.90, *sūtram pratishṇātam*). The simile appears to be taken from the maturity attained by one who had

become a *snātaka*. He also refers to the linguistic forms expressive of the devotion of an author to his work (*bhāsana*, *jñāna*, *yatna*) expressed by the root *vad* in the *Ātmanepada*, as *vadate chārvī Lokayate*, 'the Chārvī teacher shows himself brilliant in the exposition of the Lokāyata doctrine.' I.3.47).

Pāṇini mentions a type of literary activity called *prakathana* (I.3.32), or extempore composition, e.g. *gāthāḥ prakurute* (*Kāśikā*). It appears that the *gāthākāra* mentioned in *sūtra* III.2.23 was a person who was expected to compose at the spur of the moment *gāthā* verses, generally of a eulogistic character. In the *Pāriplava ākhyāna* of the *Śatapatha Brāhmaṇa* the *vināgāthī*, also called *vināgaṇagin* is said to sing *gāthā* verses of his own composition (*svayaṁ sambhṛitā gāthā gāyati*, Ś.B. XIII.4.3.5). The word *gāthaka* derived by Pāṇini from the root *gai*, to sing (III.1.146) seems to have been originally connected with a *gāthā* composer who sang the verses to the accompaniment of a lute.

**NAMING OF BOOKS**—Pāṇini enunciates two general principles for the naming of literary works: (1) after the name of the author (*Kṛite granthe*, IV.3.116), e.g. *Vāraruchāḥ ślokaḥ*, the *śloka*s composed by Vararuchi; and (2) after the name of the subject treated (*Adbhikṛitya kṛite granthe*, IV.3.87), e.g. *Saubhadra*, 'story of Subhadrā'; *Gaurimitra*, not explained; *Yāyāta*, story of Yayāti. These short stories were meant to popularise the great characters of ancient history. As examples of works named after subjects, Pāṇini mentions (1) *Śisukrandīya* ('a work based on the cry of the divine child Kṛishṇa at birth'); (2) *Yamasabbhīya* ('relating to the assembly of Yama'); (3) *Indrajananīya* ('relating to the birth of Indra') (IV.3.88).

Commentaries were named after the topics they expounded (*vyākhyāṭavyā-nāmnah*, IV.3.66), e.g. *Supāṁ vyākhyānaḥ Saupah granthaḥ* (a book on Nouns); similarly *Taiṇa* (verbs); *Kārta* (verbal Nouns); *Shātvanaṭvikam* (Cerebralisation); *Nātanāṭikam* (Accentuation). Pāṇini cites examples of com-

mentarial literature dealing with topics, both big and small; e.g. (1) *kratus* (IV.3.68) such as (a) *Āgnishṭomika* (dealing with Agnishṭoma sacrifice), (b) *Vājaṭpeyika* (dealing with Vājaṭpeya sacrifice), (c) *Rājasūyika* (dealing with Rājasūya sacrifice); (2) *Yajñas* (smaller sacrifices in the domestic fire, IV.3.68), such as (a) *Pākayajñika*, (b) *Nāvayajñika*; (3) *Adhyāyas* (Chapters of Vedic works, IV.3.69), such as (a) *Vāsishṭhika Adhyāya* (*Vasishṭhasya vyākhyānaḥ*, commentary of the Seventh Maṇḍala of the *Ṛigveda*), (b) *Vaiśvāmītrika* (Third Maṇḍala); and (4) smaller works, like (i) *Pauroḍāśika* (relating to the explanation of the *mantras* used in the preparation of *puroḍāśa* oblation); (ii) *Puroḍāśika* (relating to the regulations for the preparation of *puroḍāśa*); (iii) *Chbandasya* or *Chbāndasa* (a book on meters, IV.3.71); (iv) *Aśṭika* (IV.3.72, on the household sacrifices); (v) *Pāśuka* (animal sacrifices); (vi) *Chātur-hotṛika* (relating to the Chatur-hotṛi service, performed by the four chief-priests); (vii) *Pāñcha-hotṛika* (on the particular formula called *pañcha-hotṛi*, in which five deities are named); (viii) *Brāhmaṇika* (commentary of a *Brāhmaṇa*); (ix) *Ārchika* (of the *Ṛik* verses); (x) *Prāthmika* (probably the Prathmārchika of the *Sāmveda*); (xi) *Ādhvarika* (relating to the Adhvara or Soma-sacrifice); (xii) *Paurāścharaṇika* (relating to a preparatory rite as mentioned in the *Śatapatha Br.*); (xiii) *Nāmika* (dealing with Nouns) and (xiv) *Ākhyātika* (dealing with Verbs; IV.3.72). (xv) *Ārgayana* (= *Ṛigayana-vyākhyāna*, explanatory of the recitation or study of the whole *Ṛigveda*, IV.3.73, cf. also *Kāśikā* on VI.2.151). This extensive literature of commentaries is mentioned in the *sūtras*, IV.3.68-72. Other explanatory works based on minor texts are cited in the *Ṛig-ayanādi gaṇa* (IV.3.73), such as *Chbandomāna*, *Chbandobbāshā*, *Chbandovichiti*, *Nyāya*, *Punarukta*, *Vyākaraṇa*, *Nigama*, *Vāstuvidyā*, *Āṅgavidyā*, *Kshattravidyā*, *Utpāta*, *Saṁvatsara*, *Mubūrta*, *Nimitta*, etc. (Cf. *āṅgavijjā*, *vattbuvijjā*, *kbattavijjā* in the *Brahmajālasutta*, *Dīghamikāya*, I.21).

*Sūtra* works had the peculiarity of being named after the number of their chapters (*adhyāyas*, V.1.58), e.g. Pāṇini's own work called *Aṣṭaka* ('Eight Chapters'). The *Kāśika* adds that the work of *Kāśakṛtsni* consisting of three *adhyāyas* was called *Trika* ('Three Chapters'), and of *Vyāghrapād Daśaka* ('Ten Chapters') (V.1.58). The students studying these texts were also designated as *Aṣṭakāḥ*, *Triakāḥ* *Daśakāḥ* respectively (IV.2.65, *Sūtrāch-cha kopadhāt*). A similar principle of naming operated in the case of two Brāhmaṇa work of 30 and 40 chapters (V.1.62), which, as Keith suggests, were the *Kaushītakī* and the *Āitareya Brāhmaṇas* respectively (*Ṛg-veda Brāhmaṇas*, Intro.). We know at least in the case of the *Śatapatha* that the *adhyāya* division was an important factor in the growth of its contents. The first nine books dealing with a complete exposition of the Haviryajña and Soma sacrifices (Books I-V also called *Ishti-Paśubandha*, cf. *Kāśika* on *sūtra* II.1.6) contained sixty *adhyāyas* and were known as *Shasṭhi-patha* ('Sixty Chapters'). With the addition of the last five books (X-XIV) consisting of forty Chapters the name *Śatapatha* was finally applied to the work.

**PLAN OF A TREATISE**—A requisite of literary composition is its proper planning and presentation of subject-matter. This plan is called *tantra-yukti*. The work of Kauṭilya has thirty-two *Tantra-yuktis*; Charaka and Suśruta also mention them, the former adding three more to the list. The ancient Tamil grammar, the *Tolkappiyam*, based on the tradition of the Aindra school, enumerates in its *Porulātikāram* section thirty-two principles of which twenty-two agree with those of Kauṭilya. The *Mimāṃsakas* with their flare for analysis have indicated the principles of a literary composition. Of these they have singled out *saṃgati*, inherent consistency or internal order, and *maṅgala*, benedictory opening. These *Tantra-yuktis* were also known to Pāṇini. The first of these, viz. *Adhikāra*, treatment of the matter within the purview or scope of a work is referred to in the *sūtra* *Adhikṛitya kṛite granthe*

(IV.3.87), i.e. a work that is composed in accordance with the principle of *adbikāra*, or sense of the relevant. Pāṇini's own work is model of *Vidhāna* or the treatment of topics in their inherent order. Whitney supposed that the *Aṣṭādhyāyī* lacked the logical order in the arrangement of its topics, but Barend Faddegon has shown that this assumption is not correct (*Studies on Pāṇini's Grammar*, 1936). Buiskool from his Study of the Tripādī Chapters (*Tripādī*, 1939) holds that Pāṇini's work was based on a system of thematical groups which are rationally classified and arranged.<sup>1</sup>

Other principles of treatment proper for scientific works are also indicated by Pāṇini, e.g. (1) *Hetvartha*, the ground of a statement or proposition (as in I.2.53); (2) *Upadeśa*, the author's own directions or instruction contained in his work (as in I.3.2); (3) *Apadeśa*, citation of another's opinion along with one's own, for refutation (as in I.2.51-52); (4) cross-reference of which there are so many in the *Aṣṭādhyāyī*; (5) *Samśaya* or *Vipratishedha*, doubt arising from two equally forceful alternatives (I.4.2); (6) *Vakyādhyāhāra*, supplying an ellipsis, mentioned in *sūtra* VI.1.139; (7) *Anumata*, citation of the opinion of another for its acceptance, as in the case of the opinions of other grammarians quoted by Pāṇini; (8) *Atiśaya-varṇana*, detailed description or over-loading with details (as in *Indriyam Indra-liṅgam Indra-dṛishṭam Indra-sṛishṭam Indra-jushṭam Indra-dattam iti vā*, V.2.93); (9) *Nirvachana* employing the derivative sense of a word, as in the case of *mahāsamijnās*, like *Sarvanāma*, *Avyaya*; (10) *Svasamijnā*, use of one's own technical terms as *ṣi*, *ghu*, *bha*; (11) *Pūrvapaksha* and (12) *Uttarapaksha*, arguments for and against a proposition by which its truth may be ascertained (as in the *Sūtra-kāṇḍa*, I.2.51-56); (13) *Atideśa*, analogous application, (as in I.2.57, *Kāloṣasarjane cha tulyam*); and (14) alternative application, which appears in such words as *vā*, *anyatarasyām*, *ubhayathā*,

<sup>1</sup> For a simple analysis of the plan of the work adopted by Pāṇini, see Belvalkar, *Systems of Sanskrit Grammar*, pp. 20-22.

*ekeshām, bahulam* and *vibhāṣā* in the *Aṣṭādhyāyī* (cf. Patañjali for the rationale of these variant terms, II.1.58; I.400). **THEORY OF MANGALA**—Maṅgala means invocation or benediction with which a treatise is to be commenced. The invocation of the Divine was made to ensure the success of the undertaking. Pāṇini, as one of the greatest authors has also commenced his work, the *Aṣṭādhyāyī*, with a similar invocation, indicated in his use of the word *vṛiddhi* at its beginning, though it meant an alteration in the order of the words which should have read *Ādaich vṛiddhiḥ*, and not *Vṛiddhir-ādaich* (I.1.1). Patañjali raises this point and obviates the objection by invoking the practice of *maṅgala*. He says that Pāṇini as a *maṅgalika āchārya*, chose to begin his treatise with *vṛiddhi*, a word that ensures the growth of the work and the longevity of its readers (*Bhāṣya*, I.40). Patañjali takes recourse to the same practice of *maṅgala* to justify the use of *vakāra* in *sūtra Bhūvādayo dhātavaḥ* (I.3.1). He further extends it to the middle and end of a work (*maṅgalādīni maṅgalamadhyāni maṅgalāntāni hi śāstrāṇi prathante*, I.3.1; I.252). This seems to hold good in the case of the *Aṣṭādhyāyī*, for it has been suggested that the *sūtra Śiva-śam-arishṭasya kare* (IV.4.143) represents Pāṇini's use of *maṅgala* also in the middle of his treatise. Only a few aphorisms later, *sūtra Tasmai hitam* (V. 1.5), a benedictory expression ('Good be to all concerned!'), seems to be deliberately used by Pāṇini to name two of his most important chapters (fourth and fifth), viz. *Taddhita*, dealing with hundreds of grammatical formations (*vṛittis*).

Pāṇini also uses the benedictory term *udaya* in the last but one *sūtra* of the *Aṣṭādhyāyī*. The use of *udaya* in place of shorter *para* points to his faith in the practice of *maṅgala* (*udāttaṭparasetyeti vaktavya udaya-graḥaṇam maṅgalārtham, Kāśikā*, VIII.4.67). The word *udaya* of this *sūtra* was taken by him from the *Ṛik Prātiśākhya*, which uses it as a synonym of *para* (cf. *ṛikāra udaye*, II.32). It is impossible to agree with Sköld who argues that the *sūtra* is a concluding Pāṇini's

great work, coming as it does after the *maṅgala*-denoting word *udaya*, is a later interpolation (*Papers on Pāṇini*, p. 8). This assumption is not quite tenable considering that Kātyāyana devotes four *vārttikas* to it, and Patañjali also comments on them as authentic. Both of them conclude their works with the observation *Bhagavataḥ Pāṇineḥ siddham*. Patañjali, in his comment on *siddha*, the first word of the opening *vārttika* of Kātyāyana, makes that teacher also subscribe to the theory of *maṅgala* (as a *māṅgalika ācārya*, *Bhāṣya*, I.7).

In the Pārshada or Prātiśākhya tradition of the *Charaṇas* *Om* was pronounced at the commencement of *svādhyāya*. Pāṇini says that for this purpose it was to be uttered with a *pluta* accent (*Om-abhyādāne*, VIII.2.87).

WRITING—Writing was known in the time of Pāṇini and even earlier according to Goldstücker who thinks that Vedic literature was available to Pāṇini even in Mss. (Goldstücker, *Pāṇini*, pp. 11-47). Though teaching was oral in those days, and study from manuscripts was not encouraged on principle as the proper method of learning, Pāṇini hints at the use of writing in several significant expressions. These are (1) *grantha*, (2) *lipikara*, a writer, (3) *Yavanānī lipi*, and (4) the marks of numerals imprinted on the ears of cattle to indicate their owners, as already shown (VI.3.115).

(1) *Lipikara* (III.2.21) as well as its variant form *libikara*, denoted a writer. The term *lipi* with its variant was a standing term for writing in the Maurya period and earlier. *Dhammalipi*, with its alternative form *dharmadīpi*, stands for the Edicts of Asoka engraved on rocks in the third century B.C. An engraver is there referred to as *lipikara* (M. R. E., II). Kautilya also knows the term: 'A king shall learn the *lipi* (alphabet) and *saṅkhyāna* (numbers, *Arth.* I.5). He also refers to *saṁjñā-lipi*, 'Code Writing' (*Arth.*, I.12) used at the Espionage Institute. In the Behistun inscription we find *dīpi* for engraved writing. Thus it is certain that *lipi* in the time of Pāṇini meant writing and script.

(2) *Branding of kine with numerals.* Pāṇini refers to the marking of certain signs on the ears of cattle to indicate ownership. Among several signs thus branded (*sūtra* VI.3.115), the terms *ashṭa* and *pañcha* stood for the written figures of the numerals 8 and 5 (Goldstücker, *Pāṇini*, p. 44).

(3) *Yavanānī* (IV.1.49). Kātyāyana's *vārttika* mentioning the *lipi* of the Yavanas (*Yavanāl-lipyām*) is only an explanation of Pāṇini's use of the term *Yavanānī*. It is unwarranted to assume that he is supplying some new information not known to Pāṇini. Such an assumption goes against the very style of Kātyāyana's other *vārttikas* on this *sūtra*, designed to explain and not supplement the words of Pāṇini's rule, as *bimānī*, *araṇyānī*, *yavānī*. *Yavanānī* as the name of a script occurs in the list of scripts in the *Samavāyāṅga sūtra* (*Samavāya* XVIII) under the form *Javanāṇiyā* (cf. also the same list in *Paṇṇavaṇā sūtra*). Weber interpreted *Yavanānī* as Greek writing (*Ind. St.*, IV.89). Keith also holds that *Yavanānī lipi* meant 'Greek (Ionian) writing' (*Hist. of Sans. Lit.*, p. 425).

Goldstücker and Spooner took *Yavanānī* to refer to the Persian cuneiform writing which Keith refutes as highly improbable since there is no evidence to show that the word *Yavana* ever meant the Persians (*J.R.A.S.*, 1915, p. 432). Darius (B. C. 521-B. C. 485) in his Old-Persian Inscriptions refers to the country *Yauna* and to its inhabitants as *Yaunā* (Behistun Inscription, names of the twenty-three provinces), which shows that the terms cannot be taken to mean Persia or the Persians. Most scholars agree in taking them as Ionia and Ionian Greeks. Aśoka likewise uses in his inscriptions the word *Yona* for *Yavana* and not for the Persians. The suggestion that *Yavanānī* was the name of the Aramaic writing discovered in a stone inscription at Takshāṣila, likewise remains unsupported by any proof. Herodotus mentions a contingent of Indian soldiers in the army of Xerxes fighting in Greece and there were Greek colonists settled in Bactria even before Alexander. Thus Pāṇini's knowledge of the word for Greek writing can be naturally understood.

## CH. V SECTION 3. LITERATURE

**CLASSES OF LITERATURE**—Pāṇini classifies literature on the basis of the character of the creative effort producing it. This is indicated by the following terms:

(1) *Dr̥ṣṭa* (IV.2.7). Literature that is revealed or seen. Under this class he mentions the *Sāmans* named after their seers or Ṛishis, e.g. *Kāleya* (IV.2.8) and *Vāmadevya* (IV.2.9).

He also must have known the *San̥hitās* of the Ṛigveda and Yajurveda, and their divisions like *Sāṅkta* (V.2.59), *Adhyāya* and *Anuvāka* (V.2.60).

(2) *Prokta* (IV.3.101). Literature promulgated or enounced by Ṛishis, as founders of the different Vedic *Charaṇai*. Under this class were included the *Cbbandas* works (IV.2.66), or *Śākhās*, e.g. the *Śākhā* works of the Taittirīyas (IV.3.102), Kāṭhas (IV.3.107) and Kālāpās (IV.3.108); and the older Brāhmaṇas (IV.3.105). As pointed out above the *Prokta* works were connected with the teachers and students devoted to their study in the *Charaṇas*. This complete identity of the name of a Vedic text with that of its students held good for Śākhā and Brāhmaṇa works only (IV.2.66). For example, in the School of the Taittirīyas, the original Śākhā and its Brāhmaṇa alone would be entitled to a name in accordance with the rule of *tad-vishayatā*, as *Taittirīya Śākhā* and *Taittirīya Brāhmaṇa*. But in course of time the Āraṇyaka and Upanishad portions were also developed as constituent parts of the *Brāhmaṇas*, and the name *Taittirīya* was applied to them also.

A third kind of *Prokta* works developed in the Vedic schools was that of the *Kalpas*, or *Śrautasūtras*, classed as Vedāṅga works. Kātyāyana and Patañjali definitely state that the rule of *tad-vishayatā* did not apply to Kalpa works, but an exception was made in the case of only two such Kalpa books, viz.

those of Kāśyapa and Kauśika, who are mentioned by Pāṇini as Rishis (IV.3.103). The schools of Kāśyapa and Kauśika were known as *Kāśyapinah* and *Kauśikinah* (*Kāśyapa-Kauśika-graṇam cha Kalpe niyamārtham*, *Vār.* 6 on IV.2.66).

Another variety of *Prokta* literature mentioned by Pāṇini consisted of two special kinds of *sūtra* works, viz. (1) the *Bhikṣusūtras* of Pārāśarya and Karmanda, and (2) the *Naṭasūtras* of Śilālin and Kṛiṣāśva (IV.3.110-11). It is surprising that the strict principle of *tad-vishayatā* which applied to Vedic works should have been extended to these four works of later origin and secular character. The examples cited by Patañjali, *Pārāśariṇo bhikṣubavah*, *Śailālino naṭāḥ*, show that these treatises were connected with their own schools with a succession of teachers and pupils (*adhyetṛi veditṛi*), like other orthodox sacred works. The *Pārāśara* and *Śailālaka Charaṇas* were originally related to the *Rigveda*, but their activity later on centred round new subjects of study dealt with in their *Bhikṣusūtras* and *Naṭasūtras*. Probably the *Naṭasūtras* of Śilālin were the original sources of the material in Bharata's *Nāṭyaśāstra*. The Vedic schools lent their authority to the secular subjects promoted by them, which were thus given the rank of Chhandas works (*Bhikṣu-Naṭa-sūtrayoś-Chbandastvam*, *Kāśikā*), and the status of Vedic schools applied to them (*Atrāpi tad-vishayatā chetyanuvartishyate*, *Bhāshya*, II.286). That Pāṇini looked upon the dramaturgical works as *āmnāya* of sacred authority associated with the *Charaṇas*, is borne out by the reference to *Nāṭya* in *sūtra* IV.3.129, (cf. *naṭa śabdādapi dharmāmnāya-yoreva bhavati*, *Kāśikā*). The *Bhikṣusūtra* of Karmanda and the *Naṭasūtra* of Kṛiṣāśva were no doubt the product of the Vedic *Charaṇas* (*atrāpi tad-vishayatārtham chbando-graṇam*, *Kāśikā*, IV.3.111). It is not known to which Veda these latter belonged.

(3) *Upajñāta* (IV.3.115). Literature bringing to light new knowledge expounded for the first time (*ādya āchikhyāsā*, II.4.21), came under this class, e.g. the works of

such original authors as Āpiśali, Pāṇini, Vyāḍi and Kāśakṛitsna (IV.3.115). *Upajñāta* formed a special class under *Prokta* literature, since the grammatical treatises of Āpiśali, Pāṇini, etc., are both regarded as *Prokta* and *Upajñāta* (*Pāṇininā proktam, Pāṇininā upajñātam*, both were *Pāṇinīyam*). This is just what should have been expected in the transitional period. Such texts combined certain features of the *Cbhandas Prokta* works and other features of independent texts cultivated outside the *Charaṇas*. The most distinctive feature was the principle of individual authorship, which did not operate in the case of the *Prokta* class of Vedic texts, but was applied to *Upajñāta* works being the exclusive fruit of the creative efforts of their authors. Special scientific treatises, mostly the Vedāṅga literature, were being written outside the *Charaṇas*, as a result of the intense intellectual activity on the part of their authors. The works of Yāska and Śākaṭāyana, Audavraji and Pāṇini were of this category and named after the first exponents (e.g. *Pāṇiniṇoṣajñātam Pāṇinīyam akālakam vyākaraṇam, Kāśikā*, IV.3.115).

The school-denoting (*adhyeṭṛi-veditṛi*) suffix was elided in this case also (*Proktāl-luk*, IV.2.64). Thus both the treatise of Pāṇini and its teachers and students were called *Pāṇinīya*. Although in its effect on the formation of names of the text and its school there was no difference, but from the institutional point of view the difference was remarkable between the method of study as applied to the new works like those of Pāṇini on the one hand and the traditional *Charaṇa* literature on the other. The followers of new sciences were not organized into the same sort of educational fraternity as in the case of the *Śākhā* works. Moreover, the *Pāṇinīya* treatise and the *Pāṇinīya* students did not belong to one particular *Charaṇa*, but were connected with Vedic schools in general.

*Sūtra* IV.2.65 states that the students of the new *sūtra* works were also named after the number of chapters in the texts studied by them, such as *Aṣṭakāḥ*, *Daśakāḥ*, *Tṛikāḥ*. Thus all the *Pāṇinīyas* to whichever Vedic school they belonged would

be called *Ashṭakāḥ*.

As a sequel to intensive efforts at compilation and computation this special phase of naming texts had been evolved much earlier, as names like *Śatapatha*, and *Shashṭipatha* testify. Pāṇini himself refers to two *Brāhmaṇa* works with 30 and 40 *adhyāyas*, and on that account known as *Trainśa* (= *Kaushtikī*) and *Cbātvarimśa* (= *Aitareya*) (V.1.62).

(4) *Kṛita* (IV.3.87; IV.3.116). This class of literature comprised ordinary works, termed *grantha*, which were named after their subject-matter (*Adbhikṛitya kṛite granthe*, IV.3.87) or by an adjective derived from the author's name (*Kṛite granthe*, IV.3.116). The rise of the *śloka* metre and with it the emergence of the classical poet (*śloka-kāra*, III.2.23) rapidly brought into being a new type of *kāvya* and *nāṭaka* literature as a medium of literary effort, and these were put under the *Kṛita* class. For example, *Saubhadra* (a book based on the story of Subhadrā); *Yāyāta* (on the legend of Yayāti); and *Vāraruchāḥ ślokāḥ* (a book of verses composed by Vararuchi), all later examples recorded in the *Kāśikā*. Pāṇini himself cites *Śiśukrandīya*, *Indrajananīya* (works relating to the birth of Kṛishṇa and Indra) as instances of *Kṛita* works.

*Kṛita* is to be distinguished from *Upajāñāta* in that the former referred to a book composed by a certain author; whereas the latter always had reference to a topic promulgated by a person. As Maxmuller puts it: "A work which has only been taught and promulgated by a person, is not to be called his book (*grantha*), but bears its own title, such as "grammar", or, whatever else it may be, together with an adjective derived from the author's name. Pāṇini's grammar, for instance, is not to be called *Pāṇinīyo granthah*, but *Pāṇinīyam Vyākaraṇam*, because it is a canonical work revealed to Pāṇini, but not invented by him." (*Hist. of Skt. Literature*, p. 361).

(5) *Vyākhyāna* (IV.3.66). Literature of Exposition and Commentaries. It comprised miscellaneous works on religious and secular subjects. These were not to be reckoned as original

works, but were called for by the practical needs of interpreting and conserving Vedic texts, performance of rituals, and also to advance the knowledge embodied in the Vedāṅgas, works of philosophy and miscellaneous subjects, such as astrology (*Jyotiṣh*), divination (*Aṅgavidyā*), military science (*Kṣatratra-vidyā*), etc. These included a vast and varied range of literature, like the extensive works on *Soma-Kratu*s and smaller hand-books on *Puroḍāśa*, explanations of special parts (*Adhyāyas*) of the *Ṛigveda*, specialised grammatical works like *Nāmika* and *Ākhyātika* (IV.3.72). The literature of Commentaries added to the volume and variety of Sanskrit literature by the contributions made to it by authors of different capacities, competent to deal with such scientific subjects as grammar and etymology, and others to treat such minor topics as portents (*utpāta*, IV.3.73), and fortune-telling (*nimitta*), its text being called *naimitta*, (IV.3.73) and an interpreter of prognostics as *naimittika*, (IV.2.60). Pāṇini refers to foretelling in *sūtra* I.4.39 (*Rādbīksbyor-yasya vipraśṇaḥ*).

#### Works Known to Pāṇini

**VEDIC TEXTS**—The extent of Pāṇini's acquaintance with Vedic texts is known by (1) works mentioned by name, and (2) texts that provided him material for his Grammar. Thieme, tracing Pāṇini's references to their original sources, has shown that Pāṇini derived his grammatical material from the texts of the *Ṛigveda*, *Maitrāyaṇī Saṁhitā*, *Kāṭhaka Saṁhitā*, *Taittirīya Saṁhitā* and *Atharvaveda*, probably also from the *Sāmaveda*. To these may also be added the *Śākalya Pada-pāṭha* of the *Ṛigveda* which has supplied him with material for *sūtras* I.1.16-18 (P. Thieme, *Pāṇini And The Veda*, p. 63). Thieme further points out that some of the Vedic forms used by Pāṇini cannot be traced to any extant Vedic works. Possibly they were derived from some text or *Śākbā* of the Black Yajurveda which was known in his time but now lost to us (*ib.*, p. 64). The *Atharvaveda* used by Pāṇini is believed to be in its

Paippalāda recension (*ib.*, p. 66).

Goldstücker held that Pāṇini did not know the *Atharva-veda* (Pāṇini, p. 108). According to Weber this view is not tenable, since Pāṇini has actually utilised the material from this Veda (Thieme, *ib.*, p. 73). Pāṇini mentions Ātharvaṇikas (students of Atharvan, VI.4.174), and includes the name Atharvan and Ātharvaṇa in the *Vasantādi-gaṇa* (Bhāṣya, II.320), on which Patañjali says that the Ātharvaṇika students were studying an *Āmnāya* (i.e. Śākhā) and a *Dharma* (i.e. *Dbarmasūtra*) of their own.

Goldstücker had taken the view that the *Vājasaneyī Saṁhitā* and the *Śatapatha Brāhmaṇa* were also unknown to Pāṇini. Thieme thinks that Pāṇini did not gather any material from the White Yajurveda, but this should not mean that Pāṇini's grammar was anterior to the *Vājasaneyī Saṁhitā* and the *Śatapatha Brāhmaṇa* (Thieme, *ib.*, p. 74; K. B. Pathak, A.B.O.R.I., IX.84). Pāṇini refers to Vājasaneyā and Vājasaneyin in the *Gaṇa-pāṭha Śaunakādi* (IV.3.106).

**TERMS INDICATIVE OF TEXTS**—Pāṇini has used in his *sūtras* the following terms associated with certain texts: (1) *Cbbandas*, (2) *Mantra*, (3) *Ṛich*, (4) *Yajus*, (5) *Brāhmaṇa*, and (6) *Nigama*. *Cbbandas* denoted the sacred literature, as distinguished from *Bhāṣhā*, the spoken language. *Cbbandas* included both the *Saṁhitā* and the *Brāhmaṇa* literature. The term *Mantra* had a more restricted scope, being applied to a sacred formula whether in verse (*rich*) or in prose (*yajush*), as opposed to the *Brāhmaṇa*. Thus the particular linguistic forms noted for *Mantras* do not occur in the *Brāhmaṇas*. The term *Ṛich* stands in Pāṇini for a Vedic stanza, as opposed to a formula in prose which was called *Yajush*. *Brāhmaṇa* stands for the *Brāhmaṇa* works, and *a-mantra* of *sūtra* III.1.35 also pointed to non-*mantra* literature or the *Brāhmaṇas*. The word *Nigama* denoted linguistic and exegetical tradition as embodied in the Vedic literature.

**VEDIC ŚĀKHĀS**—The *Śākhās* or different recensions, as we

have seen, formed the basis upon which the *Charaṇas* or Vedic Schools were based. They were known also as *Chbandas* texts and as *Āmnāya* (*Bhāṣya*, II.319, *Charaṇād dharmāmnāyayoh*). The *Brāhmaṇa* works in addition to the *Chbandas* works formed the principal subjects of study in a Vedic *Charaṇa* or School as stated in the *sūtra*, *Chbando-Brāhmaṇāni cha tad-viśbayāni*, (IV.2.66).

**ṚIGVEDA**—The following Schools of the Ṛigveda were known to Pāṇini:

(1) *Śākala*. Pāṇini knew the *Pada-pāṭha* of the *Ṛigveda* arranged by *Śākalya* (I.1.16). He also refers to students studying the *Prokta* work of *Śākalya* (*Śākalād-vā*, IV.3.128). The *Śākalas* formed an important School of the *Ṛigveda*. The present recension of the *Ṛik Saṁhitā* is that of the *Śākalas*, and belongs specially to that branch of this School which bears the name of the *Śaiśirīyas*. The *Ṛik Prātiśākhya* proclaims its affiliation to the *Śaiśirīya Śākhā* in its introductory verses. Pāṇini refers to the *Śaiśirīyas* in the *Gaṇa-pāṭha* to IV.2.138. According to Weber, tradition makes the *Śākalas* intimately connected with the *Śunakas*, and to *Śaunaka* in particular a number of accessory works of the *Ṛigveda* are attributed (*Hist. of Ind. Lit.* p. 33). Pāṇini mentions the *antevāsins* of both these schools, *Śākālas* and *Śunakas*, under the compound word *Śākala-Śunakāḥ* (*Kārta-Kaujaṭpādi gaṇa*, VI.2.37), indicating their intimate relationship as offshoots of the same school.

The *Śākalas* again in their development branched off into five divisions founded by the disciples of *Śākalya*, named as (1) *Mudgala*, (2) *Gālava*, (3) *Vātsya*, (4) *Sāliya*, and (5) *Śaiśirīya*.

Pāṇini refers to a *Krama-pāṭha* in *sūtra* IV.2.61, which appears to imply the *Krama-pāṭha* of the *Ṛik-Saṁhitā* traced to its author named *Pañchāla Bābhravya*. A *Bābhravya* is mentioned in *sūtra* IV.1.106 as belonging to the *Kauśika goṭra*. In the *Gaṇa-pāṭha* of *Kārta-Kaujaṭpādi* (VI.2.37) *Bābhravya*'s students are referred to along with those of *Śaunaka* as *Śunaka-*

*Bābhravāḥ*, evidently implying that they were both followers of the same *Śākhā* of the *Ṛigveda*. In the later text of the *Matsya Purāṇa* (21.30) is recorded the tradition that Bābhravya was the author of the *Krama-pāṭha*, and also that he was the minister of King Brahmadatta of Dakṣiṇa-Paṇchāla.

(2) *Bāshkala*. Another important recension of the *Ṛigveda* was represented by the *Bāshkalas* according to the *Charaṇa-Vyūha* (Weber, H.I.L., p. 32). This recension is not directly mentioned by Pāṇini, but one of the disciples of *Bāshkala* was *Parāśara* who founded the *Pārāśari Śākhā*. *Patañjali* refers to a *Kalpa* work of this school, the students being known as *Pārāśara-kalpika* (*Bhāshya* on IV.2.60). Pāṇini had this Vedic School in mind when he mentioned the *Bhikṣu-sūtras* of *Pārāśarya* developed as a special branch of study under the auspices of the *Pārāśara Charaṇa*, the followers of which, having embraced the ascetic life, were known as *Pārāśarin Bhikṣus* (*Pārāśariṇaḥ bhikṣavaḥ*, IV.3.110). It may be noted that the *Pārāśarya* School showed its originality in producing the *Bhikṣu-sūtras* as a class of *Prokta* literature, and not any *Chhāṇḍasa* works for which they depended on the *Bāshkala* School.

(3) *Śilālin*. Pāṇini mentions *Śilālin* as the author of *Naṭa-sūtras*, his students forming the Vedic School of Dancing designated as *Śailālināḥ naṭāḥ* (IV.3.110). The *Śailālakas* were originally a *Ṛigvedic Charaṇa* with their own *Brāhmaṇa*, cited as the *Śailālīka Brāhmaṇa* in the *Āpastamba Śrauta-Sūtra* (Keith, *Āpastamba* and the *Bahvṛicha Brāhmaṇa*, J.R.A.S., 1915, p. 498). *Kātyāyana* also knows of the students of this Vedic school as *Śailālāḥ* (VI.4.144). Thus it will be seen that the students of dramaturgy were called *Śailālināḥ* while those of orthodox Vedic studies were known by the simpler name of *Śailālāḥ*. The growth of a secular text like the *Naṭa-sūtra* under the auspices of a Vedic School shows the scope that Vedic literature gave to new intellectual development not directly connected with religion.

(4) *Bahvṛicha*. Pāṇini mentions the *Āmnāya* and *Dhārma*

of the Bahvṛicha School as *Bāhvṛichya* (IV.3.129), and refers to Bahvṛicha as the name of a *Charaṇa* (*Antargāya-sūtra, an-richo mānave* | *Bāhvṛichaś-charaṇākhyāyām*, V.4.154). That this school once enjoyed wide distribution, is shown by Patañjali speaking in terms of the Bahvṛichas while referring to the R̥gveda recensions (*ekaviṃśatidhā Bāhvṛichyam*, I.9). The Bahvṛichas are referred to in the *Śatapatha Brāhmaṇa* (XI.5.1.10) and quoted a dozen times in the *Āpastamba Śrauta Sūtra*. None of these citations can be traced to the two R̥gveda Brāhmaṇas known to us, *viz.* *Aitareya* and *Kaushītakī*, and Keith was led to observe that 'It is perfectly certain that he (Āpastamba) meant some definite work which he may have had before him and in all probability all his quotations come from it' (Keith, *R̥gveda Brāhmaṇas*, p. 496). It is unfortunate that neither the *Samhitā*, nor the *Brāhmaṇa* of this school has survived. According to Kumārila the Bahvṛichas were governed by the *Gṛihya-sūtra* of Vasishṭha (*Tantravārttika*, I.3.11). Keith thought that the Bahvṛicha School was identical with Paiṅgya, but they are mentioned as two separate Schools in the *Kaushītakī Brāhmaṇa*.

(5) *Śaunaka*. The Śaunaka School had its Chhandas text (*Śaunakādibhyaś-Chhandasī*, IV.3.106), the students being called *Śaunakinaḥ*. As already pointed out the Śaunaka School was intimately connected with the Śākalas. To Śaunaka in particular a number of writings on the *R̥gveda* are attributed (Weber, *H.I.L.*, p. 33).

Pāṇini also refers to Paila (II.4.59), although his association with a Vedic text is not mentioned. Paila is known as a redactor of the R̥gveda, and as following the tradition of Vyāsa. The School of Paila had two offshoots, *viz.* the School of Bāshkali and that of Māṇḍukeya, the latter being mentioned in the *Kārta-Kaujapādi gaṇa* together with Sāvarni.

**YAJURVEDA**—The Kṛishṇa Yajurveda is referred to by Pāṇini several times. Amongst teachers of this School he mentions Tittiri, Varatantu, Khaṇḍika, Ukha, (IV.3.102), Katha

and Kalāpin (IV.3.107-108). The original teacher and founder of this School was Vaiśampāyana whose direct disciples are called *Vaiśampāyanāntevāsīn* (IV.3.104). These had the privilege of personal contact with the teacher (*pratyakṣa-kāriṇaḥ*, according to the *Kāśikā*). Each of these became the founder of a school and promulgated its own text. Weber has pointed out: 'Of the many schools which are allotted to the Black Yajus, all probably did not extend to the Sāmhitā and Brāhmaṇa; some probably embraced the Sūtras only. This is likewise the case with the other Vedas.' (*H.I.L.*, p. 88). The following Schools may be noticed:—

(1) *Taittirīya* (IV.3.102). Pāṇini mentions Tittiri as the founder of the Taittirīya School. The Taittirīyas had close connection with the Kaṭhas since the last sections of the *Taittirīya Brāhmaṇa* are named *Kāṭhaka* (Bhagavaddatta, *Vaidika Vālmaya kā Itibāsa*, p. 197).

(2) *Aukhīyas* (IV.3.102). The Taittirīyas grew into two Schools, the Aukhīyas and the Khāṇḍikīyas (cf. *Charaṇavyūha*, II.1). The Ātreyas referred to in II.4.65 as a counter-example and in IV.1.117 as a *gotra* name were a branch of the Aukhīyas.

(3) *Khāṇḍikīya* (IV.3.102). It was a branch of the Taittirīyas from which grew later the Schools of Āpastamba, Hiraṇyakeśin and Bhāradvāja (*Charaṇavyūha*).

(4) *Vāratantavīya* (IV.3.102). This School existed independently in the time of Pāṇini, although not a single text of the same has survived.

(5) *Vaiśampāyana* and *Charaka*. Pāṇini mentions the followers of the Charaka School as Charakas (IV.3.107). The *Kāśikā* informs that Charaka was the name of Vaiśampāyana (*Charaka iti Vaiśampāyanasyākhyā*, IV.3.104). Charaka was originally used in the sense of a "Travelling Scholar", from the root *chara*, "to wander about for instruction" (Weber, *H.I.L.*, p. 87). In the *Śatapatha Brāhmaṇa* the adherents of the Charaka branch of the Black Yajus are designated Charakādhi-

varyus. Vaiśampāyana stands out as the pre-eminent Vedic teacher, whom Śabarasmī following an old tradition describes as the originator of all the Śākhās of the *Kṛishṇa Yajurveda* (*Smāryate cha, Vaiśampāyanah sarva-śākhādhyāyī, Mimāṃsā Bhāṣya*, I.1.30). The *Kāśikā* mentions the names of nine pupils of Vaiśampāyana who were grouped territorially. Patañjali, referring to the three Prāchya (Eastern), three Udīchya (Northern) and three Madhyama (Meridional) *Charaṇas*, alludes to the Schools of Vaiśampāyana as established by his disciples (*Bhāṣya*, II.301; IV.2.138, *madhya-madhyamanī chāṇ-charaṇe*).

(6) & (7). *Schools of Ālambi and Pālāṅga*. These were the two eastern disciples of Vaiśampāyana Charaka who founded the Ālambin and Pālāṅgin Schools.

(8) *Kāmalīnaḥ*. It is the name of the third eastern School of the Charakas. The Purāṇas mention the founder as Kāmalāyani (*Brahmāṇḍa Purāṇa*, I.33.6).

(9) *Kaṭha* (IV.3.107). Pāṇini mentions the Kaṭhas separately in IV.3.107; they were the Udīchya disciples of Vaiśampāyana and probably belonged to the Panjab. In the time of Patañjali, the Kaṭha School had attained wide celebrity (*grāme grāme Kāṭhakam Kālāpakam cha prochyate, Bhāṣya*, IV.3.101; II.315), and their text was considered to be of high authority (*Kaṭhanī mahat suvibitam*, IV.2.66; II.285).

Pāṇini mentions the compound names *Kaṭha-Kālāpāḥ* and *Kaṭha-Kauthumāḥ* in the *Gaṇa-pāṭha* of VI.2.37, which indicates that these Schools were closely connected by their texts. The Saṁhitā of the Kaṭha School is extant. In the *Charaṇa-vyūha* two more local branches of the Kaṭha School are mentioned, viz. Prāchya-Kaṭhas and Kapiśṭhala-Kaṭhas. Pāṇini derives some material from the text of the Kāṭhaka School (*Devasūmnayor-Yajusbi Kāṭhake*, VII.4.38). He also mentions Kapiśṭhala as a *gotra* name (VIII.3.91, *Kapiśṭhalo gotre*), which seems to have been applied to an offshoot of the Kaṭha School. Most of the Vedic *Charaṇas* were founded by

Ṛishis whose names were also used for *gotra* appellations. Megasthenes mentions the *Kambistholoi* (=Kapishthala) as a people in the Panjab through whose territory the river Hydraotes flowed. This would place the Kapishthalas in the country of the Kaṭhas (Kathioi) who resisted Alexander's march through their country. It does not seem to have any connection with the place-name Kapisthala or Kaithal in the Panjab (VIII.3.91, counter-example). The *Samhitā* of the Kapishthalas is extant to this day.

(10) *Kālāpa* (IV.3.108). Kalāpin, a disciple of Vaiśampāyana, belonged to the Udīchya country. The pupils of his School were known as *Kālāpas* (*Kālāpino'ṇ*). Kalāpin appears to be himself a teacher of outstanding merit, since Pāṇini tells us that not only he himself but also his disciples became founders of new Vedic schools. Of the pupils of Kalāpin, the *Kāśikā* mentions four, *viz.* Haridru, Chhagalī, Tumburu and Ulapa, who severally became founders of new *Charaṇas*.

(11) *Śyāmāyana*. He was a pupil of Vaiśampāyana who belonged to the north (*Udīchya*). The followers of his School were known as *Śyāmāyaninaḥ*. *Śyāmāyana* occurs as a *gotra* name in the *Aśvādī-gaṇa* (IV.1.110). The School is counted as one of the six sub-divisions of the *Maitrāyaṇīyas*.

(12), (13) & (14). According to the *Kāśikā* the three Schools of the Charakas belonging to the Middle Country (*Madhyamīya Charaṇas*) were founded by Ṛichāba, Āruṇi and Tāṇḍya. The School of Āruṇi, may be the same as that of Uddālaka Āruṇi, who along with his son, according to Patañjali, belonged to the Bharata country (II.4.66; I.493).

(15), (16), (17) & (18). Schools of Haridru, Tumburu, Ulapa and Chhagalin. These were the four disciples of Kalāpī who founded independent Schools named after them as *Hāridravinaḥ*, *Taumburavinaḥ*, *Aulapinaḥ*, and *Chhāgaleyinaḥ*. The School of Chhagalin is specifically mentioned in *sūtra* IV.3.109 (*Chhagalino dhimuk*). Of the others little is known except that Yāska has once quoted from a text called *Hāridra-*

*vika* which may have been a *Brāhmaṇa* of this *Cbaraṇa*. All these four names occur together in the *Mānava Gṛihyaṇi-śiṣṭa*.

(19) *Khādāyana*. Pāṇini mentions the School of *Khādāyana* in the *Śaunakādi-gaṇa*, and both *Kātyāyana* and *Patañjali* take it to be a genuine reading. *Patañjali* says that *Kaṭha* was an *antevāsī* of *Vaiśampāyana*, and *Khādāyana* that of *Kaṭha*. *Kātyāyana* makes the important observation that Pāṇini's intention in mentioning the pupils of *Vaiśampāyana* and of *Kalāpin* separately was to restrict himself only to such names as denoted the seers (*pratyakṣa-kārin*), i.e. only persons by whom a Vedic text had been promulgated (*Kalāpi-Khādāyana grahaṇam jñāpakam Vaiśampāyanāntevāsishu pratyakṣakāri-grahaṇasya*, *Vār.* on IV.3.104). *Kātyāyana* also states that only *Chhandas* works were called after the name of the *Cbaraṇa* or its founder, and not ordinary secular compositions like the *śloka*s of *Tittiri* which were called *Taittirīya*.

**SUKLA-YAJURVEDA**—The name *Vājasaneyā* stands second in the *Śaunakādi* group (IV.3.106) which seeks to regulate the form *Vājasaneyin* to denote the *Cbhandas* text of this School.

**SĀMAVEDA**—The *Saṁhitā* of this Veda existed in two forms, viz. the *ārchika* (the *rich*-text marked with *sāman*-accents) and the *geya* or songs. The *ārchika* is referred to in *sūtra* IV.3.72, and the *geya* in *sūtra* III.4.68 which the *Kāśikā* interprets with reference to the *sāman* songs. Pāṇini mentions *Cbbāndogya* in the specific sense of the text belonging to the *Chhandoga* School of the *Sāmaveda* (IV.3.129). In *sūtra* VI.2.37, Pāṇini refers to *Kārta* students named after their teacher *Kṛita*, who according to the *Vishṇu Purāṇa* (IV.19.50-52) was a *Paurava* prince, and disciple of the *Sāmaveda* teacher *Hiranyanābha*, king of *Kosala*. *Kṛita* is credited with the promulgation through his disciples of twenty-four *Saṁhitā*s which were in circulation in eastern parts of India (*yaś-chaturviṁśatim Prācīya-Sāmagānām Saṁhitāś-chakāra*). He did for

the Sāmaveda what Vaiśampāyana had done for the Yajurveda. The *Kārta-Kaujapādi-gaṇa* mentions the names of about thirty Vedic Schools and the compound words indicate some kind of literary collaboration which made these pair names current in the language. Examples of such collaboration are preserved in the compound words *Kaṭha-Kālāpam*, *Kaṭha-Kauthumam* (mentioned as examples of II.4.3, *Anuvāde Cbaraṇānām*<sup>1</sup>); and *Mauda-Paiṣṭalāda* (Schools of the Atharvaveda, as examples of *sūtra* I.3.49 *Aṇorakarmakāt*); *Kauthuma-Laṅgākṣbāḥ* (both Schools of Sāmaveda; its *Kauthumī Samhitā* being now extant); and *Bābhrava-Śālaṅkāyanāḥ* (the latter a School of the Sāmaveda in the Vāhika country or Panjab, Weber, *H.I.L.*, p. 77 and p. 219 f.n.)<sup>2</sup>. The compound name *Bābhrava-Śālaṅkāyana* representing a Ṛigvedic School of Pañchāla and a Sāmaveda School of Vāhika, is also known to Patañjali who observes: 'Why should you come between the Bābhravas and the Śālaṅkāyanas?' (*Kim te Bābhrava-Śālaṅkāyanānām antareṇa gateneti, Bhāṣya*, II.3.4; I.444).<sup>3</sup> The Śālaṅkāyanas also became known as *Trikāḥ*, probably because of their being divided into three sub-schools (*Bhāṣya*, V.1.57-58).

Amongst other *Sāmaveda* teachers Pāṇini mentions Śauchivṛikṣhī and Sātyamugrī (*sūtra* IV.1.81), of whom the female descendants were called Śauchivṛikṣhī, Śauchivṛikṣhyā, and Sātyamugrī, Sātyamugryā respectively. Śauchivṛikṣhī appears as an ancient authority cited in the *Śrautasūtra* of Maśaka

<sup>1</sup> Also *Khādira Gṛīhya Sūtra*, III.2.31, *Kārṣvaṇ tu Kaṭha-Kauthumāḥ*, referring to a rule of *anadhyāya* approved both by the Kaṭhas and the Kauthumas.

<sup>2</sup> Also included in *Naṣādi-gaṇa*, IV.1.99, with the *gaṇa-sūtra* *Śālaṅka Śālaṅkam cha*; the name Śālaṅki being given to Pāṇini himself in later writings; cf. also reference to the students of Śālaṅki, *Śālaṅka-yūnaichhātṛāḥ Śālaṅkāḥ*, *Bhāṣya*, (IV.1.90; II.244).

<sup>3</sup> Bābhrava of Prāchya and Śālaṅkāyana of Udichya were geographically separated and Patañjali's remark should have been addressed to a follower of an intervening Vedic School of the Bharata Janapada, most likely of Āruṇi mentioned above.

(Weber, H. I. L., p. 77). The Sātyamugris seem to have been a sub-division of the great Rāṇayaniya School of the *Sāmaveda*, to whom Patañjali refers in connection with a phonetic peculiarity, viz. *ardha ekāra* and *ardha okāra* recognised in their Pārshada or Prātisākhya work, (*Bhāṣya*, I.22; also *Āpīśali Śikṣā*). The name of Rāṇayani occurs in the *Pailādi-gaṇa* (II.4.59), and there can be no doubt that they were known to Pāṇini who knew one of their sub-divisions, the Sātyamugris.

Kaṇṭheviddhi ('a descendant of Kaṇṭheviddhi') mentioned after the names of the above teachers (IV.1.81) was possibly also a teacher of the *Sāmaveda*, whose name occurs as an authority in the *Vanīśa Brāhmaṇa* of the *Sāmaveda* (*Vedic Index*, I.146).

**ATHARVAVEDA**—Pāṇini mentions Ātharvaṇika as a student devoted to the study of a work called *Atharvan* which was enounced by the Ṛishi Atharvan (VI.4.174). Patañjali accepts Atharvan and Ātharvaṇa as genuine readings in the *Vasantādi-gaṇa* (IV.2.63), which according to Pāṇini were names of texts for study (*Tadadbhīte tadveda*). Patañjali definitely mentions the *Āmnāya* and *Dharma* of the Ātharvaṇikas. The compound name *Manda-Paiṣṭalādāḥ* in the *Kārta-Kaujapādi-gaṇa* represented two Schools of the *Atharvaveda*. Thieme attributes definite knowledge of the *Atharvaveda* to Pāṇini who mentions the form *ailayīt* (III.1.51) found only in AV., VI.16.3 (Thieme, *op. cit.* p. 64). The Jājalas, a School of the *Atharvaveda* founded by Jājali, are mentioned by Kātyāyana in a *vārttika* to *sūtra* VI.4.144.

**OTHER VEDIC SCHOOLS**—Pāṇini also mentions by name certain other Vedic Schools, whose exact affiliations are not known, e.g. Taitila-Kadrū in *sūtra* VI.2.42 contains an allusion to the students of *āchārya* Titilin, also mentioned by Kātyāyana in the aforesaid *vārttika* to VI.4.144 (*Kāśikā*, *Taitilī-Jājalīnāvāchāryau, tatkrīto grantha upachārāt Taitilī-Jājaliśabdābhyām abhidhīyate, taṁ grantham adbhīyate Taitilāḥ, Jājālāḥ*). Patañjali mentions Krauḍāḥ and Kāṅkatāḥ as names

of Schools (IV.2.66; II.286), of which the former appear to be students of Kraudī mentioned in the *Kraudyādi-gaṇa* (IV.1.80). The *Kāṅkata Brāhmaṇa* is referred to in the *Āpastamba Śrauta-sūtra* (XIV.20.4) along with other unknown texts (Keith, J.R.A.S., 1915, p. 498). The Schools of Karmanda and Kṛiśāśva which are known only from Pāṇini (IV.3.111), and those of Kāśyapa and Kauśika (IV.3.103) were confined to their *sūtra* works only, showing to what extent specialisation under the Vedic *Cbarāṇas* had advanced. The Kauśikas belonged to the *Atharvaveda*, but the affiliations of the other three are not known.

**BRĀHMAṆA LITERATURE**—The *Brāhmaṇa* works were on a footing with the *Śākhās* in one respect, *viz.* they were represented by Vedic Schools comprising students who studied those texts. It is possible that some Vedic Schools did not evolve their own independent *Cbhandas* texts or *Śākhās*, but depended on their compilations of *Brāhmaṇa* texts only. Of the names of Vedic Saṁhitās given above, many are traced in citations as *Brāhmaṇa* works. Similarly the activity of some Schools as pointed out above was confined to the composition of *sūtra* works only.

**BRĀHMAṆAS OF THIRTY AND FORTY ADHYĀAS**—Pāṇini mentions two *Brāhmaṇa* works by the names of 'Thirty and Forty Adhyāyas', called *Trainīśa* and *Cbātvarinīśa* respectively (*Trimīśach-chātvarinīśator-Brāhmaṇe saṁjñāyām ḍaṇ*, V.1.62). The *Kausītakī Brāhmaṇa* is of 30 and the *Aitareya* of 40 *adhyāyas*. As Keith states: 'The *Kausītakī Brāhmaṇa* and the *Aitareya* were both known to Pāṇini, who in his grammar (V.1.62) mentions the formation of the names of *Brāhmaṇas* with thirty and forty *Adhyāyas*. The same conclusion as to their relation to Pāṇini is clearly proved by their language which is decidedly older than the *Bhāṣhā* of Pāṇini, as Liebhich has shown in detail for its verbal forms, and as is not disputed by any scholar.' (Keith, *R̥gveda Brāhmaṇas*, H.O.S., Vol. 25, p. 42).

**OLDER BRĀHMAṆA WORKS**—In *sūtra* IV.3.105 Pāṇini refers to *Brāhmaṇa* and *Kalpa* works enounced by older Ṛishis (*Purāṇa-prokṭesbu Brāhmaṇa-Kalpesbu*). As examples of older *Brāhmaṇa* works, Patañjali mentions the *Brāhmaṇa* works of the *Bhāḷlavins* and the *Śāṭyāyanins* (IV.2.104; II.296), to which the *Kāśikā* adds that of the *Aitareyins*. The *Bhāḷlavins* were a well-known school of the *Sāmaveda*, and Śāṭyāyana figures in the Vamśa list of Jaimini whose *Brāhmaṇa* work known as the *Jaiminīya Brāhmaṇa* is still extant. Of all the lost *Brāhmaṇa* works that of Śāṭyāyana has been quoted most frequently (B. K. Ghosh, *Fragments of Lost Brāhmaṇas*, p. ii).

Talavakāra, a pupil of Jaimini, re-edited his teacher's work, which then became known as the *Talavakāra Brāhmaṇa*. It may be noted that Talavakāra is included in the *Śaunakādi-gana* (IV.3.106), as an author of a *Cbbandas* work or Vedic *Śākbā*.

The *Hāridravika* and the *Śailāli Brāhmaṇas* were also older works known to Pāṇini, since Haridru as a pupil of Vaiśampāyana is implied in IV.3.104, and the name of Śilālin occurs in *sūtra* IV.3.110. The *Hāridravika Brāhmaṇa* was also known to Yāska (*Nirukta*, X.5).

Attention may also be drawn to Pāṇini's mention of the name Māshaśarāvin whose descendants were called *Māshaśarāvayah* according to the suffix added to words of the *Bābvādi* group (IV.1.96). In the *Cbāndravṛitti*, Māshaśarāvin is one word, and so also in Hemachandra and Vardhamāna (*Māshaśarāvīṇa riṣebh*, verse 206), but in the *Kāśikā* it is wrongly split up. The Drāhyāyana and Lāṭyāyana Śrauta-Sūtras cite an old authority saying that the Māshaśarāvins were organized as a Vedic school having their own *Brāhmaṇa* work (B. K. Ghosh, *Frag. of Lost Brāhmaṇas*, p. 112).

**YĀJNAVALKA - BRĀHMAṆA**—On *sūtra* IV. 3. 105 (*Purāṇa-prokṭesbu Brāhmaṇa-Kalpesbu*) Kāṭyāyana has a *vārttika*, *Yājñavalkyādibhyah pratisbedhas - tulyakālatvāt*. 'Among the *Brāhmaṇas* and *Kalpas* proclaimed by the old,

there is an exception with regard to Yājñavalkya and others, on account of contemporaneity and therefore Yājñavalkya's Brāhmaṇas are called, not *Yājñavalkinaḥ* but *Yājñavalkāni Brāhmaṇāni*'. This passage has often been discussed. The *Kāśikā* considers Yājñavalkya as a recent author (*achira-kāla*). *Kaiyaṣa* clearly interprets the *vārttika* in the sense that the Brāhmaṇas of Yājñavalkya were of the same age as those of the older authors like Śāṭyāyana, and in order that they may not come under the scope of Pāṇini's rule, Pāṇini should have made an exception in their case. In his opinion this omission on the part of Pāṇini to exclude the name of Yājñavalkya from the operation of *sūtra* IV.3.105 is now made good by Kāṭyāyana. Patañjali has not made himself quite explicit on the point, but in his remark, *etānyapi tulyakālāni*, the force of *api* becomes justified only when we understand Yājñavalkya as an ancient writer. Both Goldstücker and Eggeling accept this view (*Pāṇini*, p. 132; *ŚB.*, Vol.I, Intro.). In view of this if we accept Yājñavalkya as an ancient teacher coeval in time with Śāṭyāyana and other older authors of *Brāhmaṇa* works, the question remains why did not Yājñavalkya also found a Vedic school similar to other older seers and why the principle of *Tad-vishayatā* which, according to Pāṇini, was an invariable feature of the *Chbandas* and *Brāhmaṇa* texts, and in some cases also of the *Kalpa sūtras* of older Rishis, as *Kāśyapinaḥ*, *Kauśikinaḥ*, did not apply to the *Brāhmaṇa* texts promulgated by Yājñavalkya. Another *vārttika* on *sūtra* IV.2.66 ordains that the *adhyetṛi-veditṛi* suffix is not added after the name of Yājñavalkya and others (*Yājñavalkyadibhyaḥ pratishedhaḥ*, II. 285). The question arises why the *Yājñavalkya Brāhmaṇas*, if they were old, were not represented by their *Charaṇa* students like the other older Brāhmaṇas. The answer to this question largely depends on what we understand by *Yājñavalkāni Brāhmaṇāni*; or as Eggeling has put it: 'whether or not the *Yājñavalkāni Brāhmaṇāni* form part of the text of the *Śatapatha* which has come down to us, and what exact portions of that

text we have to understand by this designation'. He was inclined to the view that we should look for them in certain portions of the last Book (or Books) in which Yājñavalkya figures so prominently. Weber in his modified opinion accepted 'that it is to this Yājñavalkīya-kāṇḍa (XIV Book of *Śatapatha*) that the *vārttika* to Pāṇini (IV.3.105) refers when it speaks of the *Yājñavalkāni Brāhmaṇāni* as not *purāṇa-prokta*, but *tulyakāla*, i.e. 'of the same age as Pāṇini'. (H.I.L., p. 129). Weber was, however, not disposed to regard Yājñavalkya himself or the *Śatapatha Brāhmaṇa* as being of the same age with Pāṇini. The last *Kāṇḍa* was so named not because it was produced by Yājñavalkya himself, but because it gives prominence to him.

**THE GENESIS OF THE ŚATAPATHA**—The whole of the *Śatapatha Brāhmaṇa* of 100 *adhyāyas* is now generally attributed to Yājñavalkya, but the fact remains that the present text of the ŚB. was a composite work made up of different portions of ritualistic texts. The grammatical literature throws some light on this textual problem of the ŚB. Its first nine Books consist of two broad divisions, Books I-V deal with *Ishtis* and *Paśubandha*, being a complete exposition of Havir-Yājña and Soma sacrifices. These were subjects of special study as shown by the example *sesbṛi-paśubandham adbīte* (*Kāśikā*, II.1.6). In these Books Yājñavalkya is cited as an authority. The next four Books deal with the Fire-ritual (*Agnichayana*) and refer to Śāṇḍilya more frequently than to Yājñavalkya. These Books were also separate subjects of study as shown in the expression *sāgni adbīte* (II.1.6, *Kāśikā*); or *kashṭo'gñih*, 'difficult to master is the Agni text' (VII.2.22). These nine Books contain sixty *adhyāyas*, and may be identified with *Shasbṛipatha* mentioned by Patañjali in an old *Kārikā* (II.284). Book X (*Agnirahasya*) deals with the same subject as the preceding four *kāṇḍas*; and here also Śāṇḍilya and not Yājñavalkya figures as authority. The XI Book is called *Saṅgraha*, as it contains a summary of the preceding ritual. *Kāṇḍas* XII-XIV treat of miscellaneous subjects and are called *Parishisṭa* or Appendices. The last of

these contains the famous philosophical discourse of Yājñavalkya. The text so constituted finds corroboration from the *Mabābhārata* which speaks of Yājñavalkya as the author of certain portions of the *Śatapatha* described as (a) *Rahasya* (Ritual, Book X), (b) *Saṅgraha* (Book XI) and (c) *Parīśeṣa* (Books XII-XIV; Śāntiparvan, 318.16). *Saṅgraha* mentioned by Pāṇini in the *Uktbhādi-gaṇa* (IV.2.60) as the name of a treatise, seems to refer to the XI Book of the *Śatapatha*. A student of *Saṅgraha* was known as *Sāṅgrabhika*. These portions of the *Śatapatha*, viz. *Agni-Rahasya*, *Saṅgraha*, and *Parīśeṣa* may be taken to be what were known as the Yājñavalkya-Brāhmaṇas. The term *Madhyama* was applied to Book XII, showing that the Books preceding and following it were parts of one whole. The ŚB. was rather a voluminous text. Those who mastered its earlier portions consisting of 60 Chs. were designated as *Śbaṣṭipāthika*; while students studying its 100 Chs. were called *Śatapāthika*. The names *Śbaṣṭipāthika* and *Śatapāthika* appear analogous to *Bhārata* and *Mabābhārata* existing side by side for some time.

From their very nature the last five Books of 40 Chs. could not form the basis of an independent *Charāṇa* text, and therefore the rule of *tad-viśhayatā* did not apply to them. These later portions attributed to Yājñavalkya were not given the same status as that of the older established works of Śātyāyana and Bhāllavin. Kātyāyana, however, as a follower of the Mādhyandina School of the *Śukla Yajurveda* and of its Brāhmaṇa work the *Śatapatha*, did not consider the last five Books or 40 Chs. as of less authenticity in his time. He, therefore, joins issue with Pāṇini for not treating the Yājñavalkya Brāhmaṇas as *purāṇa-prokta*.

**ANUBRĀHMAṆA** (Supplementary Brāhmaṇas). These supplementary texts formed special subjects of study by students whom Pāṇini calls *Anubrāhmaṇī* (*Anubrāhmaṇād inih*, IV.2.62). The *Kāśikā* explains *Anubrāhmaṇa* as a work taking after a Brāhmaṇa (*Brāhmaṇa-sadṛśo'yam granthaḥ*).

Bhaṭṭa Bhāskara in his commentary on the *Taittirīya Saṃhitā* (I.8.1) refers to a portion of the *Taittirīya Brāhmaṇa* (I.6.11.1) as *Anubrāhmaṇa* (Weber, *H.I.L.*, p. 82, note). Books XIV and XV of the *Śāṅkhāyana Śrautasūtra* were sometimes reckoned as parts of the *Kausītaki Brāhmaṇa*, which were incorporated into its Kalpa by Suyajña. The commentator Ānartīya Brahmadatta calls them *Anubrāhmaṇa* (*Śaukh. S.*, XIV.2.3; Bhagavaddatta, *Vaidika Vālmaya*, I.113). Professor Caland discovered a special *Brāhmaṇa* work called *Anvākhyāna*, which belongs to the *Vādhūla Sūtra* and contains secondary *Brāhmaṇas* which may also be considered as *Anubrāhmaṇa* (Bhagavaddatta, op. cit., II.p.34). (Cf. *Baudh. G. S.*, III.1.21-24).

**UPANISHAD**—It has been argued that Pāṇini does not refer to the Upanishads. So far as he is concerned, the word *Upanishad* forming part of the *Ṛigayanādi* group (IV.3.73) serves the same purpose as if it were read in a *sūtra*. On the basis of linguistic evidence Liebhich had come to the conclusion that 'Not only the *Aitareya Brāhmaṇa*, but also the *Bṛihadāraṇyaka Upanishad* are certainly older than Pāṇini.' (*Pāṇini*, p. 37). The fact is that Pāṇini shows an acquaintance not only with the *Aitareya* and *Kausītaki Brāhmaṇas* (cf. V.1.62) and the *Anubrāhmaṇas* of a later date, but also with the *Śrauta Sūtras* (IV.3.105) and the *Dharma Sūtras* which were developed as special subjects of study inside *Charaṇas* (IV.2.46). Pāṇini actually mentions the term Upanishad in one of the *sūtras* (*Jīviko-panishadāvaupamye*, I.4.79), where it denotes 'that which is secret.' This accords with its meaning known to Kauṭilya under the head *Aupanishadikam*. A term used originally as the name of esoteric religions texts, had acquired a pejorative sense by the time of Pāṇini. Keith also concludes on the basis of *sūtra* I.4.79 that Pāṇini was acquainted with the Upanishads (*Tait. S.*, H.O.S., p. clxvii).

**KALPA LITERATURE**—Pāṇini refers to Kalpa works promulgated by ancient authors (*Purāṇa-prokta Kalpa*, IV.3.105), of which the *Paṇḍī Kalpa* and the *Aruṇaparājī Kalpa* are cited

as examples. Pāṇini refers to works of two older Ṛishis named Kāśyapa and Kauśika (*Kāśyapa-Kauśikābhyām ṛishibhyāṇi ṇinīḥ*, IV.3.103), which Kātyāyana takes to be Kalpa works. These were studied in Vedic *Charaṇas* by students called after them *Kāśyapinaḥ* and *Kauśikinaḥ*. It is also pointed out that the literary activity of these two old Schools was confined to their Kalpa Sūtras only round which centred a group of their students and teachers (*Kāśyapa-Kauśika-grahaṇāni cha Kalpe-niyamārttham*, II.286). We know of a Kauśika Sūtra of the Atharvaveda.

Patañjali in addition knows of a Parāśara Kalpa, which must have belonged to the Parāśara School of the Ṛigveda mentioned by Pāṇini.

But the exigencies of sacrificial religion required special treatises bearing on different parts of the ritual, and Pāṇini mentions several types of commentaries written with the avowed purpose of bringing sacrificial ritual within the easy reach of priests. Special commentaries are mentioned on important Soma sacrifices, and on the different kinds of *yajñas*, such as the Pākayajña, Haviryajña, etc. (IV.3.68). The preparation of the sacrificial cake offered to the deities was of great practical importance and special handbooks called *Puroḍāśika* explaining its details were written. Similarly others known as *Pauroḍāśika* were compiled with a view to explain the particular *mantras* that were used in the Puroḍāśa ceremony (IV.3.70). Commentaries on the Adhvara sacrifices were called *Ādhvarika*, and those which treated of preparatory ceremonies preceding regular sacrifices were known as *Puraś-charaṇika* (IV.3.72). The significance of the commentary called *Prāthamika* is not clear; possibly it treated of Puraś-charaṇa rites (IV.3.72). Illustrating the word *dvyachaḥ* of this *sūtra* the *Kāśikā* gives two interesting examples, *viz.*, *Aishṭjika* and *Pāśuka*, the former was a commentary on the Darśa-Paurṇamāsa *Ishtis* and the latter on the animal sacrifices. These two are covered respectively by Books I-II and

III-V of the *Śatapatha Brāhmaṇa*. It appears that the course of sacrificial studies was planned topically, for on *sūtra* II.1.6 the *Kāśikā* speaks of a student studying the portions known as *Ishti-paśubandha* ( *śeṣṭi-paśubandham adbhīte* ). The advanced course in sacrificial lore included the Fire ritual or *Agnichayana* (Books VI-IX of *Śatapatha*) and the expression *sāgni adbhīte* pointed to the final stage in the study of that subject.

**LITERATURE ON RECITATION**—Proper recitation of Vedic texts (*pārāyaṇa*, V.1.72) required methodical training. It involved mastery of the Pada and Krama texts as implied in Pāṇini's words *Padaka* and *Kramaka* to denote students devoted to such studies (IV.2.61). Pāṇini also refers to the Pada text of the *Rigveda* by Śākalya (I.1.16), and to a work known as *Ārgayana*, which was a commentary on the methods and details of the *Pārāyaṇa* of the *Rigveda*.

There are names of other phonetical works treating of Vedic pronunciation and recitation. The *Uktbhādi-gaṇa* (IV.2.60) refers to students of *Samhitā*, *Paḍa*, and *Krama*. The word *Krametara*, was applied to the recitation of texts 'other than Krama'. The technical term for instruction and exercise in recitation was *charchā* (III.3.105; also in the *Uktbhādi* group). The *Charaṇavyūha* refers to instruction in recitation depending on (1) *charchā* (exercise), (2) *śrāvaka* (the teacher reciting), (3) *charchaka* (the pupil repeating), and (4) *śravaṇīyapāra* (completion of recitation). A student who qualified in *charchā* (regulated recitation) was called *charchika* (IV.2.60).

Pāṇini uses *Paḍa-vyākhyāna* for a text explanatory of the *Paḍa-pāṭha*, and its derivative *Pāḍa-vyākhyāna* denoted a commentary on such a text (*Rigayanaḍi-gaṇa*, IV.3.73). Such a commentary was intended to explain every word of the Vedic text, similar to the style of the *Śatapatha Brāhmaṇa* explaining the first eighteen Books of the *Yajurveda*. These commentaries were also known as *Anupada* works, of which a student was

called *anupadika* (IV.3.60). Śaunaka mentions the *Anupada* work of the *Yajurveda*, which Mahīdāsa defines as the work which explained the text word for word (*Anupade anyat-padam kartavyam*). One of the *Sāma sūtras* is *Anupada-sūtra* in ten *prapāṭhakas*, which explains the obscure passages of the *Pañchaviṃśa Brāhmaṇa* and of the *Shaḍviṃśa Brāhmaṇa*, step by step (Weber, *H.I.L.*, p. 80).

**UKTHA**—The *Uktha* treatise mentioned at the head of the *Uktbādi* group (IV.2.60) of which the students were called *auktbika*, appears to be a work partaking of the nature of *Pārśvada* works of the *Sāmaveda*. Patañjali writes: 'What are Ukthas? *Sāmans* are the Ukthas. If so, all chanters of *Sāmans* will be called *auktbika*. [No, there is no fault if we take *Uktha* in the sense of a work dealing with Uktha' (*tād-arthbyāt tācchabdyam*, *Bhāṣya*, IV.2.60; II.283). Kaiyaṭa following Patañjali informs us that one of the *Sāma-lakṣhaṇa* treatises was known as *Uktha*. A selection of *Ṛik* verses for the purpose of recitation suited to each particular occasion bears the name *śāstra* to be recited by the Hotṛi priest, and a similar selection of different *Sāmans* made into a group to be recited by the Udgātā priest was called *Uktha* (from *vach*, to speak) (Weber, *H.I.L.*, p. 67). It must have been the task of the *Sāmaveda* teachers to fix rules for the making of *Uktha* songs. The texts which dealt with this subject were also called *Uktha*, and must have been considered important among the *lakṣhaṇa* works of the *Sāmaveda*.

**JYOTISHA**—Some works on *Jyotisha* were possibly known, as we find reference in the *sūtras* to belief in divination from bodily signs (III.2.53), and also to fortune-telling by sooth-sayers (I.4.39, *Rādhikshyor-yasya viprasnah*). The mention of *utpāta*, *saṁvatsara*, *muhūrta* and *nimitta* as subjects of study in the *Ṛigayanādi-gaṇa* (IV.3.73) indicates the study of astrology and omens. Early Buddhist literature is full of references to divining by means of signs (*nimittam*) and fortune-telling from marks on the body (*lakṣhanam*, the word being

used in an identical sense by Pāṇini in III.2.52-53), which were forbidden for monks. Five topics of study included in the *Rigayanādi group* (IV.3.73) are also found in the *Brahmajāla Sutta*, viz. (1) *Nimitta*, (2) *Uppādo* (= *utpāda* in the *gaṇa*), (3) *Āṅgavijjā*, (*Āṅgavidyā*), (4) *Vatthuvijjā* (determining whether the site for a proposed house is lucky or not; *Vāstuvidyā* in the *gaṇa*), and (5) *Khattavijjā* (= *Ksbatravidyā* of the *Gaṇa-pāṭha* which is also mentioned in the list of sciences in the *Cbb. Up.*, VII.1.4) (cf. *Brahmajāla Sutta*, Rhys Davids Trans. pp. 16-18, f.n.). Buddhaghosa renders *Uppāda* as 'the portents of the great ones, thunderbolts falling, and so on' caused by divine agency (cf. *Jātaka*, I.374; and commentary on *Uppāda*). Kauṭilya mentions the *naimittikas* and *mauhūrtikas* (*Arth.*, p. 23), and Megasthenes also refers to experts who 'gathered together at the beginning of the year to forewarn the assembled multitudes about droughts and wet weather, and also about propitious winds', (*Diod.* II.40, M'Crindle, Frag.I). These latter correspond to the *Sāṃvatsarikas* of Pāṇini (IV.3.73, *Gaṇa-pāṭha*).

**PHILOSOPHICAL LITERATURE**—The Pāṇinian epoch was already preceded by intense philosophical activity. The implications of his reference to philosophers of the Āstika, Nāstika, and Daishṭika schools (IV.4.60) have been shown above, the last one being represented by the followers of Maskarī Gośāla, and the second by such thinkers as the Lokāyatikas. The Lokāyata doctrine was of high antiquity and its second place in the *Uktbādi-gaṇa* may be an authentic reading. *Nyāya*, mentioned thrice (III.3.122; III.3.37, IV.4.92), stands not for the philosophical system of that name, but for justice or customary law; however, some knowledge of its dialectical terminology is foreshadowed in the *sūtra Nigribyānnyoge* VIII.2.94 (cf. *Nyāya*, V.2.1; V.2.23. For *nigribya* as a term of *vāda* or disputation, cf. also *Āraṇyaka-parva*, 132.13; 17). The term *Mīmāṃsā* occurs in the *Gaṇa-pāṭha* in relation to its students called *Mīmāṃsaka*, which points to the subject being studied as a

system of philosophy (IV.2.61, also III.1.6, *mīmāṃsate*).

**BHIKSHU SŪTRAS**—Pāṇini refers to two Vedic Schools of *Bhikṣu sūtras* founded by Pārāśarya and Karmanda (IV.3.110-111), their students being called *Pārāśariṇaḥ* and *Karmandināḥ* respectively. Weber sees in it an allusion to pre-Buddhist Brahmanical mendicants (*H.I.L.*, p. 305, footnote). We know nothing of the work of Karmanda, but the *sūtras* of Pārāśarya may have been the *Vedānta sūtras* which were based on the philosophical doctrine developed in the *Upanishads*. On the other hand it is also probable that the *Bhikṣu-sūtras* of Pārāśarya referred to some Sāṅkhya treatise. Pañchaśikha is spoken of a *Bhikṣu* and of Parāśara *gotra* (Śāntiparva, 320. 24), and being a historical teacher of outstanding merit in the Sāṅkhya tradition is believed to have written a work in prose *Sūtras* in which his doctrine leaned more towards Vedānta. (Keith, *Sāṅkhya System*, p. 49). The Chinese tradition makes him the author of the *Shashtitantra* itself (*ib.* p. 48).

In either case these early texts must be regarded as the product of a school rather than that of an individual author. The School gave a name both to its members and literary productions. As Pāṇini informs us, all Chhandas and Brāhmaṇa works, two *Kalpa-sūtras*, two *Bhikṣu-sūtras*, and two *Nāṭa-sūtras* derived their names after the founders of schools, which is the essence of the *tad-vishayatā* principle. Texts attributed to individual authors like Āpīsali and Pāṇini naturally did not admit of growth like those produced in the Vedic schools, which latter incorporated the subsequent graftings on the original text. We may recall that the Pārāśarya school was originally affiliated to a *Charaṇa* of the *R̥gveda* in the Śākhā of the Bāshkalas. Parāśara (father of Pārāśarya) is also mentioned as the founder of a School of *Kalpa-sūtras* of which the students were called *Pārāśarakalpika*, as stated by Patañjali (IV.2.60; II.284). These latter were called *Pārāśarāḥ* in distinction to those studying the *Bhikṣu-sūtras* and called *Pārāśariṇaḥ*.

**NĀṬA-SŪTRAS**—The word *Nāṭya* occurring in *sūtra* (IV.3.

129) refers to some treatise for the use of actors. As the *Kāśikā* explains, the *Nāṭya* text had the status of an *āmnāya* pointing to its growth under a Vedic *Charaṇa*. We have already referred to the development of *Naṭa-sūtras* in Pāṇini's time under the Schools of Śilālin and Kṛṣiāśva (IV.3.110-111). The present treatise on dramaturgy known as the *Nāṭya śāstra* of Bharata describes the *Naṭas* as *Śailālakas*. The corresponding Vedic term used by Pāṇini is *Śailālinah Naṭah*. It seems that Bharata's *Nāṭyaśāstra* was the product of the dramatic school of Śilālin which originated in the Ṛigvedic *Charaṇa* founded by that teacher, who was also the author of a Brāhmaṇa work called *Śailāli Brāhmaṇa* cited in the *Āpastamba Śrauta Sūtra* VI.4.7.

Patañjali speaking for later times refers to Naṭa teachers (*ākhyātā*) of dance initiating novices (*ārambbakālā*) in the art not through texts (*granthārttha*), but by their direct method of stage-acting (I.4.29; I.329, *ātāschopayogo yadārambbakā raṅgaṁ gacchbanti naṭasya śroshyāmah*). This instruction, however, did not merit the honorific epithet *upāyoga*, a term reserved for instruction under the approved religious system of teachers and initiated pupils.

Pāṇini mentions *nāndīkara* (III.2.21), a person who sings the *Nāndī* or prologue to a drama.

**ĀKHYĀNA AND KĀVYAS**—Pāṇini refers to *ślokas* and *gāthās*, and to their authors as *śloka-kāra* and *gāthā-kāra* (III.2.23). He also mentions *Ākhyāna* or the literature of stories (VI.2.103), as examples of which Patañjali and the *Kāśikā* cite texts dealing with the legends of Rāma (i.e. Paraśurāma) and Yayāti, each consisting of two parts, called *Pūrvādhirāma*, *Aparādhirāma*, and *Pūrvā-yāyāta*, *Apara-yāyāta* respectively. The latter pair of names occurs in the colophon of the Yayāti legend in the *Mahābhārata* (Ādiparva, Poona, Chs. 70-80 *Pūrvā-yāyāta*, and 81-88 *Uttara-yāyāta*).

As to *kāvya*s Pāṇini mentions (1) *Śisukrandīya*, (2) *Yamasabbīya*, and (3) *Indrajananīya* as actual works (IV.3.

88). The name *Śisukrandīya* suggests that the poem related to the Birth of Kṛishṇa, literally 'a work dealing with the crying of child (*śiṣu*, Kṛishṇa at the time of birth).' The second name was probably that of a drama dealing with the subject of Yama's Assembly (*Yama-sabha*). The third name *Indra-jananīya* was that of a work dealing with the subject of Indra's birth and his slaying of the demon Vṛitra, being an ancient legend in which Tvashṭā and Dadhīchi also played a part.

**MAHĀBHĀRATA**—Pāṇini knows of a *Bhārata* and a *Mahābhārata*, (VI.2.38), and refers to its three principal characters, Vāsudeva, Arjuna (IV.3.98) and Yudhishṭhira (VIII.3.95). This admittedly old reference to the Epic throws light on its evolution. In a well-known passage of the Āśvalāyana Gṛihya-sūtra, the two names, *Bhārata* and *Mahābhārata* are similarly mentioned together (III.4.). Utgikar after examining the passage critically observed that 'the mention of the *Bhārata* and the *Mbb.* in the *ĀG Sūtra* is to be held as textually genuine and justified by other important considerations' (*Mbb. in ĀG Sūtra*, Proc. 1st Oriental Conf., Vol. II, p. 60). The *Bhārata* was the original work of about 24,000 stanzas attributed to Vyāsa, which was preserved and popularised by the bards. The Bhṛigus, later, expanded the *Bhārata* adding to it considerable political, philosophical and religious matter (*Dharma* and *Nīti*) and legends (*Upākhyānas*) (V. S. Sukthankar, The Bhṛigus and the Bhārata, a text-historical study, *ABORI.*, XVIII, pp. 15-76). Āśvalāyana's mention of the Epic as a text to be recited may be due to the fact that Āśvalāyana was a direct pupil of Śaunaka whose name is closely associated with the final redaction of the *Mahābhārata*.

## CH. V, SECTION 4. GRAMMATICAL DATA

**VYĀKARAṆA**—The *Aṣṭādhyāyī* extant as the only early Vedāṅga text on *Vyākaraṇa* supplies some reliable data regarding the history of grammatical studies in ancient India.

Grammar is called both *Śabda* and *Vyākaraṇa*, and a grammarian *śabdakāra* (III.2.23) and *vaiyākaraṇa* (VI.3.7).

**PREVIOUS GRAMMARIANS**—The period between Yāska and Patañjali witnessed intensive creative activity in the field of grammar. No less than sixty-four teachers are cited as authority in the *Prātiśākhya*s, *Nirukta* and *Aṣṭādhyāyī* (cf. Max Muller, *History of Skt. Lit.*, p. 142, where a list is given.) Yāska regards *Nirukta* as a study supplementary to grammar (*Vyākaraṇasya kārtsnyam*), which position remained unchanged until the time of Patañjali who found grammar to be the foremost of the Vedāṅgas.

Pāṇini mentions by name the following authorities (*pūrvācāryas*) whose works he had most probably consulted:

(1) *Śakaṭāyana* (III.4.111; VIII.3.18; VIII.4.50), a grammarian, who is quoted by Yāska in support of the view that all nouns are derived from verbs. His dominant position is indicated by an illustration preserved even in the Pāṇinian system, e.g. *Anuśakaṭāyanam vaiyākaraṇāḥ* (*Kāśikā* on I.4.86), 'all grammarians rank next to *Śakaṭāyana*'.

(2) *Śākalya* (I.1.16; VI.1.127; VIII.3.19; VIII.4.51), said to be the author of the *Padapāṭha* of the *R̥gveda*; the *iti* used by him in the *Padapāṭha* is mentioned by Pāṇini as *anārśha*, non-Vedic (I.1.16), and is also referred to by the term *upasthita* (VI.1.129). Pāṇini mentions a *padakāra* in *sūtra* III.2.23, who may be Śākalya.

(3) *Āpīśali* (VI.1.91). He was an important predecessor of Pāṇini. Patañjali refers to his students in the compound

*Āpiśala-Pāṇinīya-Vyādīya-Gautamīyāḥ*, stating that these names were arranged in a chronological sequence (VI.2.36; III.125). The *Kāśikā* records that Āpiśali's treatise dealt with long and short vowels (*Āpiśaly-upajñān gurulāgbavam*, VI.2.14).

(4) *Gārgya* (VII.3.99; VIII.3.20; VIII.4.67). His view is cited by Yāska on nouns being verbal derivatives. The *Ṛik* and *Yaju Prātisākhya*s also refer to him.

(5) *Gālava* (VI.3.61; VII.1.74). His name occurs in the *Nirukta* and the *Aitareya Āraṇyaka* (V.3). The *Śaiṣirī Śikshā* refers to Gālava as a pupil of Śaunaka, and to Śākaṭyana of Śaiṣirī (Pt. Bhagavaddatta, *Vaidika Vāṇmaya*, I. 83).

(6) *Bhāradvāja* (VII.2.63). This school continued its activity much longer, as Patañjali refers to its *vārttikas* several times. Bhāradvāja is also cited in the *Ṛik* and the *Taittirīya Prātisākhya*s.

(7) *Kāśyapa* (I.2.25; VIII.4.67); he is also cited in the *Yaju* and the *Taittirīya Prātisākhya*s. (Cf. *Śāntiparva*, 342-89).

(8-10) *Senaka* (V.4.112); *Sphoṭāyana* (VI.1.123); *Cbākravarmanā* (VI.1.130). The names of these teachers are not found outside the *Ashṭādhyāyī*.

Pāṇini also refers to the views of Teachers in general *Āchāryāṇām*, (VII.3.49; VII.4.52); including both the Eastern (*Prāchām*) and the Northern (*Udīchām*) grammarians. *PŪRVĀCHĀRYA-SŪTRAS*—Pāṇini by incorporating the grammatical contributions of previous writers into his system practically threw them into oblivion. There are, however, a few exceptions. Kātyāyana refers to a *pūrva-sūtra* in his *vārttika* on IV.1.14 (II.205), and the comments of Patañjali on it suggest that Pāṇini's *sūtra* (*Anuṣaṣṭānāt*) was borrowed from an older grammarian. Patañjali quotes a *kārikā* referring to a *pūrva-sūtra* in which *varṇa* was designated as *akṣara* (*Bhāṣya*, I.36).

Kātyāyana in his comment on II.3.17 gives an alternative

reading of the *sūtra* as it existed in the grammar of Āpiśali (*Manyakarmāṇy-anādāra upamāne vibhāṣhāprāṇishv-iti Āpiśalir-adbhite sma*). The source of Kaiyaṭa appears to be some older commentary. Again, Patañjali in his comment on a *vārttika* to *sūtra* I.3.22 makes an illustrative statement, viz. *Astini sakāram ātiṣṭhate*, which is borrowed by the *Kāśikā*. The *Nyāsa* attributes this peculiarity of taking the root *as* as only *s* (*sakārmātram*) to *āchārya* Āpiśali. Patañjali commenting on a *śloka-vārttika* referring to *Āpiśali-vidbi* (IV.2.45; II.281) quotes a *sūtra* of that grammarian, *Dhenuranañi* (*kam utpādayati*), which proves that the *anubandha* in *nañ* retained by Pāṇini was in fact invented by his predecessors. The grammar of Āpiśali must have continued along with that of Pāṇini upto the time of Patañjali at least. Kātyāyana refers to students studying the work of Āpiśali (*Pūva-sūtranirdeśo vā Āpiśalamadbhita iti*, Kāt. IV.1.14.3), and Patañjali even speaks of female Brāhmaṇa students of the Āpiśali school (*Āpiśalā Brāhmaṇi*). The *Kāśikā* notes a different reading of Pāṇini's *sūtra* VII.3.95, which even Patañjali had not noticed (*Āpiśalāstutustusamyamah sārvaḍbhātukāsu cchbandasiti paṭhanti*, *Kāśikā*).

A *sūtra* of Kāśakṛitsṇa was known to Kātyāyana according to Kaiyaṭa (*Kāśakṛitsṇasya 'Pratyottara-padayoh' iti sūtram*, II.1.51, *vār*). His grammatical work was named after him as *Kāśakṛitsṇa*, which consisted of three *adhyāyas* (*Bhāṣhya*, I.12; *Kāśikā* V.1.58). Again, Kātyāyana's *Rauḍhyādi* for Pāṇini's *Krauḍyādi* (IV.1.80) was according to Kaiyaṭa taken from some *pūva-sūtra*. These references to previous grammarians are, however, few and do not give sufficient data for assessing Pāṇini's indebtedness to them. The ancient illustration *Pañcha-vyākaraṇab*, (*Kāśikā* on a *vārt*. to IV.2.60), 'a student of Five Grammars', must have had in view the grammatical treatises of Śākaṭāyana, Āpiśali, Bhārdvāja (=Indra system), Pāṇini and Kāśakṛitsṇa, these names being obtained by omitting Chandra, Amara and Jainendra

from the traditional list of eight.

**GRAMMATICAL TERMS BEFORE PĀṆINI (PŪRV-ĀCHĀRYA-SAMJNĀS)**—Some of the technical grammatical terms from Pāṇini's predecessors were preserved in his time and later, as seen specially in the *vārttikas* of Kātyāyana. A list of such technical terms, some of which have also been used by Pāṇini in the *Ashtādhyāyī*, is given below:

1. *Adyatanī*=*Luṇ* (*vārt.* on II.4.3; III.2.102).
2. *Abhinishṭāna* (VIII.3.36)=*visarjanīya* (Dr. Sūryakanta, *Punjab Oriental Research Journal*, Vol.I, pp. 13-18 cites all the relevant authorities).
3. *Ātmanebhāshā*=*Ātmanepada* (*Bhāshya*, VI.3.7-8).
4. *Ārdhadhātukā*=*Ārdhadhātuka* (II.4.35; I.484).
5. *Ān=ṭā* (III.343, 387; VII.3.120).
6. *Upagraha*=*Ātmanepada* (Kaiyaṭa on *vārt.* 5 on III.2.127; II.130).
7. *Upachāra*=the *s* in place of *visarga* in *ayaskumbha*, etc. (Kāt. on IV.1.1., Pat. II.193, explained by Nāgeśa; also *Kāśikā*, VIII.3.48). The term is known to the *Ṛik Prātiśākhya* and also *Attharva Prātiśākhya*, Viśvabandhu edn., III.1.7).
8. *Upasthita*=*anārsha iti*, i.e. *iti* of *Padapāṭha*. This term is used by Pāṇini without explaining it (VI.1.129). Patañjali explains its meaning as *anārsha iti* of I.1.16. This seems to be a technical term peculiar to the *Ṛik Prātiśākhya* (X.12, *Upasthitam seti-karaṇam*. Cf. also *vārt.* on VI.1.130).
9. *Ghu*=*uttarapada* (*Bhāshya*, III.229, 247, 318; *kimidam ghoriti? uttarapadasyeti*). Kielhorn suggested that *Ghu* must be *Dyu* (*Ind. Ant.*, XVI.106).
10. *Kalma*=*aparisaṃpṛta karma* (*Bhāshya*, I.336).
11. *Charkarita*=*yañ-luṇanta* (*Bhāshya* on VI.1.6 and VII.4.92, quoting a verse explained by Haradatta; also *Nirukta*, II.28; and *Dhātu-pāṭha* at the end of *Adādigāṇa*).
12. *Chekṛīyita*=*yañ* (Pat. II.232; Kaiyaṭa; a term for intensive).
13. *Ḍu*=*Sbaṭ samjñā* (*vārt.* 43 on I.4.1; 304).

14. *Taṇi*=*saṁjñā-cbbandasoh* (Pat. II.99). Pāṇini prefers to use the longer term *saṁjñā-cbbandas* in *sūtra* VI.3.63 in place of the shorter *taṇi*.

15. *Dbrauvyārtha*=*akarmaka*. Pāṇini uses it in III.4.76 without explaining its meaning (cf. *śloka-vārttika* on I.4.50, *dbruvayukti*, which the *Pradīpa* explains as *akarmaka*).

16. *Nāma*=*Prātipadika*, an old popular *saṁjñā* used by *Nirukta* I.1; and also Pāṇini, IV.3.72 who refers to it in connection with the name of a treatise called *Nāmika*.

17. *Nyūyya*=*utsarga* (Pat. I.439; Kaiyaṭa. Cf. also *Ṛik. Prāt.* explained by Uvaṭa as *Utsarga*).

18. *Parokṣhā*=*liṭ* or *Parokṣh-bhūta* (*śloka-vārt.* on I.2.18; I. 199; Kaiyaṭa).

19. *Prakrama*=*uraḥ-kaṇṭha-śiraḥ*, places of utterance or *sthāna* (*vārt.* on I.2.30, explained by Patañjali, I.207).

20. *Pratikanṭha*=*nipātana*, an irregular formation (*Ṛik. Prāt.*, I.54). Pāṇini has used it in connection with a *taddhita* suffix, *pratikanṭham gṛibhāti, prātikanṭhikaḥ*, IV.4.40, where it is juxtaposed with *paurvapadika* and *anttarapadika* and may denote a grammarian or his work dealing with the subject of *nipātana*, words of irregular formations such as *prishodarādi*, which according to Pāṇini should be learnt in the same regular form in which they were taught (*yathopadishṭa*, VI.3.109).

21. *Pratyauṅga*=*antaraṅga* (*Bhāṣhya*, VI.3.138; Kielhorn, *Ind. Ant.*, XVI.p.102).

22. *Prasava*=*pumān*, masculine (*Bhāṣhya*, I.245).

23. *Prasaraṇa*=*samprasāraṇa* (*vārt.* 14 on I.1.3; I.50).

24. *La*=*luk* (*Bhāṣhya*, V.2.37; as explained by Haradatta on II.2.37, *lukḥ esha pūrvācbārya-saṁjñā*).

25. *Lah*=*lakāras*. Pāṇini uses the term in III.4.69 (cf. the *śloka-vārttika* on I.4.51; I. 335). The system of *lakāras* appears to be Pāṇini's own creation in place of the older terms like *Bhavantī* (*Laṭ*), *Śvastanī* (= *Luṭ*, *Kāt.* on III.3.15), *Bhaviṣhyantī*=*Lṛiṭ*, *Kāt.* III.3.15), *Naigamī* (probably *Leṭ*, cf. *Atharva Prāt.*, II.3.2), *Presbaṇi* (*Loṭ. Atharva Prāt.*, II.1.11;

II.3.21), *Hyastanī* (Laiṇ, *Atharva Prāt.*, III.2.5), and *Adyatani* (Luh, *Kāt.* II.4.3.2; III.2.102.6; VI.4.114.3; and *Atharva Prāt.*, II.2.6).

26. *Vyakti=liṅga* (used by Pāṇini in the *sūtra-kāṇḍa*, I.2.51, but not explained, as perhaps it was not necessary for he has rejected the *sūtra*).

27. *Vināma=ṇalva* (*Kāt.* on *Śivasūtra* 3-4; I. 25).

28. *Vṛiddha=gotra*; Patañjali points out that Pāṇini has borrowed this term from an earlier grammar (*Bhāṣya*, I.248 on I.2.68), and *Kāśikā* also cites an old *sūtra* in which it had been used (*Apatyam antarbitanī vṛiddham*, I.2.65). Kātyāyana also uses it in a *vārt.* on IV.1.90, and his definition of *gotra* on IV.1.163 appears to be cited from an earlier grammar.

29. *Samkrama*=a term for *kit* and *iit* suffixes, prohibiting *guṇa* and *vṛiddhi* (*Bhāṣya*, I.48 and I.1.3 as explained by Nāgeśa). The word is not met with elsewhere (Kielhorn, I.A., XVI.102; cf. *Kāśikā*, I.1.6, *saṁkramo nāma guṇa-vṛiddhi-pratiśhedha-visbayah*).

30. *Sandhyakshara*=e, o, ai, au (*Kāt.* on *Śivasūtras* 3-4; I.2.4; where the other term *samanākshara* for the simple vowels is also used).

31. *Sasthāna=jihvāmūliya* (*Kāt.* II.4.54.8, as explained by Kaiyaṭa).

32. *Hrāda=ānuranāṇa-ghosha*, sound vibrations following the uttering of a letter (*Kāt.* *brāḍavirāmaḥ saṁbitā*, I.4.109. 7; I.355).

**SYLLABUS OF GRAMMATICAL STUDIES**—The early grammatical literature sheds light on the syllabus and method of its study. Kātyāyana raising the question as to what constitutes grammar, replies that word-forms (*lakṣya*) and rules of formation (*lakṣhaṇa*) together make up grammar. The earlier method was naturally that of learning each word by itself, as Patañjali has observed (*Pratīpadoktānām śabdānām śabda-pārāyaṇam provācha*, I.5). Formulation of rules came later. The composition of grammar in the form of *sūtras* as

*lakṣhaṇas* or rules attained its culmination in Pāṇini, who also refers to students following the earlier method of studying individual words and called *Prātikaṇṭhika* (IV.4.40; where *Prātikaṇṭha*=*prātīpadika*). Both these methods seem to have obtained simultaneously up to the time of Patañjali, who speaks of students called *lākṣhyika* (studying words) and *lākṣhaṇika* (studying rules) (IV.2.60). Pāṇini himself refers to two principal divisions comprising between them the full course on grammar, viz. *Nāmika* treating of nouns, and *Ākhyātika* of verbs (IV.3.72). The *Kāśikā* refers to commentaries on nouns (*Sauṇya*), Verbs (*Taiṇa*) and Verbal Nouns (*Kāṛta*, IV.3.66). These commentaries were meant as aids to the topical study of nouns (*Subānta*), Verbs (*Tinānta*) and Verbal Nouns (*Kṛdānta*). In the first two the order of Pāṇinian *sūtras* must have been readjusted. Perhaps these names carry back the tradition of the arrangement of grammatical words as found in the *Prakriyākaumudī* and *Siddhāntakaumudī* to a period anterior to the *Kāśikā*. Some key-words throwing light on grammatical syllabus are mentioned by Patañjali. He refers to a work called *Sāmastika* which dealt with compounds, corresponding to Book II, Chaps. 1-2 of the *Aśbādhyaī*. In place of the term *Samasta*, known to the *Ātharva Prātisākhya* (III.4.3), Pāṇini uses *Samāsa*.

Patañjali mentions *Nātānatika* as a work dealing with Accents (*Bhāṣya*, II.295; *Kāśikā*, IV.3.67). *Nata* and *Anata* were pre-Pāṇinian terms, *Nata* standing for *Anudātta* and *Anata* for *Udātta*. Pāṇini uses the term *Sannatara* (II.2.40), in place of the older term *Nata*. The *Nātānatika* chapter counted as a separate topic in the syllabus. Book VI of Pāṇini, Chapters 1 and 2, are equivalent to *Nātānatika* of the older grammars. The *Kāśikā* refers to this topic also as *Sanvara* (VII.3.4).

The *Kāśikā* (IV.3.67) cites the names of two more chapters viz. (1) *Sāmbhita*, dealing with *Sanibhitā* or *Samādhī*, euphonic combinations, corresponding to VI.1.72-134 and VIII.4.40-65; and (2) *Sbātva-ṇatvika*, dealing with cerebrali-

zation of dental *na* and *sa*, corresponding to *Asbjādhyaī* VIII.3.55 to VIII.4.39. This Pāṇinian chapter is a model of compact topical treatment in a grammar. The *Riktautra* of the *Sāmaveda* also includes a similar but loosely strung section on cerebralization.

Another important chapter dealt with the vowel changes in words caused by the presence of suffixes, and described as *Guṇa* and *Vṛiddhi*. These chapters were known as *Guṇāguṇa* (*Uktbādi gaṇa*, IV.2.60; *aguṇa*, *Vṛiddhi*) of which the students were called *gaṇyāguṇika*. The *Kāśikā* also acquaints us with some theoretical studies like *Gauṇa-mukhyam*, dealing with *Pradhāna* and *Upasarjana* (IV.3.88), and *Śabdārthasambandhiyam* (IV.3.88). Completing the prescribed course of study was called *vṛitta* (*Ṇeralbyayane vṛittam*, VII.2.26), e.g. *vṛittaguṇo Devadattena*, 'Devadatta has mastered *Guṇa*' as part of his grammatical studies.

The *Kāśikā* informs us that the subject of lengthening and shortening of vowels formed the subject of a treatise called *Guru-lāghavam*, first promulgated by *Āpiśali* (*Āpiśalyupajñāni Guru-lāghavam*, VI.2.14; IV.3.115). That treatise is now lost, but its contents seem to have been used in Pāṇini's work (cf. Keith, *H.S.L.*, p. XXV).

**PĀṆINI AND LOKA (CURRENT LANGUAGE)**—Pāṇini's regard for current language bearing on grammatical formations is reflected in the *sūtra-kāṇḍa*, I.2.51-58. Generally reluctant to express his opinion on controversial matters which engaged the attention of previous grammarians and etymologists, Pāṇini here shows an exception by presenting the *pūrvapakṣa* and the *siddhānta* in defence of his fundamental grammatical position, i.e. his article of faith as a grammarian. He stoutly defends *Samjñā* or *LOKA*, i.e. current social and linguistic usage, as the best guide and standard to decide theoretical definitions and questions. The authority of *Samjñā* or usage of words must always supersede that of *Yoga* or meaning dependent on derivation (*samjñā-pramāṇa*, I.2.53-55). It may be asked whether

the treatise on grammar should also deal with such matters as determining the exact significance of time-denoting words, social grades, *etc.*; as for example, 'How much is a *droṇa*?', 'What is a *yojana* distance?', 'What are the relative positions of a principal and agent?', *etc.* There were enthusiasts who thought that in the absence of exactly knowing which twenty-four hours constitute *adya*, 'today', grammatical rules cannot be correctly applied. Pāṇini utters a note of warning against such extreme theorists and invokes the invariable authority of usage, both linguistic and social (*Tad-aśisbyam samjñā-pramāṇatvāt*, I.2.53). For example, it may be a fact that the name Pañchāla was given to a country because of the first settlement of the Pañchāla Kshatriya tribe in that region. This 'land-taking' stage was now a thing of the past. Pañchāla was now understood as the name of a *janapada* without reference to the Kshatriyas who inhabited it. A grammarian should face facts. It is unnecessary to seek the derivation of Pañchāla *janapada* from the Pañchāla tribe. Similar is the case with hundreds of other place-names which were originally derived from historical conditions which no longer existed and so those names lost their original derivative sense. This point of view gives to the grammarian a realistic outlook by which he is able to build up from a living language its system of grammar.

Thus, instead of tying himself down to the treatment of age-old topics, such as accentuation, cerebralization, vocalization, letter-coalescence, formation of compounds and declension of nouns and verbs, Pāṇini extended the scope of his investigation to include all kinds of words taken from the different departments of language and current usage. The result of this approach is visible in Pāṇini's exhaustive treatment of the *Kṛdanta* and *Taddhita* suffixes. He investigated in great detail the manifold *vṛttis* or meanings expressed by words through suffixes. Yāska informs us that the subtle distinctions of meanings of words are not always free from doubt (*viśaya-*

*vatyo hi vṛittayo bhavanti*, Nir. II.1). In his linguistic laboratory, as it were, Pāṇini collected and classified all possible meanings in which words were used, and grouped them under suitable headings as *bita*, *sampādi*, *arha*, *alamartha* (VI.2.155), *kṛta*, *rakta*, *vikāra* (VI.3.39), *aṅka*, *saṅgha*, *lakṣaṇa*, *dharmā*, and several hundreds of others. The activities of all grades of persons in society, such as a musician, hunter, shoe-maker, cook, salesman, trader, ferryman, author, mendicant, devotee, farmer, cowherd, prince, councillor, etc., were analysed and taken note of grammatically. He thus viewed *Loka* in all its comprehensiveness as the primary source of material for a living grammar. This attitude towards the reality of life resulted in the secularization of knowledge and is patent in the *Aśṭādhyāyī* which for the most part served the *Bhāṣā* or the spoken language of Pāṇini's time and was not tied to the chariot-wheels of Vedic schools. Kātyāyana and Patañjali also frequently appeal to current usage as the final authority (*Loka-vijñānāt siddham*, I.1.21; I.77; I.1.65; I.171).

**SANSKRIT AS A SPOKEN LANGUAGE**—The question whether Sanskrit was the spoken language in Pāṇini's time or only a literary language is often raised. Grierson with his eyes fixed more on the language of the Aśokan inscriptions argued that if Pāṇini was legislating for the spoken language of his days, how could it have so changed by the time of Aśoka in such a short time (*Ind. Ant.*, Vol. XXII, 222). On the other hand Goldstücker, Keith and Leibich (*Pāṇini*, p. 48) hold that Pāṇini's Sanskrit was the spoken language used by the cultured classes of his time. Grierson does not appear to have wholly taken into account the internal evidence of the *Aśṭādhyāyī*. As Keith puts it: 'Pāṇini has rules which are meaningless for any thing but a vernacular, apart from the fact that the term *Bhāṣā* which he applies to the speech he teaches has the natural sense of a spoken language.' (*H.S.L.*, p. 9). Thus Pāṇini includes in his purview linguistic forms relating to questions and answers (*prāśna*, III.2.117; *prishṇa-prativachana*, III.2.

120), praise and censure (*praśaṁsā-kutsā*), calling from a distance (*durād-dhūte*), greeting (VIII.2.83-86), expressions in oxytone for censuring an opponent worsted in argumentation (*nigṛibhānuṣyoga*), terms of threat (*bhartsana*, VIII.2.95), mental deliberation (*vicāryamāna*, VIII.2.97), censuring a lapse in polite conduct (*kṣbiyā*), benediction (*āśih*), bidding (*praśba*, VIII.2.104), narration (*ākhyāna*, VIII.2.105), friendly persuasion (*āmantrana*, VIII.1.33), haste (*parīpsā*, VIII.1.42), permission (*anuññaisbaṇā*, VIII.1.43 as *nanu gacchbāmi bhob* 'May I go, Sir'), communicating something in a harsh manner (*ayabābbhipretākhyāna*, III.4.59), etc. We have also the parenthetical use of *manyē*, 'I think', (I.4.106; VIII.1.46) when denoting derision or sneering in colloquial language, and other similar forms of living speech as *kbādata-modatā*, 'eat and be merry'; *asnīta-pibatā*, 'eat and drink'; *pachata-bbrijitā*, 'cook and fry', etc. An expression like *bbinddbi-lavaṇā*, 'Pour the salt', must have been derived from the cries of busy cooks in a kitchen on festive occasions. This extraordinary penetration into popular life and language accounts for Pāṇini's extensive linguistic material which made him notice even such minute details as the names of wells on the left and right banks of the river Beas (IV.2.74).

He notes variations of idiom in Sanskrit spoken in the North and the East, and also quotes forms prevailing in the local dialects of the *janapadas*, e.g. names of towns in the Uśinara country and names of Brāhmaṇa and Rājanya members of the *saṅgha* organization in the Vāhika region (V.3.114).

The term *Bhāṣā* as used by Pāṇini is the language distinguished from the language of the sacred texts, viz. Chhandas and Brāhmaṇa literature. Patañjali states the true position when he says that Sanskrit was the standard speech of the *Śiṣṭas*, i.e. cultured persons, who even without instruction were capable of using the correct speech. He does not deny the co-existence of the speech of the common people called *Apabhraṁśa* of which there were variations (*ekaikasya*

*śabdasya babavo' pabhrāmīśāh*, I.5). Patañjali could speak the language which was the medium of his literary expression, but a common herdsman would use one of the Prākṛit dialects. Kātyāyana definitely mentions *Loka* (ordinary language of the *Śiśṭas*) as the standard of grammatical norm, and at the same time refers in a *vārt.* to the existence of Prakrit roots like *āṇapayati* and others (I.3.1.12; I.269). Sanskrit and Prakrit should not be thought of as exclusive of each other in point of time. 'The matter is really to be viewed not in the light of a contrast between actual spoken language and a Hochsprache. It is rather a matter of class speeches; Yāska spoke Sanskrit much as he wrote it, and the officials of Asoka equally conversed in a speech essentially similar to that in which they wrote, while contemporaneously lower classes of the population spoke in dialects which were far further advanced in phonetic change'. (Keith, *H.S.L.*, p. XXVI).

**PĀṆINI'S GENIUS FOR SYNTHESIS**—Pāṇini shows a scientific and balanced judgment which could reconcile the opposite views and controversies regarding important topics of grammar and their method of treatment.

Thus the most acute grammatical controversy in his days was that concerning the derivation of nouns from verbs. The Nairuktas and the Śākaṭāyana school held the view that nouns were derived from verbs. On the other hand, Gārgya, who was probably a Nairukta, and the grammarians maintained that it was not necessary to trace each and every noun to a verb (*Nāmany-ākhyatajānīti Śākaṭāyano nairukta-samayaścha*, Yāska, I.12; *Bhāṣya*, II.138, *Nāma cha dhātunjamāba Nirukte Vyākaraṇe Śākaṭasya cha tokam*). Yāska himself subscribed to the theory of verbal derivation of nouns, but he disapproved of the ridiculous attempts made at times by the followers of Śākaṭāyana to invent fanciful derivations of nouns from verbs (*Nirukta*, I.13): 'The etymologist who indulges in improper and unauthorized derivation of words deserves censure; the scientific principle thereof cannot be faulty'.

Pāṇini's view on the subject represents a synthesis. Kātyāyana and Patañjali state that Pāṇini regarded the *Uṇādi* formations as not derived from any root and suffix (*avyutpanna prātipadika*; *Prātipadika-vijñānāccheba Pāṇineḥ siddham*, VII.1.2.5; III.241, *Uṇādayo' vyutpannāni prātipadikāni*). Words of regular derivation from verbs and suffix form the subject of Pāṇini's *Kṛdanta* section. Others which do not admit of such regular analysis and derivation were considered by him to belong to the *Uṇādi* class. Pāṇini's attitude towards the *Uṇādi* suffixes is one of silent approval. In the *sūtra* *Uṇādayo babulam* (III.3.1) he takes a passing notice of the *Uṇādi* suffixes, but he refrains from discussing in his usual manner the characteristic features and details of the *Uṇādi* system. It appears that the *Uṇādis* were the product of the Śākaṭyāyana school. To ascribe them to Pāṇini would militate against the system for which he stands.

**SOURCE OF MEANING**—Kātyāyana acquaints us with two views held about the factors which give to the words their proper meaning. He says that the application of a word to a particular object rests on the root-meaning underlying it, e.g. *gan* is so called because it moves, but all objects which move do not get the name *gan*. Yāska uses this argument as the *pūrvapakṣa* view for rejecting the derivative theory (*Nirukta*, I.12). The other reason according to Kātyāyana is the application of a word to an object as seen in popular usage (*Darśhanam hetuḥ*, I.2.68; I.250). We have seen that Pāṇini recognises both these views when he says that *Samjñā* and *Yoga* both contribute to the meanings of words in their own way (II.1.53,55).

**JĀTI AND VYAKTI**—This controversy centred round the question whether a word denotes a class (*Jāti*) or an individual (*Vyakti*). As indicated by Kātyāyana, Vājapyāyana held the view that a word denotes the class, whereas Vyāḍi took the other view that it stood for the individual (*Bhāṣya*, I.242; I.244). Patañjali credits Pāṇini with the reconciling of the two opposite views; e.g. *sūtra* I.2.58 is based on the *ākṛiti* (class) view, and *sūtra* I.2.64 on the *dravya* (individual) view of mean-

ing (*Bhāṣya*, I.6).

ONOMATOPOEIA—Yāska gives two views on the subject: "Onomatopoeia does not exist", says Aupamanyava'. His own view was that the names of birds are very often in imitation of their sounds. Pāṇini has accepted this principle of *anukarana*, as applied to *avyakta* speech, i.e. articulation which is not in the form of distinct syllables (*avyaktānukaraṇāt*, V.4.57).

PREFIXES—Yāska says that Śākaṭāyana considered the prefixes as mere signs or symbols of meaning (*dyotaka*), but Gārgya held that they carry a meaning of their own (I.3). Pāṇini sees no conflict between these views. Prefixes like *adhi* and *pari* are deemed by him as *anarthaka* (I.4.93), evidently implying, as Patañjali points out, that there were other prefixes which were not devoid of meaning.

DHĀTU AS KRIYĀ- AND BHĀVA-DENOTING—The question whether the verbs denote 'becoming' (*Kriyā*) or 'being' (*Bhāva*) was an important one for the grammarians on the ground of its bearing on the eternity of words. Patañjali says that Pāṇini accepted both views in *sūtra Bhūvādayo dhātavaḥ* (I.3.1; I. 258). Taken separately *sūtra* II.3.14 supports that verbs refer to *bhāva* and *sūtra* II.3.15 to *kriyā*.

ETERNITY OF WORDS—This doctrine is the basis of the philosophy of Grammar. Kātyāyana in his *vārt.* on IV.4.1 refers to two opposite schools, viz. *naityaśabdika* and *kāryaśabdika* (*Bhāṣya*, II.329). The *Ṛik Prātiśākhya* refers to the two views regarding the eternity and not-eternity of letters (XIII.14). Yāska quotes the opinion of Audumbarāyaṇa holding that words vanish with their utterance (*Indriyanityam vacanam Audumbarāyaṇaḥ, Nirukta*, I.2). Patañjali reveals in his discussion that Pāṇini as well as Kātyāyana were advocates of the eternity of words, but that does not preclude the grammatical operations of *lopa* and *āgama* affecting words. Pāṇini defines *lopa* or elision as *adaraśana* (I.1.60), which Patañjali explains as *antaradhāna*, i.e. disappearance. On the

contrary, the *Tait. Prāt.* held that *lopa* is *vināśa* or annihilation, (I.57), a view based on the non-eternity of words. Similarly, Pāṇini's *ādeśa* was previously known as *vikāra* (Kāt. I.31).

From the above examples it may be inferred that between two extreme views, Pāṇini always preferred to follow the golden mean, or as we might put it, the *MAJJHIMA-PATIPADĀ*, the Middle Path, which was the keynote of the period in which he was born.

## CHAPTER VI RELIGION

### SECTION 1. DEITIES

The religious conditions in Pāṇini mainly relate to *yajña* or sacrifice, and worship of various Vedic deities with oblations and performance of appropriate rituals by different classes of priests. Names of officiating priests and *dakṣiṇā* or payments for their service are also mentioned (V.1.69; V.1.95). At the same time there are definite indications of popular phases of religious beliefs and practices as elaborated in devotion to gods and asterisms, worship of images and the growth of religious ascetic orders.

**DEITIES.** Pāṇini mentions the following Vedic deities, both singly and in pairs: (1) Agni (IV.1.37), (2) Indra, (3) Varuṇa, (4) Bhava, (5) Śarva, (6) Rudra, (7) Mṛṇa (IV.1.49), (8) Vṛishākapi, (IV.1.37), (9) Pūshā, (10) Aryamā (VI.4.12), (11) Tvashṭā (VI.4.11), (12) Sūrya (III.1.114), and (13) Nāsatya (VI.3.75). The last name is derived by Pāṇini as *na asatyāb*, 'who are the opposite of non-truth'. The Mahābhārata mentions Nāsatya and Dasra as the twin Aśvins born of the nose (*nāsā*) of Samjñā, wife of Sūrya (Anuśāsana-parva, 150.17). The derivation from *nāsā* is in fact mentioned by Yāska as a probable explanation of the word (*nāsikāprabhavan babbhūvatur iti vā*, VI.13). But Pāṇini accepted the etymology of this word given by Aurnavābha whose opinion is quoted by Yāska (*satyan eva nāsatyāv-ity-Aurnavābhaḥ, Nirukta*, VI.13).

Indra is also referred to as Marutvān (IV.2.32). Pāṇini refers to Prajāpati under the symbolical name of *Ka*. Patañjali says that *Ka* is not a pronoun, but the proper name of a deity (*samjñā chaishā tatrābhavataḥ*, II.275), so that the dative

case of *Ka* would be *Kāya*, not *kasmāi*. Reference is also made to the deity called *Vāstoshpati* who presided over a house or homestead and was as old as the *Rigveda*. Pāṇini's mention of *Grihamedha* (IV.2.32) under the context 'This is its deity' (IV.2.24) shows that *Grihamedha* was also looked upon as a deity. In the same context mention is also made of *Soma*, *Vāyu*, *Mahendra* and *Apāṁnaptri* (IV.2.27), which last was a name of *Agni* as sprung from water to whom special oblations were offered.

Of the pairs of deities (*devatā-dvandva*, VI.2.141) a long list is found in the *Aṣṭādhyāyī*, e.g. *Agni* and *Varuṇa* (VI.3.27), *Agni* and *Soma* (IV.2.32; VI.3.27), *Dyau* and *Prithivī* (IV.2.32; VI.3.29-30) *Ushā* and *Suryā* (VI.3.31), the twin agricultural deities *Śunāsira*, and other combinations with *Rudra* and *Pūshā* (VI.2.142). Even *Manthin*, a *Soma*-vessel (*Somagraba*) is mentioned in the context of 'twin deities' (VI.2.142).

Of the female deities the older goddesses mentioned are *Indrāṇī*, *Varuṇāṇī*, (IV.1.49), *Agnāyī*, *Vṛishākāpāyī* (IV.1.37), *Prithivī* always referred to as a pair with *Dyaus*, and *Ushas* for whom oblations were prepared as for an independent deity (IV.2.31).

**POST-VEDIC DEITIES.** The most important of these is goddess *Pārvatī* four of whose names are mentioned, *viz.* (1) *Bhavāṇī*, (2) *Śarvāṇī*, (3) *Rudrāṇī* and (4) *Mṛidāṇī* (IV.1.49). This worship was a feature of the *Sūtra* period. The *Vedas* refer to their male counterparts such as *Bhava*, *Śarva*, *Rudra* and *Mṛiḍa*. The *Śatapatha Brāhmaṇa* mentions *Rudra*, *Śarva*, and *Bhava* as forms of *Agni* (VI.1.3.18), and makes the important statement that the name *Śarva* was popular in the *Prāchyā* country, and *Bhava* in the *Vāhika* region (*Śarva iti yathā Prāchyā āchakshate, Bhava iti yathā Vāhikāḥ*, ŚB., I.7.3.8). It may, therefore, be inferred that the names *Śarvāṇī* and *Bhavāṇī* were local designations of the one and the same Mother Goddess. Similarly *Rudrāṇī*

and Mṛḍāṇī may have been other local epithets of the same deity.

Āditya referred to in *sūtra* IV.1.85 is to be taken as the name of the classical sun-god rather than of the Vedic Ādityas. In fact a new feature of the Pāṇinian pantheon is the emergence of time-denoting words raised to the status of deities (IV.2.34). For instance, oblation was prepared to worship the deity named *Māsa*, 'Month', and called *Māsika*; and similarly for the deity *Samvatsara*, 'Year', and called *Samvatsarika*. There was also worship of the 'Seasons' as deities, e.g. *Vasanta* or Spring, the oblation being called *Vasantam baviḥ*. Pāṇini himself refers to *Ṛitu*, 'Season' as a deity (IV.2.31), in whose honour some worship was prescribed. This process of deification extended even to stars. This is indicated by the mention of *Proshthapada*, a name of *Bhādrapada*, as a *devatā* or deity (IV.2.35). But the whole system of adopting personal names after the names of asterisms, for which detailed rules are given (IV.3.34, 36, 37), was due to the fact that the stars became objects of adoration and worship. Names like *Rohiṇiṣeṇa*, *Bharaniṣeṇa* and *Śatabhishaksena* implied in the *sūtra* *Nakshatrād-vā* (VIII.3.100) point to a belief in the beneficent influence of deities presiding over these asterisms.

**BHAKTI.** The new phase of religious belief found its expression in the cult of *Bhakti* or theistic devotion to particular gods and goddesses. Such names as *Varunadatta* and *Aryamadatta*, which were shortened as per *sūtra* V.3.84, point to the belief that gods like *Varuṇa* and *Aryamā*, if propitiated by the parents, would grant the boon of a son to be named after them. Pāṇini admits that the name-ending *datta* denoted a benediction from a god or a higher power of which the personal name became a symbolic expression (*Kāraṇād-datta-śrūta-yorevāśiḥ*, VI.2.148). This religious approach is further exemplified in Pāṇini's reference to *bhakti* to *Vāsudeva* and *Arjuna* (IV.3.98). Patañjali clearly remarks that *Vāsudeva* was here not a mere Kshatriya name but the personal name of

Kṛishṇa whose *bhakta* or worshipper was called *Vāsudevaka*. We should, however, admit that *bhakti* in this context (IV.3.95-100) has also a secular significance in some *sūtras*, e.g. *āpūpika*, one who loves eating cakes (example to IV.3.96). The reference to the *bhakti* of Mahārāja or Kubera proves on the other hand that Pāṇini surely had religious *bhakti* also in mind (*Mahārājaṭṭhaṇ*, IV.3.97).

**MAHĀRĀJA.** Besides referring to the *bhakti* shown to Mahārāja as stated above, Pāṇini also mentions that Mahārāja was a *devatā* (IV.2.35), to whom oblations were offered. According to Patañjali *bali* offered to Mahārāja was called *mahārāja-bali* (I.388, cf. also *Kāśikā*, II.1.36). This deity may be identified with those mentioned as a group of Four Great Kings, *Chattāro Mahārājāno*, who dwell in the *Chātummahārājika* or the lowest *deva* world as guardians of the four quarters. In *Jātaka* VI.265, Vessavaṇa is called a Mahārāja and in the *Mahāsutasoma Jātaka* Śakra and the other three Lokapālas are called *Mahārājāno* (VI.259). They also stand at the head of the list of gods and other superhuman beings in the *Āṭānāṭiya Sutta* (*Dict. Pāli Proper Names*, I.242; 861). From *bhakti* to Mahārāja deity, it is clear that Vāsudeva as an object of *bhakti* is also to be taken as a deity as stated by Patañjali.

**VĀSUDEVA-CULT.** Pāṇini's reference to Vāsudeva as the object of *bhakti* throws light on the antiquity of the *bhakti* cult. Kaiyaṭa describes Vāsudeva as *paramātma-devatā-viśeṣa*. Keith accepts the accuracy of this identification and considers the remark of Patañjali, *viz. saṃjñā chaishā tatra-bhavataḥ*, to be 'the most satisfactory proof of the identity of Vāsudeva with Viṣṇu, for except through such identification no one could dream of putting Vāsudeva on the same plane as Ka' (*J.R.A.S.*, 1908, p. 848). Patañjali's reference to the staging of *Bali-bandhana*, Viṣṇu's famous exploit, and the slaying of Kaṁsa, Kṛishṇa's great deed, were regarded by Weber himself as hinting at the early belief in the existence of Kṛishṇa-Vāsudeva and his identification with Viṣṇu (*ib.* p.

847). If in the second century B.C. these exploits formed part of the Viṣṇu legend they must have been considerably older (cf. the example, *Jagbāna Kaṁsaṁ kila Vāsudevaḥ, Bhāṣhya* quoting it as a past event, II.119). Patañjali also refers to the Vyūha of Kṛishṇa with his three acolytes: *Jan-ārdanas-tvātmachaturtha eva, (Bhāṣhya, III.43, on sūtra VI. 3.5)*. He also mentions Kṛishṇa and Saṁkarshaṇa as joint leaders of an army (*Saṁkarshaṇa-dvītiyasya balam Kṛishṇasya vardhatām, I.426*), and refers to the existence of temples dedicated to Keśava and Rāma besides those of Kubera (*Prā-sāde Dhanapati-Rāma-Keśavānām, I.436*). In *sūtra VIII.1. 15* Pāṇini states that the word *dvandva* signifies a pair of persons jointly famous (*abbivṛyakti*), on which the *Kāśikā* cites as an example *Saṁkarshaṇa-Vāsudevan (dvāvāpyabbivṛyaktan sābacharyeṇa)*. Devotional worship to Saṁkarshaṇa and Vāsudeva in connection with a religious shrine is proved by epigraphic evidence of second century B.C. (Nagari Ins., *E.I.*, XXII, p. 198 ff.). The *Arthaśāstra* not only refers to the legend of Kṛishṇa and Kaṁsa (XIV.3) but also prescribes the building of temples sacred to god Apratihata, i.e. Viṣṇu (II. 4). These examples, although of the Maurya-Śuṅga epoch, show that Kṛishṇa's divinity was already established as a result of centuries of religious development. Patañjali's reference to the Śiva-Bhāgavata religion (II. 387) is also proof of the early antiquity of the Bhāgavata cult, for the Śaivas following the Bhakti cult must have been so named after the Bhāgavatas. Although the evidence from the *Gaṇa-pāṭha* is not unassailable, it must be mentioned that the *Gavāśva* group (II.4.13) reads *Bhāgavatī-Bhāgavatam*, as a compound word in singular number mentioning a female and a male follower of the Bhāgavata religion. Grierson also maintained the antiquity of the Bhāgavata religion in Pāṇini's time on the basis of his knowledge of Vāsudeva as a deity (*J.R.A.S.*, 1909, p. 1122). Sir R. G. Bhandarkar agrees with this view. (*J.R.A.S.*, 1910, p. 170, Vāsudeva of Pāṇini, IV.3.98).

IMAGES.—Figurines, including divine images are included under the general term *pratīkṛitī* (V.3.96). Pāṇini, however, knew of a more specific word, *archā* (V.2.101), which accords with Patañjali's usage (*Mauryaiḥ bhṛāṇyārthibhiḥ archāḥ prakalpitāḥ*, V.3.99, *Bhāṣya*, II.429).<sup>1</sup> Its derivative *archāvān* (V.2.101) should have signified the owner of an image.

An important sūtra, *Jīvikārthe cāpaṇye* (V.3.99) intended to regulate the formation of names of divine images, proves beyond doubt Pāṇini's knowledge of images of deities in his time. Regarding the naming of images there are the following possibilities covered by Pāṇini's rule and Patañjali's rather involved argument on it:

(1) There may be images installed in temples or open shrines, which are not of individual ownership, and hence not for any ones' livelihood (*jīvikā*), or for sale (*paṇya*), but are for worship (*pūjārtha*). These images remain outside the purview of Pāṇini's rule. How they were named, whether *Śiva* or *Śivaka* we are left to guess, but there is all the probability that they were named without the *kan* suffix, as *Śiva*, *Skanda*, etc.

(2) In the second place there may be images in the possession of *devalakas* or owners and custodians of shrines. They may be either fixed in one place or carried from place to place. The former would cover for all practical purposes the images of class 1 above, which would then be objects of Pāṇini's rule and the deity would be named *Śiva* (without *kan* suffix). Both *cāla* and *achala* images with the *devalakas* would serve for worship (*pūjārtha*), be a source of livelihood (*jīvikārtha*) to their care-takers, but be not for sale (*apaṇya*). All these are the object of Pāṇini's rule, and they would be named as *Śiva*, *Skanda* (without *ka*).

<sup>1</sup> *Archā* means 'image of a god'; cf. *dirgha-nāsikī archā*, *tuṅga-nāsikī archā* (IV.1.54; II.222); also Lüder's discussion of its use in the Mora Well Inscription, *Ep. Ind.*, XXIV. p. 198.

(3) The third class of images would be those displayed for sale (*paṇya*); these were not for worship (*pūjārtha*), although they were a means of livelihood to their owners (*jīvi-kārtha*). These would be counter-examples of Pāṇini's *sūtra*, and named as *Śivaka*, *Skandaka*, etc.

(4) Here Patañjali joins issue with Pāṇini. On the basis of some reliable historical information which he had he contends as to how the *sūtra* will fare in the case of images which the Mauryan kings, 'greedy of gold' (*hiranyārthibibhīḥ*), had ordered to be set up (*prakalpitāḥ*) and most probably also to be sold, and which thus served simultaneously the triple purpose of *jīvikā*, *paṇya* and *pūjā*.<sup>1</sup> Kauṭilya supplies the much needed commentary on this extraordinary Mauryan measure to replenish their exchequer.<sup>2</sup> The Devatādhyakṣha is directed to raise money (*ājīvet, hiraṇyopahāreṇa, koṣaṁ kuryāt, Arth. V.2*) by manipulating the worship of divine images and exploiting the credulousness of the people, such as organising fairs and festivals in the holy shrines of deities (*daivata-chaitya*), improvising shows of miraculous *nāga* images with changing number of hoods, and spreading the news of other miracles, etc. (*Arth. V.2*). According to Patañjali these particular images would not be covered by Pāṇini's rule (*bhavit tāsū na syāt*), and although they might have found a place in the shrines for worship, they would not get the name *Śiva*, *Skanda*, etc.

(5) As a way out of the conundrum, Patañjali dismisses the case of the Mauryan images which were both for sale and for worship, and he points to contemporary images under actual worship (*yās-tvetāḥ samprati pūjārthāḥ tāsū bhaviṣ-*

<sup>1</sup> अपण्य इत्युच्यते तवेदं न सिध्यति । शिवः स्कन्दः विशाख इति । किं कारणं । मीरिहिरम्भार्थिभिरर्चाः प्रकल्पिताः । भवेत्तासु न स्यात् । यास्त्वेताः संप्रति पूजार्थास्तासु भविष्यति ।  
(*Bhāṣya*, V.3.99; II.429).

<sup>2</sup> *Hiraṇyārthi*, according to Patañjali on *vār, arthāchchāsannibhite* on *sūtra* V.2.135, denoted one who was bereft of wealth or gold, and consequently longed for it.

*yati*) which were suitable examples of Pāṇini's rule and be designated as *Śiva*, *Skanda*, etc. (without *kan* suffix).<sup>1</sup>

Images of Śiva and Vaiśravaṇa were also known to Kauṭilya (II.4) as being installed in temples. Some of these deities were worshipped in pairs, e.g. *Śiva-Vaiśravaṇa*, *Skanda-Viśākha*, *Brahma-Prajāpatī* (*Gaṇa-paṭha* to II.4.14, and also a *vārttika* on VI.3.26). As pointed out by Patañjali these joint names were post-Vedic (*na chaite Vede sahanirvāpa-nirdishṭāḥ*, VI.3.26; III.149). Śiva and Vaiśravaṇa were the two main deities associated in the development of the popular cult of the Yakshas, Nāgas and other godlings. We have seen that Pāṇini refers to the worship of Mahārāja, which was but another name of Vessavaṇa-Kubera, who headed the group of the Four Great Kings or Regents of the Four Quarters and was the king of the *Yakkhas* in the North. Pāṇini also mentions the descendants of Dhṛitarājan (VI.4.135) who may be identified as the Lokapāla Dhataratṭha ruling in the East at the head of the Gandhabbas.

**DEMONS**—The counterpart of the gods were the demons who are dreaded as much as the former were loved. In mentioning them Pāṇini is obviously drawing on older literature rather than recording contemporary beliefs. Diti (IV.1.85)

<sup>1</sup> Images	<i>Jivika</i>	<i>Parya</i> or not	For <i>pūjā</i> or not	name
1. Images installed in shrines	no जीविका	अप्य	पूजार्थ	outside Pāṇini's rule; or see above (2)
2. Devalaka images	जीविकार्थ	अप्य	पूजार्थ	शिवः स्कन्दः

mother of the Daityas, Kadrū (IV.1.72), Asuras (IV.4.123), Rākshasas and the Yātus (IV.4.121) are referred to, but in connection with older linguistic forms. The term *āsuri māyā* (IV.4.123) similarly appears to be an old word signifying thaumaturgy or the *asura-vidyā* (cf. *Āśv. Śr.*, X.7, and *ŚB.*, XIII.4.3.11). The female demon Kusitāyī, wife of Kusita (IV.1.37) occurs in the *Maitrāyaṇī Samhitā* (III.2.6). The planet Rāhu is referred to as an enemy of the moon (*Vidhūm-tuda*, III.2.35).

**YAKSHAS**—In *sūtra* V.3.84 Pāṇini refers to Śeṣala, Supari, Viśāla, Varuṇa and Aryamā. These were names of tutelary deities. It has been shown above (*ante*, p. 188) that Viśāla was the name of a *Yaksha* according to the *Sabhāparva*, 10.16. Supari and Śeṣala also appear to be minor godlings, probably *Yakshas*. According to the *Āṭanāṭiya Sutta* (*Dīghanikāya*) Varuṇa was a *Yaksha* also. Aryamā, too, was most probably a minor deity of popular religion associated with child-birth.

## CH. VI, SECTION 2. YAJNAS

**THE YĀJNIKAS**—Yāska quotes the opinions of the Yājñikas along with those of the Nairuktas. Pāṇini also refers to the *āmuāya* or tradition of the Yājñikas whose school was called *Yājñīkya* (IV.3.129). The Yājñika literature was of remote antiquity. Patañjali refers to difficult Yājñika texts, e.g. *sthūla-ṣṛīṣatīm anadvābīm*, which could not be rightly explained without the aid of grammar (I.1). He also mentions their treatises (*Yājñika-śāstra*, I.9). It appears from the *Aṣṭādhyāyī* that the *Yajña* doctrine both in its theory and practice held full sway in his time. He records minute details regarding the peculiarities of pronunciation of such formulas as the *Subrahmaṇyā* (I.2.37), *Nyūnkha* (I.2.34) and *Yājyā* verses (VIII.2.90). His references relate not merely to academic discussions, but to actual practices of the *Yajña* ritual (*yajña-karmaṇi*, I.2.34; VIII.2.88).

**YĀJNIKA LITERATURE**—Besides the *Brāhmaṇas* and the *Anubrahmaṇas* (IV.2.62), a vast body of specialised *yājñika* literature in the form of explanatory texts (*vyākhyāna*) of the *kratus* or Soma sacrifices and other *yajñas* had come into existence (IV.3.68); for example, the treatise giving an exposition of *Agnishṭoma* was called *Āgnishṭomika*; similarly there were texts called *Vājapeyika* and *Rājasūyika*. Particularly interesting is Pāṇini's reference to two-fold texts, one called *Puroḍāśika*, 'a book on *puroḍāśa*', containing detailed instructions about the manner of preparing the sacrificial rice-cake, and another called *Pauroḍāśika* (IV.3.70) which was a commentary of the *mantras* recited at preparing the *puroḍāśa* cake.<sup>1</sup> These *mantras*

<sup>1</sup> The *Puroḍāśa* verses in the *Yajurveda*, *Adhy.* I, deal with the following stages, *vrihīn nirvaṇati* (verse 9), *prokṣati* (12), *avahanti* (14), *parāpunāti* (16), *tanḍulān pināṣṭi* (20), *praṇītābhiḥ saṁyanti* (21), and *kapāleṣu śraṇayati* (22).

occur in the *Yajurveda*, Adh. I, and their commentary is found in the *Śatapatha*, Book I, which is thus a *Pauroḍāśika* text. These special handbooks arose to meet the practical needs of priests at the *Yajñas*.

**YAJAMĀNA (SACRIFICER)**—The sacrificer was called *Yajamāna* (III.2.128) for the period of the sacrifice, after which he was on that basis called *Yajvā* (III.2.103). There were also other terms derived from the performance of special sacrifices, as *Agnishṭoma-yājī* (III.2.85). A person devoted (*tach-chbīla*) to the constant performance of *yajñas* was called *yāyajūka* (III.2.166; *ijyā-śīlo yāyajūkaḥ*, *Amara*). [For the period of the sacrifice, the *yajamāna* observed the vow of restraining himself from wordy speech, hence called *vācham-yama* (*Vāchi yamo vrata*, III.2.40), and of sleeping on a raised platform on the *vedi*, hence called *stbāṇḍila* (IV.2.15) or *stbāṇḍila-śāyī* (III.2.80). The son or the student of the *yajamāna* when he came to be of age as competent to perform the sacrificial act was called *alanīkarmīṇa*, sitting by his side and assisting him (*Yadyasya putro vāntevasī vālanī-karmīṇaḥ syāt-sa dakṣhiṇata āsīno jubuyād iti*, *Baud Śr.*, XXII.20). *Karma* in this *sūtra* meant *Yajña* (cf. *Yajur.*, I.1; *Śatapatha*, I.1.21, *yajño vai karma*).

**ĀSPADA**—Social status (*pratishṭhā*) amongst the Brāhmaṇas was termed *āspada* (*Āspadam pratishṭhāyām*, VI.1.146), a term still current. The *āspadas* were derived from the various sacrificial performances, such as *Vājapeyī*, *Agnihotrī*, etc. An *Āhitāgni* (II.2.37) was one who had consecrated the Three *Śrauta* Fires. One who had ceremoniously lived in the place set apart for the *Āvasatha* Fire, was called *Āvasatbika* (IV.4.74), a word still seen in modern *Avasthī*. Inside the *yajña-bhūmi*, the special place built for the *yajamāna* is called *āvasatba* (also *agni-śaraṇa*, because of the *āvasatbha agni* consecrated there), and it was obligatory for him to stay in the *āvasatba* room for the duration of the sacrifice.

NAMES OF YAJÑAS—(*Yajñākbyā*, V.1.95). *Yajña* is derived from *yaj*, 'to worship' (III.3.90). *Ijyā* is another term used by Pāṇini (III.3.98). Amongst the four Vedas the *Yajurveda* deals with sacrifices which are of three kinds, *Ishti*, *Paśubandha* and *Soma*.<sup>1</sup> Pāṇini makes a general reference to all the *Kratu*s or *Soma* sacrifices mentioned in the *Adbvaryuveda* which was but another name of *Yajurveda* (*Adbvaryukratuṇ-anapumśakam*, II.4.4). A distinction is made between *Kratu*s and *Yajñas*, as both are mentioned separately in *sūtra* IV.3.68. *Yajña* was a general term which included the *Ishtis* like *Darśa* and *Paurṇamāsā*, *Yajñas* as *Pākayajña*, *Navayajña*, and such variations as *Pañchaudana*, *Saptaudana*, etc., as well as such well known *Kratu*s as *Agnishṭoma*, *Rājasūya*, and *Vājapeya*. But *Kratu* was used specially for the *Soma* sacrifices (II.4.4, *Kāśikā*, *kratu-śabdah soma-yajñesbu rūḍbah*). The *Soma* juice forms the oblation in the *Kratu*s. The *Kratu*s are further subdivided into those called *Abīna*<sup>2</sup> which are *Soma yāgas* lasting from one to eleven days, and *Sattra* which continued from twelve days to a hundred or a thousand years, the *Dvādaśāha* being regarded as both an *abīna* and a *sattra*. There are *Kratu*s governed by fixed time durations as *ekāha*, *daśāha*, etc. (subject to *kālādbhikāra*, V.1.95). *Agnishṭoma*, *Vājapeya*, *Rājasūya* were *kratu*s, but not *sattras*.<sup>3</sup> Names of the sessions of *Soma* sacrifices continuing for prescribed periods, were compounded with the names of *Yajamānas*, e.g. *Garga-trivṛttra*, i.e. a *Soma* session of the *Garga* family lasting for three days; similarly *Cbaraka-*

<sup>1</sup> In the *Ishti* as *Darśa* and *Paurṇamāsā*, the oblation is thrown with *Stāvā*, in the other two with *Vausht* (उपविष्ट होमाः स्वाहाकारप्रदानाः जहोत्यः ; निष्ठहोमा वषट्कारप्रदानाः वाग्यापुरोनुवाक्यावन्तो यजतयः ।)

<sup>2</sup> *Sūtra* V.4.145, and *vārt.* on IV.2.42 *abnah krah kratau, abnān samūbah kratuh abīnah*.

<sup>3</sup> *Agnishṭoma* and *Vājapeya*, each lasts for one day only with a preliminary course (*pūrvāṅga*) of four days, and the *Rājasūya* for about four days.

*trirātra*, *Kusurabindu-saptarātra*, etc. (*Dvigu kratan*, VI.2.97).

Of special sacrifices, Pāṇini mentions Agnishtoma (VIII.3.82), Jyotishtoma and Ayushtoma (VIII.3.83), the latter performed to obtain longevity, and making with the former a part of the Abhiplava ceremony. The Agnishtoma with its three pressings (*savanas*) and twelve *stotras* forms the norm (*prakṛiti*) and the Vājapeya and the Jyotishtoma are its modifications (*vikṛiti*). Rājasūya (III.1.114), a *vikṛiti* of the Agnishtoma, and Turāyaṇa (V.1.72) are also mentioned. Turāyaṇa was a modification of the Paurṇamāsa, and the *Yajamāna* performing it was called *Taurāyaṇika* (V.1.722). The *Śāṅkhāyana Br.* speaks of Turāyaṇa as a *yajña* performed for the attainment of heaven (*sa esha svargakāmasya yajñah*, IV.11, cf. *Āraṇyakaparva*, 13.21). According to the *Kāt. Sr.* (XXIV.7.1-8) this *sattra* commenced on the fifth day of Vaiśākha Śukla or Chaitra Śukla and lasted for one year (*samvatsaram yajate*). It was regarded as a *vikṛiti* of Dvādashāha *sattra*. *Kuṇḍapāyya* and *San̄chāyya* were the names of special Soma *kratus* (III.1.130), the former being a *vikṛiti* of Dvādashāha and a *sattra* lasting for one year, which was originally performed by the Kuṇḍapāyin Ṛishis (cf. *Rig.*, VIII.17.13, where a person is so named).

Reference is also made to *Dīrghasattra* or sacrifices extending over long periods of time, as a hundred or a thousand years (VII.3.1). No doubt the *Brāhmaṇa* texts describe such *yajñas*, e.g. Viśvasṛij, a *yajña* lasting for one thousand years (*sabastri-samā sattra*) described in the *Panchaviṃśa Brāhmaṇa*, but we have the testimony of Patañjali saying that such long sacrifices were not actually performed (*loke aprayuktāḥ*), and that only the Yājñikas described them in their works as part of inherited tradition (*kevalam ṛishi-sampradāyo dharmā iti kṛitvā Yājñikāḥ śāstreṇānuvidadbate*, *Bhāṣya*, 1.9, and *vār. Aprayukte dīrgha-sattravat*).

SOMA—Pressing of Soma was known as *sutyā* (III.3.99), and

one who pressed it as *Somasut* (III.2.90). After the ceremony the *yajamāna* who pressed the Soma was called *sutvā* (III.2.103), corresponding to the other title *yajvā*, 'one performing a sacrifice'.

The drinking of Soma depended on the fulfilment of certain spiritual and material conditions. According to Pāṇini he who had the requisite qualification to drink Soma was called *somya* (*Somam arbatī yaḥ*, IV.4.137). In the opinion of the Yājñika school as quoted by Patañjali, that person was entitled to drink Soma in whose family there was no social stigma in the ten preceding generations (*Evam hi Yājñikāḥ paṭbanti, Daśapurushanūkām yasya grihe sūdrā na vidyeraṇ sa Somam pibediti, Bhāṣya*, IV.1.93; II.248). Manu looks at the problem from an economic point of view: 'He who owns food to last for three years or more so as to maintain his dependants, is entitled to drink Soma (*sa somam pātum arbatī, Manu*, XI.7; also *Kāśikā*, VII.3.16). 'He should lay by the minimum prescribed store lest his labour be wasted' (XI.8). In the Soma ceremony the priests (*yājakas*) might press the Soma plant, but the credit of performing the Soma *yajña* belonged to the actual *yajamāna* who was in reality the beneficiary (*pradhāna kartā*) of that sacrifice. A special expression was current to designate him as *sunvan* (*Suño yajña-saṁyoge*, III.2.132). On the other hand in a *sattra*, i.e. a Soma *yāga* lasting for more than twelve days, the number of priests ranges from 17 to 25 (*saptadaśavarāḥ pañchaviṁśatiparamāḥ*), all of them enjoy the status of *yajamānas* (*sarve yajamānāḥ, sarve ritvijāḥ*), all are *ābitāgnis*, all sharing the fruits of the *yajña* equally, and since it is a corporate endeavour no one pays or expects any fee, and all of them perform the act of pressing the Soma juice. This arrangement is reflected in the phrase *sarve sunvantāḥ sarve yajamānāḥ sattriṇāḥ ucbyante* (*Kāśikā* on III.2.132, *Suño yajña-saṁyoge*).

**NAMES OF FIRES (AGNYĀKHYĀ, III.2.92)**—*Agni* as an agent carrying the offering of the sacrificer to the gods is

spoken of as *bavyavāhana* (III.2.66), and to the manes as *kavyavāhana* (III.2.65). In these two capacities it receives the offerings with the formula *Svābā* and *Svadbā*, respectively (II.3.16). The former was called *Chitya agni* (III.1.132) used for performing the Śrauta sacrifices. Of the Three Śrauta Fires (*śrautāgnayah*), mention is made of Gārhapatya (IV.4.90), and of the Dakṣiṇāgni under the special name of *Ānāyya* which was brought from the Household Fire and not retained (*Ānāyyo' nitye*, III.1.127; with *Bhāshya* II.89).

The word *ānāyya* is of uncommon interest. The Śraut-āgni is kindled with *araṇī* and perpetually maintained by an *ābitāgni* as Gārhapatya *agni* in the *vedi* of that name. The other two altars are Āhavanīya and Dakṣiṇāgni. The intending sacrificer takes the *agni* from his Gārhapatya altar to the other two. In that case both are called *ānāyya* temporarily, since after the oblations are over the fires in the Āhavanīya and Dakṣiṇāgni lose their sacred character. But besides the Gārhapatya Fire there were other recognised sources for feeding the Dakṣiṇāgni; for example, as a temporary measure the Dakṣiṇāgni could be borrowed from a frying-place (*bhrāshṭṛa*), a Vaiśya-kula, or from a new home where the proper *śrautāgni* had not yet been installed. In such a contingency the word *ānāyya* denoted only the Dakṣiṇāgni. (*ānāyyo Dakṣiṇāgnih; rūḍhiresbā, Kāśikā*).

The three stages in the kindling of the Fire are appropriately referred to as *parichāyya*, its showy assemblage and adornment in the beginning (*alaṅkaraṇa*; cf. *parichāyyaṁ chinvīta grāmakāmaḥ*, Śat. Br. V.4.11.3); *upachāyya*, its augmenting or blazing forth (*saṁvardhana*) in the middle; and *saṁūhya* (III.1.132), its final form consisting of ashes and rubbish swept or heaped together, for which the graphic phrase *saṁūhyapurīṣa* was current (Ś. Br. VI.7.2.8; Kāt. Sr. XVI.5.9.10).

Special kinds of *vedis* which were made twice or thrice the usual size, were known as *dvistāvā*, *tristāvā* (V.4.84). The normal size of the platform in the Darśa-Paurṇamāsa was

27 ft.  $\times$  13½ ft. (36 *vitastis* long and 18 broad). On this platform different fire-altars were built, each being called a *sthaṇḍila* (IV.2.15; same as *kuṇḍa* in *smārta yajñas*). These altars were made of different shapes referred to in the *sūtra Karman-yagnyākhyāyām* (III.2.92), e.g. *śyena-chit*, *kaṁka-chit* (*Kāśikā*), *droṇa-chit* (square), *ratha-chakra-chit* (round), *praūga-chit* (triangular), *ubhayataḥ praūga-chit* (double triangle; *Kāt. Śrauta*, XVI.5.9). These were special *agnis*, the arranging of which was called *agni-chityā* (III.1.132). The altars were piled up (*chityā*, III.1.132) with bricks, which were given special names after the particular *mantras* used for building them (*Tadvānāsām upadhāno mantra ilīṣṭakāsu luk cha matoḥ*, IV.4.125). Important words occurring in the *mantras* used for laying the bricks were selected as their names, e.g. *Varchasyā*, *Tejasyā*, *Payasyā* and *Retasyā*, ancient words for particular bricks. Pāṇini mentions in particular the bricks called *Āśvini* (IV.4.126). One who consecrated these sacrificial Fires was known as *agni-chit* (III.2.91).

**OTHER ACCESSORIES**—*Yajña* required a number of accessory articles of which some are mentioned in the *Aṣṭādhyāyī*. That place in the *yajña* was called *saṁstāva* (III.3.31) where the Chhandoga singers sang the hymns in the Soma *Kratu*s, a sort of *stuti-bhūmi* (*Amara*). Another portion was the *avaskara* for throwing refuse (IV.3.28), also called *ut-kara*. The *kuśa* grass, necessary for sacrificial ceremonies, is referred to as *pavitra* which had become a *saṁjñā* word (*Pu-vaḥ saṁjñāyām*, III.2.185; cf. *Yaju.* I. 2, 3, 12). The Soma plant was required for Soma sacrifices. Patañjali mentions *pūlika* grass as a substitute for Soma, but observes that Soma had not become obsolete (*na cha tatra somo bhūtapūrvō bhavati*, I.1.56, I.137).

The sacrificial utensils (*yajña-pātra*, I.3.64), specially the cups for drinking Soma, were arranged in pairs which is given as one of the meanings of the word *dvandva* (*yajña-pātra-prayoga*, VIII.1.15). Two Soma-cups (*grahas*) are named,

*kṣbullaka-vaiśvadeva* (cf. *Kāt. Śr. IX.4.1*) and *mahā-vaiśvadeva* (*Kṣbullakaścha Vaiśhvadeve*, VI.2.39, cf. *Kāt. Śr. X.6.2.* for *mahāvaiśvadeva*). Oblation is mentioned as *bavi*, a special form of which was known as *sāmnāyya* (III.1.129), which is said to consist of 'curd from the cow's milking of the previous evening (*sāyamindoba*) taken with fresh milk of the following morning (*prātardoba*) and offered together to Indra in the New Moon sacrifice (*sam+nī*, to mix).<sup>1</sup>

**PRIESTS.**—The generic term *ṛitvij* (III.2.59) was applied to all classes of priests employed at a sacrifice. The priests must have been Brāhmaṇas as in the Vedic period (*Vedic Index*, I.112). This is suggested by the epithet *ārtvijīna* (V.1.71) denoting a person qualified in priestly duties (*ṛitvik-karmārhati*, *Kātyāyana*) which according to Patañjali was applied to a member of a Brāhmaṇa family. The *Shāḍviniśa Br.* explains *artvijīna* as one who is able to expound those Vedic texts which are used in *yājñas* (*esha ārtvijīno ya etam vedam annubrūte*, I.3.16). According to Patañjali an *ārtvijīna* should be able to utter the Vedic speech according to its proper *pada*, *svara* and *akṣara* (*Bhāṣya*, I.3). A priest with reference to his duties on behalf of the *yajamāna* was called *yājaka*; *sūtra* II.2.9. implies that the word *yājaka* was compounded with another denoting the sacrificer, e.g. *Brāhmaṇa-yājaka*, *Kṣatriya-yājaka*.

Selection of priests must have depended on their special knowledge of the ritual for which they were invited. Pāṇini refers to the emergence of experts who made a special study of the complicated ritual of Soma-kratus like Agnishtoma and Vājapeya, and were named *Āgnishṭomika*, *Vājapeyika* after

<sup>1</sup>There are three oblations in the Darśa sacrifice, the first is the sacrificial cake for Agni (*āgneya purodāśa*), the second curds for Indra (*aindraṁ dadbi*), and the third milk for Indra (*aindraṁ payah*). The last two make up the *sāmnāyya yāga* in which the deity is single but the oblations to him being different are added and offered together. Firstly curd is taken in the *jubū* and then milk is poured on it.

those rituals (*Kratukṭhādisūtrāntāṭ-ṭhak*, IV.2.60). For such important sacrifices the invitations would naturally be issued to them. Along with their pupils these masters cultivated advanced studies of those specialized *Kratu* texts (*kratu visbeṣa-vāchibhyash-ṭhak pratyayo bhavati tadadbhite tad-vedetyasmin vishaye*, *Kāśikā*).

In the ritual as given in the *Brāhmaṇas*, the number of priests is sixteen, classed in four groups (*Vedic Index*, I.113).<sup>1</sup> Of those connected with the *Ṛigveda*, Pāṇini mentions Hotā, Praśāstā (VI.4.11), and Grāvastut (III.2.177), the Praśāstā known as Maitrāvaruṇa also. The Grāvastut praised the *grāvā* or stones for pressing Soma. The Hotā recited the *yājyā* and *anuvākyā* verses.

Of the *Sāmveda* priests, Pāṇini refers to Udgatā in *sūtra* V.1.129, and to his assistant Pratihartā in its *gaṇa*.

The duties of the various priests were indicated by the addition of suffixes to their names, those of the Udgatā being called *audgātra* (V.1.129) and of the Adhvaryu, *ādhvaryava* (IV.3.123). Adhvaryu's assistant Neshtā (VI.4.11) belonged to the Soma ritual whose duty it was to lead forward the wife of the sacrificer. The importance of the Adhvaryu increased with the growth of the complicated ritual in which differences of opinion also arose in course of time. It appears that the followers of each special recension of the *Yajurveda* adopted the ritualistic peculiarities of their own School. The insistence on the two-fold variations of ritual according to locality and *śākbā* (*āmnāya*) resulted in the growth of special Adhvaryus who were designated by particular names. This is reflected in *sūtra* VI.2.10, *Adhvaryu-kashāyayor-jātau*, e.g. Prāchyādhvaryu, priests belonging to east India who were affiliated to the *Śukla Yajurveda*. The followers of the special schools

<sup>1</sup> 1. होता, मंत्रावरुण, अच्छावाक्, घावस्तुत ।

2. उद्गाता, प्रस्तोता, प्रतिहर्ता, मुब्रह्मण्य ।

3. अध्वर्यु, प्रतिष्ठाता, मेष्टा, उन्नता ।

4. ब्रह्मा, ब्राह्मणाच्छेसी, आग्नीध्र, पोता ।

of the *Kṛishṇa Yajurveda* were distinguished by the names of their *śākbās*, as *Kaṭhādhvaryu*, *Kalāpādhvaryu*, etc.

Of *Ātharvaveda* priests, Pāṇini mentions *Brahmā* (V.1.136), *Agnīdh* (VIII.2.92) and *Potā* (VI.4.11). *Brahmā* must have emerged as the general supervisor of the ritual, as is indicated by his duties (*karma*) designated by the special term *Brahmatva* (V.2.136). The epithet *Mahā-Brahmā* 'Chief of the *Brāhmaṇas* (V.4.105, in which *Brahman*=*Brāhmaṇa*) seems to have been derived from the privileged position of the Brahman priest, who as early as the *Ṛigveda* (I.162.5) was called *suviśra*, a sage or priest of profound knowledge acting as superintendent of the whole ceremony.

The sons of *ṛitvijs* have been specially noticed as *Ṛitvik-putra* and *Hotuḥ-putra* (VI.2.133). These names were derived from sons who followed the calling of their fathers.

**RECITATION OF MANTRAS**—*Yajña* implies the invoking of deities with recitation of *mantras* (*mantrakaraṇa* I.3.25). Recitation in concert (*sabochchāraṇa*) marked by clear tone and accent was called *samuchchāraṇa* (I.3.48). Invocation of deities was *nibava* and *abbihava* (III.3.72).

**YĀJYĀ VERSES**—Pāṇini refers to the technical details of repeating the *Yājyā mantras* in a sacrifice (*Yajña-karmaṇi*, VIII.2.88-92). The *Yājyās* were all selected hymns from the *Ṛigveda* and enumerated in the *Hautra-kāṇḍa* of the *Āśvalayāna* and other *Śrautasūtras*. The *Hotā* priest recites the *Yājyā* and *Puronuvākya* verses as often as the *Adhvaryu* commences a set of oblations. The latter priest does not recite any *mantra*; he only gives directions (*praisha*) to the *Hotā* whose privilege it is to recite the appropriate *mantra* ending with the formula *Vausbat*, on hearing which the *Adhvaryu* throws the oblation into the fire.

This complicated ceremony is arranged as follows:

(1) *Puronuvākya* and *Anubrūhi*. It is the first *praisha* or direction that the *Adhvaryu* gives to the *Hotā* to recite the preliminary laudatory verses called *Puronuvākya* in praise

of the deity who is to be invoked. | According to *sūtra* VIII.2.91 the formula must be uttered with a *pluta* accent, as अग्नयेऽनुब्रूहि ।

(2) In response to this *praisha* the Hotā recites the *Puronuvākya* verse, the last letter of which is followed by a *pranava* pronounced with *pluta* accent (VIII.2.89), e.g. अपारितामि जिन्वतो ऽम् । According to the *Śatapatha*, *Puronuvākya* is used for invoking the deity and the *Yājyā* for giving the oblation (*bvayati vā anuvākyaṃ, prayachchhati yājyayā*, I.7.2.17). After the Hotā has repeated the *puronuvākya* verse, the actual *yājyā* is recited (*atha yadanuvākyaṃ anūchya yājyayā yajati*, *Śatapatha*, XI.4.1.12). Both form one pair. In some cases, as pointed out by the *Śatapatha*, the *puronuvākya* was dropped (*atha yad-apunarvākyaḥ bhavanti*, XI.4.1.12), and therefore its *praisha* (*anubrūhi*) was not counted in the set of five directive formulas comprising 17 letters.<sup>1</sup>

(3) *Āśravaṇa*. The Adhvaryu, Agnīdh and Hotā priests having taken their seats round the Vēdī, the Adhvaryu calls upon the Agnīdh (cf. Agnimindha of R̥igveda I.162.5), an assistant of Brahmā, whose duty it was to guard the sacrifice against the Asuras. He sat near the *utkara* and held a wooden sword (*sp̥hya*) in hand. The order to him (*agnīt-preshaṇa*, also called *āśravaṇa*) consisted of the formula जा३ आ३वय with its variant in some *śākhās* as ओ३ आ३ वय (*Agnīt-preshaṇe parasya cha*, VIII.2.92). This *praisha* signified 'Please notify the sacrifice to the gods, as all is well'.

(4) *Pratyāśravaṇa*. To this the Agnīdh responded by a *pratyāśravaṇa* formula, अस्तु श्री३षद् pronounced with *pluta* accent (*sūtra* VIII.2.91), the meaning being 'Let the gods be notified; everything is O.K.' (cf. *Āśv. Śr.* I.4, *astu śrausad ity-aukāraṃ plāvayan*).

<sup>1</sup> The following verse interpolated in the Bhīṣmavaraṇa of the Śāntiparva refers to the *Yājyā* verses:

चतुर्भिश्च चतुर्भिश्च द्वाभ्यांपंचभिरेव च ।

हूयते च पुनर्द्वाभ्यां तस्मै होमात्मने नमः ॥

(Verse added after 47.27 in the Critical edition)

(5) *Yājyā-praisha*. Thus getting a line-clear from the Agnīdh, the Adhvaryu turns to the Hotā with the directive 'Yaja', on hearing which the Hotā begins to recite the *Yājyā*. There is no *pluta* in the *Yaja* formula, which is uttered in monotone (*ekasruti*).

(6) *Āgūrta* formula (also called *abbigūrta*, cf. *Ṛig*. I.162. 6; Haug, *Aitareya Br.*, Intr., XVIII) consists of the words ये ३ यजामहे 'We who are assembled here all give our approving help to promote the *yajña*' (*Ye yajñakarmaṇi*, VIII.2.88) which always precedes the *Yājyā* verse.

(7) *Ishta* or *Yājyā*. As said above select verses from the *Rigveda* for invoking particular deities are called *Yājyā*, which constitute the actual *mantras* for throwing the oblation. Their last syllable is *pluta* (*Yājyāntah*, VIII.2.90). The *Yājyā* is preceded by *Ye yajāmāhe* and followed by the formula *Vausbat*, e.g. ॐ ये यजामहे समिवः समिवोऽग्ने आज्यस्य व्यजुः ३ वो ३ षट् ।

(8) *Vasbatkāra*—As seen above, it was added after each *Yājyā* verse and pronounced by the Hotā as *pluta* and in a very loud voice (*Uchchaistarām vā vasbatkārah*, I.2.35; cf. *Ait. Br.* III.1.7, *śanaistarām asya riccham uktvouchchaistarām vasbat kuryāt*; i.e. the *yājyā* verse to be repeated with a very low and the *vasbatkāra* with a very loud voice). As soon as *Vausbat* is uttered the Adhvaryu throws the oblation into the fire. *Vasbat* (I.2.35; II.3.16) and *Vausbat* (VIII.2.91) were variants of one and the same word, just as आश्वाव्य and ओश्वाव्य were variants in the different *Śākhās*.

(9) *Vitam* and (10) *Anuvasbatkāra* (I.2.35; VIII.2.91). In the Soma *yāga* after the *yājyā* verse and *vasbatkāra*, another formula is repeated, e.g. सोमस्याग्ने वोहो ३ वो ३ षट् 'O Agni, taste the Soma!'. According to the *Aitareya* (III. 1.5) in this way the deities are satisfied by a repeated request

आश्वावेति चतुरक्षरम्, अस्तु श्रौषडिति चतुरक्षरम्, यजेति द्व्यक्षरम्, ये यजामहे इति पञ्चाक्षरम्, द्व्यक्षरो वषट्कारः । एष वै सप्तदश प्रजापतिः यज्ञमन्वायतः

(*Tait. Br.*, Kāṇḍa II).

to them to drink the remaining Soma juice. The *Vibi* formula is called *vītam* and the *vasbat* added to it *anuvashatkāra* (Haug, *Ait. Br.*, p. XVIII).

**ĀVĀHANA**—In the Darśa-Paurṇamāsa Ishṭis, there are five oblations (*Pañcha-prayājas*)<sup>1</sup> which constitute the first part (*pūrvāṅga*) of the sacrifice (*Prayājānuyājan Yajñāṅge*, VII.3.62) and three secondary oblations called *anuyājas*.<sup>2</sup> In a *Paśu-yāga* their number is raised to eleven. Of the five *prayājas*,<sup>3</sup> the last one is *svabhākāra* oblation, when the deity is invoked by the formula *āvaha*, for which Pāṇini prescribes *pluta* accent, e.g. अग्निमा३ वह (VIII.2.91).

**MONOTONE (EKAŚRUTI)**—The strict rule of reciting Vedic *mantras* with correct three-fold accent (*traiśvarya*) was gradually being relaxed. Pāṇini, like the *Kātyāyana Śrautasūtra* (I.8.16-19), was making a note of the tendencies current in his time when he says that the *mantras* were recited with monotone (*ekaśruti*; *ekatāra* in *Kāt. Sr.*, I.8.18) in the *yajñas*, excepting the few cases of *Japa*,<sup>4</sup> Sāman songs and the special *Nyūṅkba* accents<sup>1</sup> (*Yajñakarmānyujapa-nyūṅkba-*

<sup>1</sup> Five *prayājas*, viz. समिधो यजति, तनूनपातं यजति, बहिर्वेजति, इहो यजति स्वाहाकारं यजति (*Satapatha*, I.5.3.1-13, comparing them with 5 seasons). On account of the five oblations or *ājyāntis*, accompanied by their appropriate invocations the *Yajña* is referred to in the Śāntiparva as *daśārdhabavirākṛitim*, 'whose form is made whole by five *bavis*' (47.27).

<sup>2</sup> *Trayo'nyājāi-chaivāro patnī-samyājāb*, *Śat. Br.* XI.4.1.11. The *Kāśikā* seems to be mistaken in stating that there were 5 *anuyājas* and 3 *patnī-samyājājas*. In the *Paśubandha* sacrifices the number of *prayājas* and *anuyājās* is eleven each. The 4 *patnī-samyājājas* were offered by the *Yajamāna*'s wife after the *anuyājas* in the Darśa-Paurṇamāsa Ishṭi. The 8 *patnī-samyājājas* are, however, prescribed, as an option, by the *Baudh. ŚSr.*, 24.29.

<sup>3</sup> The *Japa mantra* is *Yajurveda*, II.10, *Mayīdamindra indriyam*, etc., uttered by the *Yajamāna* with three-fold accents (*Kāt. Śr.* III.4.18).

<sup>4</sup> *Nyūṅkba* is a recitation by the Hotā at the morning libation of a Soma *yāga*, comprised of 16 *okāras*, e.g.

आपो ३ ओ ओ ओ ओ ओ ओ ३ ओ ओ ओ ओ ओ

ओ ३ ओ ओ ओ रेवती : क्षयथा हि वस्वः कर्तुं च भद्रं विद्मामर्न च ।

रायो ३ ओ ओ ओ ओ ओ ओ ओ ३ ओ ओ ओ ओ ओ ओ ३

*sāmasu*, I.2.34). Jaimini made a vigorous attempt to restore the old practice of reciting Vedic *mantras* with their threefold accent whether for study or for ritual purposes (*Mīmāṃsā*, XII.3.20-24; D. V. Garge, Jaimini, Śabara and the Science of Grammar, A.B.O.R.I., XXX, 254-5). But it seems to have been a losing battle against heavy odds. The *Tait. Pr.* also records the practice of monotone (*sarvam ekamayam*, *T. Pr.* XV.9).

**SUBRAHMANYĀ**—The *Subrahmanyā* formula also had its definite rules of accentuation (I.2.37-38). It was a loud invocation addressed to Indra in the Jyotiṣṭoma and other Soma sacrifices (cf. *Kullūka* on *Manu*, IX.126; *Kāt. Śr.* IX.1.12; Haug, *Ait. Br.*, p. 260)<sup>1</sup>.

*Upayaj* was the special name (III.2.73) of the eleven short formulas (*samudram gachchbha svābhā*, etc.) given in the *Yajurveda* VI.21. Reference is made to the *sāmidhenīs*, the eleven verses of the *Rigveda*, III.27.1-11, used for enkindling the fire. The first and the last are each repeated thrice and thus we make fifteen *sāmidhenīs* for the Darśa-Paurṇamāsa *Ishtis*. Of these *Rig.* III.27.4 is called *sāmidhyamānavatī* and III.27.11 *samidhbvatī* by the words *samidhyamānaḥ* and

ओ ओ ओ स्वः स्वपत्यस्य पत्नी । सरस्वती तद्गुणते वयो धो इमा इ पो इ । ऋ० १०  
३० । ई२

The first word in each half-*rich* is written with 16 *nyūṅkha okāras* added after its second vowel, comprising three *plutas* and thirteen *ardhokāras*.

<sup>1</sup> The *Shāḍviniśa Brāhmaṇa* 1.1.8-28 explains in detail the several parts of the *Subrahmanyā* formula (*nigada*) as follows:

सुब्रह्मण्यो इम् (repeated thrice), इन्द्रागच्छ, अहल्यायै वार, कौशिकब्रुवाण, गौतमब्रुवाण इत्यहे सुत्पामागच्छ मघवन् ।

Then the remaining formula (*nigada-iesha*) is repeated

देवा ब्रह्माण आगच्छतागच्छतागच्छतेति

(cf. Pāṇini, I.2.38).

Here *brahmāṇaḥ* is explained as *manushyadevāḥ* referring to *Brāhmaṇas* who are full of reverence and learning (*śūrinvāṃso'nūchānāḥ*, *Śad. Br.* 1.1.28).

*samindhate* used in them. Sometimes extra verses are brought in from outside, e.g. *ekaviṃśatim anubrūyāt pratishṭhākāmasya*, i.e. the person desirous of stability should use 21 *sāmidhenis*. In such cases the extra verses should be accommodated between *samidyamānavatī* and *samiddhavatī*, and all the verses between them are therefore called *dhāyyās* (*sūtra*, III.1.129).

The mention of these minute details shows that Pāṇini was in touch with a living tradition of the sacrificial ritual or *yajñas*. The title *pūtakratu* seems to have assumed a new significance, denoting the man whose mind was purified by the potions of Soma drunk at the *Kratu*. His wife, Patnī, who was his partner in the sacrifices (*yajña-samīyoga*, IV.1.33) shared in this distinction and was thence called *pūtakratāyī* (IV.1.36).

The institution of *yajñas* had a vital economic interest for the officiating priests in that they received the *dakṣhiṇā* or sacrificial fee about the distribution of which instructions are contained in the law-books. We are told that the particular sacrificial guerdon was called after the name of the sacrifice for which it was paid (*Tasya cha dakṣhiṇā yajñākhye-bhyaḥ*, V.1.95). Examples are cited of the particular fees paid at the Rājasūya, Vājapeya and Agnishṭoma sacrifices, called *āgnishṭomikī*, etc., of which minimum units must have come to be fixed. The word *dakṣhiṇya* was applied to one whose merits entitled him to receive the proper *dakṣhiṇā* (V.1.69).

The social relationships arising out of sacrifices as between priests and *yajamāna* constituted one of the happiest features of domestic life. Patañjali refers to these as *srauva sambandha* (I.119) distinguished from those of blood (*yauna*), economic life (*ārtha*), and academic relationships (*maukha*). He also refers to certain priests marked by red turbans on their heads (*lobitosṣṇīsbā ṛitvijah*, I.1.27 I.826) officiating for the Vratya (*Kāt. Śr.*, XXII.3.15).

## CH. VI, SECTION 3. ASCETICS

Pāṇini refers to religious mendicants as *bbikṣus* (III.2.168) from their obligatory duty of begging; whence they were also known as *bbikṣhāchāra* (III.2.17). The ordinary beggar was known as *bbikṣhāka* (III.2.155). Pāṇini mentions both Brāhmanical ascetics and heretical sects. As to the former he mentions those following the *Bbikṣu-sūtras* promulgated by Pārāśarya (IV.3.110), and Karmanda (IV.3.111); of the latter reference is made to Maskarī mendicants (*maskarī parivrājaka*, VI.1.154) who were most probably the followers of Makkhali Gośāla. The term *tāpasa* (V.2.103) or *tapasvin* (V.2.102) was applied to an ascetic practising penance. This was denoted by the special root *tapasyati* (III.1.15). The several epithets like *śamī*, *damī*, *yogī*, *vivekī* and *tyāgī* (III.2.142) were indicative of the stages of spiritual culture. There are also two other terms *dānta* and *śānta* (VII.2.27), signifying control of the senses and the mind. The use of the term *yogī* points to Yoga as a system of spiritual discipline then known.

A mendicant subsisted on what he obtained by begging. The word *sarvānnīna* was applied to a person who accepted all kinds of food in his begging rounds (V.2.9). The *Kāśikā* states that a monk indiscriminately accepting alms from persons was so called. Some ascetics lived by gleaning corn (*Uñchbatī*, IV.4.32). The *uñchbavṛitti* ascetics held stock of corn to last for some time. In *sūtra* VI.2.9. Pāṇini explains the word *śārada* as 'new'. Literally *śārada* should denote that which belongs to the Śarad season. The transition of meaning can be understood from Manu stating that a *muni* should gather his stock of corn twice a year, which was called *vāṣanta* and *śārada* respectively after the names of the two crops harvested annually

(*Manu*, VI.11). It is further laid down that he should renew his clothing and corn in the month of Āśvayuja, *i.e.* the beginning of autumn (*Manu*, VI.15). These fresh stocks obtained in Śarad were responsible for the secondary meaning of *śārada* as 'new'. The word *naikaṭika* (*nikāṭe vasati*, IV.4.73) is taken by the commentators to refer to a monk who had become a Vānaprastha, and in obedience to the rules of his order took his abode near the village outside it. Similarly *kaukkuṭika* is taken by the *Kāśikā* as a mendicant who walks with his gaze fixed to the ground to avoid harming life (IV.4.46).

There were also sham ascetics, called *dāṇḍājīnika* (V.2.76) *i.e.* one who passes for an ascetic by the outward signs of staff and deer-skin only.

**ĀYAHŚŪLA**—Pāṇini refers to a class of false ascetics known as *āyahśūlika*, 'who flourished by the method of *ayahśūla* or iron spikes' (V.2.76). Patañjali's comment is of some historical interest. 'If *ayahśūla* literally means an iron spike, the word so formed will apply to a Śiva-Bhāgavata which is not the intention of Pāṇini's *sūtra*. Therefore the term *ayahśūla* indicates the practice of violent methods (*rabbasa*) to recruit followers as distinguished from the softer method of persuasion and instruction' (*mṛidu upāya*, *Bhāṣya*, V.2.76). Patañjali here gives the information that there was a sect of the Śiva-Bhāgavatas who worshipped Śiva as Bhagavān and whose outward sign was an iron trident (*Ind. Ant.*, 1912, p. 272). As opposed to them the *āyahśūlika* Śaivas pierced their tongue or arms or other parts of the body with iron prongs and extracted forced sympathy.

**MASKARIN**—Pāṇini mentions *Maskarin* as a *parivrājaka* (VI.1.154, *Maskara-maskariṇau veṇu-parivrājakayoḥ*). Here *Maskarin* is taken to be the name of Maskarī Gośāla, the founder of the Ājīvika order and a contemporary of the Buddha. Patañjali enlightens us on this point as follows: 'A *Maskarin parivrājaka* is not so-called because there is a *maskara* (bamboo-staff) in his hand. What else is then the explanation? Do not

perform actions, but seek peace as the highest end'. This is their teaching, who are therefore called Maskarins' (*Mā kṛita karmāṇi mā kṛita karmāṇi, śāntirvaḥ śreyasītyābāto Maskarī parivrājakah, Bhāṣya, III.96*). No doubt Patañjali's reference is to the philosophy of inaction taught by the great teacher Makkhali Gośāla whose identity with Maskarī thus become a certainty. He was a Determinist who ascribed every cause to fate or destiny (*niyati*). He held that the attainment of any given condition or character does not depend either on one's own acts, or on the acts of another, or on human effort. There is no such thing as power, energy, human strength or vigour. All beings are bent this way and that by their fate. In his system chance (*yadyiccbhā*) has no place, but everything is ordered by an immutable Fate (*Niyati*) (*Dict. of Pāli Proper Names, II.398*). According to Buddhist books Makkhali was considered by the Buddha as the most dangerous of the heretical teachers.

The identification of Maskarī with the founder of the Ājīvika sect, if accepted as is highly probable, is of the utmost importance for the relative chronology of Pāṇini himself. Another evidence in the *Aśṭādhyāyī* supports Pāṇini's knowledge of the philosophical school of Makkhali. He refers to three kinds of philosophic beliefs (*matī*), viz. *Āstika*, *Nāstika* and *Daishṭika* (IV.4.60). *Mati* here corresponds to *diṭṭhi* of the Buddhists signifying a philosophic doctrine. The *Āstika* philosophers were those whom the Buddhist books call *Issarakāraṇavādī* or the Theists, who held that everything in the universe traces itself to Īśvara as the supreme cause (*ayaṃ loko issaranimmito*, Mehta, *Pre-Buddhist India*, p. 333). The *Nāstika* philosophers correspond to those who are called *Nattikadiṭṭhi* in Buddhist works (C. D. Chatterji, *A Hist. Character in the Reign of Aśoka, Bhandarkar Com. Vol.*, p. 330). These included the Annihilationist school of another great teacher Ajita Keśakambalī (*ito paralokagatanāma n'atthi, ayaṃ loko ucchijjati, Jāt.*, V.239). This was a materialistic

doctrine famous as the Lokāyata school. The third category of thinkers who are mentioned as *Daishṭika* by Pāṇini certainly refer to the followers of the determinist philosophy preached by Makkhali Gośāla who repudiated the efficacy of *karma* as a means for improving the lot of human beings.

In the canonical scriptures of the Jains, Makkhali Gośāla has been mentioned as Gosāla Maṅkhaliputta (*Uvāsaga Dasāo*, Hoernle, p. 97), while in the Sanskrit Buddhist texts he figures under the name of Maskarī Gośālīputra (*Divyāvadāna*, p. 143) (Chatterji, op. cit. p. 331, who concludes that Makkhali was undoubtedly a Maskarī ascetic). The views of this teacher are echoed in the Brahmanical literary tradition under the name of Maṅki who discarded *pauruṣa* in favour of a belief in destiny alone (*Śuddham bi daivamevedam baṭhe naivāsti pauruṣam*) and preached *nirveda* (cf. the doctrine of *Śānti* attributed to Maskari in the *Bhūṣhya*) as the best principle (*Śāntiparvan*, Ch. 177, vv. 1-14).

As Mr. C. D. Chatterji has shown there were various traditions about the accurate form of Gośāla's name; Maṅkhali was the form according to the Jaina Prakrit and a tradition in the *Bhagavatī Sūtra* makes him the son of a mendicant or beggar (*Maṅkham*, *Bhag. Sūtra*, XV.1). We have no doubt that Maṅki of the *Mahābhārata* represents the name Maṅkhali in an abbreviated form. Pāṇini explains *Gośāla* as one 'born in a cowshed' (*sūtra*, IV.3.35), which accords with the traditional explanation of this part of Makkhali's name.

ŚRAMAṆA—Pāṇini refers to *Śramaṇas* and unmarried female ascetics (*kumārī śramaṇā*, II.1.70). This *sūtra* is connected with another in the *Ashṭādhyāyī*, viz., *Kumāraścha* (VI.2.26) which regulates the accent of the word *kumāra* in such compound words as *kumāra-śramaṇā* and others of this class. This *gaṇa* also mentions *kumāra-pravrajitā*, and *kumāra-tāpasī*, a girl embracing the life of a wanderer, and a girl taking to penance. In the oldest *Śrāntasūtra* literature the meaning of *śramaṇa* is an ascetic in general; for example, in Baudhāyana

a *muni* is described as *śramaṇa* and asked to offer *puroḍāśa* to Agni standing in knee-deep waters of the Sarasvatī (Baud. ŚS., XVI.30, ASB, edit., p. 276).

Patañjali, however, states that the *Śramaṇas* and the *Brāhmaṇas* belonged to different religious groups whose opposition was of a permanent nature (*yesbāṃ cha virodhaḥ śāśvatikaḥ*, Pāṇini, II.4.9, *ityasyāvakāśaḥ*, *Śramaṇa-Brāhmaṇam*, *Bhāṣya*, I.476 on *sūtra* II.4.12). It shows that *Śramaṇa* in grammatical literature referred to non-Brahmanical ascetics.

Early Buddhist literature distinguishes between *Brāhmaṇas* and *Śramaṇas* as distinct ascetic orders. King Alābu addresses the Bodhisattva as *Samana* (*Jāt.*, III.40). The *Udāna* says that there were very many and various sectaries of *Śramaṇas* and *Brāhmaṇas*, all *Parivrājakas*, followers of different *Diṭṭhis*, i.e. *Darśanas* or Systems, and organisations (*sambabulā nānā-tiṭṭhiyā Samana-Brāhmaṇā paribbājaka nānādiṭṭhikā nānādiṭṭhi-nissayanissitā*, P. T. S. edition, p. 66-67). The *Anguttara* (IV.35) mentions two classes of ascetics whom it calls *Parivrājakas*, viz. (1) *Brāhmaṇa* and (2) *Annatitthiya*, i.e. other non-Brahmanical ascetics. The Greek writers of Alexander's time also noticed these two classes of ascetics, the *Brāhmaṇas* and *Śramaṇas* (*Strabo*, XV.1.59, M'Crindle, 1901, p. 65, footnote). In the inscriptions of Asoka the *Brāhmaṇa* and the *Śramaṇa* ascetics are separately mentioned as worthy of equal honour.

The reference to monk's garment (*chīvara*), and the verb *saṃchīvarayate*, 'he dons the monk's robe' (III.1.20) again smack of the institution of Buddhist monks, as *chīvara* signified only monk's dress (cf. *ticchīvara*, *Jāt.*, III.471; *paṇisukūla chīvara*, *Jāt.*, IV.114).

The word *Arhat* was applied to a person worthy of reverence (*Arhaḥ praiśaṃsāyām*, III.2.133). The state of being an *Arhat* was *ārbantya* (*arbato num cha*, *Gaṇa-sūtra*, V.1.24). Pāṇini refers to a class of ascetics called *yāyāvara* (III.2.176),

According to the *Baudhāyana Dharmasūtra*, 'To be a *yāyāvara* means that one proceeds by the most excellent livelihood' (*vṛittyā varayā yāti*, III.1.4), and 'the word *śālīna* is used for them because they dwell in houses (*śālā*, III.1.3). Most probably it referred to those house-holders who like Janaka lived in their home although following the ascetic discipline. The *Śrautasūtra* of Baudhāyana adds that, even when itinerant, the *Yāyāvara* mendicants halted on the way and performed fire oblations (XXIV.31, तत्रोदाहरन्ति यायावरा ह वै नामर्षय आसँस्तेऽबन्धुः श्राम्दँस्ते समस्तमजुहवुः ).

## CH. VI, SECTION 4. RELIGIOUS BELIEFS & PRACTICES

The other aspects of religious life included domestic rites, vows like *Chāndrāyana* (V.1.72), and *Japa* or repetition of *mantras* (I.2.34). One who took the vow of restraint of speech was called *vāchanīyama* (III.2.40), and similarly the vow to sleep on hard ground *sthāṇḍila* (IV.2.15). These epithets applied to one observing *pārāyāna*, a Brahmachāri or a *bbikṣhu* (IV.2.15). One who silently performed *Japa* as a habit (*taṭ śīla*) was called *jañjapūka* (III.2.166). Such muttering would sometimes be for mere show or a sham practice (*bhāvagarbhāyām*, *jañjapyate*, III.1.24). Reference is also made to the offering of *bali*, probably to different deities (II.1.36), e.g. *Mahārāja-bali* offered to the Mahārāja class of deities like Kubera. Special food stuffs selected for preparing *bali* were called *bāleya* (V.1.13).

**ŚRĀDDHA**—Reference has already been made to the fire *kavyavāhana* (III.2.65) to carry oblations to the manes. The *Pitṛis* are mentioned as *devatās*, deities to whom oblations called *pitṛyam* were offered (IV.2.31). The *śrāddha* ceremony held in the Śarat season (the *Pitṛipakṣa* in Āśvina) has been mentioned as *śaradika śrāddha* (IV.3.12). One who dined at a *śrāddha* was marked out as *śrāddhī*, *śrāddhika* (*śrāddhamanena bbuktam*, V.2.85), but Kātyāyana points out that the epithet was applied to that person only for that particular day (II.389). The necessity for this term seems to have arisen from the fact that the *śrāddha-bhojī* was required to perform some purificatory rites on that day. A *śrāddhika* Brahmachāri would be marked out from other students and would get leave from his class for performing *japa*, etc.

Religious tonsure was in vogue (*Madrāt parivāṣaṇe*, V.4.67), the tonsurer being called *madrāṁkāra* or *madrakāra* (III.2.44).

**BELIEFS**—Belief in divination from bodily signs is mentioned in *sūtra* III.2.52 (*Lakṣhaṇe jāyā-patyosbṛak* as read with III.2.53). The marks on the body of the husband or the wife were believed to have effect in respect of each other, e.g. *jāyāgbnas-tilakālakaḥ*, 'the black mole indicative of wife's death'; *patigbñi pāṇirekbā*, 'the line on hand indicative of husband's death'. Probably this topic came under *Āṅgavidyā* to which references is found in the *Ṛḡayanādi gaṇa* (IV.3.73), in the *Brahmajāla* sutta of the *Dighanikāya* and some *Jaina Āgamas*.

Questioning a foreteller about future good luck was called *vipraśna*. The *sūtra* *Rādbīkashyor-yasya vipraśnaḥ* (I.4.39) deals with its linguistic form e.g. *Devadattāya īkṣate*, 'the astrologer is busy calculating about the future of Devadatta'.

*Mantras* to captivate the heart of others (*vaśīkaraṇa*) were known as *bṛīḍya* (*bṛīḍaya-bandhana ṛisbi*, IV.4.96, in which *ṛisbi*=*mantra* or *veda*).<sup>1</sup>

The idea that certain days (*puṇyāba*, V.4.90) and nights are auspicious (*puṇyarātra*, V.4.87) was also prevalent. The idea that good actions lead to merit is also referred to (*Saptamyāḥ puṇyam*, VI.2.152), e.g. *veda-puṇyam*, *adhyayana-puṇyam*. Good and bad actions originated from their doers called *puṇyakṛit*, *sukarmakṛit*, or *pāpakṛit* (III.2.89). Transgression of moral conduct was *kṣhiyā* (= *dharma-vyatīkrama*, *ācāra-bheda*), expressed by a special linguistic form, using the exclamatory particle *ha* (VIII.1.60), and pronouncing the verb with *pluta* accent, e.g. स्वयं ह रथेन याति इ उपाध्यायं पदार्ति गमयति 'Fie on the pupil himself riding in a chariot and making the teacher drag on foot!'; स्वयं ह्रीदन्नं भुङ्क्ते इ उपाध्यायं सकृन् पाययति 'Fie on the pupil himself feasting on rice and suffering the teacher to live on groats!' (VIII.2.104).

Heinous sins (*mahāpātakas*) like *bhrauṇabatya* (VI.4.

<sup>1</sup> Para-bṛīḍayam yena badhhyate vaśīkriyate sa vaśīkaraṇa-mantro bṛīḍya ity-uchyate, *Kāūikā*.

174) and *brahmahatya* (III.2.87) are mentioned (cf. *Manu*, XI.54).

Amongst moral virtues, Pāṇini mentions *prajñā*, *śraddhā*, *tapā*, *tyāga*, *viveka*, *dharmā*, *śama*, *dama* (VII.2.27; III.2.142). Persons endowed with high moral character were recipients of social honour as *śāmī*, *damī*, *tyāgi*, *vivekī*, *dharmī*, *tapasvī*. Persons who performed meritorious actions relating to life in this world and in the other (*īśhṛta* and *Pūrta*) were honoured as *īśhṛtī*, *pūrtī* (V.2.88). Religious gifts constituted a pious act (*dharmā*) and the use of one's wealth for such objects was called *upayoga*. These benefactions were expressed by such linguistic forms, as *sahasraṁ prakurute*, *sahasraṁ vinayate* (I.3.32; I.3.36).

**DHARMA**—The word *dharmā* has a two-fold meaning in the *Aśṭādhyāyī*; firstly *dharmā* denoted custom or *āchāra*, as in the *Dharmasūtras* (cf. *Kāśikā* on *sūtra* IV.4.47). That which was in accordance with custom was called *dharmya* (IV.4.92, *dharmādanapetaṁ*). Pāṇini explains *dharmya* as approved by local usage or custom (VI.2.65; cf. *Kāśikā*, *dharmyam ityāchārānīyatam deyam ucchyate*). Even the charges levied as legal dues, e.g. toll-tax, are called *dharmya*, because they were sanctioned by usage. Secondly *dharmā* denoted religious or moral duties, as in the expression *dharmam charati*, *dhārmikah* (IV.4.41).

## CH. VI, SECTION 5. PHILOSOPHY

**INTELLECTUAL FERMENT**—The philosophic thought of ancient India in the period from about the eighth century B.C. was marked by a new awakening and intellectual upheaval in her history. It led to the foundation of various schools centering round different doctrines as to the ultimate cause and nature of the world and soul. The atmosphere was charged with the keenest intellectual ferment as if a new god of wisdom had become manifest.

**JNA**—Patañjali takes the word *Jñā* to mean Brāhmaṇas as embodiments of *jñāna* or spiritual knowledge and refers to their descendants who carried on the ancient philosophic tradition. The term probably originated in the *Upanishads* (*Jñāḥ kāla-kālo guṇī sarva-vid yaḥ*, *Śv. Up.*, VI.2). Patañjali also mentions *Jñā* as a deity named *Jñā Devatā*, to whom householders were to offer special oblations (*Jñā devatāyasa stbālīpākasya Jñāḥ stbālīpākah*, *Bhāṣya*, VI.4.163; III.232). Pāṇini mentions *Jñāḥ* (III.1.135) as an independent word signifying 'One who knows'. It appears as if the monosyllabic *Jñā* stood for the ideal of the Sophistic movement beginning in the *Upanishads* and reaching its climax in the time of the Buddha and Mahāvīra. Patañjali refers to celebrated families of these Sophists as *jñānāṁ Brāhmaṇānām āpatyam*, descendants of Brāhmaṇas who followed the *Jñā* deity and were themselves known as *Jñā*. (*Bhāṣya*, IV.1.1; II.190).

Pāṇini refers to a philosophical doctrine promulgated by a thinker as *matī* (IV.4.60), corresponding to Buddhist *ditṭhi*, and the means of knowledge as *matya* (*matasya karaṇam*, IV.4.97).

**DIFFERENT SCHOOLS OF THOUGHT**—Pāṇini classifies the views of various philosophical thinkers under three cate-

gories according to the basic points of view implied in their teachings. They were (1) *Āstika*, (2) *Nāstika* and (3) *Daishṭika* (*Asti nāsti dishtam matih*, IV.4.60). A list of principal philosophic doctrines or *matīs* is preserved in the *Śvet. Up.* 1.2 (also *Charaka*, *Sūtrasthāna*, ch. 25; *Suśruta*, *Śārīrasthāna*, 1.11). At the head of the list appears *Kāla* or Time as the cause of the world, known as *Kālavāda* (*Mūla-pariyāya Jātaka*, II.pp.260-61). It occurs in the *Mahābhārata* in a more elaborate form (*Śāntiparva*, 220. 29-110). According to Pāṇini, the time-denoting words had attained the status of a deity (*devatā*) fit to be worshipped (IV.2.34). Stars and Seasons (IV.2.31, *Ṛitur-devatāsya ṛitavyam*) were similarly deified.

Next is *Svabhāva*, a view which had its counterpart in the Buddhist *Akiriyā-vāda* or doctrine of Non-causation advocated by Pūraṇa Kassapa (cf. *Śāntiparva*, 215.15-16). *Yadṛichchbā* or fortuitous origin was represented by the *Abetuvādins* who put forward the hypothesis of chance (cf. *Śāntiparva*, 168.21-22; also called *pariyāya-vāda*). The *Niyativāda* corresponds to the Determinist school of Makkhali Gośāla (cf. *Śāntiparva*, ch. 171). The view of the *Bhūtas* (the four material elements) creating the world was represented in the materialistic doctrine of the *Lokāyata* school. The Annihilationist school of Ajita Keśakambalī (*Uchchbedavādins*) took the same view (*chātum-mahābhūtiko'yaṁ puruso*). *Yoni* or the privileges and incidence of birth as a potent factor directing the world of men and animals was probably represented by the Militarist doctrine which believed in the efficacy of force to rectify human ills. (*Khattavijjā-vāda*, *Jāt.*, V.240; cf. *Śāntiparva*, ch. 173 for *Yonivāda* doctrine). Lastly, *Puruṣa* or *Devamahimā* or Power of the Creator was taken to be the cause of the cosmos, a view termed in the *Jātakas* as *Issarakāraṇavāda* (*Jāt.*, V.238). The *Śvet. Up.* advocating *Puruṣavāda*, refers to other thinkers, like the advocates of *Svabhāva* and *Kāla*, as *parim-ubhyamāna*, i.e. holding erroneous views.

These distinctions of philosophical thought mentioned in the *Śvet. Up.* and the *Mahā-Bodhi Jātaka* (*Jāt.* V, p. 228 ff.) are presupposed in Pāṇini. For example, Pāṇini's *Āstika mati* is the Theistic school of *Puruṣa* or *Issarakāraṇavāda*. We know that orthodox Brahmanical thought laid great stress on this view which was developed in the earliest Śāṅkhya and attained its climax in the *Vedānta sūtras*. Pāṇini also mentions by name the *Bhikṣhusūtras* of Pārāśarya (IV.3.110), which probably denoted the earliest Vedānta treatises written in *sūtra* form. The nucleus of such a text did exist in Pāṇini's time. The *Puruṣa* or *Adhyātma* school ultimately absorbed other minor doctrines as *Prāṇa*, *Jyoti*, etc., by evolving a synthesis of all such causes in *Puruṣa*, and in course of time other views on matter and creation aligned themselves with that view, so that *Āstikavāda* as expressed in a number of orthodox schools became the most predominant pattern of Indian philosophy.

Pāṇini's *Nāstika mati* represents the views of those who were opposed to the school of *Puruṣa* and they included amongst them rather earlier philosophers of various denominations, such as the believers in *Śvabhāva* (Non-causationists), *Yadricchbā* (Fortuitous Originists, *Abetuvādin*), *Bhūtas* (Materialists) of which Ajita Keśakambalin was the famous exponent (cf. *Śāntiparva*, 172.13-18), and *Niyati* (Determinist). Of these *Nāstika* schools Pāṇini has noted the name of Maskarī (Makkhali Gosāla) and his *Dishṭa-mati* or the view of *Niyati-vāda*, which as we have discussed above was based on the repudiation of action (*kiriyā*) and human endeavour (*virīya*). Patañjali states the pivotal points of their doctrine in explicit words (*Bhāṣya*, VI.1.154; III.96).<sup>1</sup> The *Mahābhārata* deals at length with the philosophic approach of such thinkers, citing five main points of their belief, viz. equanimity or indifference towards creatures (*sarva-sāmya*), immobility or absence

<sup>1</sup> मा कृत कर्माणि मा कृत कर्माणि शान्तिर्वः श्रेयसीत्याहातो मस्करी परि दाजकः ।

of endeavour (*anāyāsa*), straightforward utterance (*satya-vākya*), complete disregard of action leading to cynical peace (*nirveda*) and indifference to seeking knowledge (*avivitsā*, Śāntiparva, 171.2). There Maṅkhali is presented as the sage Maṅki who cheated of his two bulls by a cruel fate dismisses all effort as stupid (*Śuddhaṁ hi daivamevedamato naivāsti pauruṣam*, Śāntiparva, 171.12). The followers of this school were the *Daishṭikas* or Determinists.

**LOKĀYATA**—The name of this school which was identical with the theory of elements as the prime cause (*Bhūtavāda* and *Uchchhedavāda*) is not found in any *sūtra*, but occupies the second place in the *Uktbhādi-gaṇa* (IV.2.60). A teacher and a student of this doctrine were both known as *Lokāyatika*. There is a strong possibility that the Lokāyata School was known to Pāṇini. Kautīlyā refers to the *Lokāyatas* (*Arth.* p. 6). The antiquity of the school is also suggested by a reference in the *Dīghanikāya*, and by the mention of a Brāhmaṇa well-versed in the Lokāyata doctrine asking the Buddha a series of questions (*Samyuttanikāya; Dict. Pali Proper Names*, II.787). A *Jātaka* passage refers to Lokāyatika doctrine (*na seve Lokāyatikam*, VI.286). The *Kāmasūtra* has preserved an intensely worldly-wise saying of the Lokāyatikas, *Varaṁ sāmśayik-ānnishkāḍ-asāmśayikaḥ kārshāpaṇa iti Laukāyatikāḥ* (*Kām.*, I.2.30). 'A silver Kārshāpaṇa in hand is worth more than a gold Nishka in the offing', with which may be compared the modern saying 'A bird in hand is worth two in the bush'. There is an interesting reference in Patañjali, *Varṇikā Bhāgurī Lokayatasya*, 'the view-point of Bhāgurī is a specimen of the Lokāyata doctrine (III.325; VII.3.45), which shows that Bhāgurī was an exponent of the Lokāyata school. (Cf. also *varṭtikā Bhāgurī Lokāyatasya*, i.e., the way of life preached by Bhāgurī is that of Lokāyata, III.326). The Chārvākas of the Lokāyata school are mentioned in an old grammatical illustration as models of dialectical proficiency (*jñāna*, I.3.46) and convincing exposition of their doctrines (*saṁmānana*,

I.3.36, *Kāśikā* and *Chāndra*, I.4.82).<sup>1</sup> Chārvi or Chārvāka was not a proper name but an epithet derived from their brilliant discourses. A Lokāyatika appears as a friend of Duryodhana. Jābāli, a counsellor of Daśaratha, was also a follower of Lokāyata. The antiquity of the Lokāyata School being thus indicated, it must be one of those comprised in the *Nāstika matī* of Pāṇini.

Of the terms of Yoga philosophy Pāṇini mentions *yama*, *niyama*, *saṁyama* (III.3.63), *yogī* (III.2.142); of Nyāya, *nigribyānuyoga* (VIII.2.94) which were the same as *nigraha* (Nyāya, I.2.19; V.2.1) and *anuyoga* (*ibid* V.2.23) meaning defeat and censuring of an opponent. *Parimaṇḍala* in *sūtra* VI.2.182 seems to be the same technical term as *Vaiśeṣika* VII.1.20, signifying an atom.

**OTHER PHILOSOPHICAL TERMS—Ātmā:** Pāṇini uses the term *Ātmā* in such expressions as *ātma-prīti*, *ātma-māna* and *ātmanīna* (*ātmane hitam*, V.1.9). *Sva* was the word for *ātman* as Self. *Jīva* in such terms as *jīva-nāśam naśyati* (III.4.43) means 'life'. The *Ṛigvedic* word *akṣetravid* (*Ṛigveda*, X.32.7, *akṣetravit kṣetravidam hy-aprāt*) occurs as *akṣetrarajña* in Pāṇini; and a new word, *akṣetrarajña*, had come into existence to denote absence of self-knowledge (VII.3.30).

*Prāṇabhyit* or *prāṇin*, 'one endowed with *prāṇa*' included both men and animals, as distinguished from herbs and trees or the plant kingdom (IV.3.135). Pāṇini also distinguishes animate kingdom, *chittavat* (I.3.88) from *achitta* or the inanimate world (IV.2.47).

Kātyāyana in one place invokes the doctrine of *sarvachetanāvatva* (III.1.7; II.15), implying that in the higher philosophic sense which may also influence grammatical operations

<sup>1</sup> वदते चार्वी लोकायते । भासमानो दीप्यमानस्तत्र पदार्थान्वयक्रीकरोति ।  
वदते चार्वी लोकायते । जानाति वदितुं मित्यर्थः । काशिका, I. 3. 47.

the distinction of animate and inanimate does not exist. Pāṇini, however, seems to have taken a more practical view. Patañjali was probably referring to old definitions when he advocated the view of the two-fold nature of *ātma* (II.8). He adds that our physical being (*śarīrātma*) acts and the effect of pleasure and pain is felt by the *antarātma*, and conversely our mind acts and the effects of *sukha* and *duḥkha* are felt by the physical body. What in Pāṇini's time was called *svānta* (VII.2.18) seems to be the same as *antarātma*, referring to mind as the internal organ of Self or *Sva*. Pāṇini also refers both to the gross body as experiencing pleasure (*kartuḥ śarīra-sukham* III.3.116), and to its experience by the mind (*sukha-vedanā* III.1.18). *Sukha* is clearly defined as pleasant experience (*ānulomya*, V.4.63) and *duḥkha* as unpleasant (*prātilomya*, V.4.64), same as *anukūla-vedanīya* and *pratikūla-vedanīya* of the Nyāya school. The definition *Sva-tantrah Kartā* (I.4.54), held good both in grammar and as reflecting a philosophical doctrine.

**INDRA AND INDRIYA**—Indra, the famous Vedic deity is referred to in the *Ashṭādhyāyī* by his older synonyms as *Martvat* (IV.2.32), *Maghavan* (IV.4.128), *Vṛitrabhan* (III.2.87). Pāṇini also records the synonym *Mahendra* (IV.2.29), a word used only thrice in the *Yajurveda* in a late prose formula (VII.39-40; XXVI.10). The conception of Mahendra seems to have arisen out of that of the Chief Vital Air (*Madhya Prāṇa*) enkindling others through the five sense-organs (*Śatapatha*, VI.1.1.2), symbolised as a group of Five-Indras (cf. *Udyogaparva*, 33.103, *Pāṇḍoh putrāḥ pañcha Pañchendra-kalpāḥ*). But the reference to the new metaphysical meaning of Indra as Self is truly remarkable (V.2.93). This new meaning had been evolved in the religio-philosophical cogitations of the *Brāhmaṇas* where new *adhyātma* interpretations of the hymns were being discussed. Pāṇini derives *Indriya*, 'sense-organs', from the word *Indra* meaning 'Self'. He sums up the various derivations in five clauses of equal rank, and also provides for

other possible views by adding the phrase *iti vā* in the *sūtra*.<sup>1</sup> We learn from Yāska that the derivation of Indra was a major point of discussion in which eminent teachers like Āgrāyaṇa and Aupmanyava had participated. The fifteen different etymologies of Indra compiled by Yāska (*Nirukta*, X.8; cf. H. Sköld, *The Nirukta*, p. 210) were taken from different *Brāhmaṇa* and *Āraṇyaka* passages, some of which can still be traced (cf. my article 'Studies in the Grammatical Speculations of Pāṇini', *J.U.P.H.S.*, April, 1936, pp. 95-104). Pāṇini also refers to them as shown below.

(i) *Indra-liṅgam*; the sense-organs are the outer sign of Indra. According to the *Kāśikā* Indra here is *Ātmā* and this meaning goes back to the *Maitr. Up.*, VI.8. So long as the organs function, Indra resides within the body. Indra is the life-giver of the Indriyas: 'Verily, in the beginning there was the *Asat* named the Rishis who were doubtless the Vital Airs, *Prāṇāḥ*. The invisible *Prāṇa* incarnated in the body; he is Indra, propelling by his power the senses which thereby stand as proof of his existence' (*Śatapatha*, VI.1.1.2). Thus the functioning sense-organs are the visible symbols of life within (*Indra-liṅgam*).

(2) *Indra-dṛishṭam*; the senses were 'seen' or experienced by Indra. Yāska ascribes this opinion to Aupamanyava (*Idam darśanād iti Aupamanyavaḥ*), a view also expressed in the *Aitareya Āraṇyaka* (*Idam adarśam tasmād Indro nāma*, III.14). This Aupamanyava was a grammarian mentioned by Yāska as holding a different view about the onomatopoeic derivation of names (III.18). It is likely that Pāṇini took this etymology from Aupamanyava. *Idam* in the above two citations stands for the non-self, or senses.

(3) *Indra-sṛishṭam*; the organs were 'created or produced by Indra.' Yāska attributes this view to the teacher Āgrāyaṇa

<sup>1</sup> इन्द्रियम् इन्द्रलिङ्गम् इन्द्रदृष्टम् इन्द्रसृष्टम् इन्द्रजुष्टम् इन्द्रवत्तम् इति वा ।

(११२।१३)

(*Idam karanād iti Āgrāyanah*, X.8), and a similar suggestion is made in the *Aitareya Up.* (II.1, *Tā etā devatāḥ śṛishṭāḥ*).

(4) *Indra-jushṭam*; 'loved by Indra', who feels delighted in the company of the senses. The *indriyas* are the receptacles of Soma which is Indra's delightful drink. The *Aitareya Br.* (II.26) describes the sense-organs as the Soma-cups (*Soma-graha*), and since Indra loves his sweet mead he is never so happy as when he is in the company of the senses (cf. *Indra as indan ramate*, *Nir.*). The epithet *Indra-jushṭa* is thus appropriate in view of the intimate relationship between the Self and the sense-organs.

(5) *Indra-dattam*; 'assigned to their respective objects of enjoyment by Indra' (*ātmanā viśhyebhyo dattam yathā-yatham grahaṇāya*, *Kāśikā*). The same view is found in the *Aitareya Up.*, describing the primeval Self as assigning to the senses their respective functions in the human person (*puruṣe*): 'He said to them: Enter into your respective abodes.' Pāṇini's *Indra-dattam* is in relation to this old legend.

(6) *Iti Vā*. This part of the *sūtra* provides for an unknown quantity and puts the grammarian's seal of approval on such other derivations as were taught by ancient teachers but not included in the above list of five.<sup>1</sup> The *Kāśikā* brings out the spirit of the words by stating that the word *iti* points to the manner of derivation which thus made room for other similar etymologies also, all of them being of equal force. For Pāṇini to be so liberal with words is rather exceptional and points to the synthetic spirit in which he had conceived his work.

**PARALOKA (OTHER WORLD)**—A belief in the other world and in the continuity of Self in after life was an article of faith with the people who so conducted themselves in this life as to attain happiness in the next world (*Sidhyater-apāralaukike* VI.1.49). The *sūtra* *Lipsyamāna-siddhau cha*

<sup>1</sup> For seventeen similar crude derivations of *Indra*, see Fatah Singh, *Vedic Etymology* (Kota, 1952), p. 94.

(III.3.7) refers to the attainment of supreme objective (*siddhi*) which, according to the commentators, was *Svarga*. In the Vedas *Svarga* is called *Nāka*. The word *nāka* is derived in the *Brāhmaṇas* (ŚB., VIII.4.1.24) from *na*, 'not', and *aka*, 'pain', because those who go there are free from sorrow (*Vedic Index*, I.439). Yāska and with him Pāṇini splitting the word into *na* and *aka* (VI.3.75) retain its association with the final abode of happiness, as heaven was believed to be in the earlier literature.

Pāṇini also mentions *Niśreyasa* (V.4.77) which in the *Upanishads* denoted supreme bliss or beatitude into which the soul entered. On the contrary, the word *Nirvāṇa* was also known to the *Aśṭādhyāyī* (VIII.2.50). It denoted something negative, *i.e.* extinction, as of a lamp or flame of fire. The term was possibly associated with Buddhism, as indicated in *Kāśikā's* example *nirvāṇo bhikṣuḥ*.

## CHAPTER VII POLITY AND ADMINISTRATION

### 1. MONARCHY

**TITLES AND TERMS**—Pāṇini refers to a monarchical state as *Rājya* (VI.2.130), derived from *rājan* or king, as distinguished from *San̥gha* or Republic. In a well-known passage of the *Aitareya Brāhmaṇa*, *Rājya* occurs as one of the several classes of sovereignty to which rulers were consecrated at the time of their coronation (VIII.15). The term *īśvara* in the *Ashṭādhyāyī* denotes a *rājā* with reference to his supreme power, as in *sūtras* I.4.97, and II.3.9 (*Yasya cheśvaravachanam tatra saptaṁ*), which relate to grammatical formations for naming the king of a country. In early literature *īśvara* meant an earthly king and not 'God'. Patañjali cites an old example, *adbi Brahmadatte Pañchālāḥ*, i.e. 'the Pañchālas are under the kingship of Brahmadatta'. In the *Bhāṣya*, *rājā* of *sūtra* II.4.23 is taken as a synonym of *ina* and *īśvara* (I.177). The *Nighaṇṭu* makes *rāshṛī*, *arya*, *niyutvān* and *ina* as names of *īśvara*. Of these *arya* is referred to by Pāṇini as a synonym of *svāmī* (III.1.103). The latter word is derived to denote one who possesses *aiśvarya* or sovereignty (*Svāminn-aiśvare*, V.2.126). Patañjali points out that the idea of *aiśvarya* is inherent in the word itself and is not the result of any suffix (*nāyam pratyayārthabḥ*, II.400). It appears that *svāmī* implying *aiśvarya* primarily denoted a king.

Another title of *rājā* in Pāṇini is *bhūpati* (VI.2.19), and here also *aiśvarya* is an attribute of his overlordship (*patyān-aiśvare*, VI.2.18). *Bhūpati*, therefore, means 'lord of the earth'. The word *adhipati* mentioned along with *svāmī* and *īśvara* (II.3.39) occurs in the coronation formula of the *Aitareya Br.* in a form of sovereignty called *ādhipatya*. Jaya-

swal understood it as overlordship over neighbouring states, who paid tribute to the *Adhipati* (cf. *Ādi*, 103.1; 105.11-15, 21). The words *Samrāj* and *Mahārāja* were old kingly titles, of which the former is mentioned in *sūtra* VIII.3.25, and the latter although mentioned twice (IV.2.35; IV.3.97) does not refer to a king, but to one of the *Chatur-Mahārājika* gods.

The king's relationship to territory (*bbūmi* and *prithivī*) is indicated in his titles *sārvabhauma* and *pārthiva* based on his sovereignty or *aśvarya* (*Tasyeśvaraḥ sarvabbūmi-prithivī-bhyām aṇāṇau*, V.1.41-42). One's own kingdom was called *prithivī*; but *sarvabbūmi* denoted the whole country and was the same as *mahāprithivī* of the *Mahāgovinda* sutta of the *Dīgha-Nikāya*. The *Sārvabhauma* after conquest of the earth and annexation became entitled to perform an *aśvamedha* (*Āpas. Śr.*, XXX.1.1; cf. *Bharata Sārvabhauma*, *Ādi*, 69.45-47). The title also occurs in the list of the *Ait. Br.*

**COUNCIL OF MINISTERS (PARISHAD)**—Pāṇini is acquainted with the *parishad* as a recognized institution of his time of which he mentions three kinds, (1) social (IV.4.44), (2) literary (IV.3.123), and (3) political (V.2.112). A member of a *parishad* was called *pārishada* and *pārishadya* (IV.4.101). He must be duly qualified or eligible for it (*sādhū*). One who joined the meeting of a *parishad* was called *pārishadya* (*parishadam samavaiti*, IV.4.44). This *parishad* or social congregation was like the *samāja*. *Parishad* as a political institution is mentioned in *sūtra* V.2.112 (*Rajaḥ-kṛṣhy-āsuti-parishado valach*) prescribing the form *parishadvala*, which the commentators apply to a king with his Council of Ministers (*parishadvalo rājā*). The Buddhist literature, Kauṭilya and Aśoka inscriptions contain references to this institution. In the *Mahāsīlava Jātaka*, the king's *Parishad* consisting of ministers (*amachchas*) is spoken of as perfectly disciplined to act harmoniously with the will of the king (*evam suvinītā kir'assa parisā*, *Jāt.* I.264). Aśoka in Rock Edicts III and VI mentions the *Parishad* which was summoned to consider urgent matters

(*achāyike*). An authoritative account of the constitution of the *Mantri-Parishad* is given in Kauṭilya who describes it as a well-established institution invested with definite constitutional powers in relation to the king and the business of the State (*Arth.* I.11., p. 26-29).

The particularly happy expression *Parishadvalo rājā*, 'King-in-Council', current in the political terminology of Pāṇini's time, shows the importance which was attached to the *Parishad* with reference to the constitutional position of the king in relation to his ministers.

*RĀJAKṚITVĀ* (III.2.95)—This was another important term of political vocabulary mentioned by Pāṇini in *sūtra Rājani yudbi kṛiṇaḥ* (III.2.95), signifying the institution of *rājānam kṛitavān* 'one who is a king-maker'. In the Vedic period the *Ratnins* or High State Functionaries are spoken of as *rājakṛits*, 'king-makers' (*Atharva*, III.5.6-7). This political epithet continued up to the Buddhist period: 'The Pali canon employs 'king-maker' as a synonym for ministers (*rājakattāro*, *Dīghanikāya*, *Mahāgovinda Suttanta*). The *Rāmāyaṇa* in describing the ministers who put their resolution before Bharata, calls them 'king-makers' (*Ayodhyākāṇḍa*, 79.1, *saṁetya rājakartāro Bharataṁ vākyam-abruvan*; *Comm. rājakartāraḥ=mantriṇaḥ*, *Hindu Polity*, II.116).

**CHIEF MINISTER**—A fact of great constitutional significance with respect to the working of the Hindu monarchy in that early period is mentioned by Pāṇini in the following *sūtra*:

*Misram chānuṣasargam asaṁdhau* (VI.2.154).

'The word *misra* has an acute accent on the final vowel after an instrumental case, when it is not joined with any preposition, and does not mean an agreement with oath (*saṁdhi*)'.

On this *Kāśikā* says: 'Why do we say, not denoting an agreement with oath? Observe *Brāhmaṇa-misro rājā*, *Brāhmaṇaiḥ saba saṁbhita aikārthyamāpannaḥ*. *Saṁdbiriti bi paṇabandhen-aikārthyam uchyate*'. As Vasu renders the mean-

ing of the *Kāśikā*: 'The word *Samdhi* here means a contract formed by reciprocal promises; 'If you do this thing for me, I will do this for you.' Others say, it means close proximity, without losing identity and thus differs from *miśra* in which two things are compounded into one. Therefore, though the King and the Brāhmaṇa may be in close proximity as regards space (*deśa-pratyāsattau*), they both retain their individuality; hence the counter-example *Brāhmaṇa-miśro rājā*'. Thus the word *miśra* points to joint authority between the king and his ministers who shared it in common according to constitutional usage.

This technical meaning of *samdhi* is recorded in the *Arthaśāstra*, which defines it as *pañabandhaḥ sandhiḥ*, 'an agreement with oath is *samdhi*' (*Artha*. VII.1, p. 263, Trans. p. 293). The agreement of a king with a Brāhmaṇa in accordance with the oath of loyalty to the constitution was a feature of Hindu polity. The king, according to *Manu* (VII. 58), must consult his Chief Minister, who should be a learned Brāhmaṇa, about secret counsels dealing with the six limbs of state-craft (*śāḍguṇya*, *Hindu Polity*, 11.119). According to Kauṭilya also the king's Chief Minister should be a Brāhmaṇa: 'The king (*Kshatra*) who is supported by a Brāhmaṇa, and who has the advantage of the advice of other *mantrins*, and who is governed by the *Śāstras*, conquers territories unacquired before (*Artha*. I.8, p. 16). It is virtually a restatement of the Vedic dictum *Brāhmaṇā kshatrena cha śrīḥ pari-grīhītā bhavati*, also embodied in *Manu* (IX.322).

In actual practice also, the alliance of a Kshatriya king with a Brāhmaṇa prime-minister or chancellor was the prevailing political arrangement from about the Śaśunāga period to the reign of Aśoka. The names of some of the great ministers were as well-known as those of the rulers; for example, we find mention of Varshakāra, chief minister of Ajātaśatru, Dirgha Chārayāna of king Viḍūḍabha of Kosala, Yaugandharāyana of Udayana, Chāṇakya of Chandragupta and also Bindu-

sāra, Rādhagupta of Aśoka, Piśuna of Pālaka of Avanti (*Artha. Comm.*), Bharata Rohaka of Chaṇḍa Pradyota, Āchārya Ghoṣamukha of Aṁśumān of Avanti (Bhagvaddatta, *History of India*, p. 258), Kaṇṇika Bhārdvāja of Parantapa, king of Kosala (*Artha. Comm.*), and Bābhavya of king Brahmadatta of Pañchāla (*Matsya Purāṇa*, XXI.30). As Jayaswal has observed, the system of noting historically the Prime Ministers' name occurs as a marked feature in Buddhist records (*Imperial History of India*, p. 17). All these ministers occupied positions of the highest responsibility in the administration and were bound by constitutional ties to the king whose policies they directed so completely.

Pāṇini mentions another political term, *Ārya-Brāhmaṇa* (*Āryo Brāhmaṇa-kumārayoḥ*, VI.2.58), 'Honourable Brāhmaṇa', used with reference to the Chief Minister. In the next *sūtra*, *Rājā cha* (VI.2.59), Pāṇini refers to *Rāja-Brāhmaṇa*, which as a *Karmadharaya* compound, would apply to a king of the Brāhmaṇa caste, but as a counter-example would refer to the Brāhmaṇa of the King. The King's Brāhmaṇa was the same as the king's minister mentioned in *Brāhmaṇa-miśro rājā*. **ASHADAKSHIṆA** (V.4.7, SECRET COUNSEL)—It literally means 'that which is not seen by six eyes'. The *Kāśikā* explains it to mean deliberation between two persons only, and not more (*ashadaksbīṇo mantrah, yo dvābhyāmeva kriyate, na babubhiḥ*). In the political evolution of the *Mantri-Parishad* and with the emergence of the office of the Prime Minister, there was a tendency to form a smaller body inside the *Parishad* for more effective and responsible deliberation. As to the number of ministers constituting this Inner Body, Kauṭilya supplies valuable information recording the views of earlier political thinkers like Piśuna, Pārāśara, Viśālāksha and Bhāradvāja. Kauṭilya states that the number of ministers should be three or four (*Artha*. I.15, p. 28). In this matter the most forceful view was that of Kaṇṇika Bhāradvāja, the severe theorist who advocated the system of one-minister cabinet

(*Gubyam eko mantrayeteti Bhārdvājaḥ*, *Arth.* I.15, p. 27). This was the *ashadaksbīṇa* mantra referred to by Pāṇini, i.e. the secret counsel of the king and the chief minister only, in which 'six eyes' had not participated. It signified the same thing as *shat-karṇo bhidrate mantrah* of later literature. *Bhārdvāja* held that a plethora of councillors betrayed the secret (*mantri-paramparā mantram bhinatti*, *Artha.* I.15; cited in the *Kāśikā* on V.2.10). This view was disputed by Viśālākṣha who, perhaps true to the veiled suggestion of his name, was in favour of admitting more ministers to the secret sessions of the council.

The *ashadaksbīṇa* business must have related to urgent and important matters of state. Pāṇini refers to *ātyayika* (*Vinayādi gaṇa*, V.4.34), urgent business, to which Aśoka also refers in R.E. VI, and so also Kauṭilya: 'Summoning the ministers and the council, the king shall speak to them on urgent matters (*ātyayike kārye mantriṇo mantri-parishadam chūbhūya brūyāt*, *Arth.*, I.15). Here *mantriṇah* refers to the Inner Cabinet, and *Mantri-Parishad* to the fuller Council of Ministers. The *ashadaksbīṇa* deliberations belonged to the former.

Similarly, in the *Gaṇa-pāṭha* IV.3.118 an act or resolution of the *Parishad* is called *pārishatka*.

**RĀJA-SABHĀ** (II.4.23)—As distinguished from the *Parishad*, the General Assembly was represented by the *Rāja-sabbhā*. Tradition makes Bindusāra having a Council of five hundred members. As examples of *Rāja-sabbhā*, Patañjali cites *Chandragupta-sabbhā* and *Pushyamitra-sabbhā* (*Bhāṣya*, I.177).

The implication of Pāṇini's next *sūtra*, *aśālā cha* ('that which is not a building', II.4.24) interpreted with the rule under discussion is that the term *Rāja-sabbhā*, and also its specific names, such as *Chandragupta-sabbhā*, had a two-fold significance, firstly the body of members and secondly the building where the assembly held its session. Even in the Vedic literature we find that *Sabbhā* was the name of an 'assembly' as well as of the 'hall' where the assembly was held (*Vedic Index*, II.

426). The example *Chandragupta-sabbā* although certainly post-Pāṇinian denoted both the assembly or Great Synod of that emperor and the magnificent pillared hall which has been discovered in the excavations at Pāṭaliputra. The pillared assembly hall was a Vedic model as the word *Sabbā-stbānu* (*Vedic Index*, II.426) shows. Chandragupta built his *sabbā* with stone pillars. In this connection we may refer to the expression *Kāshṭha-sabbā* indicative of wooden architecture of earlier times. *Chandra* and *Kāśikā* cite it as a counter-example. It is known that the earliest Indian architecture in stone was preceded by that in wood, from which the technical patterns and ornamentation of early Indian art were certainly derived. Therefore, an assembly hall made of wood (*kāshṭha-sabbā*) was a fact of the pre-Maurya period.

According to Ludwig the Vedic *Sabbā* was an assembly not of all the people but of the Brāhmaṇas and Maghavans or the rich aristocrats (*Vedic Index*, II.426). The word *sabbeya*, 'worthy of the assembly' is taken by Keith to support this view. Vedic *sabbeya* (IV.4.106) corresponds to *sabhya* of classical Sanskrit (*sabbāyām sādhuḥ sabhyaḥ*, IV.4.105), which must have been applied only to those who were privileged to become members of the *Sabbā*.

✓ Pāṇini mentions the office and duties of *Purohita* as *Paurohitya* (V.1.128). The *Purohitādi-gaṇa* includes *Rājā* and also *Senāpati* implied in the phrase *patyanta* of the *sūtra*. According to Kauṭilya, next in rank to the Chief Minister was the *Purohita*; after him came the *Senāpati*; and then the *Yuva-rāja* (*Arth.* V.3, p. 247). A *Purohita* was to be learned both in the Veda and in politics (*Daṇḍanīti*).

**MAHISHĪ (QUEEN, IV.4.48)**—The queen had an official position in Hindu polity. She was crowned jointly with the king. Pāṇini mentions the chief queen as *Mabishī* (*Amabishyādibhyaḥ*, IV.4.48) and the special term *Māhishā* must have referred to her allowances in the Civil List, which was a charge fixed by convention (*dharmyam, āchāra-yuktaṁ*).

In the same *gaṇa* after *Mahishī* comes *Prajāvatī*, mother of princes, and her salary is called *prājāvata*. Kautilya also mentions both the Chief Queen and the mother of princes (*Rājā-mahishī*, *kumāra-mātṛi*) in the Civil List, the former receiving 48,000 and the latter 12,000 silver *panas* per year (*Artha*. V.3, p. 247). The Chief Queen (*Ajja-mahesi*) is frequently mentioned in the *Jātakas* (V.22; VI.31) and distinguished from *ṣajāpatī* (I.398; Sanskrit *prajāvatī*), a title applied to all other queens except the Chief Queen.

Pāṇini mentions the phrase *asūryam-ṣaśyā* applied to women who lived in the seclusion of the palace where they could not see even the sun. The commentators interpret the term as *rājadārāḥ* or the royal harem, which corresponds to Aśoka's *orodhana* (Skt. *avarodhana*).

**CROWN PRINCE.**—The general word for 'prince' in the *Ashṭādhyāyī* is *rāja-putra* (IV.2.39) and *rāja-kumāra* (VI.2.59). The word *rāja-kumāra* has two meanings (1) a boy king and (2) prince, the latter being a counter-example to the *sūtra* *Rājā cha (rājñah kumārāḥ)*. Of all his sons the king selected the son of the Chief Queen, as the crown-prince or *Yuvarāja*. In this connection Pāṇini makes an important reference to *Ārya-kumāra*, i.e. Chief Prince, who was invested with the title *Ārya (āryaśchāsan kumāraścha)* (*Āryo Brāhmaṇa-kumārayoḥ*, VI.2.58). *Ārya* appears to be a political title both in *Ārya-Brāhmaṇa* and *Ārya-kumāra*. Samudragupta was addressed as *Ārya* by his father at the time of his selection to the throne (*āryo hītyuṣagubhya*, Allahabad Pillar Inscription). In the *Jātakas* the crown prince is called *uparājā*. In one instance, of the two brothers one is made *uparājā* and the younger one *senāpati*; on the death of the king the *uparājā* becomes *rājā*, and the *senāpati* becomes *uparājā* (*Jāt*. VI.30).

**RĀJA-KUMĀRA.**—This expression especially taught in *sūtra* VI.2.59, denotes a boy-king, i.e. a prince who was required under special circumstances to succeed to the throne as a

minor. It should be noted that a boy-king, although permitted to succeed in his minority, was formally consecrated as king only when he attained the age of majority.

**PERSONAL AND PALACE STAFF.**—The King, in keeping with his royal dignity, maintained a full contingent of personal and household staff which consisted of body-guards, the chamberlain, ecclesiastical staff, toilet attendants, and inferior servants who were in charge of royal paraphernalia. The *Aṣṭādhyāyī* acquaints us with each one of these classes of officers.

**PERSONAL BODY-GUARDS.**—The king's A.D.C. or staff for the protection of his person (*ātma-rakṣitaka*, *Arth.* II.21, p. 42) is mentioned by Pāṇini as *Rāja-pratyenas* (*Śbaṣṭhī pratyenasī*, VI.2.60). *Pratyenas* is mentioned along with *Ugra* and *Sūta-grāmaṇī* in the *Bṛihadāraṇyaka Up.* (IV.3.43-44), denoting there a police-officer. 'The sense must be that of the humbler 'servants' of the king' (*Vedic Index*, II.34). It was a responsible task for which Kautilya directs special precautions to be taken. Pāṇini informs us about the status of dignitaries appointed as king's body-guard. In *sūtra* VI.2.27 (*Ādīḥ pratyenasī*) he explains the formation *kumāra-pratyēnāḥ*, i.e. a prince serving as an A.D.C. It must have been a position of honour to which princes of the royal blood were usually appointed. An assemblage of princes is mentioned as *rājaṣṭraka* (IV.2.39).

**CHAMBERLAIN.**—This official is called *Dauvārika* (VII.3.4, *Dvārādīnām cha; dvāre niyuktaḥ*). His importance is indicated by his pay fixed at 24,000 silver *kārṣhāpaṇas* in the *Arthaśāstra* (*dauvārika . . . saṃnidhātāraḥ caturviṃśati-sābaśrāḥ*, V.3).

**OFFICERS TO GREET THE KING.**—These were: (1) *Svāgatika*, the officer who pronounced welcome to the king at his appearance (*Svāgatādīnām cha*, VII.3.7; *svāgatam ityāha*); (2) *Sauvastika* (*svastītyāha*, *Dvārādī gaṇa*, the officer who recites *svasti-vāchana* to the king). To this Kātyāyana

adds three more: (3) *Saukha-śāyanika*, the person who enquires of the king if he had slept well (*sukhaśayanam pricchati*). This is the same as Pāṇini's *Saukha-śāyika* (*sukhaśayyā jīvati*, *Vetanādi gaṇa*, IV.4.12). In the *Lobakumbhī Jātaka* we find mention of Brāhmaṇas coming at dawn to enquire about the health of the king of Kosala (*aruṇāgamana-velayā Brāhmaṇā āgantvā rājānam sukhasayitam pucchbhimsu*, III.43). (4) *Saukha-rātrika*, the officer who asks whether the king spent a comfortable night. (5) *Sausanātika*, the officer who greets the king after his toilet (*susnātam pricchati*). The *sausnātika* in relation to the king is referred to by Kālidāsa (*Raghuvamśa*, VI.61).

**TOILET ATTENDANTS**—Both male and female attendants are mentioned in connection with king's toilet, e.g. *parishcheka*, *snāpaka*, *utsādaka*, *udvartaka* (*Yājñakādi gaṇa*, II.2.9; VI.2.151); *pralepikā*, *vilepikā*, *anulepikā* (*Mahishyādi gaṇa*, IV.4.48). The allowances (*dharmya*) paid to the latter were called after them *pralepika*, *vailepika* and *anulepika* respectively. Patañjali makes a special reference to *vailepika* as a customary payment to a female attendant who applied unguents (VI.3.37; III. 156). The expression *snātānuliṭṭa* shows that *anulepa* denoted unguents applied after bath (*Arth.*, IV.6; p.217). The *Kalpasūtra* refers to these terms in describing the king's toilet (*Kalpasūtra*, S.B.E., pp. 242-3).

**RĀJA-YUDHVĀ**—That text also states that the king entered the hall for gymnastic exercises and there engaged in wrestling (*mallayuddha*). Pāṇini refers to *rāja-yudhvā* (III.2.95), a term applied to the wrestler who gives exercise to the king (*rājānam yodhitavān iti rāja-yudhvā*). This list of attendants incidentally has reference to the king's daily routine, as laid down in the *Artha-śāstra*.

## CH. VII, SECTION 2. GOVERNMENT

**GOVERNMENT**—The king was at the head of government in a monarchical or *Ekarāja* State. He was assisted in his work by a ministerial council or *Parishad*, and also possessed a larger body called *Sabbā* as we have already seen. The number of ministers comprising the *Parishad* is not known from Pāṇini, but, as Kauṭilya states, it must have depended on the needs of administration. The Chief Minister (*Ārya-Brāhmaṇa*), the Chief priest (*Purohita*), the Crown-Prince (*Ārya-kumāra*, same as *Ārya-putra* of the Minor Rock Edict at Brahmagiri), and the Commander of the Army (*Senāpati*) have received mention in the *Ashtādhyāyī*, being important officers represented in the language through special terms.

**ADMINISTRATIVE OFFICERS**—Pāṇini mentions government servants of several grades who appear to have been organized into a Civil Service. The term *āyukta* was a general term for government servants (II.3.40) engaged in routine work (*āsevā*). Kauṭilya refers to *āyukta puruṣas* of a king (*Arth.* I.15, p. 27), and so do the *Jātakas* (*yuttakapurisā rāṇo*, *Jāt.*, V.14). When they were assigned special jobs they were called *niyukta* after their assignments (*Tatra niyuktaḥ*, IV.4.69). As examples of *niyukta* officers, the *Kāśikā* mentions *Koshtbhāgarika*, store-keeper employed in the royal store-houses (*Agārāntāt-īhan*, IV.4.70), who according to Kauṭilya was of the grade of a superintendent. Other special officers whose names ended in *agāra* were *Devāgarika* for temples, and *Bhāṇḍāgarika* for stores (*Kāśikā* on IV.4.70). These must have been officers known from olden times (cf. also Kauṭilya). Personal attendants, such as *chhatradhāra*, bearer of the royal umbrella, *tūṇidhāra*, bearer of the quiver of arrows, and *bhṛīṅgāradhāra*, bearer of the king's spittoon, were of the *niyukta* class (*Aṇi niyukte*, VI.2.75).

The most important officers constituting the steel-frame of administration were the *Adhyakshas* mentioned in *sūtra* VI.2.67 (*Vibhashādhyakshbe*). They were Heads of Government Departments. In Kauṭilya's administrative system, the *Adhyakshas* play an important part as presiding over the different departments of administration. The *Arthasāstra* enumerates about twenty-five *Adhyakshas*. As examples of *Adhyakshas*, the *Kaśika* cites *Aśvādhyaksha* and *Gavādhyaksha* (IV.4.69), mentioned also by Kauṭilya. The *Kāśikā* refers to other *niyukta* officers, such as *Ākarika*, those for mines; *Śaulkaśālikā* for customs, *Āṇika* for market-places, *Gaulmika* for forests, who were of the *Adhyaksha* cadre according to Kauṭilya.

**YUKTA**—The *Yuktas* were a class of subordinate officers of whom Pāṇini mentions *Yuktārobhī* (VI.2.81), which is the same as *yuktārobaka* of Kauṭilya (*Artha*. V.3. p. 248). His remuneration was fixed not as regular pay, but as an honorarium (*pūjā-vetana*) of 500 to 1000 *kārshāpaṇas* per year. His duties are not exactly defined but he may have been entrusted with the special task of breaking ungovernable elephants and horses (*avidhēya-bastyāśvārohana-samarthaḥ*, Gaṇapati Śāstri). The *Śāmaññaphala-sutta* mentions *batthāroha* and *assāroha* amongst skilled workmen of the times. Under the *Adhyakshas* was placed the entire civil service consisting of subordinate officers or *Yuktas*. They were a regular feature of the Mauryan administration referred to both in the Asokan Edicts (R.E.III) and the *Arthasāstra* (II.5, *sarvādhikaraṇeṣu yukto-payukta-tatpurushāṇām*). Pāṇini's mention of both the *Adhyakshas* and *Yuktas* points to the fact that these officers had become parts of the administrative system a few centuries before Kauṭilya.

Pāṇini mentions some other subordinate officers, e.g. *gopāla*, cowherds; *tantipāla*, goatherds; and *yavapāla*, guards of barley fields (*Go-tanti-yavam pāle*, VI.2.78). *Tantipāla* is mentioned also in the *Virāṭaparva* (XI.8) having other *pāla* officers

working under him. The *Pālas* of Pāṇini (*Pāle*, VI.2.78) form a class of officers, of whom Kauṭilya mentions *nadīpāla*, *dravya-pāla*, *vanapāla*, *nāgavanapāla*, *antapāla*, *durgapāla*, and the *Mahābhārata* refers to *sabhāpāla* (*Ādi.*, 222.16), in addition to *gopāla* and *tantipāla*, known also to Pāṇini. The *Sasa Jātaka* refers to *kbettapāla* and *Kbettaḡopaka* (*Jāt.*, III.54) and the *Sībachamma Jātaka* to *kbettarakkbakā*, those watching barley and rice fields (II.110), which corresponds to Pāṇini's *yava-pāla*. Later we get *viḥārapāla*, *ārāmapāla* and *dhammapāla* in the Buddhist tradition.

As specific instances of *Yukta* officers the *Kāśikā* mentions *go-saṅkhyā* and *aśva-saṅkhyā* who acted as census officers of royal cattle and horses and whose business it was to register their number, age and branding marks. Details of such a census of royal cattle held in the kingdom of Duryodhana occur in the *Ghoshayātrāparva* (*Vanaparva*, chs. 239-40).

*Ksbetrakara*, an officer for surveying fields, and *lipikara*, a scribe (III.2.21, with the variant form *libikara*, were both subordinate officials known in the Mauryan administration also.

*DŪTA*—The *Dūta* or emissary was named after the name of the country to which he was deputed (*Tad-gachchhati pathi-dutayoḥ*, IV.3.85). The term *pratishkasha* also denoted a messenger (VI.1.152). Couriers were called *jaṅghā-kara* (III.2.21), corresponding to *jaṅghārika* of Kauṭilya (*Arth.* II.1, p. 46). Pāṇini refers to a special term *yaujanika*, to denote a courier travelling one *yojana* (*yojanam gachchhati*, V.1.74), to which Kātyāyana adds *yaujanaśatika*, i.e. a courier who is deputed on an errand of a hundred *yojanas*. This is in complete agreement with Kauṭilya who refers to the speed of Mauryan courier service in terms of the distances they travelled from one *yojana* to a hundred *yojanas*. The remuneration prescribed was ten *paṇas* for each *yojana* travelled up to 10 *yojanas*, and thereafter twice as much in a rising scale from eleven to one hundred *yojanas* (*Arth.*, V.3, p. 248).

A similar courier service was maintained in Achaemenian Iran, under king Xerxes and other emperors almost contemporaneous with Pāṇini's time.

The message delivered orally by a *dūta* was called *vāchika* (*Vācho vyābhitārthāyām*, V.4.35), and the action taken on it *kārmaṇa* (*Tad-yuktāt kārmaṇo'ñ*, V.4.36; *vāchikaṃ śrutvā tatthaiva yat-karma kriyate*, *Kāśikā*). Pāṇini refers to an officer called *kartṛi-kara* (III.2.21), an obscure word unrecorded in literature, but in Pali *kartā* denoted the king's agent or messenger (Stede, Pali Dict., *Jāt.*, VI.259, etc.), whence the person who selected or appointed him must have been so called. **ĀKRANDA**—Pāṇini mentions special couriers called *ākrandika* (IV.4.38), deputed to an *ākraṇḍa* (*ākraṇḍaṃ dhāvatī*). The *Kāśikā* takes it as a place of moaning or suffering (*ārtāyana*) which does not make sense. Kauṭilya defines *ākraṇḍa* as a friendly king in the rear of the *vijigīṣhu* (*Arth.* II.62, p. 31.) Kullūka on *Manu* VII.207 explains the word clearly saying that a hostile king in the rear was called *pārśbhigrāha* and a friendly king in the rear who would act as a countercheck to the enemy at the back was known as *ākraṇḍa* (*Śānti*, 69.19). Thus a messenger deputed to an *ākraṇḍa* king was called *ākrandika*.

One who considered himself strong enough to proceed against an enemy, because of his secure position in the political *Maṇḍala*, was called *abhyamitrīya* or *abhyamitrīṇa* (*abhyamitram alaṅgāmī*, V.2.17).

**IDEALS OF ADMINISTRATION**—The ideal of the State was good government (*saurājya*). Good government means state under a king (*rājā*), after whom it was called *rājanvān* (*Rājanvān saurājye*, VIII.2.14). This points to the theory advocated both in Kauṭilya and in the *Jātakas*, according to which the institution of kingship emerged out of the people's desire to escape from the miseries attendant on 'no government' (the state of *mātsya-nyāya*). The people decided to elect a king, and thus making themselves *rājanvān* they realised the condition of peaceful society. The evils of kingless society

*arājaka rāshṭra* are described in the epics (cf. *Ayodhyākāṇḍa*, ch. 67; *Śāntiparva*, ch. 68).

**FUNCTIONS OF GOVERNMENT**—The successful working of government in a monarchy depends on the qualities and personal character of the king and his ministers. Training of the king in disciplined life was termed *Vainayika* (V.4.34). This is exactly the term used by Kauṭilya who deals with the training of princes in the chapter called *Vinayādbhikārika*. He considers *Vinaya* as the foundation of successful governance.

The *Vinayādi gaṇa* includes important terms relating to a variety of governmental functions of which the following may be noted: (1) *Sāmayika*, that which appertains to *Samayas* or established contractual relationships; (2) *Sāmayāchārika*, the subject of customary law or usage—the term forms the subject of a Section in the *Arthaśāstra* (Book V, Sec. 5)—and as stated by Āpastamba was the basis of *dharmā* (*Āthātāḥ sāmayāchārikān dharmān vyākhyāsyāmaḥ*, *Hindu Polity*, II. 106); (3) *Aupayika*, everything concerning ways and means (*Arth.* II.10, p. 74); *Vyāvahārika*, transaction of law; (4) *Ātyayika* urgent business, mentioned both by Kauṭilya (I.15, p. 29) and Aśoka (R.E.VI) as already seen, which required immediate attention of the king and his ministers; (5) *Sāmutkarshika*, problems of development; (6) *Sāmpradanika*, affairs relating to royal charities; (7) *Anpachārika*, State ceremonial; (8) *Sāmācharika*, the business of correct procedure. Obviously the author of the *Gaṇa-pāṭha* is here in touch with living tradition borrowing these terms from actual administration.

**MISCELLANEOUS DETAILS**—We have already noticed the maintenance of a Civil List with respect to the allowances of the king's household, ministerial staff, and other government servants. Pāṇini, according to the requirements of grammar, mentions only a few names, e.g., the Chief Queen, mother of princes and some of their personal attendants (IV.4.48), but that should be taken as part of a regular system which is elaborated in the *Arthaśāstra*. Salaried staff is termed by

Pāṇini as *vaitanika* (IV.4.12). We learn from the *Mahābhārata* that salary was disbursed on a monthly basis (Sabhāparva, 61.22). Patañjali also refers to *bhṛitaka māsa*, or month as the unit of time for payment of wages (II.275), and *bhṛitya-bharaṇīya* or wages of employees (*Bhāṣya*, I.370). The term *karmaṇya* (V.1.100) indicated efficiency arising out of adequately remunerated work, as noted by Kauṭilya (*etāvatā karmaṇyā bhavanti*, *Arth.* V.3, p. 247). Bribery is referred to (V.1.47); e.g. work for which a sum of rupees five was paid as bribe (*upadā*) was called *pañchaka*. The *Kāśikā* mentions the amounts of such bribes running up to a hundred or a thousand rupees. Reference is also made to the fabrication of accounts, *avastāra* (III.3.120), a term also known to the *Arthasāstra* with reference to corruption prevailing in government offices (*Arth.*, II.8, p. 65) which resulted in the embezzlement of government money (*kośa-kṣaya*).

Secret means employed in the espionage office were called *upanishat*, a pejorative sense of the original word *Upanishad* which denoted occult or mystic doctrine (I.4.79). Kauṭilya uses *Anupanishadikam* in the same sense (*Artha.*, XV). The adoption of such third degree methods was termed *upanishat-kṛitya*. The *Gaṇa-pāṭha* (IV.4.12) also mentions *anupanishadika*, a spy making his living by secret means called *upanishat* (*upanishadā jīvati*). In this connection attention may be drawn to the term *viśhya*, which according to Pāṇini denoted a person marked out for administering poison (*viśheṇa vadhyah*, IV.4.91). This refers to the nefarious practice of *rasadāh*, who formed a branch of the secret service, (*Artha.*, I.12, p. 21; V.3, 248).

**SOURCES OF REVENUE**—Pāṇini makes a general reference to sources of revenue as *āya-sthāna*; the object of the *sūtra* is to teach that the name of the revenue is derived from the name of the source producing that income (*Ṭhagāyasthānebhyaḥ*, IV.3.75). It appears that in the account registers maintained for revenue receipts income was entered according to its source.

For example, Patañjali mentions *śaulkika*, revenue derived from toll-taxes, cf. *śaulkaśālika* in *Kāśikā*; *gaṭmika*, forest plantations; *āpaṇika*, market-places (IV.2.104.13; II.295); to which the *Kāśikā* adds *ākarika*, income from mines. Pāṇini himself refers to the payment of imposts called *śulka*, (V.1.47). Toll-tax was described in terms of its amount, e.g. *pañchaka*, goods on which a toll of rupees five was paid (*tad asmin śulkaḥ dīyate*, V.1.47).

Specific mention is made of *śauṇḍika*, or income derived from excise (*Śauṇḍikādibhyo'ṇ*, IV.3.76). Kauṭilya states that the excise department was maintained as a State monopoly. Special regulations are given there to control the revenue from drinking booths. *Śauṇḍika* was the name of distilling plant, so called from the elongated condenser tube (*śauṇḍikā*) attached to the pot. Several specimens of them have been found at Takshasilā from Kushāṇa levels.

In the *Śauṇḍikādi gaṇa* we find reference to other heads of income, as platforms (*sthaṇḍila*), probably let out in market-places, wells (*udapāna*), stone quarries (*upala*), ferries (*tīrtha*), land (*bhūmi*), grasses (*trīṇa*) and dry leaves (*parṇa*), the last two items indicating to what limits the sources of revenue were exploited. Even now, contracts in respect of forest produce are given by government for collection of leaves, weeds and grasses.

**SPECIAL TAXES IN EASTERN INDIA**—There is a provision in *sūtra* VI.3.10 to regulate the names of certain special taxes in the eastern parts of India (*Kāranāmni cha Prācchān balādan*). Four examples are given by the *Kāśikā*: (1) *Sūṣe-śāṇaḥ*, a levy of one *śāṇa* coin (this coin is known from two *sūtras* of Pāṇini and was equal to one-eighth of a *Śatamāna*) realised per kitchen or household; (2) *Mukuṣe-kārshāpaṇam*, one *kārshāpaṇa* coin per capita (*mukuṣa*); (3) *Dṛishadi-māśbakaḥ*, one *māśbaka* coin collected from each hand-mill in a family; (4) *Hale-dvipādikā* and *Hale-tripādikā*, an imposit of two or three *pāda* coins on each *bala* or plough-measure

of land. These appear to have been customary levies imposed by the king on special occasions to meet emergent expenditure. Some of these taxes in modern terms are *pāg* (per head), *tāg* (per adult or poll-tax), *bār* (per plough), etc. It may be noted that Pāṇini does not name them by the usual word *kara* for 'tax', but they were known by the more emphatic word *kāra*. Pāṇini mentions a special class of officers named *Kāra-kara* (III.2.21), who, it appears, were entrusted with the raising of these taxes.

**ACCOUNTING**—*Gaṇaṇa* was the term used for accounting, and *vigaṇana* for discharge of accounts (I.3.36). The Superintendent of accounts (*gāṇanika*) and the clerks (*kārmika*) are mentioned by Kauṭilya in connection with the annual audit by the Accounts Office (*Arth.* II.7, p. 64). In the *Aśbṭādhyāyī* these two officers are mentioned in the *Gaṇa-pāṭha*, *kāraṇika* in IV.2.116 and *kārmika* in V.2.116. Falsification of accounts was called *avastāra* (III.3.120). The *Kāśikā* reveals the importance of the Heads of the Accounts Office (*gaṇakas*) when it refers to them as controlling all other officers from their desks in the accounts office (*Tishṭhantonuśāsati gaṇakāḥ*, III.2.126).

## CH. VII, SECTION 3. LAW AND JUSTICE

**DHARMA AND NYĀYA**—The word *Dharma* in Pāṇini has a two-fold meaning, firstly an act of religious merit, e.g. one who performs *dharma* is called *dhārmika* (IV.4.41); secondly it means custom or usage as in *sūtra* IV.4.92, according to which an act which does not deviate from *dharma* or usage is called *dharmya* (*dharmād-anapeta*). Pāṇini refers to payments fixed by long usage as *dharmya* (IV.4.47; VI.2.65). This second meaning of *dharma* crystallised in the earliest law, of which the oldest compilations were known as *Dharmasūtras*. Apastamba commences his work with the statement: *Athātah samayāchārikān Dharmān vyākhyāsyāmaḥ* (*Āpas.*, *Db. S.*, I.1.1), 'We shall now propound *Dharmas* or laws based on custom'. *Dharma* as a subject of study had been developed under the Vedic *Charaṇas* from before the time of Pāṇini, who refers to this subject in the *sūtra* *Charaṇebhyo Dharmavat* (IV.2.46), showing that the Vedic schools possessed distinctive texts dealing with *Dharma*, which were none else than the *Dharma-sūtras*. Kātyāyana explains it (IV.3.120.11) by saying that a *Charaṇa* had two-fold texts: (1) *Āmnāya* or sacred tradition compiled as religious canon, and (2) *Dharma* or customary law compiled from actual life.

Pāṇini takes *Nyāya* as *abbresha*, non-deviation from traditional practice (III.3.37). An action in accordance with custom or usage was called *nyāyya* (IV.4.92), which was analogous to *dharmya*.

**COURT**—Matters concerning Civil Law were termed *Vyāvahārika* (V.4.34, *Vinayādi gaṇa*). *Dharma-pati*, master of law, also occurs in a *gaṇa* (IV.1.84). The arbitrator chosen by the parties to a dispute was called *sthaya* (I.3.23, *vivādapadanirṇetā Kāśikā*). The plaintiff or complainant was known

as *parivādī* (III.2.142) or *parivādaka* (III.2.146). A witness was *sākshī*, whom Pāṇini defines as one who is an 'eye-witness' (*Sākshād drashtari samjñāyām*, V.2.91). Later on those who possessed hearsay evidence were also called *sākshī* (*Samaksha-darśanāt sākshī*; *śravaṇād-vā*, *Viśvādharmottara*, VIII.13). According to the *sūtra Svāmīśvara*, etc. (II.3.39) a witness was named according to the transaction or object in connection with which he was an eye-witness, e.g. a witness in relation to cows was called *go-sākshī*, and his evidence would be of use only on that particular point in the complaint.

The practice of administering oaths to witnesses was also known. *Sūtra* V.4.66, *Satyād-aśapathe*, prescribes a two-fold linguistic formation from the word *satya*: (1) *satyā-karoti* was used in connection with the payment of earnest money to settle a bargain; (2) *satyam karoti* was used in connection with the taking of oath. Manu informs us that this form of oath was reserved for witnesses of the Brāhmaṇa caste (*satyena śāpayed vipram*, VIII.113). For example, it was enough for a Brāhmaṇa to declare solemnly: 'I shall state the truth', and then to proceed with his evidence. The form of the oath for other castes was different and of a more materialistic nature. This nice distinction known to Pāṇini must have been developed in the *Dharmasūtras*, whence the tradition came down to the *Smṛitis*.

A surety was called *pratibhū* in relation to the loan for which he was bound as surety (II.3.39; III.2.179).

CIVIL LAW—Of the various items of *Vyavahāra*, only inheritance is referred to in the *sūtras*. One who inherits is called *dāyāda*, and the property which he inherits *dāyādya* (*Dāyādyaṁ dāyāde* VI.2.5). The *dāyāda* was designated according to the object in which he had beneficiary interest, e.g. if of several claimants one had an interest in cows, he alone was called *go-dāyāda* (II.3.39).

A co-sharer is referred to as *aṁśaka*, i.e., entitled to a share in the property (*Aṁśaṁ hārī*, V.2.69; cf. Manu, IX., 150-53

for division of *aṁśas*). The force of the suffix in the word *bārin* (*āvaśyake ṇiniḥ*) would make *aṁśaka* an heir with legal sanction. Both *dāyāda* and *aṁśa* are technical terms known to the *Dharmasūtras* (cf. *Vasishṭha Dh.S.*, 17. 25; 17. 48, 49, 51, 52).

**CRIMINAL LAW**—Crime was called *sābasikya* (I.3.32). Various forms of crime are referred to, e.g. theft (*steṇa*, V.1. 125), robbery (*luṇṭāka*, III.2.155) and way-laying (*pariṇatnam cha tiṣṭhāti*, IV.4.36). The word *aikāgārika* means a thief, who waits for an opportunity to enter a house when lonely. Buddhist texts use the term in a different sense, i.e., a monk who begged his food from one house only. In the *Majjhima Nikāya* Gautama describes himself as an *ekāgārika*, *dvyaḡārika* and *saptāḡārika* (*Mahāsīhanāda Suttanta*).

Various forms of the use of defamatory language and of expressing censure are given.

Punishment both by way of fines and physical torture is mentioned. The former was called *daṇḍa*, as in *sūtra* V.4.2 which regulates the expression for indicating the amount of fine, e.g. a fine of two *pāda* coins was mentioned as *dviṇḍikāṁ daṇḍitaḥ*; similarly *dviśatikāṁ daṇḍitaḥ*, a fine of 200 *kārshāpaṇas*. An accused adjudged for punishment was called *daṇḍya* (V.1.66, *daṇḍam arhati*; cf. Yāska, II.2 referring to one fit for clubbing and called *musalya*). Mutilation of limbs was called *chheda*, and the criminal so punished *chchaidika* (V.1.64). Capital punishment was *śīrṣa-chchheda* (V.1.65). Heinous crimes as infanticide and murder (*kumāra-ghāta*, *śīrṣa-ghāta*, III.2.51) are mentioned; so also destroying an embryo (*bhrauṇahatya*, VI.4.174), and killing a Brāhmaṇa (*Brahmahā*, III.2.87). Kauṭilya was in favour of stern administration of criminal justice and mentions *uchchheda* or death (II.13, p. 87) and *chheda* or mutilation of limbs as punishments for serious crimes (*Artha.*, IV.11, p. 229).

## CH. VII, SECTION 4. ARMY

**FOUR-FOLD DIVISION**—The organisation of the army as known to Pāṇini was based on the traditional four-fold division, *viz.* infantry, chariots, horses and elephants. These were known as *senāṅga*, or limbs of the army (II.4.2; cf. *bastyārobāḥ ratbinaḥ sādinaścha padātayaścha*, Udyogaparva, 30.25). There is a grammatical rule saying that the names of army-divisions when compounded take singular number, *e.g.* a combination of charioteers and horsemen was called *rathikā-śvāroham*; and of the former and foot-soldiers as *rathika-pādātam*. The compounds must have had their origin from the prescribed grouping of these different units for the purpose of military operations. An infantry division was called *padāti* (VI.3.52). Special mention is made of the infantry units organised in the Sālva country (IV.2.135). As against the *padāti* soldiers or footmen were the mounted ones called *sādi* (VI.2.41; cf. *sādi-padāti-yūnām*, Bhīshmaparva, 60.20). Pāṇini makes special mention of dromedary riders or camel corps (*ushtra-sādi*, VI.2.40). Mule and camel corps together are referred to as *ushtra-vāmi* (VI.2.40). Army was sometimes named in terms of caste, *e.g.*, *Brāhmaṇa-senā*, a Brāhmaṇa battalion (*Kāśikā* on II.4.25).

A big army required, besides its fighting services, a hierarchy of civil officers to manage its organisation, *e.g.* clerks, accountants and men in charge of supply. The accountants in charge of infantry and chariots are named as *patti-gaṇaka* and *ratha-gaṇaka* with a special suffix to denote their functions in connection with military accounts (V.1.129, *Udgātrādi gaṇa*). *Prītanā* is obviously mentioned as a Vedic word in *prītanāśbāt* (VIII.3.109).

**FIGHTING SERVICES**—The army to be effective must be

properly manned and officered. A cavalry commander was called *āsvapati* (IV.1.84). The commander of the army as a whole was *senāpati*, whose rank according to Kauṭilya was one of the highest in the realm mentioned along with the chief-minister and the crown-prince in the civil list. An ordinary soldier who served in the army was known as *sainika* or *sainya* (IV.4.45). A soldier with a marching army or bound for field operations was distinguished as *senāchara* (III.2.17). The principle underlying the nomenclature of the various classes of fighting forces was the same as found at present in such words as musketeers, lancers, riflemen, etc. Pāṇini says that the fighter is named after the weapon which he wields (*Prabaraṇam*, IV.4.57), e.g. *āsika* (swordsman), *prāsaka* (lancer), *dhānuśbha* (bowman). He makes special reference to those fighting with a battle-axe (*pāraśvadbhika*, IV.4.58), and spear (*śāktika*, IV.4.59). Patañjali says that in forming the names of armed persons no suffix is necessary, for example *kunta* would denote both a lance and a lancer (cf. *kuntān praveśaya*, II.218). Amazonian soldiers also seem to be known, as *śāktikī*, *yāśb-ḥikī*, mentioned by Patañjali (II.209), but since neither Pāṇini nor Kātyāyana makes provision for the addition of a female suffix after *īkak*, it is doubtful if the institution of women warriors was known before the Mauryan period. Kauṭilya mentions them in connection with the emperor's palace-guards (*strī-gaṇair-dhanvibhiḥ*, *Arth.* I.20, p. 12), and it is possible that it was an innovation of Chandragupta. Special mention is made of contingents of armoured soldiers organised as *kāvachika* units (*kavachinām samūhaḥ*, IV.2.41). *Kavachabara*, 'one who wears the coat of mail', was a term denoting the age at which a youth was admitted to arms (III.2.10). The armour seems to have become a part of regular military uniform for which a special root (*samvarmayati*, III.1.25, *don*s the armour) had come into use.

PARISKANDA—According to Pāṇini the word was pronounced as *pariskanda* in the Prāchya-Bharata region (*Kuru-*

*Pañchāla*), and *parishkanda* elsewhere (VIII.3.75). The word occurs in the Vṛātya hymn of the *Atharvaveda* (XV.2.6, *et. seq.*) denoting in the dual, the two footmen running beside a chariot (*Vedic Index*, I.497). The *Mahābhārata* also refers to footmen protecting the wheels of a chariot on either side (*ratbānām chakra-rakshāścha*, Bhīshmaparva, 18.16). The Greeks also found them as forming part of the full equipment of a chariot in the Indian army in the fourth century B.C. It is said of war-chariots that each of them 'was drawn by four horses and carried six men, of whom two were shield-bearers, two archers posted on each side of the chariot, and the other two, charioteers, as well as men-at-arms, for when the fighting was at close-quarters they dropped the reins and hurled dart after dart against the enemy.' (McGrindle, *Alexander's Invasion*, p. 260). The two shield-bearers correspond to the two footmen running by the side of the wheels, and called *chakra-raksha* or *pariskanda*.

ARMS—The general term for weapons is *praharaṇa* (IV.4.57), also mentioned in the *Arthasāstra*. Of names of weapons mention is made of bow (*dhanush*, III.2.21), spear (*śakti*, IV.4.59), battle-axe (*paraśvadha*, IV.4.58), long and short lances (*kāsū* and *kāsūtārī*, V.3.90; *brasvā kāsūḥ kāsūtārī*; *kāsūrīti śaktirāyudhavishesa uchyate*, *Kāśikā*) a special kind of missile called *beti* (III.3.97), and sword (*asi*; also called *kauksbeyaka* from its scabbard or *kukshi*, IV.2.96). Short lances were effectively used in ancient cavalry units of the Scythians and Parthians both on their advancing and retreating tactics. In the army led by Xerxes against Hellas, the Gandhārians are described by Herodotus as bearing short spears, which seem to have been *kāsūtārī* (Raychaudhury, *Polit. Hist.*, 1950, p. 242). A bow was also called *kārmuka*, which Pāṇini derives from *karman* or action in the field (V.1.103). Sāyaṇa derives it from *kṛimuka*, name of a tree (*Śatapatha*, VI.6.2.11). According to Kautīlyā a *kārmuka* bow was made of the wood of *tāla* or palmyra tree (*Arth.*, II.10,

p. 102). This agrees with Pāṇini who also refers to a bow made of *tāla*, and itself called *tāla* (*Tālād dhanushī*, IV.3.152, *tālani dhanuḥ*; also mentioned in the *Mahābhārata tālamayanī dhanuḥ*). Pāṇini mentions a specially big kind of bow called *maheshvāsa* (VI.2.38). According to Kauṭilya a bow was equal to five cubits or seven and a half feet (*Arth.*, X.5, p. 372). This appears to have been the size of the big bows called *maheshvāsa* in Pāṇini and known much earlier. The Indian soldiers under Puru in the battle of the Vitastā are stated by the Greeks to have used long bows, one end of which rested on the ground and was held by the archer's foot, who shot with its string long and heavy arrows with such force as no breast-plate could withstand.

The arrows were fitted with barbs (*patra*) to make them strike with deadlier effect. Pāṇini refers to the use of barbed arrows (*saṣatra*), causing extreme pain (*Saṣatra-nishṣatrād ativyathane*, V.4.61). This is confirmed by the account of Plutarch of the arrow with which Alexander was wounded in the fortress of the Malloi (*Mālavas*). He also gives the measurement of the barb: 'An archer let fly an arrow which transfixed his cuirass and pierced to the bones around his breast and there stuck fast, the shaft as it projected from the wound aggravating the pain (cf. Pāṇini's *ativyathana*), while the iron of the barb measured four fingers in breadth and five in length'. (McCrindle, *Alexander*, 1901, p. 207).

ART OF WAR—The *Āyudhajīvin*s were warrior tribes organised on a military basis into *Saṅghas*, occupying mostly *Vāhika* or the Panjab. Their members were known as *āyudhīya*, 'making a living by the profession of arms' (*Āyudhena jīvati*, IV.4.14). We know that these soldiers put up the stoutest resistance against the Greeks in the fourth century B.C. The *Āśvakāyanas* of *Maśakāvati* and the *Mālavas*, all *āyudhajīvin*s, constituted the finest soldiery, which extorted the admiration of the foreigners. The *Kshudrakas* and the *Mālavas* (*Gaṇa-pāṭha* of IV.2.45), we are informed by Kātyā-

yana, pooled their military strength in a confederate army called the *Kṣbandraka-Mālavī Senā*. The foot-soldiers (*padāti*) of the *Sālva* country have been especially noted (IV.2.135).

Pāṇini also refers to military sports or tournaments (*praharaṇa-kṛīḍā*, IV.2.57), in which young men participated for display of archery and swordsmanship. Pāṇini states that the names of battles were derived from a two-fold factor, viz. the names of combatants (*yoddhṛi*) and the objective (*prayojana*) for which they fought (IV.2.56). The *Kāśikā* cites *āhimāla*, a battle fought by the *Ahimāla* soldiers (*ahimālā yoddhāro'sya saṁgrāmasya*); *syāndanāśva*, fight by contingents of chariots and horses; *Saubhadra* and *Gaurimitra*, a battle for the sake of *Subhadra* and *Gaurimitrā*. Attacking with an army was termed *abhiśeṇayati* (III.1.25; VIII.3.65); encircling *pariśeṇayati*; and retreating *pradrāva* (III.3.27). *ANUŚATIKA*—Pāṇini refers to *Anuśatika* (VII.3.20), who was an officer of the Commissariat, according to the *Śukranīti*. He was an assistant of the *Śatānīka*, or commandant of 100 soldiers. 5 footmen were placed under a *Pattipāla*, 30 under a *Gaulmika*, and 100 under a *Śatānīka* (*Śukra*, II.140). The *Anuśatika* looked to army stores and recruitment.<sup>1</sup>

## CH. VII, PART 2. REPUBLICS IN PĀṆINI

### SECTION 5. POLITICAL SANGHA OR GAṆA

**JANAPADA AND JANAPADINS**—The country was divided into *Janapadas* demarcated from one another by boundaries (*Janapada-tadavadbhyoścha*, IV.2.124). In Pāṇini *Janapada* stands for country, and *Janapadin* for its citizens. The derivative meaning of the term *Janapada* points to the early stage of land-taking by the *Jana* for a settled way of life. This process of the first settlement on land had completed its final stage prior to the time of Pāṇini. The *Janapadas* which were originally named after the peoples settled in them, dropped their tribal significance and figured as territorial units or regions. Pāṇini testifies to this process (*Sūtrakāṇḍa*, I.2.51-57) by stating that the names of the *Janapadas* did not take after their original settlers, but were then current as independent proper names for territorial units. He even goes to the extent of arguing that if the derivative meaning of such geographical names as Pañchāla was insisted upon, there might be cases in which with the disappearance of the derivative cause, the name of the country itself formed on that basis should disappear (*Lub-yogāprakhyānāt*, I.2.54; *Yoga-pramāṇe cha tadabhāve' darśanam syāt*, I.2.55). This appears to be only a rational attempt to meet the views of extreme etymologists; it does not mean that in Pāṇini's time the essential relationship between the *Janapadas* and the *Janapadin* rulers had in any way weakened. We find that Pāṇini later on makes that relationship a real basis for his *sūtras*. For example, the *sūtra*, *Janapade lup* (IV.2.81) alludes to the name of a *Janapada* derived from its inhabitants but without any extra affix. Moreover, we find from Pāṇini's own statement that in the majority of the ancient *Janapadas* their origi-

nal Kshatriya settlers still held sway and the political power was concentrated in their hands.

In this connection *sūtra* IV.1.168, *Janapada-śabdāt kshatriyād-añ*, is important. Grammatically it teaches that the affix *añ* comes in the sense of a descendant after a word which is both the name of a country and a Kshatriya tribe. Here the identity of the *Janapadas* and the powerful Kshatriya clans settled there is repeated. These ruling Kshatriyas inhabiting the *Janapadas* were, as we are informed by Kātyāyana, governed by two-fold constitutions; some were monarchies and others were *Saṅghas* or republics (*kshatriyād-ekarjāt saṅgha-pratishedbārtam*, IV.1.168.1). As monarchical states, Pāṇini mentions the following: Sālveya, Gāndhāri, Magadha, Kālīṅga, Sūramasa, Kosala, Ajāda, Kuru, Sālva, Pratyagratha, Kālakūṭa, Aśmaka, Kamboja, Avanti and Kunti. Besides these names included in the *sūtras*, there might be others which were implied in Pāṇini's rules, of which Patañjali mentions Videha, Pañchāla, Aṅga, Dārva, Nīpa, Sauvīra and Ambashṭha, the latter two being mentioned in the *Ashṭādhyāyī* in a different context. The kings who ruled over these *Janapadas* were Kshatriyas, and the same word denoted both a descendant of the Kshatriyas, i.e., a citizen and their king (*Kshatriya-samāna-śabdāt janapadāt tasya rājanyapatyavat*, IV.1.168.3). For example, Pañchāla was the name of a Kshatriya descendent of the Pañchāla tribe and also of the king of that *Janapada*. Similarly, *Pañchālāḥ* in the plural was the name of the country as well as the name of the Kshatriya clan. Although a *Janapada* consisted of other castes also besides the ruling Kshatriya caste, still the political sovereignty was in the hands of the dominant Kshatriya clan who had founded that *Janapada*. This was a fact so patently recognized that Kātyāyana questions the advisability of including the word Kshatriya in *sūtra* IV.1.168. His point is that only the descendants of the ruling Kshatriya tribe were designated by the *apatya*-denoting suffix added after the name of a *Janapada*.

(*Kṣatriya-graṇānārtakye choktam*, IV.1.168.2). Patañjali definitely states that such words as *Kṣāndrakya* and *Mālavya* denoted only a member of the Kṣatriya caste, and not other sections of the population, such as the labourers or slaves living there (II.269). No doubt, there were Brāhmaṇas and other castes also inhabiting these *Janapadas*, but the political power was centred in the hands of the Kṣatriyas, and only in exceptional cases of any other caste.

**SANGHA**—We have seen above that Kātyāyana takes *Saṅgha* as a form of government distinct from *Ekarāja*, where sovereignty vested in one (*ekādhibā*), and not in the many as in the *Saṅgha* (*gaṇādhīna*). This meaning is also borne out by the rules of Pāṇini. Pāṇini speaks of *Saṅgha* as a generic term, applied to the following. Firstly, *Saṅgha* means 'a multitude', as in the expression *grāmya-paśu-saṅgha*, a herd of domestic cattle. In the same sense it is also applied to a multitude of human beings. Secondly, a *Saṅgha* was a term for a *Nikāya*, which is defined by Pāṇini as a corporate body where the distinction of upper and lower does not exist (*Saṅghe chānauttarādharye*, III.3.42). This applied to a religious *Saṅgha* functioning as a fraternity without distinctions of high (*uttara*) and low (*adhara*). Thirdly, there is the *sūtra*, *Saṅgh-odghau gaṇa-prasamsayoh* (III.3.86), which speaks of the political *Saṅgha* technically known as *Gaṇa*. *Saṅgha* and *Gaṇa* were used as synonymous words for a republic. Pāṇini speaks of the Yaudheyas as a *Saṅgha*, whereas they refer to themselves as a *Gaṇa* on their coins, albeit in the post-Pāṇinian period.

**THE RELIGIOUS SANGHA**—Pāṇini mentions the religious *Saṅgha* as *Nikāya*, as we have seen. The religious *Saṅgha* was a perfect copy of the political model except in one important respect. We shall presently see that in the Kṣatriya tribes organised as *Saṅghas*, the political power vested in the hands of those families which were eligible for regular coronation (*abbisbeka-maṅgala*) and consecrated to rulership

by that ceremony (*abbishikta-vamśyas*). Other castes in the *Gaṇa* did not share the political power, although they owed allegiance to the *Janapada* and the *Janapadins* (IV.3.100). This distinction between castes did not obtain in the sphere of religious *Saṅgha* based on equality. In fact, the different orders in the religious *Saṅgha* or Church were known as *Nikāyas*, of which the Buddhist *Saṅgha* in course of time developed eighteen. Not only Buddha, but other religious teachers who were his contemporaries, e.g. Purāṇa Kassapa, Makkhali Gosāla, and others have been called *Saṅghino*, heads of *Saṅghas*, *Gaṇino*, heads of *Gaṇas* and *Gaṇāchāriyo*, teachers of *Gaṇas*. The *Saṅgha* spirit in Pāṇini's time had influenced every sphere of public life, political, economic, religious, social and educational. Like the political *Saṅghas*, even *Gotras* and *Charaṇas* had their *aṅka* and *lakṣhaṇa*.

## CH. VII, SECTION 6. GAṆA POLITY

**RĀJANYA AS THE RULING CASTE IN A GAṆA**—The term *Rājanya* denoted the Kshatriya descendants of a *rājā*, whereas the others were called *rājana* (IV.1.137. For example, in the Andhaka-Vṛishṇi *Saṅgha*, only some members bore the title *rājanya*, as the descendants of Śvāphalaka, Chaitraka, Śini and Vāsudeva, whereas others like the Dvaipyas (inhabitants of the islands near the sea-coast) and Haimāyanas did not have that status although they too belonged to that *Saṅgha* (VI.2.34; *Andhaka-Vṛishṇayah ete na tu rājanyāḥ*). The *Kāśikā* defines *rājanya* as *abbishikta-vaṁśīya* Kshatriyas, i.e., leaders of families consecrated to rulership. It appears from this that not all the members of a *Saṅgha* were entitled to exercise political power, which was the privilege of only the governing class. It appears that the descendants of the pioneer Kshatriyas who had settled on land and founded the *Janapada* state, treated political sovereignty as their privilege which was transmitted in their families from generation to generation. In spite of the growth of population in a *Janapada*, the centre of power was not altered and the main authority continued to vest in Kshatriya hands. These Kshatriyas in a *Saṅgha* bore the title *rājā* which was applied to the head of each family who represented his *kula* in the *Saṅgha* assembly. The constitutional practice in the Sabhāparva (*gṛībele gṛībe hi rājānaḥ*, 14.2) had reference to this feature of Saṅgha polity, the opposite of which was a *Samrāt* government (*samrāj-śabdo hi kṛtsnabbāk*). Kauṭilya speaks of *Saṅghas* as *rāja-śabd-opajīvinah* (*Arth.*, XI.1, p. 378), i.e., 'those whose members bore the title *rājā*'. The Lichchhavis are said to have comprised 7,707 *rājans* living in Vesālī, and it is stated in the *Lalita-vistara* that each one of them thought: 'I am king, I am king,' (*Ekaika eva manyate abam rājā abam-rājeti*). Pāṇini mentions the Vṛjīs, of whose confederation

the Lichchhavis formed part. There is a reference in the *Jātakas* to the Lichchhavi rulers consecrated to rulership by sprinkling sacred water on them (cf. *Vesāli-nagare Gaṇa-rāja-kulānām abhiseka-maṅgala-pokkharāṇī*, *Jāt.*, IV.148). A similar custom prevailed amongst the *abbhikṣita-vamśiya rājanyas* of the Andhaka-Vṛishnis and other *Saṅghas*, which justified their designation *abbhikṣita vamśiya*.

**KULA**—The phrase *Gaṇa-rājakula* used in connection with the *Saṅgha* of the Vṛjis shows that the political *Saṅgha* called *Gaṇa* was composed of various *rājakulas* or royal families and that the heads of these *rājakulas* constituted the governing body of that *Gaṇa*. This is confirmed by the *Mahābhārata* which says that the members of a *Gaṇa* were equals of one another in respect of birth and family (*Jātyā ccha sadṛśaḥ sarve kulena sadṛśas-tatbā*, *Śāntiparva*, 107.30). Kauṭilya also states that *kula* was the unit of a *Saṅgha*.

The *kula* basis of the tribes appears to be vitally connected with a number of Pāṇinian *sūtras* dealing with *gotrāpatya* and *yuvan* descendants. Apart from those names which were *Ṛishi gotras* Pāṇini also includes a number of tribal names in the lists dealt with in the *Gotrāpatya* chapter. For example, in the very first *sūtra* (IV.1.98) Kuṇja and Bradhna were not names of *Ṛishi gotras* but of *Vrātas*, a class of rudimentary *Saṅghas* of the *Āyudhajīvī* pattern (V.3.113). The need for distinguishing the *gotra*-descendant from the *yuvan*-descendants should be understood clearly. In fact in the social as well as the political sphere, the family was the unit of representation, which was exercised through the head of each family, called *Kula-Vṛiddha* (*Śāntiparva*, 107.27). In grammatical literature, Pāṇini refers to him as *Vṛiddha*, which was a pre-Pāṇinian term for *Gotra* (*Vṛiddha-śabdaḥ pūrvāchārya-samjñā gotrasya*, *Kāśikā*; also Patañjali, I.248 on *sūtra* I.2.68; Kātyāyana IV.1.90.5). Pāṇini in his grammar substituted *Vṛiddha* mostly by *Gotra*, stating that all the descendants of an ancestor in a family except the son of the founder were called *Gotra* (*Apatyaṁ*

*pautra-prabhṛiti gotram*, IV.1.162). [ During his life-time the eldest male member who represented the family was the *Gotra* and the junior members were called *Yuvan*. Pāṇini also uses a third term, viz. *Vamśya*, to designate him; this also appears to be a pre-Paninian *saṃjñā* incidentally retained (IV.1.163). Each individual was given his personal name and a *Gotra* name. The latter came in for special attention by the grammarians owing to its importance in social and political life. According to Pāṇini only one member in the family at a time was to retain the title *Gotra*, the rest were called *Yuvan*. This implies that only one person, usually the eldest male member, represented his *Kula* on all important occasions and functions.

The family basis of *Gaṇa* polity preserved the hereditary character of its rulership vesting in the same families. The number and names of these families comprising the ruling class were carefully preserved as in the case of the Lichchhavis whose number is stated to be 7,707 in Pāli literature. In the capital of the Cheta state mention is made of 60,000 *khattiyas* all of whom were styled *rājāno* (*Jāt.*, VI.511), and must have represented so many Kshatriya members constituting that State. The craze for constituting new republics had reached its climax in the *Vābika* country and north-west India where clans consisting of as many as one hundred families only organized themselves as *Gaṇas*, as in the case of the hundred sons of Sāvitrī establishing themselves as a Kshatriya clan under the name of *Sāvitrī-putras* with the title *rājā* applied to each one of them (*Vanaparva*, 297.58; *Kaṇaparva*, V.49; and Pāṇini in the *Dāmanyādī* group, V.3.116).

**BHAKTI**—Pāṇini takes *bbhakti* to denote loyalty of the citizen to the State whether a kingdom or a republic, i.e. of the *Janapadins* to their *Janapada* (*sūtra* IV.3.100, *Janapadinām janapadavat sarvam*, etc.). The *Kāśikā* mentions, as examples of this kind of *bbhakti* or civic loyalty, (1) *Āṅgaka* (*Āṅgāḥ janapado bbhaktirasya*), (2) *Vāṅgaka*, (3) *Saubmaka*, (4) *Paunḍraka*, (5) *Madraka* and (6) *Vṛjijika*.

We may also consider such terms as *Sraugbnaḥ*, *Māthuraḥ*, one owning loyalty (*bbakti*) to the township of Srughna or Mathurā, as indicative of the civic devotion of a citizen to his city. Such formations as *Prāchya-sapta-samah*, 'a Prāchya for 7 years', *Gāndhāri-sapta-samah*, 'a Gāndhāri for 7 years' (*Dviguṇa pramāṇe*, VI.2.12, as explained by the *Kāśikā*) indicate citizenship acquired by domicile for stated periods.

**PARTY SYSTEM**—Pāṇini refers to *dvandva* denoting two rival parties, and to *vyutkramaṇa* denoting their rivalry for power (VIII.1.15). The *Kāśikā* explains it as the division of members into parties sitting separately in the House (*dvivarga-sambandhena prithagavasthitā dvandvaṃ | vyutkrāntā ityuchyante*, VIII.1.15). There were three terms to denote a party-member, viz. (1) *vargya*, (IV.3.54), (2) *grihya*, and (3) *pakshya* (III.1.119). *Vagga* as a technical term of the Saṅgha vocabulary had the same Pāṇinian meaning and denoted a party, as shown by the Buddha's teaching (*sukhā saṅghassa sāmaggī . . . neva Bhikkhave vaggena saṅgha-kammaṃ kātavyam* (*Mahāvagga*). The Party was named after its Leader (*Vargyā-dayaśca*, VI.2.131), e.g. *Vāsudeva-vargya*, *Vāsudeva-pakshya*, *Arjuna-vargya*, *Arjuna-pakshya*. Division of members out of allegiance to their respective parties was termed *vyāśraya* (V.4.48; *nānā-paksha-samāśraya*). This was indicated by a special linguistic formation, i.e. *Devā Arjunato'bbavan*, 'the Devas ranged themselves on the side of Arjuna' and *Ādityāḥ Karṇato'bbavan*, 'the Ādityas ranged themselves on the side of Karṇa'. The existence of party-system in the working of the *Gaṇas* is especially mentioned in the case of the Andhaka-Vṛishṇi Saṅgha (IV.2.34). Patañjali in commenting on Kātyāyana IV.2.104.11 mentions the party of Vāsudeva and that of Akrūra.

**EXECUTIVE**—In *sūtra* V.1.58, Pāṇini refers to the numerical strength of a Saṅgha which Patañjali explains as consisting of five, ten, or twenty members (*pañchakaḥ*, *dasakaḥ*, *viṃśakaḥ saṅghaḥ*, V.1.58 and 59). In *sūtra* V.1.60, he speaks of a *varga*

comprising five members called *pañchad-varga* or *pañchaka-varga*, and of another *varga* comprising ten members and named *daśad-varga* or *daśaka-varga* (*Pañchad-daśatau varge vā*). This seems to refer to the Executive of a *Saṅgha*.

In the *Antagaḍadasāo*, recounting the subjects ruled by Kṛishṇa Vāsudeva at Dvārāvati, reference is made to the ten principal Dāsārhas headed by Samudravijaya (*Samuddavijaya-pāmokhāṇaṁ dasaṇhaṁ Dasārhaṇaṁ*), and to five Mahāvīras with Baladeva as their leader (P. L. Vaidya's edition of *Antagaḍadasāo*, p. 4). The Dāsārhas were a clan forming part of the Andhaka-Vṛishṇi *Saṅgha*; a reference to ten of them with a Leader implies an Executive Body corresponding to the *Daśaka Saṅgha* of Patañjali on Pāṇini's rule. Similarly the reference to Baladeva and his four deputies constituting the *Pañcha-Mahāvīras* corresponds to the Inner Group called *Pañchaka Saṅgha*. The *Mahāvagga* (IX.4.1) also speaks of five kinds of *Saṅghas*, namely, those which had a *Varga* of four, five, ten, twenty or more members.

The *sūtra* *Pañchad-daśatau varge vā* (V.1.60) is of deeper significance. *Varga* here means quorum, or minimum number. It is stated in the *Mahāvagga* (V.13.2) that the Buddha vested the power of *upasaṁpadā* by means of a regular process, in the *Saṅgha* or the whole body of Bhikkhus; but in the outlying localities (*pacchāntimā janapadā* IX.4.1), where the requisite number of monks was not available (*Avanti-Dakkhiṇāpatho appabbikkhuko hoti*), the quorum for initiation was to be ten (*na ūna-dasa-vaggena upasampādetabbo*, 1.31.2) and for other matters five (*pañchavagga gaṇa*). This was permitting *vagga-kammata* in place of *saṅgha-kammata* and interdicting the practice of *duvagga* and *tivagga gaṇas*. The Pāṇinian terms *pañchad-varga* and *daśad-varga* seem to have reference to such a contingency. VOTING—Vote is termed *chbandas* in the *Ashtādhyāyī* (IV.4.93). Decisions reached as a result of voting (*Chbandaso, nirmite*) were called *chbandasya* (IV.4.93). We read in the

*Talapatta Jātaka* that the ministers and the citizens of Takshasilā decided to elect the Bodhisattva as their king with one vote (*Attha sabbe amachchā cha nāgarā cha ekachchbandā butvā, Jātaka, I.399*).

**QUORUM**—The idea of quorum was known. Pāṇini refers to *gaṇatitha* as the person whose attendance completes the *Gaṇa* (*Gaṇasya pūraṇaḥ, V.2.52*; similarly *saṅghatithaḥ* and *pūgatithaḥ*). The rule of quorum was strictly observed. The *Mahāvagga* refers to a *gaṇa-pūraṇa* who acted as the 'whip' to secure a complete quorum (III.3.6).

**STATE EMBLEMS**—*Aṅka* and *Lakṣhaṇa*. As mentioned in *sūtra* IV.3.127 (*Saṅghāṅka-lakṣhaṇeṣu-añ-yañ- iñām aṇ*), a *Saṅgha* had its *aṅka* and *lakṣhaṇa*. The *lakṣhaṇa* denoted the heraldic symbols or marks of a *Saṅgha* which they employed on their coins, seals and banners, etc. Pāṇini himself refers to symbols marked on cattle as *lakṣhaṇa*. On the tribal coins we find a great variety of symbols and these represent the *lakṣhaṇas* of the *Saṅghas* which issued them. The *Mahābhārata* takes *aṅka* as a synonym of *lakṣhaṇa* in describing the census (*smāraṇa*) of the royal cattle by branding them with proper marks (*Vanaparva, 240.5*). But in Pāṇini's *sūtra*, *aṅka* seems to stand for the legend adopted by the States, like *Mālavānām jayaḥ* or *Yaudheya-gaṇasya jayaḥ*, as found on their coins. *Lakṣhaṇa* is the same as *lāñchhana* or heraldic crest of later Sanskrit.

**JAYA**—In the *sūtra*, *Jayaḥ karaṇam* (VI.1.202) Pāṇini refers to *jaya* as a technical term implying an instrument of victory (*jayanti teneti jayaḥ, Kāśikā*), which was distinguished from the other word *jaya* denoting victory by an acute accent on its initial vowel. This term is found on many *Gaṇa* coins and must be interpreted in the new light received from Pāṇini's rule. For example, the formula *Yaudheya-gaṇasya jayaḥ* on the coins of the Yaudheya republic, proclaims the coin as the symbol of Yaudheya authority. The issuing of coins was an exclusive prerogative of their sovereignty over that territory.

## CH. VII, SECTION 7. ĀYUDHAJĪVĪ SANGHAS

**ĀYUDHAJĪVĪ SANGHAS**—Pāṇini refers to a number of *Saṅghas* as *āyudhajīvin* (V.3.114-117), meaning those who lived by the profession of arms. In *sūtra* IV.4.14, *Āyudhāch-cha cha*, one who earns his living by means of arms (*āyudhena jīvati*) is called *āyudhīya* or *āyudhika*. Kauṭilya refers to two kinds of *janapadas*, (1) *āyudhīya-prāyāḥ* (explained as *āyudha-jīvi-Kshatriyādi-prachurāḥ*), those mostly comprising soldiers, and (2) *Śreṇi-prāyāḥ* comprising guilds of craftsmen, traders and agriculturists. The former (and also his *śastropajīvins*) correspond to Pāṇini's *āyudhajīvī Saṅghas*, which were the same as the *yodbājīvas* of Pali literature.

**FOUR KINDS OF ĀYUDHAJĪVINS**—Pāṇini classified his material of the *āyudhajīvin Saṅghas* under several heads, viz. (1) *Saṅghas* in Vāhika (V.3.114); (2) of Parvata (IV.3.91) or mountainous country; (3) *Pūgas* organised under their *Grāmaṇī* into some form of *Saṅgha* government (V.3.112); and lastly (4) *Vrātas* living by depredation and violence (V.3.113; V.2.21), and having only a semblance of *Saṅgha*. The most advanced *āyudhajīvin Saṅghas* belonged to the Vāhika country (V.3.114), which comprised the region from the Indus to the Beas and the Sutlej (Kauṭilya, 44.7; *Hindu Polity*, 1.34). These were the Yaudheyas, Kshudrakas, Mālavas, etc.

**MOUNTAINEERS**—A very important group of martial *Saṅghas* comprised those occupying *Parvata* or some mountainous region in the north-west. According to the true import of Pāṇini's rule, those whose ancestors once lived in the Parvata region continued to retain their original appellation of the ancestral homeland (*abbijana*), although for the time being they might have migrated elsewhere (*Āyudhajīvivibhya-*

*śchbhaḥ parvate*, IV.3.91; *so'syābbijana iti vartate*, *Kāśikā*). Evidently this Parvata region must have been outside the plains of the Vāhika country, which brings us to the highlands of north-west as the home-land of the *āyudhajīvins*. The *Kāśikā* mentions the *Hṛdgolīyas* of Hṛidgola, probably Hi-lo of Yuan Chwang (modern Hiḍḍā south of Jalalabad); *Andhakavartīyāḥ* of Andhakavarta, perhaps Andkhui, a district in the north-east of Afghanistan (*Imp. Gaz.*, Afghanistan, p. 80), and *Rohitagīriyas* of Rohitagiri, which last is important as reminiscent of Roha, old name of Afghanistan. All this portion of the country is up to the present day peopled by hardy and warlike mountaineers. The *Mārkaṇḍeya Purāṇa* refers to mountain-dwellers (*parvatāśrayiṇaḥ*) of the west, including such names as the *Nibāras* (*Nigrabhāra* of *Vāyu*, same as Nagrahāra or Jalalabad where Hṛidgola or Hiḍḍā is situated) and the *Hamsamārgas* (modern Hunza in the north of Dardistan). Thus the country of the mountaineers extended from Kashmir to Afghanistan and most of the people settled in these mountains and their valleys were of the *āyudhajīvin* class. The *Bhīshmaparva* especially mentions the *Girigahvaras*, dwellers of mountain caves, as a people of the north-west (*Bhīshmaparva*, 9.68; cf. *Pratīchyāḥ Pārvatīyāḥ*, Udyoga, 30.24), and this epithet appropriately applies to the tribes of the north-west. They were the same as the *saṅgbāḥ girichārīṇaḥ* and *girigahvaravāsiṇaḥ* (*Droṇaparva*, 93.48). Arrian mentions these mountainous Indians as fighting in the army of Darius against Alexander at Arbela (*Anabasis*, III,8.3-6). It was these *Parvatīya* *Āyudhajīvins* that offered stout resistance to Alexander in Bactria and Gandhāra. The approximate location of these *Parvatīyas* should be sought for in the region of the Hindukush on both sides of it. Roha, of medieval geographers, Rohitagiri of Pāṇini, the ten *maṇḍalas* of Lohita (*Sabhā*, 24.16) and Rohitagīriyas of the *Kāśikā*, all together point to the mountainous regions of central and north-east Afghanistan as being the *Parvata* country, which name survives in Kohistan. We may

now form a clear conception of the geographical distribution of the three types of *Saṅghas* in Pāṇini: (1) the *Āyudhajīvins* of Vāhika from the Indus upto the Beas and the Sutlej, of whom a special group occupying the mountainous Kangra region was called *Trigarta-Shashṭha* (V.3.116); (2) *Pūgas*, under the leadership of *grāmaṇīs*, settled on the right bank of the Indus (*Sindbukūlāśritā grāmaṇīyāḥ*, *Sabhāparva*, 32.9), corresponding in all probability to the present day "Tribal Area" to the west of the Indus; (3) *Parvatīyas*, or the Highlanders of Afghanistan and the Hindukush, who included also the tribes of Dardistan. These contained many living only in the *Vrāta* stage of existence. It is evident that the *Saṅghas* in the innermost belt were the best organised of all and lived in a higher stage of civilization owing to Aryan contact and proximity and those in the outlying parts were much less civilised.

**PŪGA AND VRĀTA**—The Vāhika land and the Parvata country were reeking with *āyudhajīvin* tribes governed by constitutions of different types. The highest form of government evolved amongst them was the *Saṅgha*. Under the *Saṅgha* polity also there were several stages of development. Some were only aristocratic oligarchies; others were of the Rājanya variety whose descendants are to be seen most likely in the Rāṇas of the Panjab Hill States; and still others were politically so well organised as to associate the whole *Janapada* with the sovereign right of issuing coins.

But besides *Saṅgha* there were other elementary forms of democratic institutions in existence amongst those *āyudhajīvins*, three of which as *Śreṇi*, *Pūga* and *Vrāta* are particularly noteworthy. The word *Śreṇi* possessed a political significance also as shown by the expression *Kshatriya-śreṇi* found in the *Arthaśāstra* for a class of *Vārtā-śastroḥajīvins*. The *Mahābhārata* also knows of *Śreṇi* as a political institution. It mentions *Śreṇis* fighting on the side of Duryodhana (*Śreṇayo babu-sāhasrāḥ saṁśapatakagaṇāścha ye*, *Kaṇṇaparva*, V.40). These must be corporations of fighting Kshatriyas. Pāṇini's *sūtra*

II.1.59, *Śreṇyādayaḥ kṛitādibbiḥ*, shows the political development at work among the *Āyudhajīvan* peoples organising themselves into new *Śrenis* and *Pūgas*. Bands of *āyudbjīvin* warriors were coming under the general influence of political awakening and emerging into organised political life. The linguistic formation such as *aśreṇayaḥ śreṇayaḥ kṛitāḥ Śreṇikṛitāḥ* points to these new political developments. Similarly *Pūga-bbūtāḥ*, (*apūgāḥ pūgā bbūtāḥ*, 'those who were not organised as *pūga* became so organised'), and *Eka-bbūtāḥ*, 'tribes organising themselves as one political unit under a common ruler' (*ekādbhīna*) or king.

**PŪGA**—*Pūga* was less developed than a regular *āyudbjīvi Saṅgha*, but better organised than a *Vrāta*. The *Kāśikā* makes *Pūga* a species of *Saṅgha* composed of members of different castes without any regular occupation, but probably of a peaceful character intent on earning money (*nānā-jātīyā aniyata-vṛittayo arthakāma-pradhānāḥ Saṅghāḥ Pūgāḥ*, V.3.112). Pāṇini mentions *Pūga* along with *Saṅgha* and *Gaṇa* in connection with a quorum, the member whose presence imparted to the *Pūga* its completeness being mentioned as *Pūgatittha* (*pūgasya pūraṇaḥ*, V.2.52). This shows that the method of deliberation prevailing in the *Pūga* was similar to that in the well organised *Saṅghas* and *Gaṇas*.

**Grāmaṇī Constitution of Pūgas.** *Sūtra* V.3.112 is important as throwing light on the nature and constitution of *Pūgas*. It shows that *Pūgas* derived their names in two ways; some were named after their Leader or *Grāmaṇī*, and some from other circumstances (*Pūgāñṇyo'grāmaṇī-pūrvāt*, V.3.112). The *Kāśikā* mentions Lohadhvaja, Chātaka and Śibi as *Pūgas* whose names were not derived from those of their leaders. But Devadattaka and Yajñadattaka are given as typical names of *Pūgas* called after the name of their *Grāmaṇī*. Thus those who recognised Devadatta as their *Grāmaṇī* were called *Devadattakāḥ*. This fact is significant, as we know that the organisation of a corporate band of persons under one

leader is still the prevailing custom in the North-West. Many of the Pathan tribes or *khels* are named after their ancestral leaders corresponding to ancient *Grāmaṇīs*. Isazai, Usufzai, both living on the banks of the Indus, are names of this type. The name of the *Pūga* as derived from its original *Grāmaṇi* founder continued later on through generations.

The association of *Pūga* with *Grāmaṇi* in Pāṇini's *sūtra* points to their definite geographical area. We are told in the *Mahābhārata* that the warlike *Grāmaṇīyas*, i.e. clans named after their *grāmaṇīs*, lived on the banks of the Indus and they fought against Nakula in his western campaign (*Sindhu-kūlāśritā ye cha Grāmaṇīyā mahābalāḥ*, Sabhāparva, 32.9). We may thus locate the *Pūga* type of *Sanghas* organised under *Grāmaṇi* leaders in the tribal area to the west of the Indus. Pāṇini names some of these war-like tribes of the North-West Frontier, e.g. *Aśani* (*Parśvādi* group, V.3.117) perhaps, *Shinwāris* with their parent-stock of the *Kārshbuns*, to be identified with *Kārshāpaṇas* in the same *gaṇa*; the *Āprītas* or *Aparītas* (IV.2.53), same as Greek *Aparytai*, (*Camb. Hist.*, p. 339), modern *Afridis*. The Pathans are an ancient people, settled in their original homeland, the country of Vedic *Pakthas*, or *Pakṭeys* (country *Paktyike*) mentioned as being in the north-west of India by Herodotus (*Ved. Ind.*, I. 464), from which *Pakhtun* is derived. Several ancient Sanskrit names in the *gaṇas* correspond to names of these clans, e.g., the *Pavindas* (*Aśvādi gaṇa*, IV.1.110) corresponding to modern *Powindas* settled in the Gomal valley, armed tribesmen formerly occupying the Wana plain (*N.W.F.P. Gaz.*, p. 253), and the *Vānavyas* (*Naḍādi* group, IV.1.99; people of the *Vanāyu* country), corresponding to the people of the wide open *Wānā Valley* in the north of Gomal river.

These clans (*Pūgas*) are still governed by their Council of Elders, which according to the Frontier Crimes Regulation has a determining voice in the adjudication of criminal cases, and which represents survivals of the old form of *Sangha*

government which obtained amongst them.

*Kumāra-Pūgas*. In *sūtra* VI.2.28 there is a reference to Youth Organisations of these *Pūgas*, with the prefix *kumāra* added to their names, e.g., *Kumāra-Chātakāḥ*, *Kumāra-Lohadhvajāḥ*, *Kumāra-Balūbakāḥ*, *Kumāra-Jīmūtāḥ* (*Kāśikā*). These must have been organised under the auspices of their parent body or the Elders. Kauṭilya also mentions these two divisions as *Samghamukhyas* and *Kumārakas* distinctly existing inside *Samgha* organizations (*Arth.*, XI.1, p. 378). It is clear that the terms *kumāra* and *saṃghamukhya* correspond to what Pāṇini has designated as the *yuvan* members and *vṛiddhas*. Both the *Yuvan* and *Vṛiddha* members of each family received social and political recognition in the *Kula* as well as the *Samgha*.

**VRĀTA**—The *Vrātas* were bands of war-like roving aboriginal tribes, with whom the Aryans came into conflict. The *Ṛigveda* refers to the Aryan heroes as *vrātasābah* (VI.75.9). From Pāṇini it appears that the *Vrātas* lived in an elementary stage of *Samgha* government. The *Kāśikā* defines *Vrāta* as a *Samgha* living by violence (*utsedha-jīvināḥ saṃghā vrātāḥ*, V.3.113). Pāṇini refers to *Vrāta* in a two-fold sense, the other being depredation or physical violence by which those people made a living (*Vrātena jīvati*, V.2.21), from which they were known as *Vrātīnas*. This was the general name given them by *Lāṭyāyana* also. According to Weber they were non-Brahmanical western tribes comprised of *yaudhas* or warriors (Weber, *H.I.L.*, p. 78; *Vedic Index*, II.344, agrees with this). Since Pāṇini's time up to now the predatory habits (*utsedha*) of these tribes have continued. For example, the Zakkakhel clan of the Afridis are notorious as the most active bands of thieves on the Frontier (*N.W.F.P. Gaz.*, p. 236). The *Kāśikā* explains *vrāta* as physical violence, and the word *utsedha* used there corresponds to *prasedha* of the *Lāṭyāyana Śrautasūtra* used for the *Vrātyas* (*Vrātyāḥ prasedhamānā yānti*, VIII.6 7; commentary, *lokam āsedhantaḥ praśayantaḥ*). The object of

*sūtra* V.3.113 (*Vrāta-chpphañor-astrīyām*) is to regulate the formation of the names of *Vrātas* of which the *Kāśikā* cites two examples, viz., *Kapotaṭpākāḥ* and *Vṛibimatāḥ*. The *Mahābhārata* regards the *Dārvābhisaras* and *Darads* as *Vrātas* (*Droṇaparva*, 93.44; Vulgate).

*VRĀTAS=VRĀTYAS*—The *Vrātas* seem to have been the same as *Vrātyas* (cf. Sāyaṇa explaining *vrāta* of *Tāṇḍya* XVII. 1.5; as *vrātya-samudāya*). The *Śrāntasūtras* give details regarding *Vrātyas* as to their modes of life, belongings and dress. They are said to have used a kind of very small wagon covered with a plank for seat and useful for driving along trackless paths (*vipatha*; also *phalakāstīrṇa*, from which Hindi *phirak* a dialectical word still current), a stringless bow not using arrows but probably sling balls or pellets, bellow-like skin quivers (*bbastrā* or *kalāpa*) as used by the Sakas, a silver disc round neck, goat-skin or *postīn* (*āvika*), tilted cornate turban, and a kind of cloth woven with black thread (*vāsaḥ kṛishṇa-daśam kadru Kātyāyana Sr.*, XXI.134), or of a different colour, but fringed with streaks of strong block colour (XXI.135) and called *kadru* (*kṛishṇa-sūtrotaṁ tat-kadravākhyam*, com.) Pāṇini's reference to *Taitila-kadrū* (VI.2.42) is very likely to the *kadru* cloth of the Taitila country. Kauṭilya mentions Taitila as a breed of horses which from its association with other names of north-western countries as Kambhoja, Sindhu, Bāhlīka, Sauvīra and Vānāyu (Wana Valley) should be taken as being imported from north-west India (*Arth*, II.30, p. 133). This gives an indication of the place of origin of the *Taitila-kadrū*, if the rendering of *kadrū* as the name of a fabric in use amongst the *Vrātyas* be correct.

The *Vrātyas* were more backward in their political organisation than the *Pūgas*. They were subordinate to a leader distinguished by his *nishka* ornament of silver (*nishko rājataḥ, Kātyāyana*, XXI.138; *Vedic Index*, II.344). Like the *Pūgas*, their leader also seems to have been called a *Grāmaṇī* (V.3.112). In the *Śāmyutta Nikāya*, a *yodhājīva gāmaṇī* discourses with

the Buddha (IV.308-09). From his talk it appears that there were many old *ācāryas* among them who themselves being soldiers held out to those dying in action the hope of becoming one with the Sarañjita Devas (the gods of "Passionate Delight", D.P.P.N., II.1068). This agrees with the description of the *Lāṭyāyana Śr.* which draws a distinction between the *yaudhas* (warriors) and the *arhants* or teachers or priests wearing red turbans. (cf. Patañjali's *lobītosbñishāḥ ṛitvijah, Bhāṣhya*, I.1.27; I.86; also *Kāt. Śr.*, XXII.3.15).

**VRĀTYA-STOMAS**—Earnest attempts were made to reclaim these people to the Aryan fold by the performance of some easy rituals called *Vrātya-stoma*, considered adequate to purify them (*mṛijānāḥ yanti, Kāt. Śr.*, XXII.4.26), to put an end to their stigma (*vrātyastomeneshṭvā vrātya-bhāvād virameyuh, ib.*, XXII.4.29), and to entitle them to social intercourse (*vyayabāryā bhavanti, ib.* XXII.4.30). It is possible that the converted *Vrātyas* who had been admitted to the *Brāhmaṇa* or *Kshatriya* fold were spoken of as *Brāhmaṇa-kṛitāḥ*, and *Kshatriya-kṛitāḥ*, expressions read along with *Śreni-kṛitāḥ*, *Pūga-kṛitāḥ*, etc. in the *Śrenyādi gaṇa* (II.1.59).

These social formations indicate a vigorous movement to absorb in the Hindu society elements that were at one time outside the Aryan pail. In Pāṇini's time social movements of this type were in brisk operation as evidenced by certain words in the *Ashṭādhyāyī*. Sometimes even after the transition of a particular people from the *Vrāta* stage to that of a *Saṅgha*, pockets of *Vrāta* soldiery continued to exist. This was true of the Andhaka-*Vṛishṇi Saṅgha*, about which *Kṛishṇa* says that 'contingents, 18,000 strong, are organised still as *Vrātas* in our *Kula* organisation' (*ashṭādaśa-sahasrāṇi vrātānāṃ santi naḥ kule, Sabhāparva*, 13.55).

**FOUR-FOLD VRĀTYA-STOMAS**—The *Vrātya-stoma* ritual was made an extremely simple affair, allowing much latitude to its performer. Naturally the *Vrātas* could not been expected to handle elaborate ritual. It is therefore laid down that

the Vrātya-stoma sacrifice can be performed in ordinary fire (*laukika agni*, com. on *Kāt.* I.1.14), and with such ingredients as could be obtained in each locality (*yathādravye janapade, ib.* XXII.2.22). One can easily perceive that the four kinds of Vrātya-stomas were prescribed for corresponding elements of the Vrāta population:

(1) For cultural leaders in Vrātya society (*vrātya-gaṇasya ye sampādāyeyuḥ, Kāt.*, XXII.4.3). These were the same as are designated *āchāryas* in the *Saṃyutta Nikāya* (cited above).

(2) For those who actually lived by violence, (called *nindita* and *ṛṣāṇisa* (*Kāt.*, XXII.4.4), corresponding to the *utsedha-jīvins* of grammatical literature.

(3) For youngsters (*trīṭīyana kanishṭhāḥ, Kāt.*, XXII.4.5; = *Yuvānaḥ*), who had not yet developed criminal habits. We are at once reminded of Pāṇini VI.2.28 referring to *Kumāra-Pūga*. This shows two things, viz. existence of juvenile groups amongst the *Vrātyas*, and similarity in the political texture of *Pūgas* and *Vrātas* as crude *Saṅgha* organisations.

(4) The last Vrātya-stoma converted the elderly members of a Vrātya community, *jyeshṭhāḥ* (*Kāt.*, XXII.4.6) also called *sthavira* (XXII.4.7), corresponding to what Pāṇini calls *Vriḍḍha* in distinction to the *Yuvan* members in the families. It is thus clear that this four-fold programme aimed at working on more than one front at a time to accelerate the process of Aryanisation of the Vrātya elements in the population.

## CH. VII, SECTION 8. NAMES OF REPUBLICS

**ĀYUDHAJĪVI SANGHAS**—Pāṇini mentioned the *āyudhajīvī Saṅghas* by name in *sūtras* V.3.115-17 and in the three *gaṇas* of these *sūtras*, *Dāmanyādi*, *Parśvādi* and *Yaudheyādi*. The chapter opens with a reference to such *Saṅghas* in the Vāhika country, the cradle-land of martial tribes who cultivated military art as a way of life. Mostly they were Kshatriyas. But *sūtra* V.3.114 (*Āyudhajīvī-saṅghaṁ-ūyaḍ Vahīkeshva-Brāhmaṇa-Rājanyāt*) shows that some of them were Brāhmaṇas also, e.g. the Gopālavas, and others called Rājanyas, which most likely correspond to those Hill States whose ruling classes designate themselves at present as Rāṇās. The Śālaṅkayanas are stated by the *Kāśikā* to have belonged to the Rājanya class, and they seem to be an ancient community, as even Patañjali mentions them by the name of *Trika* (V.1.58; II.352), probably on account of their League of Three States (on the analogy of *Shashṭha* as applied to the League of Six Trigartas, V.3.116).

**NAMES OF SANGHAS IN THE SŪTRAS**—The following *āyudhajīvī Saṅghas* are mentioned in the *sūtras*:

1. *Vṛika* (V.3.115). An individual member of this *Saṅgha* was called Vārkeṇya, and the whole *Saṅgha* *Vṛika*. This name standing alone in the *sūtra* with a suffix peculiar from the rest is hitherto untraced. It is stated to be *āyudhajīvin*, but not necessarily associated with Vāhika. It should probably be identified with Varkaṇa, the Old-Persian form in the Behistun inscription of Darius, mentioned along with Pārthava or the Parthians (*Behistun Ins.*, Col. II.1.16). There is a striking similarity between the Sanskrit and Old-Persian forms of the name, e.g. Vārkeṇya equal to Vārkaṇa in the singular number, and Vṛikāḥ equal to Varkā in the plural as in the expression *Sakā Hauma-Varkā*. The country of the Vṛikas seems to have

been the same as Hyrcania lying to the north of Parthia and on the eastern corner of the Caspian (mod. Persian *Gurgan*, from *vṛika*=*gurg*, in the valley of the river of that name in the fertile district of Astarabad (*Sanjana Studies*, p. 251; *Enc. Br.*, 17. 566). The Persians distinguished the Varkas and in fact all the northern warlike equestrian people as Sacas (Persepolis Tomb Insc., *Sakā para-daraia*). The name *Vṛika* was known throughout the north-west as shown by its derivatives found in the several languages near Pāṇini's homeland, e.g. *Ishkashmī werk*, *Yidghā wurk*, *wurg*, etc. The title Bakanapati or Bar-kanapati, the chief of Varkanas, is applied to a Śaka governor of Mathurā who was associated with the foundation and repair of the Devakula of Wima Kadphises (*J.R.A.S.*, 1924, p. 402; *J.B.O.R.S.*, XVI, p. 258), whom Jayaswal identified as a Hyrcanian Saka. Pāṇini's acquaintance with a branch of the Śakas is not surprising, since he uses the Śaka word *kanthā* meaning 'town' in six *sūtras*. The Śakas were a very ancient race referred to in the Old-Persian inscriptions of Darius and settled both in Śakasthāna and on the borders of Parthia which were connected with Bāhlika and Gandhāra. Kātyāyana also has the expression *Śaka-Parthava* in a *vārttika* showing that in the fourth century B.C. he knew of the Śakas and the Parthians, probably by way of commerce, previous to their political invasions. The Virks are also a section of the Jāts in the Punjab, who originally seem to have been Scythians.

2. *Dāmani* (V.3.116). There is a strong resemblance between the name of this *Saṅgha* and a powerful warlike tribe still known as Damani and settled in the north-western portion of Baluchistan known as Chagai lying to the south of the Chagai Hills (*Imp. Gaz.*, Vol. X, p. 117).

3. *Trigarta-Sbashtba* (V.3.116), the League of the Six Trigartas. Trigarta stands for 'Three Valleys', viz., those of the rivers Ravi, Beas and Sutlej. The Trigartas represented a second cluster of mountainous *Saṅghas* being counted amongst *Parvatāśrayiṇaḥ* (*Mārk. Purāṇa*, 57.57), along with the Nihāras,

Dārvas, Karṇa-Prāvaraṇas, etc., who formed the north-western group. In earlier times this region, as now, was split up into a number of States. The *Kāśikā* mentions the Six Members of this Confederacy as follows:—

(1) Kauṇḍoparatha, (2) Dāṇḍaki, (3) Krausṭhaki, (4) Jālamāni, (5) Brāhmagupta and (6) Jānaki.

These are not identified. Brāhmagupta may be Bhramor. Jānakis are mentioned as helpmates of king Suśarmā of Trigarta (*Ādi.*, 61.17; *Udyoga.*, 4.17).

4. *Yaudheya* (V.3.117). Pāṇini's reference to Yaudheyas is the earliest known. The Yaudheyas have a long history as shown by their inscriptions and coins of different ages, and were existing upto the time of Samudragupta. Their coins are found in the East Panjab and all over the country between the Sutlej and the Jumna, covering a period of about four centuries, 2nd century B.C. to 2nd century A.D. The *Mahābhārata* mentions Rohitaka as the capital of the Bahudhānyaka country, where a mint-site of the Yaudheyas of Bahudhānyaka was found by the late Dr. Birbal Sahni. Sunet mentioned as Saunetra by Pāṇini was a centre of the Yaudheyas where their coins, moulds and sealings have been found. The Yaudheyas do not seem to have come into conflict with Alexander, since they are not named by the Greek writers. The Johiyā Rajputs who are found on the banks of the Sutlej along the Bahawalpur frontier may be identified as their modern descendants (*A.S.R.*, XIV., p. 114).

5. *Parśu* (V.3.117). The whole tribe was called *Parśavaḥ*, and a single member *Pārśava*. The Parśus may be identified with the Persians. The Parśus are also known to Vedic literature (*Rigveda*, VIII.6.46) where Lüdwig and Weber identify them with the Persians. Keith discussing Pāṇini's reference to the Parśus proposes the same identification and thinks 'that the Indians and Iranians were early connected' (*Ved. Ind.*, I.505).

Gandhāra, Pāṇini's homeland, and Pārśa, both occur as

names of two provinces in the Behistun Inscription, brought under the common sovereignty of Darius (521-486 B.C.), which promoted their mutual intercourse. Pāṇini knows Gāndhāri as a kingdom (IV.1.169). It seems that soon after the death of Darius Gandhāra became independent, as would appear from the manner of its mention by Pāṇini as an independent *janapada*. Pāṇini's *Pārsava* is nearer to the Old-Persian form *Pārsa* (cf. the Behistun Inscription) denoting both the country and its inhabitants, and king Darius calls himself a *Pārsa*, *Pārsabyā pusa*, 'Persian, son of a Persian' (Susa inscription, J.A.O.S., 51.222).

Baudhāyana also mentions the Gandhāris along with the Sparśus amongst western peoples (*Baudhāyana Śr.*, 18.44, p. 397; *Vedic Index*, II.489).

**ĀYUDHJĪVĪ SANGHAS IN THE GAṆA-PĀṬHA**—The three *gaṇas*, *Dāmanyādi*, *Parśvādi* and *Yandbeyādi* give some more names of *Āyudhajīvī Saṅghas*:

1. *Dāmanyādi group* (V.3.116). The names which are supported both by the commentary on *Chandra* and the *Kāśikā* are Aulapi, Audaki, Āchyutanti (or Achyutadanti), Kākādanti, Sārvaseni, Bindu, Tulabha (*Kāśikā* Ulabha), Mauñjāyana and Sāvitrīputra. Of these only the Sāvitrīputras are mentioned in the *Mahābbārata* (Vanaparva, 297.58; Karṇaparva, V.49) and should be located in the Panjab adjacent to the Uśīnaras. The Sārvasenis (also *Kāśikā*, VIII.1.5; VI.2.33; cf. Bhīṣmaparva, 10.59) seem to be a branch of the Sarvasenas mentioned in the *Śaṇḍikādi gaṇa* (IV.3.72), like Gāndhāri-Gandhāra, Sālva-Sālveya. As pointed out by Przyluski *kāra* in Madrakāra meant 'army' or 'troops', being an Old-Iranian word. It is the same as Skt. *senā* (*ante*, p. 57). The Madrakāras were a division of the Sālvas (IV.1.173). In medieval tradition the Sālvas were known as Kārakukshīyas (Hemachandra, *Abbidhānabintāmaṇi*, IV.23), a significant name derived from their territory containing rich pockets of *kāras* or soldiery. This is just the idea of Sārvaseni also,

and it appears that this was the region of north Rajasthan, where we have already located the Sālvās (*ante*, p. 55). This is confirmed by the *Kāśikā* counting it amongst three rainless areas, *viz.* Trigarta, Sauvira and Sārvasenī. (*Kāśikā* VIII.1.5; VI.2.33). Mauñjāyana (V.3.116; IV.1.99) seems to be Munjān in the Upper Oxus region, the home of the Ghalcha dialect called Munjānī (cf. *Mauñjāyanī* in IV.1.73 *gaṇa*). The Baijavāpis seem to be a genuine reading in the *gaṇa*, being included in the commentary on *Chandra* also. The name occurs in the *Raivatakādi* (IV.3.131) and *Sutaṅgamādi gaṇa* (IV.2.80), and is mentioned in the *Bhāshya* (II.4.81; I.496), *Cbaraka* (I.1.10), and the *Śatapatha* (XIV. 5.5.20, Baijavāpāyana).

2. *Parśvādi* (V.3.117). There are twelve names in this *gaṇa* common to both *Chandra* and *Kāśikā*, only the name Viśāla is new in the *Kāśikā* and may be an interpolation. The first three names Parśu, Rakshas and Asura are mentioned by Patañjali as forming part of this *gaṇa* and must be names of actual peoples and not mythical (*Bhāshya*, II.270). The following is the full list of the *Saṅghas* in this group:

(1) *Bābhlika*. Identified with Balkh in the extreme north of Afghanistan, which must have been organised as an *āyudhajīvi Saṅgha* in Pāṇini's time. It was reckoned as a satrapy of the empire of Darius, a little before Pāṇini's time.

(2) *Asura*. It is a generic name but in this case may be identified with the name of the Assyrians, whose country formed part of the Persian empire in the fifth century B.C. and is mentioned in the Behistun inscription as Old-Persian *Athurā*, and in Susian as *Aṣṣura*.

(3) *Piśācha*, literally a people who were consumers of raw flesh. Grierson has conclusively shown that the inhabitants of the North-Western Frontier, *i.e.*, of Gilgit, Chitral and Kafiristan, were of Piśācha tribe, where cannibalism, eating raw flesh, once prevailed and he also observes that in the south of the Kafir country, round about Laghman, are the

Pashai Kafirs whom Dr. Hoernle proposed to identify with Piśācha as a phonetically sound equation (Piśācha, *J.R.A.S.*, 1950, pp. 285-88). Discussing the question "Who were the Piśāchas?", he comes to the conclusion that they were originally a real people, probably of Aryan origin, who inhabited the north-west of India and the neighbouring parts of the Himalayas, and were closely connected with the Khasās, Nāgas, and Yakshas. Pargiter agreeing with Grierson's identification of the Piśāchas has observed that 'there can be no reasonable doubt that their character as demons or goblins was a later perversion of their real nature' (*J.R.A.S.*, 1912, p. 712). The existence of the Piśāchī Prakrit is so well attested to by literary references that there can be no reasonable doubt about its speakers being real human beings.

(4) *Rakshas*. By adding the *aṇ* suffix in a pleonastic sense (*svārthe*) prescribed by this very *sūtra* (V.3.117) we get the word form *Rākshasa*. They also appear to have been an actual people, probably of the north-west group and of the same racial character as the Piśāchas. The Rākshasas, Nāgas and the Piśāchas fight also in the Bhārata war on both sides (Pargiter, *J.R.A.S.*, 1908, p. 331). We find an important tribe named Rakshānis settled in Chagai district of North Baluchistan (*Imp. Gaz.*, X.117).

(5) *Marut*, unidentified, but possibly connected with the Pathan tribe called the Marwats, now settled in the Marwat Tahsil of Bannu district (*Imp. Gaz.*, VI.394).

(6) *Asani* and (7) *Kārshāpaṇa*. The juxtaposition of these two names seems to be significant, for we find two corresponding Pathan tribes, Shinwari and Karshabun, belonging to the same stock (*Imp. Gaz.*, N.W.F.P., p. 79). The preservation of a caste system, and the sanctity of the cow among the Shins, settled in the eastern Hindu-Kush region, north of Landi Kotal, point to their former religion being Hinduism. The mountain villages where Shins are in majority retain a trace of former idolatry in the sacred stones set up in one form or an-

other, in almost every hamlet (*Afghanistan Gazetteer*, p. 49). The change in religion has not yet brought about the seclusion of Shin women, who mix freely with men on all occasions, a survival of the days of their freedom.

(8) *Sātvata* and (9) *Dāsārha*. The *Sātvata* and the *Dāsārha* clans are stated in the *Mabābhārata* to have formed part of the *Andhaka-Vṛishṇi Saṅgha*.

(10) *Vayas* and (11) *Vasu* are names not identified.

3. *Yaudheyādi group*, is repeated twice in the *Ashṭādhyāyī* (IV.1.178 and V.3.117), a phenomenon somewhat unusual, as observed by the author of the *Nyāsa* (*Vichitrā bi gaṇānāni kṛitir-gaṇakārasyeti puṇaḥ paṭhitah*). Nine names are common to both lists and they alone seem to be genuine:

(1) *Yaudheya*, as explained above.

(2) *Śaubhreya*, probably named after an original ancestor called Śubhra referred to in *sūtra* IV.1.123 (*Śubhrādibhyaścha*). The name was possibly connected with the *Sabarcae* of Curtius, who are named as *Sabagrae* by Orosius. After the battle with the *Oxydrakai* (Kshudrakas) near the old junction of the Ravi with the Chenab, Alexander 'marched towards the *Sabarcae*, a powerful Indian tribe where the form of government was democratic and not regal (*Curtius*). Their army consisted of 60,000 foot and 6,000 cavalry attended by 500 chariots. They had elected three generals renowned for their valour and military skill;' (M'Crindle's *Alexander*, p. 252). The above description points to the *Sabarcae* having been an *āyudhjīvī Saṅgha*, which the *Śaubhreyas* of Pāṇini were. In this case the Greeks particularly noted the form of their government which was democratic and not regal.

The territory of this *Saṅgha* lay on the lower course of the Chenab after it met the Ravi. The tribe was settled near the river by which Alexander was returning with his fleet after his battle with the Kshudraka-Mālavas. Both banks of the river were thickly studded with their villages (*Alexander*, p. 252).

(3) *Śaukreyā*. Probably the Scythian tribe *Sakarauoi*, mentioned as *Saruka*, along with *Pasionoi* (*Prācīnī*) in the Puṇyaśālā Ins. at Mathurā.

(4) *Vārteya*, may be identified with the Indian tribe *Oreitai*, settled to the west of the river Porali which now falls into the Sonmiani Bay, west of Karachi (cf. Saunāmaneya in *Śubhrādi gaṇa* IV.1.123; also IV.1.86). According to Curtius the tribe had long maintained its independence in those parts and it negotiated peace with Alexander through their leaders, which reflects its *Saṅgha* character (*Alexander*, p. 169).

On the east of the river Arabis (old name of Porali) was another independent tribe which the Greeks called *Arabitai*, corresponding to Sanskrit *Ārabhaṭa* (the home of *Ārabhaṭi vṛitti*), a word unknown in Pāṇinian geography, but both of them as the Greeks noted, lay within the geographical limits of India.

(5) *Dhārteya* unidentified, probably the same as the *Dārteyas* (*Ved. Ind.*, I.353). The Greek writers mention Dyrta as a town of the Assakenoi or the Āśvakāyanas of Massaga, and this may have been the capital of the *Dārteyas*.

(6) *Jyābāṇeya*, a war-like tribe whose bow-string served as arrow. The *Vrātyas* of the *Tāṇḍya Br.* (XVII.1.24) and the *Śrautasūtras* appear to be the same as Pāṇini's *āyudha-jīvī Saṅghas* of *Vrāta* type. Amongst them we have a feature called *jyā-broḍa*, a kind of bow not for shooting arrows (*anishubhanushka*, *Lāt. Śr.*, VIII.7; and *ayogyā dhanu*, *Kāt. Śr.*, XXII.4.13), which seems to be a contrivance for hurling sling balls, most probably a pellet-bow. The *Jyābāṇeyas* seem to be a section of these *Vrātyas*. The *Mahābhārata* specifically mentions the Mountaineers (*Pārvatīyas*) as experts in fighting by hurling stone-blocks as big as elephant heads, and secondly by shooting stone-balls with slings (*kṣhepaṇīya*, *Dronaparva*, 121.34-35).

(7) *Trigarta*. It is mentioned here again although its

constituent states (*Trigarta-Shashthas*) have been referred to only in the preceding *sūtra* V.3.116.

(8) *Bharata*. This *gaṇa* alone mentions the *Bharatas* as an *āyudhjīvī Saṅgha*. It must be some old tradition, otherwise Pāṇini locates them in the Kuru region, on the borderland of the Udīchya and Prāchya divisions of India. According to another *sūtra* the Kurus lived under a regal form of government. It seems that these *Bharatas* lived round about Kurukshetra as a *Saṅgha* in Pāṇini's time.

(9) *Uśinara* already mentioned as a division of Vāhika. It is likely that it was under the *Saṅgha* government.

The above survey of the names of the *āyudhjīvī Saṅghas* as found in *sūtras* and the *Gaṇa-pāṭha* shows the dominant fact that the *Saṅghas* were clustered in the north-west regions of India and the Punjab, that they were mostly *āyudhajīvins* or martial tribes, a feature retained by most of them to this day, and that they were living in different stages of political evolution, ranging from the *Vrātas* and *Pūgas* to *Śrenis* and *Saṅghas*, as represented by the wild *Pisāchas* at one end and the highly organised *Yaudheyas* on the other.

**SOME MORE REPUBLICS**—Besides the *āyudhajīvī Saṅghas* stated as such in the *Ashtādhyāyī*, there were some other communities in Pāṇini's time, which as we know from other sources were republics. These were:

(1) *Vṛjji* (IV.2.131). They are known as *Vajji* in Buddhist literature and said to have included eight confederate clans of whom the Lichchhavis and the Videhas were the most important, both being described as republics in Buddha's time (*Buddhist India*, p. 25).

(2) *Rājanya* (IV.2.53). They are mentioned also by Kātyāyana and Patañjali and in the *Mahābhārata*. The abundance of their coins in Hoshiarpur district points to it as their region (*visbaya* or *deśa*). According to Pāṇini the country occupied by the *Rājanyas* was called *Rājanyaka*. It appears

that in the period after Alexander which witnessed large-scale tribal movements, a branch of the Rājanyas had moved to the region of Mathurā where also their coins have been found.

(3) *Mahārāja*. Pāṇini refers to *bhakti* shown to Mahārāja in *sūtra* IV.3.97. So far as the word form is concerned it is the same for the name of Mahārāja as a people and as a deity. The existence of a *Mahārāja Janapada* is proved by their coins found in the Panjab. Traces of the ancient name are probably still preserved in the collection of four large villages in the Moga Tahsil of Ferozpur district which is the headquarters of a Pargana and still called Mahārāja, held by the Maharajki clan of Jats. The Maharajkians who own the surrounding country as Jagirdars form a distinct community, physically robust and opposed to subordination (*Punjab Gazetteer*, I.453).

(4) *Andhaka-Vṛishṇi* (VI.2.34). The Purāṇas make them identical with the Sātvatas whom Pāṇini mentions as a *Śaṅgha* in the *Gaṇa-pāṭha*. The *Mahābhārata* refers to them as a *Śaṅgha* and so does Kauṭilya. Pāṇini refers to Rājanya leaders amongst the Andhaka-Vṛishṇis, which as explained by the *Kāśikā* denoted members of such families as were entitled to be consecrated to rulership (*abbhishikta-vamśya*). The chief feature of the Andhaka-Vṛishṇi constitution appears to be a full-fledged party system. The party of Akrūra and that of Vāsudeva are referred to by Patañjali showing that the followers of each leader were designated in accordance with their respective party leaders, e.g. *Akrūra-vargya*, *Akrūra-vargīṇa*, and *Vāsudeva-vargya*, *Vāsudeva-vargīṇa* (II.295).

(5) *Bharga* (IV.1.178). Pāṇini refers to the Bhargas as a Kshatriya tribe. The Buddhist records mention them as a republic.

**NAMES OF SOME IMPORTANT TRIBES**—Some tribes in the *Gaṇa-pāṭha* deserve to be mentioned as being of considerable importance. We are indebted to the Greek historians of Alexander for the information that most of these were republics.

(1) *Ksbudraka* (IV.2.45) identified by Sir R. G. Bhandarkar with the *Oxydrakai* of Greek writers. Curtius refers to them as *Sudracae* (M'Crindle, *Alexander's Invasion*, p. 238).

(2) *Mālava* (Gk. *Malloi*). According to the Greek writers both these communities were settled in the region where the Ravi joins the Chenab. They are said to have offered the stoutest resistance to the Greek invaders.

(3) *Vasāti* (IV.2.53; *Rājanyādi gaṇa*) identified with Greek *Ossadioi*, settled somewhere in the region of the confluence of the Chenab and Sutlej with the Indus.

(4) *Āprīta* (*Rājanyādi gaṇa*). These are to be identified with the *Aparytai* of Herodotus (*C.H.I.*, p. 339), the ancestors of the Afridis, whose own pronunciation of the name is *Āpridī*. Their country is called *Āpridī-Tirāh*.

(5) *Madhumant*.—Pāṇini mentions *Madhumat* as the name of a country in the region of Gandhāra (*Kacchbādi*, IV.2.133; *Sindhvādi*, IV.3.93). The name occurs in *sūtra* IV.2.86 also as a *deśa-nāma*. The *Mabābbārata* mentions the *Madhumantaḥ* as a people of the north-west (*Bhīṣmaparva*, IX.53). The *Madhumants* are clearly the *Mohmands*, who occupy the territory to the north of the Kabul river, their home-land *Dir-Bajaur* covering an area of 1200 sq. miles (*Afghanistan Gaz.*, p. 225). On the map one can at once notice the relative position of these two powerful tribes who were close neighbours. What appear to be the ancient names of *Dir* and *Tirāh* are preserved in *Patañjali*, who refers to *Dvīrāvatīko deśaḥ*, *Trīrāvatīko deśaḥ* as pair names (*Bhāṣya*, I.4.1; I.301; II.1.20; I.382). The former is *Dir* (land of the two rivers) so called from the *Mohmand* homeland between the *Kunar* and *Panj-kora* rivers. Similarly the extensive *Afridi-Tirāh* was *Trīrāvatīka*, from the three rivers *Kabul*, *Bara* and *Indus* (*Kubbā-Varā-Sindhu*) which enclose it.

(6)-(8) *Hāstināyana*, *Āśvāyana*, *Āśvakāyana*. The first is mentioned in *sūtra* VI.4.174, the second in IV.1.110, and the third in the *Naḍādī gaṇa* (IV.1.99).

While describing Alexander's campaign from Kapiśa towards the Indus through Gandhāra, the Greek historians mention three important war-like peoples, viz. the *Astakenoi*, with capital at Peukelaotis, the *Aspasioi* in the valley of the Kunar or Chitral river, and the *Assakenoi* settled between the Swat and the Panjkora rivers, with capital at Massaga, and more specially in the mountainous regions of the Swat. The Paninian evidence throws light on these three names for the first time:

- (a) *Aspasioi*=Āśvāyana; in Alishang or Kunar Valley.
- (b) *Assakenoi*=Āśvakāyana; in the Swat valley and highlands, with capital at Maśakāvatī.
- (c) *Astakenoi*=Hāstināyana; near the confluence of the Swat with the Kabul, with capital at Pushkalāvatī.

The Āśvāyanas and the Āśvakāyanas were the bravest fighters of all, being strongly entrenched in their mountainous fortresses. Alexander himself directed the operations against them. The Āśvakāyana capital at Massaga or Maśakāvatī is given in the *Bhāṣya* as the name of a river (IV.2.71), that should be looked for in that portion of the Suvāstu in its lower reaches where Mazaga or Massanagar is situated on it at a distance of 24 miles from Bajaur in the Yusufzai country. In times of danger the Āśvakāyanas withdrew into the impregnable defences of their hilly fortress which the Greeks have named Aornos. It appears to be the same as Varanā of the *Aśbī-ādhyāyī* (see *ante*, p. 69, for its identification with modern Unrā on the Indus). The Greeks also mention another of their towns, viz. Arigaeon, which commanded the road between the Kunar and the Panjkira valleys, and is comparable with Arjunāva of the *Kāśikā* (*rijunāvām nivāso deśaḥ*, IV.2.69).

## CHRONOLOGICAL CONSIDERATIONS

Our study of the historical material preserved in the *Aṣṭādhyāyī*, its geographical and cultural data, glimpses of social life and religious institutions, may help us to ascertain its chronological position.

**PREVIOUS VIEWS**—The question of Pāṇini's date has been discussed by many previous writers with different conclusions. We may profitably consider them. Goldstücker in his well-known work held that Pāṇini must have lived in the seventh century before the Christian era at the latest. He rightly observed: *'The investigation of the relative position which Pāṇini holds in ancient Sanskrit literature is more likely to lead to a solid result, than speculations as to the real date of his life.'* (Pāṇini, *His Place in Sanskrit Literature*, p. 67). His position was that Pāṇini lived after Yāska and before the Buddha. Sir R. G. Bhandarkar held the same view mainly on the ground that Pāṇini does not show acquaintance with South India. Pathak assigns him to the last quarter of the seventh century B.C., just before the appearance of Mahāvīra, the junior contemporary of Gautama Buddha. (*A.B.O.R.I.*, XI, p. 83). D. R. Bhandarkar proposed seventh century B.C. in his 1918 Carmichael Lectures (p. 141), which he later changed to about the middle of sixth century B.C. (*A.I.N.*, 1921, p. 46). Charpentier thinks that the date should be 550 B.C. (*J.R.A.S.*, 1913, p. 672-74). His revised view was: 'As for the date of Pāṇini I have suggested, sometime ago, that it should be placed somewhere about 500 B.C. and I feel more and more convinced that such a suggestion is mainly correct.' (*J.R.A.S.*, 1928, p. 345). H. C. Raychaudhry holds: 'In all probability Pāṇini lived after the Persian conquest of Gandhāra in the latter half of the sixth century B.C., but before the fourth

century B.C. With a date in the fifth century B.C. all the evidence accommodates itself.' (*Early History of the Vaiṣṇava Sect*, 1936, p. 30). Grierson believed that a century or 150 years at the most elapsed between Pāṇini and the Aśokan inscriptions, which represent the spoken dialect of the day. This would place Pāṇini about 400 B.C. Macdonell's latest view (*India's Past*) was that Pāṇini did not live later than 500 B.C. Bohtlingk, however, makes Pāṇini more modern by dating him to about 350 B.C. Weber placed him subsequent to Alexander's invasion. It is unfortunate that a scholar of his depth and mastery over grammatical intricacies should through a grievous misunderstanding of the *kārikā* on sūtra IV.2.45 about Āpisali and Kshudraka-Mālavas, have advocated a specious argument about the relative dates of Āpisali, Pāṇini and Alexander (*H.I.L.*, p. 222; see V. S. Agrawala, Patañjali on the Kshudraka-Mālavas, *Poona Orientalist*, Vol. I, No. 4, Jan. 1937, pp. 1-7). Liebich's opinion on this point is that we have not yet sufficient ground to come to a definite conclusion, but that in all probability Pāṇini came after the Buddha and before the commencement of the Christian era, and that he was nearer the earlier than the later unit. It would thus appear that the range of Pāṇini's date is in the opinion of scholars limited to a period of three centuries between the seventh and the fourth century B.C. We may now try to examine this question more closely within these two limits on the basis of the data set forth above.

**LITERARY ARGUMENT**—As Liebich has summed up, the literary argument of Goldstücker leads to the following result: the *Āraṇyakas*, *Upanishads*, *Prātiśākhya*s, *Vājasaneyī Samhitā*, *Satapatha Brāhmaṇa*, *Attharvaveda*, and the six philosophical systems were unknown to Pāṇini, but he knew the *R̥gveda*, *Sāmaveda* and *Kṛishṇa Yajurveda*. He holds that Pāṇini lived after Yāska. This argument does not bear scrutiny. Thieme from his critical study of Pāṇini's Vedic material has shown that the Vedic texts undoubtedly used by Pāṇini included the RV.

MS., KS., TS., AV., and most probably the SV. (*Pāṇini and the Veda*, 1935, p. 63); he further opines that Śākalya's Padapāṭha of the *R̥gveda* and the *Paippalāda Śākhā* of the *Atharvaveda* were also known to him. To take another significant example, Goldstücker had come to the conclusion that Pāṇini did not know the *Upanishad* literature, and hence his time should be antedated to the Upanishadic period. This position cannot be maintained since Pāṇini knew the word *Upanishad* in a pejorative sense (I.4.79) which must have taken considerable time to develop after the close of the Upanishadic age. On the basis of this *sūtra* Keith also accepted Pāṇini's knowledge of the Upanishads (*Tait. S.*, Eng. Trans., p. clxvii). But Pāṇini's literary horizon is not confined to Vedic texts only; it goes much further to include those several stages of literary and linguistic evolution at the end of which his own work came into existence. The Chapter on Literary Data has set forth this evidence exhaustively, and in that light we may vouchsafe that the process of literary evolution inside the Vedic *Charaṇas* had already brought into existence such literary types as the *Kalpa Sūtras* and the *Dharma Sūtras*. Outside the *Charaṇas* much of the Vedāṅga literature as *Vyākaraṇa*, with its special commentaries on Nouns and Verbs (*Nāmika* and *Ākhyātika*, IV.3.72) and a vast body of Yājñika literature and its commentaries had been compiled. Pāṇini also knows of the *Mahābhārata* (referred to for the first time in the *Āśvalāyana Gṛihya Sūtra*), the text of which must have taken shape by his time (Utgikar, *Bhandarkar Commemoration Volume*, p. 340). Further, he refers to later literary types, as *śloka* and their authors the *śloka-kāra*, to secular subjects like *Naṭasūtras*, and even to classical Sanskrit works, such as *Śisukrandīya*, *Yamasabbhīya*, and *Indrajananīya*, which were the earliest examples of classical poetry and are mentioned for the first time by Pāṇini. Pāṇini thus witnessed the rise of classical Sanskrit poetry and the *sūtra* and *śloka* forms of literature flourishing together in his time. Moreover, the style of his *sūtras* is much more

finished, as he himself would call it (*pratisbṛātām sūtram*), than that of some of the *Dharma-* and *Gṛhya-sūtras*. We must therefore abandon Goldstücker's estimate of Pāṇini's time.

**PĀṆINI AND THE SOUTH**—The argument that Pāṇini did not know of South India should not be pressed too far. Firstly, Yāska whom even Goldstücker considers prior to Pāṇini shows acquaintance with southern social customs and grammatical usage. As pointed out by Keith, Yāska "already mentions a southern use of the Vedic word *viṣāmātyi* for a son-in-law who pays to his father-in-law the price of the bride (*viṣāmātye śaśvad Dākṣiṇājāḥ kṛtāpatim āchakṣate*, *Nirukta*, VI.9; Keith, *His. of Sans. Lit.*, p. 15). Secondly, the Deccan was the home of Sanskrit as early as Kātyāyana's time whom Patañjali regards as a southerner on account of his partiality for the use of Taddhita (cf. *priya-taddhitāḥ Dākṣiṇatyāḥ*). Kātyāyana is not far removed in time from Pāṇini. According to Eggeling: 'As regards the dates of Kātyāyana and Patañjali I accept with Professor Bühler and others, as by far the most probable the fourth and the middle of the second century B.C., respectively (*Śatapatha Br. Intro.*). Thirdly, Pāṇini besides referring to the sea and the islands lying near the coast and in mid-ocean, actually mentions that portion of the country which lies between the tropics as *antarayana deśa* (VIII.4.25). It can refer only to the Deccan lying south of the Tropic of Cancer, which passes through Kachchha and Avanti. Pāṇini also knows of Āsmaka on the Godāvarī (modern *Paitbāṇa*) which was south of Avanti. He also refers to Kalinga on the eastern coast which too lay within the tropics. We thus see that Pāṇini's silence about the south is not quite so absolute as presumed by Sir R. G. Bhandarkar.

**PĀṆINI AND MASKARĪ**—It has been shown above that Pāṇini's reference to Maskarī Parivrājaka in the light of Patañjali's explanation of that name connecting it with the *Karm-āpavāda* doctrine, points to the teacher Mañkhali Gosāla, whose doctrine of Determinism, *Daishṭika Mati*, also finds mention in

## Chronological Considerations

Pāṇini. Dr. Hoernle holds that Gosāla lived about 500 B.C. (Ājivikas, *Hasting's Ency. of Religion and Ethics*, I.259 seq.). According to the *Bhagvatī Sūtra*, Gosāla founded his order at Sāvattthī sixteen years before his death. Charpentier agreeing generally with Hoernle thinks that the date of Maṅkhalī's decease should be moved a little later (*J.R.A.S.*, 1913, p. 674). This suggests the upper limit of Pāṇini's time at about 500 B.C.

**PĀṆINI AND BUDDHISM**—The fact that Maṅkhalī Gosāla was a contemporary of the Buddha and also known to Pāṇini helps us to understand some of the *sūtras* dealing with a few terms which have greater association with Buddhism, e.g. *Nirvāṇa* (VIII.2.50); *Kumārī Śramaṇā* (maiden nuns, II.1.70); *cbīvarayate* in the sense of 'donning the monk's robe' as explained by the *Kāśikā* (*saṁcbīvarayate bbikṣubh*, III.1.20), and the religious *Saṅgha* called *Nikāya* which did not know the distinction of upper and lower (*auttarādharya*). Such a *Saṅgha* was a typical Buddhist institution. It had been the custom among the primitive religious wanderers to be organised under a head who was called master (*Sattbā*). But the Buddhist sect after his decease developed on different lines, which was looked upon by contemporaries as somewhat strange. The headship was abolished, all members of the *Saṅgha* were on a footing of equality. The principle of obedience to a Master was watered down to respect and reverence for elders and politeness for equals. For the discharge of the functions of its collective life, the whole body of monks constituted a perfectly democratic community. This is exactly the nature of the new religious *Saṅgha* envisaged in the significant Paninian term *anauttarādharya*, III.3.42). The political *Saṅgha* called *Gaṇa*, although professing to be democratic, worked on a different model in which some were *rājānaḥ* and the others commoners. These institutions mark out a date for Pāṇini after the Buddha.

**ŚRAVIŚṬHĀ AS THE FIRST NAKSHATRA**—In a list of ten *nakṣatras* in *sūtra* IV.3.34, Pāṇini puts Śraviṣṭhā as the

first. Although the other stars in the *sūtra* are not strictly in the order of the ecliptic, the commencement of the list with Śravishṭhā appears to have a reason for it. Śravishṭhā was the first star in the calendar of the Vedāṅga Jyotisha which must have been compiled during the period when other Vedāṅga works including Vyākaraṇa were also written. As the subject is full of technical difficulties it would be safer to go by the opinion of experts in the matter. The relative positions of the *nakshatra* lists together with their significance is stated by G. R. Kaye as follows: 'The early lists all begin with Kṛittikā, but the *Mahābhārata* puts Śravaṇa first. The Jyotisha Vedāṅga begins with Śravishṭhā; the *Sūryaprajñapti* with Abhijit, the *Sūrya Siddhanta* with Aśvinī. But here Aśvinī is definitely equated with the vernal equinox, while Abhijit, Śravaṇa and Śravishṭhā, which are continuous, are equated with the winter solstice . . . ' (The Nakshatras And Precession, *Indian Antiquary*, Vol. 50, p. 47).

According to Tilak, as quoted by Kaye, it was stated by Garga that Kṛittikā was first for purposes of ritual, while for the purpose of the calendar Śravishṭhā was put first, the same as we find in Pāṇini's list. Leaving aside the question of the Kṛittikās standing at the head of the asterisms and the possible basis of this phenomenon in the coincidence of the vernal equinox with Kṛittikās at a certain epoch connected more properly with Vedic chronology, we must consider the implications of the reference to Śravishṭhā as the first of the Nakshatras. The generally accepted theory is that the Nakshatras were 27 or 28 constellations that roughly marked out the ecliptic. The winter solstice was at the first point of the Dhanishṭhā in the period of the Vedāṅga Jyotish when Dhanishṭhā was put first. Later on it travelled to the preceding Nakshatra Śravaṇa, and at the time when this happened the asterism Śravaṇa was reckoned as the first in the calendar.

It is the latter phenomenon, *viz.* the recording of the Nakshatra Śravaṇa at the head of the list that is definitely

alluded to in a passage of the *Mabābhārata* of considerable historical interest. Fleet discussed the epic evidence, *Śravaṇādīni ṛikshāṇi* (the Nakshatras begin with Śravaṇa, *Aśvamedhaparva*, 44.2) to show that 'the winter solstice had travelled westwards from the first point of Śravishṭhā (Dhanishṭhā), where it was placed by the astronomy which was preserved in the Jyotisha-Vedāṅga, and was in the preceding Nakshatra Śravaṇa (*J.R.A.S.*, 1916, p. 570). Prof. Keith carrying the discussion further admitted the correctness of Fleet's view and pointed out that the passage had been much earlier discussed by Hopkins with the same result in the *J.A.O.S.* for 1903 (*J.R.A.S.*, 1917, p. 133). It is, however, interesting to note that a passage in the *Vanaparva* refers to the Dhanishṭhādī reckoning of the stars (*Vanaparva*, 230.10) as done by Pāṇini.

The important question to be discussed in this connection is the determining of the time when the transition of the winter solstice from Dhanishṭhā to Śravaṇa took place. This would naturally mark the lower limit of Pāṇini's date, since in his enumeration of stars (IV.3.34) he put Dhanishṭhā at the head of the list. It may be mentioned in this connection that the *Mabābhārata* attributes to Viśvāmitra the new arrangement of asterisms by substituting Śravaṇa for Dhanishṭhā. Prof. Keith taking Viśvāmitra as an astronomical reformer takes that reform to have consisted in putting Śravaṇa at the beginning of the asterisms in place of Dhanishṭhā (*J.R.A.S.*, 1917, p. 39).

Prof. Jogesh Chandra Ray has investigated the time of the transition of the winter solstice from the first point of the Dhanishṭhā to the star Śravaṇa on the basis of astronomical calculations in his paper entitled 'The First Point of Aśvini' (1934). His conclusion is that the Nakshatra Śravishṭhā is the star *Beta Delphini*, and that it was in the fourteenth century B.C., or in the year B.C. 1372 when the sun, moon and the star Śravishṭhā were in conjunction at the time of the winter solstice, and since one Nakshatra period changing at the rate of about one degree in 70 years takes somewhat less than a

thousand years (about 933 years), it was in the fifth century B.C. that Śravaṇa occupied a position in relation to the winter solstice similar to that occupied by the Śravishṭhā previously. Counting from B.C. 1372, the precession amounted to one Nakshatra-space in B.C. 405, and the nearest year in which new moon happened on the day of the winter solstice was 401 B.C. At this time Śravaṇa was observed as the star of the winter solstice and recorded by astronomers as being the first in the list of Nakshatras, a fact implied in the statement of the *Mahābhārata* cited above (Śravaṇādīni ṛikṣāṇi) and interpreted in this light by Fleet, Keith and others. In case the date 401 B.C. represents the year of Śravaṇa Nakshatra coinciding with the winter solstice, the literature and authors referring to Śravishṭhā as the first of the Nakshatras must be placed anterior to that date. With reference to the question of Pāṇini's date this gives us a reliable basis to fix the lower limit of his date at about 400 B.C. The upper limit as stated already may be *circa* 500 B.C. from the date of Makkhali Gosāla referred to as Maskarī in the *Aśṭādhyāyī*.

**THE NANDA TRADITION**—There is a strong tradition preserved in both the Buddhist and Brahmanical literatures that Pāṇini was a contemporary of some Nanda king. Tārānātha, in his *History of Buddhism* compiled from older sources (1608 A.D.) states that Pāṇini lived in the time of a Nanda king. Somadeva (1063-1081) in the *Kaṭhāsaritsāgara* and Kshemen-dra in the *Bṛīhakatbāmañjarī* (11th century) also associate Pāṇini with king Nanda and his capital Pāṭaliputra. The newly discovered *Manjuśrī-Mūlakaḥpa*, which Jayaswal placed roughly at about 800 A.D., confirms the tradition that 'king Nanda's great friend was a Brāhmaṇa, Pāṇini by name' (Jayaswal's edition, p. 14), and also adds that in the capital of Magadha there were Brāhmaṇa controversialists who gathered at the king's court. Yuan Chwang from his record of the tradition as handed down in Pāṇini's birth-place, Śalātura, states that Pāṇini after finishing his work sent it to the supreme

ruler, who exceedingly prized it and issued an edict that throughout the kingdom it should be used and taught to others (*Siyuki*, p. 115). Although the name of the king and that of the town of Pāṭaliputra are not mentioned, he confirms the tradition of Pāṇini's connection with a royal court and of the patronage bestowed upon him in recognition of his work. Rājasekhara (900 A.D.) connects Pāṇini with the *Śāstrakāra Parikṣhā* of Pāṭaliputra which as we have shown corresponds with the account of the Great Synod or the literary assembly held under royal patronage which Megasthenes found functioning at Pāṭaliputra as an old institution (M'Crindle's *Megasthenes*, Frag. XXXIII; *Strabo*, XV.1). A tradition which is thus testified by different sources, Greek, Chinese, Indian, seems to be based on truth. The contact between *Udīchya* (Northern) and *Prāchya* (Eastern) scholars was a feature of intellectual life of ancient India from the time of the *Upanishads*, as in the case of Uddālaka Āruṇi of Pañchāla proceeding to the Madra country in search of higher knowledge. Pāṇini also shared in this kind of intellectual intercourse. We have seen the same thing in the career of Chāṇakya who visited Pāṭaliputra in quest of disputation (*ante*, p. 20).

An important factor in determining Pāṇini's time would be the name and time of the Nanda king known to Pāṇini. This question is of admitted difficulty owing to confusion in the chronology of the Nandas. There are, however, two points more or less fixed: (1) the year 326 B.C. as the final year of the last Nanda king, ruling over the country of the *Prasii* and *Gangiridae* as reported to Alexander. He was overthrown by Chandragupta Maurya. The other date is obtained by reckoning from the fifth year of king Kharvela who in the Hathigumpha inscription dated in the year 165 of the era of Rājā Muriya refers to Nandarāja in connection with a canal excavated by him 300 years earlier. Another passage in the same inscription records that king Nanda carried away to Magadha the statue of the first Jina. We thus find King Nanda ruling

in Pāṭaliputra about the year 465 B.C. This Nanda king can be no other than Nandivardhana (*Early History of India*, p. 44). Of the kings of Śiśunāga dynasty as given in the *Purāṇas* Nandivardhana and Mahānanda occur as the last two kings after whom came the base-born Nandas. With the point 465 B.C. falling within the reign of king Nanda, we arrive at a tolerably fixed period for the reigns of these two Nanda kings as c. 473 B.C. to 403 B.C. Mahāpadma Nanda and his sons appear to have followed from about 403 B.C. to 323 B.C. According to Tārānātha, Nanda the patron of Pāṇini was the father of Mahāpadma. It is thus evident that the Nanda king, the reputed contemporary and patron of Pāṇini of the popular stories is Mahānanda, son and successor of Nandivardhana, or the Nandarāja of the Hathigumpha inscription. In view of the joint period of the reigns of Nandivardhana and Mahānandin as stated above, we may assume the dates c. 446 to 403 B.C. for the reign of Mahānandin.

The above hypothesis of Pāṇini's date based on the traditional account of his contemporaneity with a Nanda king fits with the other known facts about him. The various lines of arguments in connection with Pāṇini's chronology seem to converge at this particular point, *viz.* the middle of the fifth century B.C.

It is worth noting that grammatical literature also has preserved some references to the Nanda tradition. In the illustration *Nandopakramāṇi mānāni* (*Kāśikā* on II.4.21) we have an allusion that the weights and measures of the country were standardised for the first time by king Nanda. Again in *sūtra* VI.2.133 Pāṇini says that the word *putra* coming after the word *rājā* does not take an initial acute accent. The commentators agree that the word *rājan* includes here also the specific names of individual kings, and in this connection they remember the name of king Nanda, whose son is referred to as Nanda-putra. We have the testimony not only of Khārvela that the name of the king ruling in 465 B.C. was Nanda, but

the form is also supported by the Jaina tradition and the *Bhaviṣya Purāṇa* as pointed out by Jayaswal (J.B.O.R.S., 1917). We may identify Nanda-putra with Mahānandin, son and successor of King Nanda or Nanda-rāja, or Nandivardhana. **POLITICAL DATA**—Pāṇini refers to Magadha as one of the monarchies, but it was not yet an empire. In his time the Udīchya country was made up of a number of kingships like Gandhāra and numerous republics as the Yaudheyas and Kshudraka-Mālavas, etc. We know it as a fact that none of those kings who ever sat on the throne of Rājagṛīha or Pāṭaliputra from Bimbisāra up to the last Nanda king dethroned by Chandragupta, ever extended his empire so far as the Vāhika country. The Greeks under Alexander found the Nandas east of the Beas. In the Prāchya country, Pāṇini mentions Magadha, Kosala, Avanti, Kaliṅga and Sūramasa as separate States (*Janapadas*), which as stated by Kātyāyana (*vārttika* on *sūtra*, IV.1. 168) were monarchies (*Ekarāja*).

It was not yet the resounding epoch of Magadhan imperialism. Ajātaśatru as a Magadhan king, had annexed only the kingdoms of Kāśi and Kosala. It was only a passing phase. The last two rulers of this dynasty, Nandivardhana and Mahānandin, did not make any annexations. The Purāṇas state that it was only Mahāpadma Nanda who annexed the leading Kshatriya states of the time, *viz.* the Aikshvākus of Kosala, Pañchālas, Kāśis, Haihayas, Kaliṅgas, Āśmakas, Kurus, Māithilas, Śūrasenas and Vītihoṭras, and made himself the sole sovereign (*ekrāj*) or emperor. Therefore the period, when Pāṇini spoke of the kingdoms of Kuru, Kosala, Magadha, Kaliṅga, Avanti and Āśmaka, specifically as so many small monarchical states must have preceded the time of Mahāpadma Nanda, before about 400 B.C. Thus the political data of the *Aśṭādhyāyī* must relate to the epoch circa 450 to 400 B.C.

**REFERENCE TO YAVANĀNI**—Pāṇini's reference to Yavana and Yavanāni writing, possesses distinct value for his date. The term *Yauna* (=Skt. *Yavana*) for Ionia and the

Ionian Greeks is first used in the inscriptions of Darius I (516 B.C.). It must have been after this that the term *Yavana* came into circulation in parts of India which also formed part of the Achaemenian empire. It would not be right to suppose (as Benfey, Burnell, Weber and Wackernagel have done) that the Macedonian Greeks who first came into India with Alexander about two centuries later first became known as Yavanas. In fact the Yavanas had been known much before Alexander who already found in the Kabul valley a colony of Nysian Greeks. In the Old-Persian Inscriptions of Darius (521-485 B.C.) we first find the term *Yauna* denoting Ionia and an Ionian, and *Yaunā*, Ionians, corresponding to Sanskrit *Yavanah* and *Yavanāḥ* (Sukumar Sen, *Old Persian Inscriptions*, p. 223). Both Ionia and Gandhāra, the home of Pāṇini, formed part of the empire of Darius and also continued under the reign of Xerxes, who recruited to his army a contingent of Indians from Gandhāra in his expedition against Greece about the year 479 B.C. Thus was furnished a firsthand opportunity for the Indians to become acquainted with the Greeks even before Alexander. As Prof. Keith has observed: 'If it is borne in mind that Pāṇini was a native of Gandhāra according to Hiuen Tsiang, a view confirmed by the references in his grammar, it will not seem far-fetched to consider that it was most probably from the older tradition that the name Yavanānī was derived' (*Aitareya Āraṇyaka*, p. 23). The word *lipi* borrowed from the Achaemenian *dipi* meaning 'edict' is conspicuous by absence in the Buddhist canonical works and seems to have been borrowed from Achaemenian Iran. It may further be assumed that the *Yavanānī lipi* was known only in Gandhāra and the north-west at that time (*ante*, p. 312).

**PĀṆINI AND THE PARŚUS**—Pāṇini refers to a people called Parśus as a military community (*Āyudhijīvi Saṅgha*, V.3.117). The term *Parśu* corresponds to the Old-Persian form *Pārsa* as given in the Behistun inscription. The Babylonian form

## Chronological Considerations

of the name in the same Inscription is *Par-su* which comes closer to Pāṇini's *Parśu* (*Behistun Ins.*, British Museum, pp. 159-166). It appears that *Parśu* was the name of a country as noted in the Babylonian version, and *Pārśava* was a designation of an individual member of that *Saṅgha*, a form of the name which corresponds to Babylonian *Par-sa-a-a*. A part of India was already a province of the Achaemenian empire under Cyrus and Darius, which it enriched with its military and material resources. Indians were already serving in the army of Xerxes and fighting his battles about 487 B.C., while that very small part of India paid as much revenue as the total revenue of the Persian empire. There was thus an intimate intercourse between north-western India and Persia, and Pāṇini as one born in that region must have had direct knowledge of such intercourse. Not only Gandhāra but also Sindhu corrupted into Persian *Hindu* in the inscriptions of Darius (corresponding to the Sind-Sagar Doab of the Western Panjab) came under the occupation of the Achaemenians at one time (cf. Hamadan Plate *Ins.*, *J.R.A.S.*, 1926, pp. 633-6; *Jour. Cama Ins.*, 1927; *Memoir A.S.I.*, No. 34). (Cf. *ante*, p. 445).

Similarly, there is also the possibility that another Persian tribe came to be known in India in Pāṇini's time who refers to *Vṛikas* as an *āyudhajīvē Saṅgha*, a community that lived by the profession of arms. An individual member of this tribe was called in Sanskrit *Vārkeṇya*, a term which seems to correspond to *Varakāṇa* of the Behistun Inscription. The whole tribe was called *Vṛikāḥ*, which corresponds to the form *Varkā* in the plural number in the name *Saka-Haumavarkā* in the Naksh-i-Rustam Inscription. The *Vṛikas* thus appear to be a section of the war-like Saka tribes. (Cf. *ante*, pp. 443-44).

Pāṇini notices *kanthā*-ending place-names as being common in Varṇu (Bannu valley) and the Uśīnara country between the lower course of the Chenab and Ravi, and also instances some particular names such as Chihāṇa-kantham and

Maḍura-kantham, which rather appear as loan-words (*ante*, pp. 67-68). In fact *kanthā* was a Scythian word for 'town', preserved in such names as Samarkand, Khokan, Chimkent, etc.

The above data point to somewhat closer contacts between India and Persia during the reigns of the Achaemenian emperors Darius (522-486 B.C.) and Xerxes (485-465 B.C.) as a result of their Indian conquests. This explains the use in India of such terms as *Yavana*, *Parīu*, *Vṛika*, *Kanthā*. To these we may add two others, *viz.* *jābāla* (goat-herd) and *bailibila* (poison), mentioned by Pāṇini (VI.2.38) which were really Semitic loan-wards.

This evidence points to Pāṇini's date somewhere after the time of these Achaemenian emperors.

**THE KSHUDRAKA-MĀLVAS**—On account of Pāṇini's reference to the Kshudrakas and the Mālavas in the formation *Ksbaudraka-Mālavī Senā* in the *gaṇa-sūtra* of *sūtra* IV.2.45, Weber argued that this reference brings down the time of Pāṇini (and also his predecessor Āpiśali) to after Alexander's invasion which was resisted by those two Indian tribes, whom the Greeks noted as *Oxydrakai* and *Malloi*. He argued that the Kshudrakas and the Mālavas had been usually at war with each other and a foreign invasion welded them to fight a common foe through a united army called *Ksbaudraka-Mālavī-Senā*. These united forces, opposing Alexander are said by Curtius to have comprised 90,000 foot-soldiers, all fit for active service, together with 10,000 cavalry, and 900 war chariots (*Alexander's Invasion*, p. 234).

So far as Āpiśali is concerned Weber misunderstood the text relating to *Āpiśali-vidbi* (quoted by Patañjali), which has no connection with the Kshudraka-Mālavas and is concerned only with the formation *ādbenavam*. Its purpose was restricted to showing the prevalence of *Tadantavidbi* in the *Sāmṛībika* suffixes.

Secondly, the confederate military arrangement between

the Kshudrakas and the Mālavas was not a temporary make-shift, but permanent arrangement so as to find its way into current language in the phrase *Kshudraka-Mālavī Senā* as a special grammatical formation. There is therefore every likelihood that Pāṇini himself had composed the *Gaṇa-sūtra Kshudraka-Mālavāt Senā-samjñāyām*, on the basis of his personal knowledge of such an army. In fact the details given by the Greek writers rather indicate that this joint army had existed before Alexander and was not the outcome of any emergency. Curtius definitely states that the Kshudrakas and the Mālavas *in accordance with their custom* had selected as their head a brave warrior of the nation of the Kshudrakas who was an experienced general (*Alexander's Invasion*, p. 236). Unfortunately, at the time of giving battle to Alexander the events took a turn just opposite to what Weber would have us believe. Diodoros expressly states 'that the Kshudraka-Mālavas could not agree as to the choice of a leader and ceased in consequence to keep the field together' (*Alex. Inv.*, p. 236, f.n.). Curtius almost confirms this version of Diodoros by saying that 'overnight a dissension arose amongst them and they retired to their mountain recesses.' He goes one step further to acquaint us with the subsequent course of events saying that most of the army took shelter in the fortified city of the Kshudrakas which was besieged by Alexander, and this was followed by the most heroic resistance and the fiercest attack that the Greek army had experienced so far, in which Alexander himself received a deadly wound. Obviously after their separation from the Mālavas, the Kshudrakas bore the brunt of the battle singly. Finally, peace was negotiated on behalf of the fighters by deputation of one hundred ambassadors whom the Greeks received with uncommon hospitality and honour that would be rather unusual in the case of a crushed enemy. The grammatical illustration which Patañjali repeats thrice in the *Bhāṣya* (*Ekākibhiḥ Kshudrakair-jitam, asabāyair-ityarthah*, I.83; I.321; II.412) presents a true picture of the events as preserved on the Indian

side, namely that the Kshudrakas were matched alone against the invaders and emerged triumphant.

It is thus certain both on the testimony of Pāṇini and the Greek writers that the league of the Kshudraka-Mālava army had been in existence long before Alexander.

The numerous *Āyudhjīvi Saṅghas* in the Panjab and North-West India point to political conditions as existed before the rise of Mauryan Imperialism. Pāṇini treats of the development of *Saṅgha* polity as if it were at its zenith. Gradually *Saṅghas* began to decline and the march of the Greeks through their land completely exposed their political weakness. This made the *Saṅghas* unpopular and created a movement for their unification of which indications are found in Kauṭilya's *Arthaśāstra*. Pāṇini lived in the peak period of the *Saṅghas*, and an interval of about a century should be allowed for their decline against the rise of a centralised monarchy or empire. This would assign a date to Pāṇini a hundred years before the rise of Mauryan imperialism.

**PĀṆINI AND KAUṬILYA**—It has been argued that Kauṭilya writes a language which, though archaic in certain respects is decidedly later than the language of the *Aśbādhyaī* (Thieme, *Pāṇini and the Veda*, p. 80). From the foregoing studies it is apparent that the works of both authors know of many similar institutions. Sometimes the *Arthaśāstra* appears as the best commentary on Pāṇini in regard to certain specific and peculiar terms referred to by both, e.g. *Maireya*, *Kāpiśāyana*, *Devapatha*, *Ākranda*, *Yuktārohī*, *Upanishad*, *Vinaya*, *Parishad*, *Visbya*, *Śvāgaṇika*, *Āpamityaka*, *Yāchitaka*, *Ārya-kṛīṭa*, *Yaujana-śatika*, *Dūta*, *Aśbadakshīṇa*, *Vyushta*, *Vaiyushta* transactions, *Purusba* and *Hastī* measures, *Kedāra*, *Parīkbeyī*, *Mābisha*, *Adhyaksha*, *Yukta*, *Avakraya*, etc. In the foregoing studies we have oft-times dealt with institutions of all kinds which are not only similar but sometimes identical in the *Aśbādhyaī* and the *Arthaśāstra*. The common evidence of the names of punch-marked coins, as well as weights

and measures, as noticed in the body of this work, furnishes some striking parallels between Pāṇini and Kauṭilya. As Thieme puts it, Kauṭilya was junior to Pāṇini and the period of one century may reasonably be allowed to have intervened between the two.

**EVIDENCE OF COINS**—The numismatic data of the *Aśbādhyaī* show that it is older than the *Arthaśāstra*. For instance, Pāṇini's (1) *Nishka*, (2) *Suvarṇa*, (3) *Śāṇa*, (4) *Śatamāna*, point to older coinage not known to Kauṭilya. Similarly Kauṭilya does not know of the significant coin names *Vimśatika* and *Trimiśtika* mentioned in the *Aśbādhyaī*, of which actual examples have been found (*ante*, 270-71). The evidence of Pāṇini's *Śatamāna* coin is of great importance in this connection. The *Śatamāna* coinage must have been in mintage and circulation in the time of Pāṇini. Its beginnings may be placed a few centuries earlier. It is significant to note in this connection that the reference to *Śatamāna* in the *Śataṣṭha Brāhmaṇa* is found only in those Books which are associated with the name of Yājñavalkya, e.g. in Kāṇḍa V in which Yājñavalkya is quoted as authority and in Kāṇḍas XII, XIII and XIV. There is not a single reference to the *Śatamāna* coin in the Agnichayana Books (VI-X) in which Śāṇḍilya to the exclusion of Yājñavalkya figures as the principal authority. This accords with the view that Yājñavalkya was considered as a late Brāhmaṇa-writer in comparison with the earlier works of Aitareya and Śāṭyāyana, etc. The chronological inference is that the period of currency of the *Śatamāna* coin was confined to a few centuries (c. eighth-fifth cent. B.C.) from which Kauṭilya was removed in time, but which were nearer to the epoch of the *Taittiriya* and *Jaiminiya Brāhmaṇas* and portions of the *Śataṣṭha Brāhmaṇa*, which alone mention this coin.

Another coin-name of much more precise chronological value is the heavy type of *Kārshāpaṇa*, called *Vimśatika*, which was 20 *māśas* or 40 *rattis* in weight. The silver *Karshāpaṇa* minted by the Mauryan administration, as shown by actual

finds, and as mentioned in the *Arthaśāstra* weighed only 16 *māśbas*. Pāṇini on the other hand seems to know both classes of silver coins, viz. the *Vimśatika* of heavier weight as its name signifies, and the *Kārshāpaṇa* of standard weight, which although unspecified was most likely of 32 *rattis* as stated in Manu and Kauṭilya. We have therefore to assign a stage to Pāṇini in which *Vimśatika* and *Kārshāpaṇa* were current coins at one and the same time. This held good in the fifth century B.C. in the time of the Nandas. The heavier *kāshāpaṇa* of 20 *māśas* (*vīśatimāso kāshāpaṇo*) was current in Rājagṛiha during Bimbisāra's reign. It was the local currency of different *Janapadas*. The Nandas felt called upon to introduce for the first time a uniform system of weights and measures and standard coinage for their empire extending from Kāliṅga to Pañchāla. This system is known in medical works as *Māgadha māna* as distinguished from the *Kāliṅga māna* which continued as a separate system. The coinage of the Nandas showed the following new features: (1) a standard *Kārshāpaṇa* of 16 *māśbas* in place of *Vimśatika* of 20 *māśbas*; (2) punching of obverse and reverse symbols on two sides of a coin instead of on the same side as before; (3) increasing the number of obverse symbols to 5 in each group, instead of 4 as on *Vimśatika* and earlier coins; (4) introducing the Sun and Six-armed (*Shaḍara*) symbols as constant in the five-symbol groups; (5) simplifying the forms, but greatly adding to the variety of the symbols punched. The new *Kārshāpaṇa* of 32 *rattis* of the Nandas may be actually identified in the thin and broad flat pieces with clear symbols punched on them, which are known from actual hoards. The thick and small variety in which peacock- or crescent-on-hill symbols appear belongs to the Maurya period. The distinction of the earlier and later *Kārshāpaṇas* is best seen in the form of their six-armed symbols, those having an oval as a constituent are earlier than those with an arrow or taurine.

On the basis of his numismatic data Pāṇini thus belongs to the period of transition between the age of Bimbisāra and

## *Chronological Considerations*

Kauṭilya, i.e. between the sixth and the fourth century B.C. A date in the fifth century B.C. admirably reconciles the coin-references of the *Ashṭādhyāyī*.

**PERSONAL NAMES**—The evidence of personal names current in Pāṇini's time also points to the above chronological position. The *Gotra*-names were current in the *Brāhmaṇas* and the *Upanishads*, whereas in the Maurya period two other features appeared, viz. contraction of personal names and star-names, i.e. personal names derived from the names of stars. The *Ashṭādhyāyī* represents a stage between the two when the *Gotra*-names and the *Nakṣatra*-names were in use side by side. The *Gotra-nāma* was an old Vedic custom, whereas the *Nakṣatra-nāma* was a new feature approved by the *Grihya-sūtras*. There is no scope for contraction in a *Gotra*-name, and so the rules of contraction detailed by Pāṇini applied to names other than *Gotra* names. In this respect the early Buddhist literature shows an equal preference for *Gotra*- and *Nakṣatra*-names and is thus closer in time to Pāṇini.

**PĀṆINI AND THE JĀTAKAS**—In many respects Pāṇini's language is earlier than that of the *Jātakas*, but in some cases the coincidence between the two is striking and helpful for chronology. Attention may be drawn here especially to the material for mounting chariots, viz. *dvaipa*, *vaiyāghra* and *pāṇḍukambala*, which are mentioned in Pāṇini and the *Jātakas* (*ante*, p. 150). The expressions cited above represent older conditions, and as a matter of fact these words occur in the *Gāthā* portions of the *Jātakas* which are admittedly earlier than the prose portions. A date in the fifth century B.C. would explain the linguistic similarities between the *Ashṭādhyāyī* and the *Jātakas*.

**PĀṆINI AND THE MADHYMAPATHA**—Pāṇini is always distinguished by his unique balance of judgment in reconciling opposite views and looking at both sides of a grammatical controversy.

While examining the grammatical data of Pāṇini we have

already drawn detailed attention to about half a dozen instances of this spirit of synthesis (*ante*, pp. 352-5). In such controversies as *Mabā-Sāmjñās* and *Kṣittrima-Sāmjñās*, *Jāti* and *Vyakti*, *Anukaraṇa*, *Upasarga* as *Vāchaka* and *Dyotaka*, *Dhātū* as *Kriyā* and *Bhāva*, *Vyutputti* and *Avyutputti* of words, etc., Pāṇini's position is not exclusive, but reconciles the two extremes. In this respect Pāṇini's work can be said to be a true product of its age, the epoch of *Majjhima Paṭipadā*, the best representative of which was another master-mind, the Buddha himself. Those who accepted the path of the golden mean as the ideal course to follow avoided insistence on extreme views, and we actually find Pāṇini avoiding the mistakes of his predecessors like Śākaṭāyana who over-emphasized the verbal derivation of all nouns. Pāṇini presents his material throughout the *Aśṭādhyāyī* with an all-comprehensive outlook and synthesis which made his work so popular and acceptable.

**SUMMARY**—We may now summarise these considerations. The various dates assigned by scholars to Pāṇini range from the seventh to the fourth century B.C. The majority of scholars are inclined towards the fifth and the fourth century B.C. The view taken in this work is that a date nearer the fifth century B.C. appears more probable on the basis of the available data. It takes Pāṇini to be a contemporary of the Nanda king named Mahānanda and thus assigns him to the middle of the fifth century B.C.

The literary argument offers a corrective to the extreme views of Goldstücker about the types of literature and literary works known to Pāṇini. Weber's argument for a date after Alexander's invasion based on references to Yavanānī script and to the confederated army of the Kshudraka-Mālavas has been duly answered. Sir R. G. Bhandarkar's argument based on Pāṇini's supposed ignorance of the south has also been largely met by the fact that Pāṇini's geographical horizon extended from Kamboja (Pamir) to Āśmaka on the Godāvarī, and from Sauvīra (Sind) in the west to Kaliṅga and Sūramasa (Sūrmā

### *Chronological Considerations*

valley of Assam) in the east, and also included that part of South India which lies within the tropics (VIII.4.25) and also some islands situated in mid-ocean.

The references to such specifically Buddhist terms as *Masakarī*, *Kumārī-Śramaṇā* (maiden nuns), *Nikāya* and *Nirvāṇa*, suggest that Pāṇini came after the Buddha.

The argument from numismatic data and the nature of current personal names given in the *Aśṭādhyāyī* points in the direction that Pāṇini lived in the same cultural epoch as produced the earliest Pali canon.

Moreover, the striking resemblance of several technical terms between Pāṇini and Kauṭilya, indicates that Pāṇini preceded Kauṭilya but was not far removed from his time.

The astronomical argument is based on the fact that in the list of ten star-names given in *sūtra* IV.3.34 Śravishṭhā begins the list. This points to the astronomical reckoning of the Vedāṅga Jyotiṣa in which Śravishṭhā was the first of the *nakṣatras*. This position of Śravishṭhā continued from B.C. 1372 to about 401 B.C., i.e. the close of the fifth century B.C. After this the asterism of Śravaṇa was taken to commence the star-list. This gives us a definite lower limit for Pāṇini's time.

The consensus of this varied evidence is in favour of assigning to Pāṇini a date about the middle of the fifth century B.C. This chronological pointer available for the *Aśṭādhyāyī* and its distinguished author is somewhat singular in comparison to what we possess for so many other works and master-minds in the literary history of ancient India.

## JANAPADA AND THE GREEK CITY-STATE

*JANAPADA ANALOGOUS TO CITY-STATE*—The *Charaṇa*, *Gotra* and *Janapada* are three typical Pāṇinian institutions of educational, social and political life respectively. It is not without significance that the term *Janapada* is conspicuous by absence in the Vedic Saṁhitās. It occurs only in the latest phase of the Brāhmaṇa period, and found its full development in the period of the *Aṣṭādhyāyī*. A comparative study of human societies affords innumerable analogies, and we find unmistakable parallels between the *Janapada* State in India and the City-State in Greece. Both flourished at about the same period. In Greece a large number of City-States represented so many isolated communities, which were self-contained and had their own systems of government, but all of them had very similar social and religious customs and institutions. A few like Athens and Sparta were more important than others.

*JANAPADAS IN INDIA*—In India the number of *Janapada* States was quite large. Pāṇini gives a rich picture of *Janapadas* extending from Kamboja to Āśmaka and Sauvīra to Sūramasa, of which the geographical aspect has been dealt with in Chapter II and illustrated in the accompanying maps. The *Janapada* experiment in India was on a much larger scale than in the case of Greek city-states with regard to their extension both in place and time. The fuller lists of Indian *Janapadas* containing about 175 names, are preserved in the Bhuvana-kosha chapters of the *Purāṇas* (*Vāyu*, ch. 45; *Matsya*, ch. 114; *Mārkaṇḍeya*, ch. 57; *Brahmāṇḍa*, ch. 49; *Vāmana*, ch. 13; cf. D. C. Sircar, Text of the Puranic List of Peoples, *I.H.Q.*, XXX, 1945, pp. 297-314). Almost all *Janapada* names in

Pāṇini are traceable to that list. The territorial divisions envisaged there are (1) Madhya, (2) Prāchya, (3) Udīchya, (4) Dakṣiṇāpatha, (5) Aparānta, (6) Vindhyapṛishṭha, and (7) Parvata, and the Janapada names are grouped accordingly, which affords a clear picture of the States spread in all parts of the country. The *Parvatāśrayin Janapadas* of the *Purāṇas* find pointed mention in Pāṇini as *āyudha-jīvin*s of the Parvata country (IV.3.91), i.e., military high-landers settled in the north-west of India and in the Trigarta country, as explained above (*ante*, pp. 434-6).

**BOUNDARIES**—In Greece the city-states were scattered mostly amongst hills and valleys and separated by well-defined boundaries. In India also the *Janapadas* had demarcated boundaries to which Pāṇini refers as *tadavadbhi* (IV.2.124). The *Kaśikā* observes that other *Janapadas* formed boundaries of a *Janapada* surrounding it on all sides (*tad-avadbhirapi janapada eva gṛibhate*). A chain of *Janapadas* occupied the entire stretch of land, and some of them were big enough to admit of several territorial divisions of which the names are regulated by *sūtras* VI.2.103 and VII.3.12; e.g., the Sindhu divided Pūrva-Gandhāra with capital at Takshaśilā from Apra-Gandhāra with its chief town Pushkalāvati; similarly Pūrva-Madra, Apra-Madra, and Pūrva-Pañchāla, Uttara-Pañchāla, and Dakṣiṇa-Pañchāla.

**ACROPOLIS**—But it is more in the development of the *Janapada* State through the ages that we find a striking parallel with the Greek City-State. The *polis* or the city was the nerve-centre of the City-State, and it was opposed to the open village. The "fluid" term *polis* signified the acropolis or the fortified town. In India also each *Janapada* had its fortified town or capital. An interesting list of sixteen *Mahājanapadas* with their names of capitals is well-known in the Buddhist texts, and similarly twenty-five *Janapadas* in the Jaina literature together with names of their capitals.

**EVOLUTION OF THE CITY-STATE AND THE JANA-**

## Appendix I

**PADA**—In the evolution of the City-State there were four well-defined stages known as *Genos*, *Phratries*, *Phulai* and *Polis*. The *polis* grew out of small beginnings, 'from the clan—the *genos*, the patriarchal clan, "the first unit of society"—and passes through the associations of families, the *phratries*, and the military groupings of clans, the *phulai* tribes, to the political organism which grew out of a settled life and synœcism' (Glotz, *The Greek City and Its Institutions*, Foreword by Henri Berr, p. ix).

The last mentioned political organism was the City-State. The analogy holds true in the case of the evolution of the *Janapada* State in India, which had its humble beginnings in the clan or *Jana*; the *Jana* developed a number of individual units called families or *Kula*, and the associations of families formed the ruling Kshatriya tribes which wielded political power and are termed *Janapadins* in Pāṇini (IV.3.100). The *Janapadins* were, according to the *Kāśikā*, the ruling class in the *Janapada* (*Janapada-svāminah kshatriyāḥ*). This was the stage when the *Janapada* State emerged in its full-fledged development. The correspondence of the *Janapada* and the City-State may be set forth below:

- I. Clan [*Genos*] *Jana*.
- II. Families [*Phratries*] *Kula*.
- III. Tribes [*Phulai*] *Janapadinah*.
- IV. City [*Polis*] *Janapada*.

**ABHIJANA**—We can now see why in the whole of the Vedic literature there is no reference to the *Janapada* institution, whereas the *Jana* finds repeated mention. The Bharata *Jana* tracing itself to a common ancestor was a compact clan. It must have expanded and the outcome was the increasing importance of independent families or *Kulas*, which ultimately developed into *Gotras* and *Vaniśas*. The clan was not yet settled in any particular area, but with the growth of independent families it tended to lose its mobility and ultimately the tribe or *Jana* came to be tied down to an abode, called

*Abbijana* in Pāṇini (IV.3.90), literally 'the region that had come under the "land-taking" of a *Jana*'.

**JANAPADIN**—The territory of the *Jana* became the *Janapada*, whence the original settlers who formed the governing class were called *Janapadins*. In the *Janapada* there came to live also other peoples or aliens who were distinguished from the privileged class of rulers or *Janapadins* proper. The latter were consecrated to rulership and designated as *abbishikta vaniśya*. In *sūtra* VI.2.34, Pāṇini refers to the *Rājanyas* of the Andhaka-Vṛishṇi *Sangha*, and, as clearly stated by the *Kāśikā*, the consecrated Kshatriyas of that confederacy formed the object of the grammatical rule. The evidence of the Lichchhavis of the Vṛiji *Janapada* is well-known; the waters of their *maṅgala-pushakarnī* were used for the consecration of 7,707 *Rājans* and were closely guarded against others. It is, however, clear that in its later stages the *Janapada*, irrespective of the fact whether it was republican (more strictly oligarchical as in Greece) or monarchical (i.e. *gaṇādhīna* or *ekarāja*, IV.1.168, *vārt.*) consisted of a very mixed population. Patañjali explicitly says that members of the ruling Kshatriya class in the Mālava republic were called Mālavya, and in the Kshudraka Kshaudrakya, but the slaves and free labourers amongst them were excluded from its application.<sup>1</sup> In practice the name of the ruler in a monarchical state and the name of the Kshatriya members who constituted the privileged aristocracy (called *apatya*) were both derived from the name of the *Janapada* (*Kshatriya-samāna-śābdāj-janapadāt tāsya rājany-apatyavat*, *vārt.* on IV.1.168). Thus the king of Pāñchāla and a Kshatriya descendant of Pāñchāla were both called Pāñchāla.

**JANAPADA, A CULTURAL UNIT**—The stages of evolution from *Jana* to *Janapada* have yet to be clearly formulated

<sup>1</sup> इदं तर्हि क्षीद्रकाणामपत्यम् मालवानामपत्यमिति । अत्रापि क्षीद्रक्यः मालव्य इति नैतत्तेषां दासे वा भवति कर्मकरे वा । किं तर्हि । तेषामेव कस्मिंश्चित् ।

(Bhāṣya, IV. 1. 168; II 269).

and studied on the basis of literary evidence which is extensive. The *Atharvaveda* speaks of small homogeneous communities of people differentiated from one another (*babudbā janam*), speaking different tongues (*vivāchasan*) and following diverse faiths (*nānā-dharmāṇam*, *Ṛṣhivī Sūkta*, XII.1.45). Soon new factors operated leading to the discovery of fresh centres of population and development of new routes, towns and professions depending on internal trade and commerce. All this contributed to the growth of regional consciousness and the emergence of the *Janapada* life. The *Janapada* was not merely a geographical term. It was more of a social, cultural and political phenomenon that found cumulative expression in the *Janapada*. Each State was free to choose its form of government—a state of circumstances envisaged in such expressions as *eka-kṛitāḥ* (i.e., *ekādhīna* or *rājādhīna*), *śreṇī-kṛitāḥ*, *pūga-kṛitāḥ* II.1.59); each was sovereign and independent so long as its freedom was respected by the neighbouring states; each was free to follow its intellectual and cultural life; each had its own language and local gods. The Buddha permitted the spread of his teachings in the local dialect of each *Janapada* and also drew attention to the continued worship of the traditional *chaityas* and deities. In the Greek cities close connection existed in the beginning between political organisation and religion. 'Every city had its deity as had every family' (*Glötz.*, op. cit., p. 19). In India homage to the traditional *chaityas* and deities, such as Yakshas and Nāgas, was obligatory on all persons in the community, but with the emergence of new faiths like Buddhism and the Bhāgavata religion, the religious tie became less rigid and the "cultus" of the clan came to be replaced by a personal religion. The grammatical literature points to instances of linguistic peculiarities of *Janapadas*, e.g., of Kamboja, Surāshṭra and Prāchya (*Bhāshya*, I.9). Pāṇini refers to the particular domestic culture prevailing in the Kuru Janapada for which the linguistic expression *Kuru-gārhapatam* (VI.2.42) had become cur-

rent. We have already drawn attention to its import. Kātyāyana adds to it *Vṛjī-gārhaṭam*, which perhaps refers to the system of family government prevailing amongst the Lichchhavis. The *Mahābhārata* referring to the *Kula* system of polity mentions its two salient features; firstly there was a *Rājā* in each household (*gribe gribe hi rājānaḥ*, *Sabhāparva*, 14.2); and secondly in the *Kula* polity some one became supreme at one time, and somebody else at another (*Sabhā*, 14.6). This refers to periodical election to the headship of the oligarchical State; the system was called *Pārameshṭhya* (ib., 14.5). It is also stated that in the *Vṛjī Janapada* the social life of its citizens was regulated by the *Gaṇa* in certain matters such as marriage. The general rule was that no marriage should be contracted outside *Vaiśālī* and even outside its districts. The Śākyaans also were very fastidious about the purity of their blood. Similar care in the matter was taken by citizens in Greek city-states.

**FORMS OF GOVERNMENT**—The Janapada states in India had different systems of government just as the city-states in Greece. Pāṇini refers to several of them, e.g. *Gaṇa* or *Sanḅha*, *Avayavas* (IV.1.71) or member states of a Union, Leagues or Confederacies as in the case of *Trigarta-Shashṭha* (V.3.116), *Rājanyas* (VI.2.34), *Dvandva* or *Vyutkramaṇa* (VIII.1.15) i.e., Party System, *Janapadins*, *Abhisikṭa-Vamśya Kshatriyas*, *Pūga*, *Śreni*, *Grāmaṇi*, *Vrātas*, *Kumāra-Pūga*, (VI.2.88), *Parishadvala Rājā* (V.2.112), *Saṁdhi-miśra Rājā* (VI.2.154), *Āyudhajivins* and *Parvatīyas* (V.3.91; IV.2.143), etc. The political significance of these terms has been explained in their proper places. Just as bands of mercenary armed soldiers existed in many *Āyudhajivī Sanḅhas*, similarly they existed in Greece and many were enlisted in Alexander's army recruited from the Greek cities and the highlands in Thrace. The code of honour with these fighters also offers scope for comparative study.

**COMMON ANCESTRY**—The city-states were formed of

small communities of men who generally traced themselves to a common ancestry. The same fiction prevailed in the *Janapadas* in which the entire Kshatriya class of the *Janapadin*s believed themselves to have descended from an original founder who was almost deified. So long the clan was compact this memory of a common forefather was rooted in truth. For example, the Sāvitrīputrakas mentioned by Pāṇini in the *Gaṇa-pāṭha* to V.3.116 (*Dāmanyādī*) formed a clan consisting of one hundred 'sons', all descended from Sāvitrī and Satyavān (*Sāvitrīyāḥ... tad vai putrasatam jajñe*, *Āraṇyaka*., 28.3.12). 'Putra' in such cases certainly means 'descendant' and 'one hundred' was an indefinite number. They all bore the title of *Rājā* and all were Kshatriyas, each family in turn multiplying through its sons and grandsons (*te chāpi sarve rājāṇaḥ kshatriyāḥ putra-pautriṇaḥ*, *Kaṇva*., 4.47). But such a claim for the whole tribe could only be a fiction, maintained seriously through generations. In many cases the names of eponymous founders of the *Janapadas* were invented, e.g. Aṅga, Vaṅga, Kaliṅga, Suhma and Puṇḍra are stated to be the five sons of Dīrghatamas, and each the founder of a *Janapada* (*Ādi*., 98.32).

**JANAPADA CULTURE**—The city-state transformed the mental, social, religious and political outlook of the Greeks leading to an unparalleled flowering of the national genius as was seldom seen in world history. The religious and philosophical contributions of the citizens in the *Janapadas* constitute brilliant chapters in the history of Indian thought. The intellectual and metaphysical ferment during the *Janapada* period is well reflected in the Pali and Ardha-Māgadhī literatures and some of the sublime dialogues recorded in the *Śānti-parvan* are like the *Brahmajāla-sutta* of Sanskrit literature and bear witness to the moral and intellectual upheaval in the *Janapadas*. In one respect the change was all too marked, even for India, and it was the gradual secularisation of education and learning which were previously subservient to the

*Vedic Charaṇas.* The foundations of most of the scientific and philosophical systems of India were laid in this period. As has been shown in detail, a mass of literature known to Pāṇini had been developed outside the aegis of the Vedic schools, grammar itself being such a subject cultivated by independent master-minds who were a glory to their *Janapadas*. It is stated for the Greek city-state that Homeric education there was replaced by a type of education which took its colour and shape from the practical and economic needs of the new city. The fact has its exact parallel in the Indian *Janapada*, where new factors brought into being a new ideal of education serving the needs of trade and economic life. Art and industry were for the first time accorded a place of honour. Yāska had noted this significant change:

यथा ज्ञानपदीषु विद्यातः पुरुषविशेषो भवति ।

'Proficiency in the arts required by the life of the *Janapada* confers on persons a title to distinction' (*Nirukta*, I.1.5). Pāṇini explains these *Jānapadīs* as so many *vṛttis* (IV.1.42), i.e. skilled arts and professions devoted to producing the necessities of life. The Pali literature and Pāṇini record a number of such *Śilpas* flourishing with bee-hive activity in the *Janapadas*.

**CITIZENSHIP**—Citizens of a common *Janapada* were known as *Sa-janāpada* (VI.3.85), a term having the same importance as *Sa-brahmachārī* in the case of the *Charaṇa* institution to designate all its students (VI.3.86). The *Charaṇa* appellation, the *Janapada* appellation and the *Gotra* appellation—these three were important distinctions of an individual in the *Janapada* period.

**LOYALTY (BHAKTI)**—Loyalty of the citizen to his *polis* and to its laws and rulers was the hall-mark of Greek life and counted as one of its cardinal virtues. Its noblest expression is found in the life of Socrates himself: "As to his parents and his master, so to the laws and his country, he must not

return injury for injury, nor blow for blow. Country is more than a mother: for her sake all things must be endured" (Glotz, *op. cit.* p. 140). The *Janapada* State was for the citizen his mother—*Mātā bhūmih putro aham prithivyāb* (*Atharva*, XII. 1.12)—and the *Janapada Dharma*s or its laws must receive his complete loyalty. Pāṇini designates it as *Bhakti*, i.e., the political and moral allegiance of the citizen both to the *Janapada* and its *Janapadin*s (IV.3.100). A citizen of the *Āṅga Janapada* was called *Āṅgaka* with reference to his *Bhakti* to the *Āṅga* State; and similarly to the *Āṅga Kshatriyas*, the *abbishikṭa-vamīśya* rulers of that *Janapada* of which the citizen was himself an integral part. The two-fold *Bhakti* is here significantly distinguished, viz. to the State in theory and to its government in practical life.

**LAW (DHARMA)**—The new conception of law in the city-state was inspired by religious respect and marked by moral grandeur considered to be of divine origin. It is almost identical with the new interpretation of *Dharma* given to it in the *Mahābhārata*:

नमो धर्माय महते धर्मो धारयति प्रजाः । (Udyoga., 137.9).

It is not the place to enter into details about the new ethico-social meaning of *Dharma*, but it is clearly intended by Pāṇini in such a term as *Dhārmika*, *Dharmam charati*, (IV. 4.41), where *charati* is explained as *āsevā*, habitual moral conduct or practice of virtue, and *Dharmya*, that which is righteous, just, virtuous, moral and accordant with social and universal law (*Dharmad-anapeta*, IV.4.92). *Dharma* at once denoted both justice and virtue. The ideal of the *Janapada* State was the highest development of virtue and its object was to produce the perfect citizen. This ideal is embodied in the famous words of king Aśvapati of Kekaya which he uttered in the presence of such citizens as were householders possessing magnificent mansions (*mahāsāla*), supplied with all the luxuries that *Janapada* life would provide, but who still chose the path of virtue and learning (*mahāśrotṛiya*):

'Within my realm (*Janapada*) there is no thief,  
No miser, nor a drinking man,  
None altarless, none ignorant,  
No man unchaste, no wife unchaste.'

(Chhândogya Up., V.11.5)<sup>1</sup>

Reason was cultivated as the ideal of individual perfection in the city-state, and we find a similar ideal embodied in the new word *Prajñā*, which is explained in several discourses of the *Mahābhārata*, the *Vidura-nīti* being a summary of those ideals of virtue and common-sense which were cultivated by the *Janapada* citizens. The rulers also must be *Prājñā* (Śānti, 67.27). The sum total of all virtues and of the legal, social and moral ordinances which governed the life of the citizens and the *Janapada* polity was called *Vainayika*, to which both Pāṇini (V.4.34) and the Śāntiparva (68.4) refer. The *Vainayika* functions of the *Janapada* state are described at length in the *Mahābhārata* in a chapter with the epic strain 'Yadi rājā na pālayet' (Śānti., 68.1-61).

**DEFENCE** (*Gupṭi*)—The defence of the city-state was of the utmost concern to its rulers as well as the citizens. "The people ought to fight for the laws as for the walls of its city," said Heraclitus (Glottz, *op. cit.*, p. 139). The *Mahābhārata* discusses in detail the defence of the *Janapada* (*katham rakshyo janapadaḥ*, Śānti, 69.1) and lays great stress on *Gupṭi* or the military preparedness of the fortified city and its citizens. It refers to *parikhā*, *prākāra*, etc. as parts of that defensive system which Pāṇini also mentions. The evidence in the epic is naturally more elaborate, mentioning a full contingent of military and civil institutions needed for the defence of the realm, e.g. *ḍurga*, *gulma*, *nagara*, *ṣura*, *śākhā-nagara*, *ārāma*, *udyāna*, *nagaropavana*, *āṣaṇa*, *vihāra*, *sabhā*, *āvasatha*, *chatvara*, *rāsbhṛa*, *balamukhyas*, *sasyābbihāra*, *saṁ-*

<sup>1</sup> न मे स्तेतो जनपदे न कदर्यो न मद्यपः ।

नानाहिताग्निर्नाविद्वान् न स्वैरो स्त्रैरिणी कुतः ॥

*krama*, *prakaṇṭhī*, *ākāśa-jananī*, *kaṣaṅga-dvāraka*, *dvāras*, *śataghnī*, *bhāṇḍāgara*, *āyudhāgāra*, *dhānyāgāra*, *āsvāgāra*, *gajāgāra*, *balādbhikaraṇa*, all leading to the complete defence of the *Janapada* and its *pura* (Śānti, 69.1-71). We are told by the Greek historians of Alexander how the impregnable nature of the defences of the Massaga and Aornos forts (Maśakāvati and Varanā) helped the heroic Āsvakāyanas of Gandhāra in offering resistance to the invaders.

**ASSEMBLY AND COUNCIL**—Each *Janapada*, whether a kingly state or a *Saṅgha*, had its assembly (*Sabhā*) and a governing council (*Parishad*). In order to become a member of the Assembly the Greek citizen was required to have attained the age of eighteen years when he was enrolled on the register of the deme, but since usually two years of military service had first to be done, it was seldom that a man appeared in the Assembly before he was twenty. Pāṇini also refers to the qualification of a citizen to become a member of the *Sabhā* whence he was called *Sabhya*, having become privileged to be enrolled as a member and attend the meeting of the *Sabhā* (*Sabhāyā yaj*, IV.4.105; *Sabhāyām sādhuḥ*, where *sādhu* specially means *yogyā*, qualified). A Kshatriya young man, when eighteen years of age acquired the privilege of becoming a *kavacha-hara* (cf. *Vayasī cha*, III.2.10, *kavachabaraḥ kshatriya-kumāraḥ*), 'fit for military duty,' and at the age of twenty-one became privileged for all political rights and duties. The new word *Sabhya* was equivalent in meaning to the Vedic *Sabbhya* which Pāṇini records as an old Chhāṇḍasa term (IV.4.106). *Sabhā* had a two-fold meaning, i.e. the assembly and the assembly-hall (*Śālā*, II.4.23-24).

In the ancient democracies of Greek which did not know the representative system, politics was for the mass of the citizens a regular preoccupation, a constant duty (Glotz, *ib.*, p. 175). There were 42,000 citizens of Athens in 431 B.C., all did not attend and rarely were more than 2,000 or 3,000 citizens seen on the Pnyx. Certain resolutions were supposed

to be taken by the "entire people"; actually, in these cases, 6,000 votes constituted a quorum (Glotz, *ib.*, p. 153). We do not have many details of such matters for the *Sabbā* in the Indian *Janapadas*. But we are told that there were 60,000 Khatryias in the capital of the Cheta State, all of whom were styled *rājāno* (*Jāt.*, VI.511). It at least means that they were all citizens entitled to the membership of their *Sabbā*. Amongst the Lichchhavis there were 7,707 *rājāno*. No information is available about the quorum in the *Sabbā*, but in one instance the number of the Deva-jana i.e., the Deva host functioning as the *Jana* is stated to be 6,000 (*śaṭ-sāhasrāḥ*, *Atbarva.*, XI.5.2), and again as 3,000 (*Bṛih. Up.*, III.9.1). The former seems to refer to the quorum of the *Jana* as a whole, and the latter to the *Prithag-Devāḥ* (*Atbarva*, XI.5.2.), i.e., the approximate number of members individually attending their *Sabbā*. These numbers, obviously lacking any other reasonable explanation, seem to have been taken from the procedure as it prevailed in the *Janapada* assemblies of men. The Vṛishnyandhaka heroes assembled in a body in an emergent meeting of their *Sabbā* are actually compared to the gods seated in the Sudharmā hall (*Ādi.*, 212.15). Elaborate seating arrangements were made for the members (*ib.*, 212.13-14).

The *Sabbā* must have held regular sessions on fixed days, and also emergent meetings convened to consider unforeseen events, as for example, the abduction of Subhadrā by Arjuna. Under the stress of public events, when there was urgent necessity, the Sabhāpāla officer convened an assembly of panic and tumult, summoning the citizens of the town by sounding the war drum (*sānnābhikī bberī*, *Ādi.*, 212.11).

The *Sabbā* as an institution existed both in the *ekarāja* states and the *gaṇas*. In the former it was named after the name of the king (II.4.23), as *Cbandragupta-sabbā*.

SYMPOLITIES—Under pressure of political events, neighbouring and kindred cities or groups of people united in larger communities. This led to confederations of the most

diverse nature. Union was accomplished in all cases by the adoption of a common constitution. This was given the name of sympolity in the Greek city-states. The sympolities which are known to us present so many forms, so many gradations, that it is often puzzling to know how to define them, or one hesitates for the appropriate name. Almost the same political phenomena prevailed in the case of the *Janapada* states in the time of Pāṇini. He seems to have surveyed these diverse sympolities and arranged the different political terms in the *sūtra Śreṇyādayaḥ kṛitādibhiḥ* (II.1.59). The first three terms *Śreṇi*, *Eka* and *Pūga* have reference to three types of states, the diverse nature of their constitutional modifications being indicated by words in the *Kṛitādi gaṇa*. The constitutional variety and gradation may be set forth as follows for the *Śreṇi* :

1. *Śreṇi-kṛita*, formed or organised into a *śreṇi* under external pressure of events.
2. *Śreṇi-mita*, groups of people, with a *śreṇi* constitution to a limited extent only.
3. *Śreṇi-mata*, united with the approval of the constituent groups, each of the confederating units retaining the status of a *śreṇi*.
4. *Śreṇi-bhūta*, fully welded or confederated as one *śreṇi*, with the spontaneous urge of members.
5. *Śreṇi-ukta*, having only the formal designation of a *śreṇi*, otherwise retaining the independence of each group in the union.
6. *Śreṇi-samājñāta*, probably similar to an administration in which only a few officials like magistrates, *mahattaras*, were accepted in common by the contracting parties to the union.
7. *Śreṇi-samāmnāta*, a union as *śreṇi*, in which a common constitution was adopted by several *Janapadas* by incorporating some parts of one with some of the other.

8. *Śreṇi-samākhyāta*, completely and fully merged or brought into a common relationship with one another.
9. *Śreṇi-sambhāvita*, welded as a unit by the mingling or transference of populations, perhaps akin to synœcism in the city-states.
10. *Śreṇi-avadhārta*, *śreṇis* forming unions in only a limited or restricted manner.
11. *Śreṇi-nirākṛta*, *śreṇi* that had seceded from the union or hegemony of states to which it formerly belonged.
12. *Śreṇi-avakalpita*, a state that was ripe to form a union by virtue of its strength of arms.
13. *Śreṇi-upakṛta*, a smaller state becoming a partner with a bigger *Janapada* and earning some advantage for it by this deal.
14. *Śreṇi-upākṛta*, brought near or driven to form a union as a reaction to the menacing growth of some neighbouring state.

We may have two more groups of similar terms for *Pūga* and *Eka* forms of government.<sup>1</sup>

The word-meanings given to the various terms of the *gaṇa Kṛitadī* are more or less hypothetical and the determining of precise political significance must await further clarification. This much, however, is indicated that they refer to political unions or constitutional forms of diverse nature and extent, by which new states were created out of old ones, embracing new groups, losing some part of their

<sup>1</sup>पूग—पूग-कृत, पूग-मित, पूग-मत, पूग-भूत, पूग-उक्त, पूग-समाज्ञात, पूग-समाम्नात, पूग-समाख्यात, पूग-सम्भावित, पूग-अवधारित, पूग-निराकृत, पूग-अवकल्पित, पूग-उपकृत, पूग-उपाकृत ।

एक—एक-कृत, एक-मित, एक-मत, एक-भूत, एक-उक्त, एक-समाज्ञात, एक-समाम्नात, एक-समाख्यात, एक-सम्भावित, एक-अवधारित, एक-निराकृत, एक-अवकल्पित, एक-उपकृत, एक-उपाकृत ।

autonomy, or effacing their frontiers to form into bigger unions, or organising into military bands (*pūgas*) of varying *camaraderie* and cohesion.

AVAYAVAS—Pāṇini refers to this term in *sūtra* IV.1.173; its meaning cannot be said to be beyond doubt. The *Kāśikā* mentions six *Avayavas* of the Sālva state, viz., Udumbara, Tilakhala, Madrakāra, Yugandhara, Bhuliṅga, and Śaradaṇḍa, to which Patañjali adds three more, viz., Ajamīḍha, Ajakranda and Budha (*Bhāṣya*, II.269). Their territories were far flung over Rajputana and the Panjab without any geographical contiguity. It seems that the *Avayavas* were Sālva citizens who were detached from the main body and quartered on other *Janapadas* as an occupying colony where they enjoyed all the privileges of the new state, but at the same time considered themselves to be part and parcel (*avayava*) of the parent state of the Sālva Kshatriyas. Thus they were "the Sālva people of Udumbara," "the Sālva people of Tilakhala," etc., but constitutionally a section of the Sālva *Janapada*. Such a system was known in Athenian democracy where the *cleruchs* (persons sent out from Athens as occupation forces) were quartered in thousands on the soil of other cities, and were designated as "the Athenian people of Imbros," "the Athenian people dwelling in Scyros," etc. (Glotz. *ib.* p. 282).

## APPENDIX II

### A CRITICAL TEXT OF THE GEOGRAPHICAL GAṆAS

The material of place-names in the *Aṣṭādhyāyī* has been discussed above (pp. 34-74, 434-454). It is proposed to present here a critical text of the *Gaṇa-pāṭha* relating to place-names (*ante*, p. 72). A study of the comparative material of the *Gaṇas* in other grammatical systems shows beyond doubt that the basis of the Paṇinian *Gaṇa-pāṭha* is sound and that its text was adopted in the subsequent systems and preserved in so many recensions for about a thousand years with tolerable textual purity.

The critical text of the geographical *Gaṇas* is here presented on the basis of the following material:

1. *Kāśikā*, Kāśī edition of Balashastri, 1928.
2. *Candra Vyākaraṇa* with its own *Vṛitti* which has preserved quite a substantial portion of the Paṇinian *Gaṇa-pāṭha* (c. 450 A.D.); available in the excellent edition by Dr. Liebich.
3. *Jainendra Vyākaraṇa* of Pūjyapāda Devanandi (c. 550-600 A.D.), of which the *Gaṇa-pāṭha* is preserved in the *Mahāvṛitti* of Abhayanandi. A complete transcription from several manuscripts was made available by the Bharatiya Jñānapīṭha of Kāśī.
4. *Jaina Śākaṭāyana Vyākaraṇa* of Pālyakīrti, a contemporary of king Amoghavarsha (817-877); the commentary *Amoghavṛitti* of the author is a voluminous work so far unpublished, but was accessible to me in a Devanāgarī transcript based on a Kannaḍa palm-leaf Ms. by the courtesy of the Syādvāda Vidyālaya, Kāśī.

5. *Sarasvatikaṇṭhābharana* of Bhoja (c. 1018-1053 A.D.) [edited by T. R. Chintamani, Madras University Skt. Series].
  6. *Siddhabaimaśabdānuśāsana* of Hemachandra (1088-1172), with his own *Bṛihad-vṛitti* (c. 1130 A.D.).
  7. *Gaṇaratnamahodadhi* of Vardhamāna (1140 A.D.)
- Critical editions of the above, except 7 by Eggeling, are wanting, and should in course of time be undertaken. It would then be possible to effect further improvements in the collated text.

The statistical results of the reconstituted text are interesting:

(a) (i) 6 Chāturarthika gaṇas	.. 109	189	
(ii) 17 Chāturarthika gaṇas in			
<i>sūtra</i> IV.2.80	.. 228	430	
(b) 6 Śaishika gaṇas	.. 123	194	
(c) Abhijana place-names, 2 gaṇas	.. 21	23	
(d) Prastha-ending names, 2 gaṇas	.. 16	16	
(e) Kanthā-ending names, 1 gaṇa	.. 7	7	
Total	.. 504	859	

The total number of place-names in the 17 gaṇas of *sūtra* IV.2.80 as listed in Böhrtlingk's edition of the *Ashtādhyāyī* (Leipzig, 1887),\* and generally in the printed editions of the *Kāśikā* is 430, which in the reconstituted text is reduced to.

\* The text of the *Gaṇa-pāṭha* as printed in the *Word-Index to Pāṇini-Sūtra-Pāṭha and Parīśiṣṭas*, by Pathak and Chitṛao (Bhandarkar Oriental Institute, Poona, 1935), closely follows that of Böhrtlingk.

228. We had in arriving at our text tabulated in parallel columns the names as found in the six grammatical systems under purview and also the *Gaṇaratnamabodadhi*; the un-authentic or spurious words as well as the later accretions themselves sprang into relief and were eliminated and relegated to footnote, as Variants and Additions. It is now proposed to subject the entire *Gaṇa-pāṭha* to a similar critical collation and present the results in a separate volume with requisite details, including the equally important material of the Gotra lists which have been left over from the present study.

The number of names in the 34 *gaṇas* under Chāturarthika, Śaishika and Abhijana suffixes and Prastha-and Kanthā-ending names is 504 in the collated text as against 859 of the *Gaṇa-pāṭha* printed in Böhtlingk's edition, or what may be called the Vulgate text of the *Gaṇa-pāṭha*.

The general soundness of the collated text can be demonstrated by the fact that the number 500 is just what has been mentioned by the Greek writers as the number of cities between the Jhelum and the Beas (*ante*, p. 73), or the Vāhika region of Pāṇini. A city is defined as a town with a population of 10,000 and over. In the limited area between the upper courses of the Jhelum, the Chenab and the Ravi there were as many as thirty-seven cities, with a minimum population of 5,000 inhabitants, while many contained upwards of 10,000. Megasthenes wrote about the cities of Mauryan India that their 'number is so great that it cannot be stated with precision' (M'Crindle, *Megasthenes and Arrian*, p. 209). The significance of these figures may be better understood if we remember that in the undivided India of 1941 there were only 57 cities, the number increasing to 75 in 1951. On the other hand in France 455 towns, besides Paris, have more than 9,000 inhabitants.

The printed editions of the *Gaṇa-pāṭha* led to the statement (*ante*, p. 74) that the two *gaṇas*, *Samkalādi* (IV.2.75), *Aribhaṇādi*, etc., (IV.2.80) alone give about 500 names. The

correct figure in the collated text of these two *sūtras* is only 260. However, the grand figure of 500 recorded by the Greek geographers of Alexander's campaign now finds solid support from the *Aśṭādhyāyī* presenting us with an exhaustive list of the important towns and villages of north-west India. The agreement between these two figures shows the perfection of Pāṇini's method in surveying his linguistic data. The great teacher, in the words of Yuan Chwang, wandered about asking for knowledge and collected a multitude of words. During the course of his fact-finding mission he seems to have omitted nothing of value, and also evolved a simple and clear scheme of classification by which this vast and complex material of geographical names was reduced to order and made an integral part of his grammar.

There now remains the task of identifying the mass of these names. The names of castes and sub-castes and family surnames in the Panjab offer an attractive field, since they are mostly derived from names of places which were once their home-towns (*nivāsa* and *abbijana*). The human and linguistic material of Pāṇini's time cannot have totally disappeared; its survival in a changed form is the only natural process of evolution. For example, Saharāliye, a sub-caste of the Agrawala community in the Panjab, trace their original seat to Saharālā in Ludhiana Dist., and these may be connected with Pāṇini's Sarālaka (Takshaśilādi, IV.3.93) and its derivative Sārālaka. Similarly Batrā, a sub-caste of the Khattris, points to Vātraka (Rājanyādi, IV.2.53); Chope, a sub-caste of the Aroras, to Chaupayata (Bhaurikyādi, IV.2.54); Balūje, amongst the Aroras, to Vāliyyaka (IV.2.54), etc. Archaeological survey and digging may also help to some extent, since geographical places of antiquity often survive as so many sites.

The *sūtra* *Vishayo deśe* (IV.2.52) calls for comment. What was the exact significance of *Vishaya*? Jainendra, Śākaṭāyana and Hemachandra take it as *rāśbṛṭṭa*, and Vardhamāna as *Janapada*, which is the same thing. The *Kāśikā* takes

it as *grāma-samudāya*. Kātyāyana and Patañjali interpret *Vishaya* as being identical with *Janapada* in some cases, but their comments give the impression that even such geographical units as were not a *Janapada* were called *Vishaya*. For Pāṇini, if *vishaya* and *janapada* were identical, he would not treat of the former under a separate heading (IV.2.52-54). The truth seems to be that *Vishaya* denoted 'sphere of influence', 'lands', 'possessions', and as such was distinct from *nivāsa* or the actual settlement of the people whose possession it was. A *Vishaya* included both a bigger unit having the status of a *Janapada*, or a smaller area which was but an estate. In the words of the Rājanyādi *gaṇa*, *Vishaya* denoted *Janapadas*, while in those of the Bhauriki and Aishukāri *gaṇas* (IV.2.54) it was the landed property, their share of estate, *ṭhikānā* or *zamindārī* which was the source of their livelihood. The suffixes *vidhal* and *bhaktal* (i.e. *vidha* and *bhakta*) denoted food, division, share, property. *Vidhā* (food) seems to be derived from *vidha* having such a meaning, and *bhakta* is well-known as denoting 'source of livelihood or maintenance.' The villages (*grāma-samudāya*) which were the *zamindārī* of the Bhaurikis were called Bhauriki-*vidha*, and similarly Aishukāri-*bhakta* without any reference to the polity that prevailed there.

The position in the post Paninian period was as follows. (1) In the case of big *Janapadas*, the distinction between the word-forms for *Janapada* and *Vishaya* was lost, both being called *Āṅgāḥ*, *Vaṅgāḥ*, *Suhmāḥ*, *Puṇḍrāḥ*, etc. (2) In some *Janapadas* like Rājanya, the distinction was retained, as Rājanyaka denoted a *Vishaya* and Rājanyāḥ the *Janapada* of the Rājanya tribe. Similarly Vāsataḥ, Vāsātayaḥ, Gāndhāraḥ, Gāndhārayaḥ; Śaibaḥ, Śibiyāḥ. (3) Other smaller units were only *Vishayas* or estates, like Bailvavanaka, Ātmakāmeyaka, Bhaurikividha and Aishukāri-*bhakta*.

## MATERIAL

## I. JANAPADA NAMES

## (१) कच्छादि (४।२।१३३)

(शैविक अणु । कच्छः)

१ कच्छ, २ सिन्धु, ३ वर्ण, ४ गन्धार, ५ मयुमत्, ६ कम्बोज, ७ कश्मीर, ८ साल्व, ९ कुह, १० रंकु, ११ अनुषङ्ग, १२ द्वीप, १३ अनूप, १४ लज्जवाह, १५ विजापक, १६ कुलूत ।

(1) Kachchhādi. Ref.—K(āśikā) IV.2.133; Ch(andra) III.2.48; J(ainendra) III.2.112; Ś(ākaṣāyana) III.1.46; Bh(oja) IV.3.71; H(ema-chandra) VI.3.55; V(ardhamāna) 327; P(atanjali).

Var(iants)—4 Gandhāri (Bh.); 5 Madhura, Madhurāt (J.); 8 Śālva (Ch.); 11 Anukhaṇḍa (K.), a misreading, since K. reads Anushaṇḍa IV. 2.100; also Anūshaṇḍa (H); 14 Ajapāda (Ch.), Ajāvaha (J.); 15 Virūpaka (Ch.), Vijñāpaka (J.), Bijāvaka (Bh.); 16 Kulūna (K.), Kulla (Ch.), Kalūtara (Ś.), Kulūka (Bh.), also Kula, Kulva (V.). In J. Kamboja, Saktu-Sindhu) in Bh. and V. (cf. K. VII.3.19), missing in K. Ch. Ś. but found in Bh. H. V. Also Yaudheya, Sasthāla (H.). P. authenticates in this the reading of Kuru (IV.2.130), Rāṅku (IV.2.100).

(२) भर्गादि (४।१।१७८)

१ भर्ग, २ कस्तूर्य, ३ केकय, ४ कश्मीर, ५ साल्व, ६ सुस्थाल, ७ उरस, ८ कौरव्य ।

(३) सिन्ध्वादि (४।३।९३)

[सोऽस्याभिजनः, अण् । सैन्धवः]

१ सिन्धु, २ वर्ण, ३ मधुमत्, ४ कम्बोज, ५ साल्व, ६ कश्मीर, ७ गन्धार,  
८ किष्किन्धा, ९ उरस, १० दरद, ११ गन्धिका ।

II. VISHAYA

(४) ऐषुकारि गण (४।२।५४)

[विवयो देशे, ऐषुकारि भक्तः]

१ ऐषुकारि, २ सारस्यायन, ३ चान्द्रायण, ४ द्वाक्षायाण, ५ श्यायायण,  
६ जीलायन, ७ खाढायन, ८ सौवीर, ९ दासमित्रायण, १० शौद्रायण, ११ दाक्षायण,

(2) Bhargādi—K. IV.1.178; Ch. II.4.106; J. III.1.158; Ś. II.4.107; Bh. IV.1.179; H. VI.1.123; V. 202.

Var.—2 Karūsa (J.), also Karūsa (H.); Śālva (Ch. V.), Selvā (J.); 7 Urasa (Ś. H.). V. adds Bharata, Uśinara.

(3) Sindhvādi—K. IV.3.93; Ch. III.3.61; J. III.3.67; Ś. III.1.201; Bh. IV.3.212; H. VI.3.276; V. 351-52.

Var.—2 Varṇa (J.); Salva (J. H.), Śālva (Ch. Ś. V.); 7 Gāndhārī (Bh.); 8 Kishkindha (J. H.), 9. Urasā (Ś. Bh. V.), Uras (H.); 11 Gandika (Ch.), Gandikā (Ś), Gabdika (J. H.). Ch. reads Takshaśilādi also in this. J. adds Pañchāla, Kaimeḍura, Kāṇḍakāra, Grāmaṇi; H. Grāmaṇi, Kāṇḍavaraka, Kulūja; and K. Kuluna, Dirasā, but all are spurious to this Gaṇa.

(4) Aishukāri Gaṇa—K. IV.2.54; Ch. III.1.63; J. III.2.47; Ś. II.4.189; Bh. IV.2.89-91; H. VI.2.68; V. 268-69.

Var.—2 Sārasāyana (J. H.); 4 also Dvyakshāyana (H.); 5 also Tryakshāyana (H.); 6 Aulāyana (Ś. H.), Alāyana (J.); 7. Tādāyata (J.), Khādāyana (H. also V.), Khāṇḍāyana (Bh.) 9. K. Ch. Ś. H. V. also read Dāsamitri (Ch. Dāsamitra) 10. Śaudrāṇa (K.), Śaudrakāyana (Ś. H. V.); 11. only in K. Ch. V, and hence doubtful; 12 Śāyāṇḍa (Ch.), Tapanda (J.), with additional variants as Sāyāṇḍi (K.) Sāpiṇḍi (J.), Śāyāṇḍa (Bh.), Śāyāṇḍāyana (V.), Śāyāṇḍa and Śāṇḍa (H.); 13. omitted in Ch. J. Bh.; 14. Śaubhadrayāṇa (Ch.) but H. cites Śaubhrāyana-bhaktā of Ch., J. Ś. omit it, Śāyābhra (Bh.); 15. Vaiśvamānava (Bh. also V.); 16. Ch. J. H. omit; 17. Vaiśvadheva (J.), also Viśadeva (K.); 18. Ch. omits. H. adds flimsy variants as Gaulukāyana, Mālukāyana, and K. as Alāyata, Aulāyātā, all to be rejected.

Vishayo देशे of Pāṇini denoted an estate of a tribe or clan; but grāma-

१२ शयंड, १३ ताक्ष्यायण, १४ शौभ्रायण, १५ वैश्वमाणव, १६ वैश्वघेनव, १७ वैश्वदेव, १८ तंडदेव ।

### (५) भौरिकि गण (४।२।५४)

[विवयो देशे, भौरिकिविधः]

१ भौरिकि, २ भौलिकि, ३ चैटयत, ४ काण्येय, ५ वाणिजक, ६ बालिज्यक, ७ सैकयत, ८ चैकयत, ९ चौपयत ।

### (६) राजन्यादि (४।२।५३)

[विवयो देशे वृज्, राजन्यकम्]

१ राजन्य, २ देवयातव, ३ जालंकायन, ४ जालंधरायण, ५ आत्मकाभेय, ६ अम्बरीषपुत्र, ७ वसाति, ८ वैल्ववन, ९ शैलूप, १० उदुम्बर, ११ आर्जुनायन, १२ संप्रिय, १३ दाक्षि, १४ ऊर्णनाभ, १५ आप्रीत, १६ तैतिल ।

*samudāya* according to K., which J. and H. take as equivalent to *rāshṭra*, and V. as *Janapada*.

(5) Bhaurikyādi—K. IV.2.54; Ch. III.1.63; J. III.2.47; Ś. II.4.189; Bh. IV.2.88; H. VI.2.68; V.267.

Var.—3 Chodayata (Ś.); 5 Vāṇejaka (J.), Ch. Ś omit; 6 Vālikājya (Ś. V.), Vālikādyā (H.); 7 Śaikayata (K., also Ch.); 8 Vaikayata (K.), Vaiyat (J.); 9 K. omits, Chaupagata (J.); Ś. omits 5, and adds Vaidayata, Kshaitayata (also H. V.).

(6) Rājanyādi—K. IV.2.55; Ch. III.1.62; J. III.2.46; Ś. II.4.190; Bh. IV.2.86-87; H. VI.2.66; V. 265-6.

Var.—2 Devayāna (K. Bh.), also Devayāta (H.), Devayātava (V.); 4 Jālāṇdhara (Ś.), also Jānāṇḍharāyana (H.); 6 Ambariputra (Ś.), also Ambari-Āmbari-(H.); 7 Vātsaka (J.), H. omits; 8 Bāilvata (Ch.), omitted in J. Ś; 9 omitted in J. Ś., Śailūshaja (H.), Śailūshaka (V.); 10 also Audunbara (H.), J. omits; 11 Ś omits; 12 Sāmpriya (Bh.); 13 Dākshāyana (V.); 14 also Ūrṇanābhi (H.); 15 Āprita is undoubtedly the correct reading (=Afridis), but Ch. omits, and others record incorrectly, Āvrati (J.), Āvrīta (Ś.), Angita (Bh. V.), Āvrīta and Āvrītaka (H.); 16 Some original form of Vaitila (K. Bh.), Taitala (Ś. H.), Tailvala (V.), Bāilvala (K.), which seems to have been Taitila, Add. Avriḍa, Vātraka (K.); Vātrava Kāntāla, Bābhavya, Vaiśvadenava, Vaiśvamānava, Vaiśvadeva, Tuṇḍadeva (Ś., last four contaminated from Aishukārī gaṇa); Vaikarṇa Vasana, Bābhavya, Mālava, Trigarta, Vairāṭi (Bh.); Vātrava, Bābhavya, Kauntāla, Virāṭa, Mālava, Trigarta (H.); Traigarta, Vasana, Kauttāla (V.). Some original form like Vātraka seems to have been included. P. authenticates 2 (*Devayātava-graṇaṇam vaiśvayikeshu*, IV.2.92; II.291) and 5, 6, 7, 8 (IV.1.52; II.282). The group of Mālava, Trigarta, Virāṭa was taken from Chāndravṛtti by Bh. and H.

### III. SAṄGHAS

#### (७) दामन्यादि (५।३।११६)

[आयुषजीविसंघात् स्वायें छः, दामनीयः]

१ दामनि, २ ओलपि, ३ काकदन्ति, ४ अच्युतंति, ५ शत्रुतपि, ६ सावंसेनि,  
७ वैन्दवि, ८ मौजायन, ९ तुलम, १० सावित्रीपुत्र, ११ वैजवापि, १२ औदकि।

#### (८) पश्वीदि (५।३।११७)

[आयुषजीविसंघात्स्वायें अण्, पार्श्वः]

१ पश्व, २ असुर, ३ रक्षस्, ४ बाल्हीक, ५ वयस्, ६ मलत्, ७ दसाहं, ८ पिशाच,  
९ अशनि, १० कार्वापिण, ११ सत्वत्, १२ वसु।

#### (९) यौधेयादि (४।१।१७८)

१ यौधेय, २ शौभ्रेय, ३ शौकेय, ४ ज्यावाणेय, ५ वार्तेय, ६ घातैय, ७ त्रिगर्ता,  
८ भरत, ९ उशीनर।

### IV. PLACE-NAMES

#### (a) *Chāturarṭhika*

#### (१०) अरीहणादि (४।२।८०।१)

[चातुरार्थिक वुञ् । आरीहणकम्]

१ अरीहण, २ द्रुवण, ३ खदिर, ४ भगल, ५ उलन्द, ६ साम्परायण, ७ कौद्रायण,

(7) Dāmnyādi—K. V.3.116; Ch. IV.3.92; J. IV.2.5; Ś. III.4.145; Bh. V.3.151-52; H. VII.3.67; V.192.

Var.—2 also Aupali (H.); 3 Kākandaki (Ch. B. H.), Kākandi (Ś. H.), Kākadantaki also (V.), 5 Śātruntapi (Ś. V.), Śākuntaki (Ch. J. Ś. Bh. V.); 7 Bindu (K. Ch. J. H. V.); 8 Mauñjyāyani (Bh.); 11 Devavāpi (K.); 12 Audāṅki (Ś. Bh. V.), Autaki (K.), Ākidanti, Kākaranti, Ulabha, Kokatanti, Apachyutaki, Karkī, Piṇḍī are spurious readings in K.; similarly Audameghi, Aupabindi, Kakundi, Kakundaki in H.; Audavi in Bh. V.; Āvidanti in V. J. and Ś. include the Trigarta-Shaṣṭhas also in this Gaṇa.

(8) Parśvādi—K. V.3.117; Ch. IV.3.93; J. IV.2.6; Ś. III.4.145; Bh. V.3.153; V. 197.

Var.—4 Balhika (V.); 10 Karshāpaṇa (V.); 11 Sarvantu (Ch.). J. includes Yaudheyādi also under Parśvādi.

(9) Yaudheyādi—K. IV.1.178; Ch. IV.3.93; J. IV.2.6 and III.1.158; Ś. III.4.145; Bh. V.3.154; H. VII.3.65 and also in Bhargādi VI.1.123; V. missing.

Var.—3 Śaukneya (K.), Saukreya (J. III.1.158 com., missing in IV.2.6); 4 Grāvāṇeya (K. undoubtedly a corrupt reading), Jyāvāṇeya (Bh. H.) 5 Ghārtēya (Ś. H. Bh.; Bh. also correctly Vārteya). Bh. reads 7-9 in Parśvādi, and H. in Bhargādi VI.1.123.

(10) Arihaṇādi—K. IV.2.80; Ch. III.1.68 (first two words only); J. III.2.60; Ś. II.4.202; Bh. IV.2.110-11; H. VI.2.83; V. 286-89.

८ भास्वायन, ९ मैवायन, १० जैगर्तायन, ११ रायस्पोष, १२ विषय, १३ उदंड, १४ उदंचन, १५ खाडायन, १६ खंडवीरण, १७ काशकुत्सन, १८ जाम्बवत्, १९ शिशपा, २० किरण, २१ रैवत, २२ बिल्व, २३ वैमतायन, २४ सौसायन, २५ शाडिल्यायन, २६ शिरीष, २७ बधिर, २८ विपाश, २९ सुयज्ञ, ३० जम्बू, ३१ सुशर्म।

## (११) अश्मादि (४।२।८०।८)

[चातुरधिक २। अश्मरः]

१ अश्मन् २ यूष, ३ ऊष, ४ मीन, ५ दर्म, ६ वृन्द, ७ गुड, ८ खंड, ९ नग, १० शिखा।

## (१२) उत्करादि (४।२।९०)

[चातुरधिक छः। उत्करीयम्]

१ उत्कर, २ राफर, ३ पिप्पल, ४ अश्मन्, ५ अर्क, ६ पर्ण, ७ खलाजित, ८ अग्नि, ९ तिक, १० कितव, ११ आतप।

Var.—1 Arihaṇa (Bh.); 2 also Druvaṇa (Ch.), Dughaṇa (Ś.), Druhaṇa (Bh. H. V.); 3 Kharadi (Ś.); 4 H. V. Ś. add Bhalandana; 5 Ulunda (J. Ś. H.); 6 Sāmparāyana (J.), Ś. omits, Khāvurāyana and Khāpurāyana (H.); 7 Krauṣṭāyana (J.), Kosṭāyana (Ś.), Kauṣṭāyana (H., also Kaudrāyana), Ausṭāyana (Bh., also V.); 8 J. omits, but P. treats it as an authentic reading (*Bhāṣṭrāyana-grabanam naivāsikesbu*, IV.2.92; II.291); 9 Chaitrāyana (J.), Ś. omits, Śvitrāyana (H.), also Śvairāyana (V.); 11 Rāyasphosha (J. Ś.); 15 Khāṇḍāyana (J.) Khāburāyana (Ś.), Khānurāyana (H.); 16 Khāṇḍa Virāṇa as two words (K.) Khaṇṭu Dhīraṇa (Ś.), Rakaṇḍu, Khaṇḍu and Virāṇa separately (H.), Khaṇḍu, Virāṇa and Khāṇḍavīraṇa (V.), possibly these two were separate names; 17 Kaśakṛitsna (H.V.), Ś. omits; 18 Aumbavati (Ś. an obvious corrupt reading); 19 Ś. (Kanarese transcript) omits; 22 Bailvaka (K., the form by adding suffix), Ś. omits, Bilva (Bh. H. V.), Tailva J. 23 also Maimatāyana, Gomatāyana (K.), Dhaumatāyana (Ś. V.), also Gaumatāyana (V.); 24 Saumāyana (J. H.), also Sauśayana (H.), Ś. Bh. omit, cf. Sausuka a Vāhika town in P. (IV.2.104); 25 Ś. omits; 26 J. Ś. H. omit, may be doubtful; 27 J. omits, Badira (Ś.); 28 Vipārśva (Ś.); 30 J. Ś. omit, Jambu (K.); 31 J. Ś. omit.

Add. Viśāya, Vāyasa (J.); Yajñadatta, Raudrāyana (Ś.); Yajñadatta, Samburāyana, Sāmbarāyana (H.); Yajñadatta, Kanala, Dalatṛi, Kaudrāyana (V.).

(11) Aśmādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.120; H. VI.2.78; V. 271.

Var.—2 also Yūsha (K. Ś. Bh. H.); 3 Rūsha (K.), Ūtha (J.); 6 Vrindā (J.); 7 Guḍā (J.), Guhā (Ś. H.), V. adds Gahva and Guhā; Kāṇḍa (Ś. also V.), Kaṇḍa (H.) K. adds Rusha, Nada, Nakha, Kāṭa, Pāma, all uncertain.

(12) Utkarādi—K. IV.2.90; Ch. III.1.68 (only first two words); J. III.2.71; Bh. IV.2.134-36; H. VI.2.91; V.301-3.

(१३) ऋश्यादि (४।२।८०।३)

[चातुरधिक कः। ऋश्यकः]

१ ऋश्य, २ न्यग्रोध, ३ शर, ४ निलीन, ५ निवास, ६ विनद्ध (?), ७ परिगूढ,  
८ उपगूढ, ९ उत्तराश्वन्, १० स्थूलबाहु, ११ खदिर, १२ शर्करा, १३ अनडुह,  
१४ परिवेश, १५ वेणु, १६ वीरण।

(१४) कर्णादि (४।२।८०।१३)

(चातुरधिक फिक्। कार्णायनिः)

१ कर्ण, २ वसिष्ठ, ३ अर्कलूष, ४ द्रुपद, ५ आनडुह्य, ६ पांचजन्य, ७ कुलिश  
८ कुम्भ, ९ जीवन्त, १० जित्वन्, ११ आण्डीवत्, १२ स्फिक्।

(१६) काशादि (४।२।८०।५)

(चातुरधिक इलः। काशिलः)

१ काश, २ वाश, ३ अश्वत्थ, ४ पलाश, ५ पीपूष, ६ विस, ७ तुण, ८ कर्दम,  
९ कर्पूर, १० कंदक, ११ गुहा, १२ नड, १३ वन, १४ बर्बूल।

Var.—J. gives only 13 words, as against 43 of K. which may be an inflated version. Bh. H. V. of course follow K. A critical edition of K. can alone throw further light on the original text of this *gāṇa*.

(13) Rishyādi—K. IV.2.80.3; J. III.2.60; Ś. II.4.202; Bh. VI.2.114-15; H. VI.2.94; V. 293.

Var.—3 Śirā (K.); 4 mentioned in P. (IV.2.104; II.294); 5 Nivāsa, Nidhāna, Nivāta in K. point to one original; 6 Nivādha (K. J.), Nibandha (Bh. H. V.), Vivaddha (K. J.), all derived from one original; 10 Sthūla and Bāhu (V.), H. reads as one word and also separately, also Sthūlavāha (J.). The list closed with Virāṇa in J.; Ś. also Khaṇḍu; K. Bh. H. V. add Kārdama, Parivṛtta, Amśa; others Araḍu (Araṇu), Āsani, which group is doubtful.

(15) Kārṇādi—K. IV.2.80; J. III.2.60; Ś. IV.2.202; Bh. IV.2.129; H. VI.2.90; V.291.

Var.—2 Vāśishṛha (J. V.); 3 Arkalūsha was one name as read in the Bidādi *gāṇa* in K. and other systems as J. Ś. H., wrongly split here, but Bh. H. V. read both separately and as one word; 4 Dṛupada (K.), Bh. omits; 5 Anaḍuhya (K.), Ānuduhyā (Ś.); 8 Kumbhī (K. V., the latter also Kumbha, Kuntī); 9 Jivantī (K.); K. adds Jñāvat; Ś. Bh. H. V. add Ākani, Ānaka, Ākani, Ākana; Ś. H. V. Jaitra.

(16) Kāśādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.117; VI.2.82; V.296-7.

Var.—2 Vāsa (J. Ś. Bh. V.), Pāśa (Bh. H. V.); Piyūkshā (Ś. H.), Ś. omits; 8 Kārdama (J.); 10 Karkaṣa (J.); 11 Gūha (K.); 12 Nāḍa (Ś.), Nala (H.); 14 Vadhūla (K.), Varghūla (J.), Bandhūla (Bh.), Vartūla (H.), Vachchhūla (V.).

Add Śākaṣika (J.), Śipāla (Ś. H. V.), Kapittha (Ś. H. V.), Madhura, Jatu (V.).

## (१७) कुमुदादि (४।२।८०।४)

[चातुरथिक ठक् । कुमुदिकम् ।]

१ कुमुद, २ शर्करा, ३ न्यग्रोध, ४ इक्कट, ५ गर्त, ६ बीज, ७ अदवत्थ, ८ बल्लवज, ९ परिवाय, १० शिरीष, ११ यवास, १२ कूप, १३ विककत ।

## (१८) कुमुदादि (४।२।८०।१७)

[चातुरथिक ठक् । कौमुदिकम् ।]

१ कुमुद, २ गोमठ, ३ रथकार, ४ दशग्राम, ५ अदवत्थ, ६ शाल्मली, ७ मुनिस्थल, ८ कूट, ९ मुचुकर्ण ।

## (१९) कुशादवादि (४।२।८०।२)

[चातुरथिक छण् । काशादवीयः ।]

१ कुशादव, २ अरिष्ट, ३ वेदमन् ४ विशाल, ५ रोमक, ६ शबल, ७ कूट, ८ बवंर, ९ सूकर, १० प्रतर, ११ सद्वा, १२ पुरग, १३ सुल, १४ घूम, १५ अजिन, १६ बिनत, १७ विकुषास, १८ अरुस्, १९ अयस्, २० मीद्गल्य ।

(17) Kumudādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.116; H. VI.2.96; V.294-95.

Var.—2 Śarkkara (J.), Ś omits; 4 Itkaṭa, Utkāṭa (K.) also Utkāṭa (Bh.); 6 Ś omits; 7 Bīlvaja (Ś.); 9 Parivāsa (Ś.); 10 Ś. omits; 11 Yavāsha (K. H.), 13 Vikanta (Ś.).

(18) Kumudādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.133; H. VI.2.97; V.285.

Var.—2 Gomatha (K. J.), Gomada (Ś.), but Gomāṭha (Bh. H. V.) is also authenticated by Ch. (III.1.68); 4 Dāsagrāma (Ś. H.); 8 Kuṭa (H.), Kumūṭa (Bh.); 9 J. Bh. V. Ch. omit, Muchakūrṇi (Ś. also H.); K. adds Kunda, Madhukarna, Śuchikarṇa, Śirisha.

(19) Kriśāsvādi—K. IV.2.80.2; J. III.2.60; Ś. II.4.202; Bh. IV.2.112-13; H. VI.2.93; V. 290-91.

Var.—3 Vaiśya (Ś.), Veshya (H.), also Vepya (J.), all corrupt readings; 5 also Lomaka (J. Ś. H. V.); 6 Śavala (J. H.), Kabala (Ś.), also Śivala (H.), also Suvarchala (Bh. H. V.), all corrupt readings; 7 J. omits, Kuṭa (Bh.); 8 Varvara (K.), Barbala (Ś.), Bh. H. omit; 9 Śukara (H.), also Sukara (K.), Dūraka (Ś.), Pūgara, Dhūkara, Pūkara (H., who often gives the most inflated version); 10 Pūtara (J. also V.), also Pūkara (V.), Pūraka, Pūruga (Ś.); 11 Sudrīsa (Bh.), also Saṁdrīsa (H.); 12 Puragā (Bh. Ś. H.), J. omits, also Pūgara, Purāra (V.); 14 Dhūmra (Ś. also H.); 15 also Ajinata (V.); 16 Vinatā (v. l. Vanitā, K.), Vinīta (H.), K. Bh. H. V. also give Avanata, but J. Ś. omit, which shows that originally there was only one word, 17 J. omits 17 to 20, Vikūtyā (Ś.), Vikūṭyāsa (Bh.), Vikuchyā, Vikūtyāṅkuśa (H.), Vikutyāsa (V.); 18 also Iras (Ś.), Uras (Bh.), Iras, Uras, Arushya (H.); 19 Avayāsa (J.), Aya (Bh.), also Sāyas (H.), 20 Modgalaya (Ś.), also Mudgala (H.). V. adds Parāśara, Āsāyas, Dāsī, Satula, Veshya, Iras, Aras, Dhukera, Asura, Abhijana, all spurious variants. Ś adds Abhijana.

(२०) तृणादि (४।२।८०।६)

[चातुरधिक स । तृणसा]

१ तृण, २ नड, ३ वुस, ४ पर्ण, ५ वर्ण, ६ वरण, ७ अर्जुन, ८ बिल ।

(२१) नडादि (४।२।९१)

[चातुरधिक छः कुक्च । नडकीयम्]

१ नड, २ प्लक्ष, ३ बिल्व, ४ वेणु, ५ वेव, ६ वेतस, ७ तृण, ८ इक्षु, ९ काण्ड, १० कपोत, ११ कृचा, १२ तक्षन् ।

(२२) पक्षादि (४।२।८०।१२)

[चातुरधिक फक् । पाक्षायणः]

१ पक्ष, २ तुष, ३ अंडक, ४ कम्बलिक, ५ चित्र, ६ अतिश्वन्, ७ पन्थ, ८ कुम्भ, ९ सीरक, १० सरक, ११ सरस, १२ समल, १३ रोमन्, १४ लोमन्, १५ हंसक, १६ लोमक, १७ सकर्णक, १८ हस्तिन्, १९ बल, २० यमल ।

(२३) प्रगदिन् आदि (४।२।८०।१५)

[चातुरधिक ङ्यः । प्रागद्यम्]

१ प्रगदिन्, २ मगदिन्, ३ कलिब, ४ खडिब, ५ गडिब, ६ बूडार, ७ मार्जार, ८ कौबिशार ।

(20) *Triṇādi*—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.118; H. VI.2.81; V.298; Ch. III.1.68 (only first two words, *Triṇasā*, *Nadasā*).

Var.—2 *Nada* (Ś. H.); 3 *Tusa* (H.); 4 *Arṇa* (Bh.); 6 *Charaṇa* (K.), *Varāṇa* (J. Ś. V.); 7 *Arṇa* (K. Ś.), *Arṇas* (H.), Bh. omits, also *Arṇa* (V.), *Jana* (K., Bh. H.), *Janaka* (J.), *Arṇa*, *Arjuna*, *Jana* seem to be variants of one original word; 8 *Bala* (K. Bh.), *Phala* (J.), also *Bala*, *Bula* (V.); *Lava* (K.), *Pula* (Ś. H.), *Phala* (V.) are other variants; *Vana* in K. Ś. H. V. seems to be an addition.

(21) *Naḍādi*—K. IV.2.91; J. III.2.72; Bh. IV.2.137-38; H. VI.2.92; V.270.

Var.—7 *Tri* (J. H. V.).

(22) *Pakṣhādi*—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.126-28; H. VI.2.89; V.278-80.

Var.—2 *Tusa* (J.); 3 *Aṇḍa* (K. V.); 4 *Pilika* (Ś.), *Kambilikā* (V.); 5 *Chitrā* (J., also H.); 9-12 also in IV.2.80.9 (*Sakhyādi*) where they may be exotic; 15-16 omitted in Bh.; 17 *Sakaṇḍaka* (K.); 18-19 seem to be the original of the confused *Astibala*, *Hasta* (K.), *Hastabila* (J.), *Bilasta*, *Hastin* (Bh.), *Bilasta*, *Hasta* (V.), *Bilasta*, *Hastin* (H.); 20 *Paṅgala* (J.); Ś omits 18-20.

(23) *Pragadinnādi*—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.131; H. VI.2.84; V.274; J. Ś., H. V. read *Saṅkaśādi* and *Pragadinnādi* together.

## (२४) प्रेक्षादि (४।२।८०।७)

[चातुरधिक इति । प्रेक्षित्]

१ प्रेक्षा, २ फलका, ३ बन्धुका, ४ ध्रुवका, ५ क्षिपका, ६ न्यग्रोध, ७ इवकट,  
८ कंकट, ९ कूप ।

## (२५) बलादि (४।२।८०।११)

[चातुरधिक य । बल्या]

१ बल, २ बुल, ३ मूल, ४ उल, ५ डुल, ६ नल, ७ वन, ८ कुल ।

## (२६) मध्वादि (४।२।८६)

[चातुरधिक मतुप् । मधुमत्, मधुमान्]

१ मधु, २ विस, ३ स्वाणु, ४ ऋषि (अरिष्ट), ५ इलु, ६ वेणु, ७ रम्य, ८ ऋक्ष,  
९ कर्कन्धू, १० शमी, ११ करीर, १२ हिम, १३ किशरा, १४ सर्पणा, १५ मण्टु,  
१६ दावावाट, १७ शर, १८ इष्टका, १९ तक्षिला, २० शक्ति, २१ आसन्दी,  
२२ आसुति, २३ शलाका, २४ आमिबी, २५ खड़ा (पीडा), २६ वेटा ।

Var.—2 also Śaradin (K.), Śādin (J.); 3 Kalira (J.), Kaṭida (Ś.), Palita (V.); 4 Khadira (J.), Kaṭipha (Ś.), Khaṇḍita (V.); 5 Gaḍira (J.), Ś. omits, so also V., 6 Chūdāra (H.); 1. Mañjāra (J.), Majāra, Madāra (H.), Mandāra, Maḍāra (V.). H. also adds Kaṭiva, Kaṭida, Kaṭipa.

(24) Prekshādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.119; H. VI.2.80; V. 299.

Var.—2 Halakā (V., also K.); 3 Vandyakā (Ś.), Bandhuka (J.); 4 Dhruvaka (J.), also Dhuvakā (J. Ś. H. V.); 5 Kshiprakā (Ś.); 7 Irkuṭa (K.), Itkaṭa (J. Bh.); 8 Saṁkaṭa (K. J.); 9 Kupakā (K.), Kapi (J.); K. adds Karkaṭā, Sukaṭā, Saṁkaṭa, Suka, Mahā, all spurious.

(25) Balādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.125; H. VI.2.86; V. 277.

Var.—2 Pūla (J.), Pula (H.), Chula (V.), Nula (Ś. Kanerese Ms. Devanāgarī transcript, but printed edition Vula); 3 Tula (K.), Mūla (J.), also Pula (V.); 5 Dala (J.), Dulala (Bh.), 6 K. alone Kavala, others Nala; 7 Vacha (J.); 8 Krala (J.), Kula (Bh.), no doubt the original reading was Kula, cf. Kulyā in Ch.

(26) Madhvādi—K. IV.2.86; J. III.2.67; Ś. II.4.196; Bh. IV.2.148-49; H. VI.2.73; V. 300.

Var.—2 Viśa (J.); 4 Mushti (K.), Prithi (J.), Ushti (Ś.), Rishi (H.), Arishta (Bh. V.); 7 omitted in J. Ś. H., Roma (Bh. V.); 8 Rishya (Bh. V.), J. Ś. H. omits; 9 Kukundhu (Ś.) 11 Śarira (Ś.), Kirira (K.); 13 Kisara (H.), Kisarā (H.), Kisara (Bh.); 14 Sāryāna (J.), Śāryāna (Ś.), Sārpaṇa (H.), Āsāryāna (Bh.), Sāryāna (V.); 15 J. omits, Bhuvat (Ś.), Ruvat (H.), also Maruva (K.); 16 Vārdākī (J.), Pārda (Ś.), Pārdā (H. also Pārdākī), Vārdālī (Bh. V.); 17 Śaru (H.); 19 J. omits, Akshaśilā (Ś. H.); 20 Śakti (K.), Śukī (J.); 23 Śalakā (J.), Śakālī (Ś. H.); 24 Āmighī (K.),

(२७) वरणादि (४।२।८२)

[चानुरधिक प्रत्ययस्यलुप्, वरणा]

१ वरण, २ गोदी, ३ जालग्यायन, ४ पर्णी, ५ शृंगी, ६ शालमलि, ७ जालपदी,  
८ मयुरा, ९ उज्जयिनी, १० गया, ११ तक्षशिला, १२ उरसा, १३ कटुकबदरी.  
१४ शिरीष ।

(२८) वरापादि (४।२।८०।१६)

[चानुरधिक कक् । वाराहकम्]

१ वराह, २ पलाश, ३ शिरीष, ४ पिनड, ५ स्थूल, ६ विदग्ध, ७ विभग्न,  
८ बाहु, ९ खदिर, १० शर्करा ।

(२९) सख्यादि (४।२।८०।९)

[चानुरधिक डञ् । साखेयः]

१ सखि, २ सखिदत्त, ३ वापदत्त, ४ गोहिल, ५ भल्ल, ६ चक्रवाल, ७ छगल,  
८ अशोक, ९ करवीर, १० सीकर, ११ सरक, १२ सरस, १३ समल ।

Amihi (Ś.); 25 Khaḍḍā (K. Bh. V.), Piḍā (Ś. H. V.); 26. Veṭa (H. V.),  
Veda (S.), Vaṭā (Bh.), also Vaṭa (V.), Veyaveṇa (J.). J. V. add Valmika.

(27) Varanādi—K. IV.2.82; Ch. III.1.68 (only first two words); J.  
III.2.63; Bh. IV.2.144-45; H. VI.2.69.

Var.—2 Pūrva Godau, Purveṇa Godau, Apareṇa Gadau (K.), Goda  
(Bh. H.); 3 Ālanyāyana-parṇa (H.); 5-6 Śṛiṅgi-Śālmali (J. one word.  
so also H. but Śṛiṅga-); 7 Jālapada (K.), Jālapadā (H.); 12 Urasa (J.),  
Urasā (Bh.). K. J. call it an *ākṛiti-gaṇa*, because of which several other  
names were added in Bh., but H. preserves a purer text. K. adds Paṇḍi,  
Vaṇiki, Vaṇika unknown to H.

(28) Varāhadi—K. IV.2.80; J. III.2.60; Ś. IV. 2.202; Bh. IV.2.32;  
H. VI.2.95; V. 284.

Var.—3 Ś. H. omits; 4 J. Ś. omits; 5 Schūṇa (K.); 6 Nidagdha (J.);  
also Vijagdha (K. J. Ś. H.); 7 Bhagna (Ś.), 8 Bahu (J.); 10 Śarkara (J.),  
Ś. omits. For 4, 6 Kanarese transcript has Vinada, Ninada. Ś. has Ayas,  
Arusa, Maudgalya here from Kṛiṣāśvādi (IV.2.80.2).

(29) Sakhyādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.121-122;  
H. VI.2.88; V.272-73.

Var.—2 Datta (J. Bh. also H.), Vāsavadatta (J. V.); 3 Vādatta (Ś.  
also H.), Agnidatta (also J. Bh. H. V.); 4 Gopā (J.), Gophā (Ś. H. V.),  
Gobhā (Bh.); 5 J. omits; 7 Chakravāka (J. Ś. Bh. H. V.); 9 Karavāra  
(K.), Vira (Ś.), J. omits; 10 Sarkāpā (J.), Sīraka (Ś. H.), Kasara (Bh.);  
11 Saraka (Ś. H. V.), Kasura (Bh.), J. omits 11-13; 12 Sarala (Ś.); possibly  
all names 10-13 represent variants of one original form. K. adds Charka,  
Vakrapāla, Uśira, Surasa, Roha, Tamāla, Kadala, Saptala, all belonging to  
an inflated text.

## (३०) संकलादि (४।२।७५)

[चातुरथिक अञ्, सांकलः पौष्कलः]

१ संकल, २ पुष्कल, ३ उदुप, ४ उदुप, ५ उत्पुट, ६ कुम्भ, ७ निधान, ८ सुदक्ष, ९ सुदत्त, १० सुभूत, ११ सुनेत्र, १२ सुपिगल, १३ सिकता, १४ पूतीक, १५ पूलास, १६ कूलास, १७ पलाश, १८ निवेद्य, १९ गम्भीर, २० इतर, २१ शर्मन्, २२ अहन्, २३ लोमन्, २४ वेमन्, २५ वरुण, २६ बहुल, २७ सद्योज, २८ अभिविक्त, २९ गोभूत, ३० राजभूत, ३१ भल्ल, ३२ माल।

## (३१) संकाशादि (४।२।८०।१०)

[चातुरथिकः ष्य। सांकाश्यः]

१ संकाश, २ कम्पिल, ३ कदमर, ४ शूरसेन, ५ सुपथिन्, ६ सुपरि, ७ सूप, ८ अश्मन्, ९ कूट, १० पुलिन, ११ तीर्थ, १२ अगस्ति, १३ विरन्त, १४ विकर, १५ नासिका।

## (३२) सुतंगमादि (४।२।८०।१४)

[चातुरथिक इञ्। सौतंगमिः]

१ सुतंगम, २ मुनिचित्र, ३ विप्रचित्त, ४ महापुत्र, ५ श्वेत, ६ गडिक, ७ शुक्र, ८ विश्व, ९ बीजवापिन्, १० श्वन्, ११ अर्जुन, १२ अजिर।

(30) Saṅkalādi—K. IV.2.75; Bh. IV.2.100-04; missing in J. Ś. H. V. Var.—4 Udyāta (Bh.); 10 Subhūma, Subhṛita (Bh.); 12 Sumaṅgala (Bh.); 14 Pūtikī (K.), Pūtika (Bh.); 16 Tulāsa, Mūlāsa (Bh.); 20 also Gabhīra (Bh.); 22 Śarīra (Bh.); 23 Heman (Bh.); 30 Gobhṛita (Bh.); 31 Rājabhṛit. Bh. adds after 18 Gaveśha, after 31 Grīhabhṛit. Bh. adds Kapāla, Utpisha, Utpala, Śātāhata, Nihata (Niyata), Karavaṇa, all of which seem to be part of an inflated text.

(31) Saṅkāśādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.103; H. VI.2.84; V. 274.

Var.—2 Kampīla (H.); 3 Kāśmīra (J.), Kāśmīra (Bh. H. V.), Ś. omits, but Kāśmāra of K. seems to be the correct reading; 4 Śūra (Ś. H., also Śūrasena), Sūra (V., also J.); 5 V. omits, J. also Supatha, Bh. also Supanthī, Suvanthin and Supanthin (H.); 6 original doubtful, Sakthacha (K.), Manmatha (J.), Suparyapa (Ś.), Sakarṇaka (Bh.), Sakarṇa (H. also Supari); 7 Yūtha (J.), Ś. omits, Yūpat (Bh.); 9 Kuṭa (Bh.), H. also Kuṭa, Kuṇṭa, J. also Kula; 10 Malina (K. J. also Bh. H., may have been the original reading), Ś. omits; 11 Ś. omits; 12 Āgastya (Ś., also H.); 13 Virata (K.), Chiranta (Ś. V.), but Viranta seems to be the genuine reading (its derivative Vairantya); 14 Chikāra (K.), V. omits. Also some other words in Bh. H. V. all inflated texts. K. also reads Arṇśa, Aṅga in others.

(32) Sutaṅgamādi—K. IV.2.80; J. III.2.60; Ś. II.4.202; Bh. IV.2.130; H. VI.2.85; V. 282-83.

Var.—2 Munivitta (H.); 3 Mahāchitta (Ś., also Bh. V.), also Mahāchitra (J.), also Mahāvitta (H.); 6 Aṇḍika (J.), Gadika (Ś. H.), also

(३३) सुवास्त्वादि (४।२।७७)

[चानुरर्थिक अण् । सुवास्तु, +अण्—सौवास्तवः]

१ सुवास्तु, २ वर्णु, ३ भंडु, ४ खंडु, ५ सेचालिन्, ६ कर्नूरिन्, ७ शिखंडिन्, ८ गर्त, ९ कर्कश, १० शटीकर्ण, ११ कृष्णकर्ण, १२ कर्कश्वुमती, १३ गोह्र, १४ अहिसक्य ।

IV. PLACE-NAMES

(c) *Saisbeka*

(३४) कञ्ज्यादि (४।२।९५)

[शैषिक डकञ्; कञि-+डकञ्—काद्येयक]

१ कञ्जि, २ उम्भि, ३ पुष्कर, ४ पुष्कल, ५ मोदत, ६ कुम्भि, ७ कुण्डिन, ८ नगर, ९ माहिष्मती, १० वर्मती, ११ कुडपा ।

(३५) काश्यादि (४।२।११६)

[शैषिक बिट् ठञ्; काशिकी काशिका]

१ काशि, २ वैदि, ३ सांयाति, ४ संवाह, ५ अच्युत, ६ मोदमान, ७ शकुलाद, ८ हस्तिकर्ष, ९ कुनामन्, १० हिरण्य, ११ करण, १२ गोवासन, १३ भौरिक, १४ भौरिगि, १५ अरिन्दम, १६ सर्वमिव, १७ देवदत्त, १८ साधुमिव, १९ दासमिव, २० दासग्राम, २१ शौवावतान, २२ पुवराज, २३ उपराज, २४ सिन्धुमिव, २५ देवराज ।

Khaṇḍika (V.); 9 Baijavāpis form part of the Dāmanyādi *gaṇa* (V.3.116) and are known to the Maitrāyaṇī Saṁhitā.

(33) Suvāstv-ādi—K. IV.2.77; Bh. IV.2.106-07; missing in Ch. J. Ś. H. V.

Var.—5 Śaivalin (Bh.); 10 Śaśakarna (Bh.); 11 Kṛishṇa and Karka (K., an obvious wrong splitting and reading); 13 Gāha (Bh.); 14 Abhīsaktha (Bh.). Bh. adds Taṇḍu, Śephālika, Dakṣha-vikarna.

(34) Kattiyādi—K. IV.2.95; Ch. III.2.5; J. III.2.76; Ś. III.1.4-5; Bh. IV.3.6-7; H. VI.3.10-11; V.315.

Var.—1 Kattri (Ch. V.); 2 also Umbi (J.), also Umpi, Aumbhi (H.); 4 also Podana (J.), Pudana (V.), Paudana (H.), Ś. omits; 6 Ch. J. Ś. omit, hence reading doubtful, Kumbhi (K. H.), 7 Kuṇḍinā (Ch. Ś. Bh. H. V.), Kuṇḍinī (J.); 8 Nagarī (Ch. J. V.); 10 K. also Charmanvati, but Varmatī is supported by all others; 11 Kulyā (K.), Kuṇḍyā (Ś. H. V.). H. adds Kunyā, Ukshyā, Bhāṇḍyā, Grāmakunḍyā Trīṇyā, Vanyā, Palyā, Pulyā, Mulyā, all trash readings. V. adds Valyā, Vanyā, Mulyā, Trīṇyā, Bhāṇḍyā, Vulyā.

(35) Kāśyādi—K. IV.2.116; Ch. III.2.33; J. III.2.93; Ś. III.1.29; Bh. IV.3.46-49; H. VI.3.35; V. 322-24.

Var.—1 Kāśī (S.); 2 Bedi (Ch.), Vēdi (J. Ś.), Chedi (Bh. H. V. also p.f. in K.); 3 Saṁjñā (K. undoubtedly corrupt), Saṁyāti (Ch.); 4 Sāmvāha

## (३६) गहादि (४।२।१३८)

[यथासम्भवं देशवाचिभ्यः शेषिकः छः । गहीयः]

१ गह, २ मध्य, ३ अंग, ४ बंग, ५ मगध, ६ कामग्रस्य, ७ खाढायन, ८ काठेरणि,  
९ शैतिरि, १० शौगि, ११ आसुरि, १२ आहिसि, १३ आमित्रि, १४ अवस्यन्द,  
१५ क्षेमवृद्धिन्, १६ व्याडि, १७ वैजि, १८ आमिशर्मि ।

## (३७) धूमादि (४।२।१२७)

[देशवाचिभ्यः शेषिक वृञ् । धीमकः]

१ धूम, २ खण्ड, ३ शशादन, ४ आर्जुनाव, ५ दांढायनस्थली, ६ माहकस्थली,  
७ धोवस्थली, ८ मावस्थली, ९ राजस्थली, १० राजगृह, ११ सत्रासाह, १२ भक्षाली,  
१३ मद्रकूल, १४ गतंकूल, १५ आंजीकूल, १६ द्वघाहाव, १७ त्रघाहाव, १८ संस्फीय,  
१९ वर्वर, २० बचंगर्त, २१ विदेह, २२ आनर्त, २३ माठर, २४ पाथेय, २५ घोव,  
२६ शप्प, २७ मित्र, २८ पल्ली, २९ आराजी, ३० धातराजी, ३१ अवया, ३२ कूल,

दक्षिणापव, ४० साकेत ।

(Ś. Bh. H. V.); 6 Mohamāna (K. a corrupt reading); 7 Saṅkulāda (J.), Śvakulāda (Ś. H.); 8 Hastikarṇa (J.), Hāstika (Ś.); 9 Kudāman (K., a corrupt reading, *v.l.* Kunāman), Kulanāman (Ch.), Kaunāma (H.), Kenāma in Ś. (printed text) but omitted in Devanāgarī transcription of Kanarese Ms.; 12 Godhāsana (K.), Gauvāsana (Ś.), Gauvāsana (H. also *v.l.* in V.); 13 Bhāraṅgi (Ch. Bh. H. V.), Bhauriṅgi (J.), Tāraṅgi (Ś. H., also *v.l.* in V.); 14 Sāraṅgi (Ch.), omitted in Ś. Bh. H. V. group, but seems to be genuine (cf. IV.1.173, a member of the Śālva state). 15 Śakamitra (J.); Sadhamitra (Ch. J. H. V.), Sudhāmitra (Bh. V.), Chhāgamitra (Ś. H. V.), J. omits; 19 Dāsāmitra (Ś. also H.); 20 Dāsagrāma (V., also Dasagrāma); 21 Saudhāvatāna (K. Bh.), omitted in Kanarese transcript, but Śauvāvatāna in printed ed. Ch. adds Kāchi, Gopavana; J. Taraṅga, Govāhana; Bh. Modana and Amitra; V. Modana and Aritra (said to be *Bhoja-sammata*).

(36) Gahādi—K. IV.2.138; Ch. III.2.58; J. III.2.115; Ś. III.1.50; Bh. IV.3.81-92; H. VI.3.63; V.317.

Var.—The text of this *gaṇa* combines place-names with other nouns; of a total of 48 words only 18 have been selected, first 15 of which are read in the Chandra-vṛitti. 7 Khāḍāyani (Ch. J. Bh. H.), Bhidāyani (Ś., a corrupt reading); 8 Kāveraṇi (K.), Kāveraṇi (Ś.), also Lāveraṇi (J. H.). 15 Ksheshmadhṛitvi (Ch. H. V.), Kshaimavṛiddhi (Ś.), Kshaimavṛitti (Bh.).

(37) Dhūmādi—K. IV.2.27; Ch. III.2.41; J. III.2.106; Bh. IV.3.59-61; H. VI.3.46; V.329-33. Ś. omits it.

Var.—2 Shāḍaṇḍa (Ch. V.), Shaṇḍa (J. Bh.), Shāḍaṇḍa, (H.), Shad-āṇḍa (H. V.); 4 Ārjunāda (K.), Arjunāva (Ch. J. Bh., V. calls it a Vāhika-grāma); 8 Poshasthali (J.); 9 omitted in J.; 11 also Sātrāsāha (H.); 12 Bhakshāsthalī (K.), Bhakshālī (J.), Bhakshyādī, Bhakshyālī (H.); 13 Madra-

(३८) नद्यादि (४।२।९७)

[शैषिक डक् । नादेयः]

१ नदी, २ मही, ३ वाराणसी, ४ श्रावस्ती, ५ कौशाम्बी, ६ वनकौशाम्बी,  
७ काशफरी, ८ खादिरी, ९ पूर्वनगरी, १० पावा, ११ मावा, १२ साल्वा, १३ दावा,  
१४ सेतकी ।

(३९) पलद्वादि (४।५।११०)

[शैषिक अण् । पालदः]

१ पलदी, २ परिवत्, ३ यकुल्लोमन्, ४ रोमक, ५ कलकुट, ६ पटच्चर, ७  
वाहीक, ८ कमलभिदा, ९ बहुकीट, १० नैकती, ११ परिखा, १२ शूरसेन, १३  
गोमती, १४ उदपान, १५ गोष्ठी ।

(c) *Abhijana*

(४०) तक्षशिलादि (४।३।९३)

[मोऽस्याभिजन इति अञ् । तक्षशिलः]

१ तक्षशिला, २ वत्सोद्धरण, ३ कौमेदुर, ४ काण्डवारण, ५ ग्रामणी, ६ सरालक,

kula (Ch. H.), Madrasthala (J.); 14 Mitrakula (Ch.), Garta (Bh. V.), H. omits; 15 Añjikula (Ch. H.), Añjalikūla (J.), Ājikūla (Bh.); 18 Saṁhīya (K.), also Saṁstīya (Ch. V.), Sāṁstīya (Bh.); 19 Parvata (J.), Barbaḍa (H.); 20 Garta (Ch. H.), Bh. splits Varcha and Garta, and so also V., Garbha (J.), also Varjya (H.); 23 Pādūra (J.); 24 also Pāṭheya (Bh. H. V.); 26 Shishya (K. H.); 27 omitted in Ch. J., 28 Vala (K.), Vallī (Ch.), Palli (J.), Vapiyapallī (H.); 29 also Arājñī (H.); 31 Ch. Avayāt tīrthe, Āvayāt-tīrthe (V.), Avayā (H.), Abhayā (J.), Avayāta tīrtha (K.) as two words; 35 Antariya (Bh.); 36 Dvipa (Bh.).

K. adds Mānuvalli, Valli, Surajñi; J. Mānavasthali; Bh. Mānasthali (also H. V.); H. Mānakasthali, Ānakasthali, Māṇavakasthali, Śakunti, Vanāda, Imkānta (?), Vadūra, Khādūra.

(38) Nadyādi—K. IV.2.97; Ch. III.2.6; J. III.2.77; Ś. III.1.1; Bh. IV.3.9; H. VI.3.2; V.314-15.

Var.—6 J. Bh. omits; 7 Ch. omits, Kāśapari (Ś.); 8 Ch. omits; 9 Pūrvanagara (Ś., also Bh. H.); 10 Pāṭhā (Bh.); 11 Vāmā (Ch.), Māyā (Bh.); 12 Mālvā (Ś. H., also Bh.), Śilvā (J.), Śālvā (Ch. V.); 13 Ch. omits; Daurvā (Bh.); 14 Vāsenakī (K.), Saitava (J.), Senakī (Ś.), Saitikī (Bh.), seems to be the same as Setavyā. Ś. V. add Vanavāsī.

(39) Paladyādi—K. IV.2.110; Ch. III.2.20 (only 7, 10, 13, 15); J. III.2.87; Bh. IV.3.29-33; H. VI.3.25-26; V.325.

Var.—1 H. omits; 2 H. omits; 3 Sakṛilloma (Bh. V. who cites Vāmana's reading Yakṣilloman); 5 Kālakūṭa (K.), J. Bh. H. omit, hence reading doubtful, although it occurs in Pāṇini (IV.1.173); K. J. Bh. V. also read Kalakūṭa which may have been the original reading here; 8 H. omits; 9 Bāhukūṭa (K.), H. omits; 10 Naitakī (K.), Naitetī (J. H.); 11 H. omits; 14 Udayāna (K.), H. omits. 19 Gaushṭhī (J.). Ch. reads 6, 7, 10, 15.

(40) Takshaśilādi—K. IV.3.93; Ch. III.3.41; Bh. IV.3.213-214; V.351.

७ कंस, ८ किलर, ९ संकुचित, १० सिंहकर्ण, ११ क्रोष्टुकर्ण, १२ बर्बर, १३ अवसान ।

(४१) शंडिकादि (४।३।९२)

[सोऽस्याभिजनः ज्यः । शंडिवचः ।]

१ शंडिक, २ सर्वकेस, ३ सर्वसेन, ४ शक, ५ शट, ६ वह, ७ शंख, ८ बोध ।

(d) *Prastha-ending names*

(४२) कर्क्यादि (६।२।८७)

[कर्कीप्रस्थः, मषीप्रस्थः]

१ कर्की, २ मषी, ३ मकरी, ४ कर्कन्धू, ५ शमी, ६ करीर, ८७ कटुक, ८ कुबल, ९ बदर ।

(४३) मालादि (६।२।८८)

[मालाप्रस्थः, शालाप्रस्थः]

१ माला, २ शाला, ३ शोणा, ४ द्राक्षा, ५ क्षीम, ६ कांची, ७ एक, ८ काम ।

(e) *Kantā-ending names*

(४४) चिहणादि (६।२।१२५)

१ चिहण, २ मडर, ३ वैतुल, ४ पटलक, ५ वेङ्गालिकर्ण, ६ कुक्कुट, ७ चित्कण ।

Var.—3 Kairmedura (J.), Kairmedura (Bh. V.); 4 Kāṇḍavāra (Ch.), Kāṇḍakāra (J.), Kāṇḍadhāra (Bh. V.); 6 Chhagalalaka and Śakala (Ch.), Chhagala (Bh. V.); 10 Śimhakoshṭha (K.); Karkakoshṭha (K.), Karṇa (Ch.), Kroshtukarṇaka (Bh.). Ch. combines this *gaṇa* with Sindhvādi; J. reads only 3, 4, 5; H. casually refers to this *gaṇa* in the Bṛihadvṛitti of Sindhvādi but does not read it; V. includes this in Sindhvādi.

(41) Śaṇḍikādi—K. IV.3.92; Ch. III.3.60; J. III.3.66; Ś. III.1.201; Bh. IV.3.211; H. VI.3.215.

Var.—1 Śaṇḍika (Bh.); 5 Saṭa (K. J. Ś. Bh.), 6 Raka (K. Ś. H.), Raha (Bh.), Chaṇaka (J.); Ch. Bh. add Kuchavāra, H. Kūchavāra; J. Godha, H. Charaṇa and Śaṅkara.

(42) Karkyādi—K. VI.2.87, relates to accent, and is not found in other systems.

(43) Mālādi—K. VI.2.88, not found elsewhere.

After 5 is read Kshāmā, which may be a variant of the same name.

(44) Chihapādi—K. VI.2.125.

Var.—2 also Maḍura; 5 also Vaitālikarṇi; 7 also Chikkapa.

(f) *Mountains* (गिरि)

(४५) किशुलकादि (६।३।११७)

१ किशुलक, २ शाल्वक, ३ अंजन, ४ मंजन, ५ लोहित, ६ कुक्कट ।

*Forests* (वन)

(४६) कोटरादि (६।३।११७)

१ कोटर, २ मिथक, ३ पुरग, ४ सिघ्रक, ५ सारिक ।

*Rivers, etc.*

(४७) अजिरादि (६।३।११९)

१ अजिर, २ खदिर, ३ पुलिन, ४ हंस-कारण्डव, ५ चक्रवाक ।

(४८) शरादि (६।३।१२०)

[मती संज्ञायां दीर्घः । शरावती ।]

१ शर, २ वंश, ३ घूम, ४ अहि, ५ कपि, ६ मणि, ७ मुनि, ८ शुचि ।

(45) *Kirśulakādi*—K. VI.3.117; Ch. V.2.132; J. IV.3.220; Ś. II.2.95; Bh. VI.2.166; H. VI.2.77.

Var.—1 *Kirśuka* (Bh.); 2 *Sālva* (Ś.), Ch. omits 2, 5, 6; *Sālvaka* (Bh.); 4 *Bhānjana* (H.); Ś. reads only 2, 3.

(46) *Koṭarādi*—K. VI.3.117; Ch. V.2.132; J. IV.3.220; Bh. VI.2.165; H. III.2.76.

Var.—2 *Mithaka* (Bh.); 3 *Puraka* (K.), Ch. J. Ś. omit; 4 Ś. omits; 5 Ch. J. Ś. H. omit, *Śarika* (Bh.).

(47) *Ajirādi*—K. VI.3.119; J. IV.3.223; Ś. II.2.96; Bh. VI.2.167; H. III.2.78.

Var.—3 *Alina* (J.), *Sthalina* (Bh.); 4 only *Kāraṇḍava* (J.), *Malya*, *Kāraṇḍava* (Bh.). H. says it is an *ākṛiti gaṇa*. Ś. reads only 1, 2.

(48) *Śarādi*—K. VI.3.120; Ch. V.2.134; J. IV.3.223; Ś. II.2.96; Bā. VI.2.167; H. III.2.78; V.143.

Var.—5 *Kavi* (Bh.); 7 *Manya* (Bh.). K. Ś. Bh. V. add *Hanu*. Ch. calls it an *ākṛiti gaṇa*. H. Bh. V. add *Kuśa*; H. also *Vārda*, *Veṇa*; V. also *Rishi*. Ś. omits 2, 3, 7.

## KEY TO PLATE SHOWING PUNCH-MARKED COINS

- FIGS. 1-5. *Śatamāna* coin (pp. 261-2). Bent-bar silver punch-marked coins from Takshasilā. Wt. 175 to 178 grs. or 100 *rattis*, Pāṇini V.1.27.
- FIG. 6. *Trimśatika* coin (p. 271); Pāṇini V.1.24. Silver punch-marked from Lucknow, with 14 symbols, obverse (big) and reverse (small) punched on one side only. Wt. 105.7 grs.=57.7 *rattis*, i.e. 60 *ratti* or 30 *māsha* standard, as the name implies. Coinage of the ancient Kosala Janapada, as also No. 7.
- FIG. 7. *Trimśatika* coin, as No. 6. From Partabgarh. Wt. 104.4 grs. with 1 obverse and 5 reverse symbols punched on the same side.
- FIG. 8. *Vimśatika* coin (pp. 268-70); Pāṇini V.1.27; 32. From Madhuri, Shahabad Dt., coinage of Magadha Janapada current in the time of King Bimbisāra (6th cent. B.C.). Wt. 40 *rattis* (*Vīsatamāso Kabāpano*). Two prominent symbols on one side only.
- FIG. 9. *Vimśatika* coin. From Bhabhua, Bihar. Wt. 40.2 *rattis*. Obverse symbols, Sun, Six-armed symbol with 3 ovals and 3 arrow-heads, Bull and Lion; more evolved than No. 8, and hence of the time of Pāṇini (5th cent. B.C.).
- FIG. 10. *Vimśatika* coin of alloyed silver. From Madhuri. Wt. 68.4 grs. =38 *rattis*. Four obverse symbols, two bigger, two smaller, two of them being identical; transitional stage between Nos. 8 and 9. *Tri-Vimśatika* (120 *rattis*), *Dvi-Vimśatika* (80 *rattis*) and *Adhyardha-Vimśatika* (60 *rattis*) (*Kālikā* on V.1.32) and also *Ardha-Vimśatika* seem to have been actual coins (*J.N.S.I.*, Vol. XV, Pt. p. 38).
- FIG. 11. Silver punch-marked coin from Patna, identified as *Pāda-Śatamāna* or one quarter of *Śatamāna*. Wt. 45 grs.=25 *rattis*. Size .8"×.8".
- FIG. 12. Silver punch-marked coin from Partabgarh, identified as *Ardha-Śatamāna* or one-half *Śatamāna*. Wt. 44.98 *rattis*=80.95 grs. Two obverse symbols and one small symbol punched on one side only.
- FIGS. 13-20. Silver punch-marked coins or *Kāṛṣhapāṇas* (pp. 263-5) of the wt. standard of 32 *rattis*; actual wt. is more often a little less owing

to wear and tear. They bear on the obverse a regular group of five symbols (*rūpa*, V.2.120) of which two are constant, viz., Sun and Six-armed symbol, which is often designated by numismatists as a *Shaḍara Chakra*. This symbol holds the key to the age of the coin by the varying form of its spokes, consisting on some of three ovals and three taurines (No. 15), on others of three ovals and three arrow-heads (Nos. 13, 14, 18), and on some of three taurines and three arrow-heads (Nos. 19, 20). The first variety (Early) may be assigned to the fifth, the second (Intermediate) to the fourth, and the last (Late) to the third century B.C. (Maurya Period). The coin shown as Fig. 17 is specially noteworthy, as on it the Sun and Six-armed symbols have been replaced by a group of three human figures. This specimen comes from Charsadda in the Peshawar district (ancient Pushkalāvati, capital of Aparā-Gandhāra).

FIG. 21. A punch-marked *Kārsbūpaṇa* coin of copper with traces of thin silver plating on it, having a regular group of five symbols and a wt. standard of 32 *rattis*. These specimens seem to represent the debased coinage of the Mauryan administration introduced to replenish the exchequer or meet some unusual drain on the currency.

FIG. 22. A Half-*Kārsbūpaṇa*, 16 *rattis* (actual 14.6 *rattis*) in wt., called *Ardha* and *Bhāga* in the *Ashtādhyāyī* (V.1.48-49; p. 266) and *Ardha* by Kauṭilya and Kātyāyana (VI.1.25).

FIG. 23. *Raṇḍya Māsha* (p. 267), minute silver punch-marked coin of 2 *ratti* wt. = 3.5 grs. From Takshailā. Stamped with a single symbol on one side. The *Kāśikā* also refers to *Adhyardha-Māshaka* (1½ *Māshaka* coin of 3 *rattis*), *Dvi-Māshaka* (2-*Māshaka* coin of 4 *rattis*) and *Tri-Māshaka* (3-*Māshaka* coin of 6 *rattis*) (*Kāśikā*, V.1.34; J.N.S.I., Vol. XV, Pt. 1, p. 39).
